Awesome setup! Gave me a detailed explanation of what he was doing for each step setting up my RAT so that I could actually learn compared to some other people that just do it for you and then you never learn anything. Quick and efficient using TeamViewer! Well worth my \$2 for a setup which

taught me many things I needed to know!

Thanks theassasin!!! :)

Hello, wtih the RAT Setup, you portforwad it all and everything? and what is you msn?

Klempner - June 1, 2010, 1:45 pm

I need 5 posts to PM s.b.

I want use your warbot service.

PM me.

ottohacker - March 2, 2012, 5:06 pm

If I do warbot and iStealer, could you bind and crypt them with crypteX Lite (I have it) and then Java Drive By it with my drive by? I am using Draguny's Java Drive By.

I got warbot set up but can you still setup iStealer and help me bind with crypteX and then Java Drive By it?

Do you still only accept paypal? What about cryptocurrencies like ftc, ltc and btc?

Noel02 - May 10, 2014, 7:54 am

I think this is very good. Do you still offer this services?
