Thread: [Question PLEASE READ :D](#)

~HF~ - March 10, 2014, 11:35 am

Hey so I got this account when I tweet a bit.ly [WARNING: potentially infected] link or something it can get like 2-3k clicks in about 24 hours is there anyway I can make money of this? I've tried mylikes but, when they click on the click it takes them to a blog and then they have to click on something else on there to make me money so it doesnt really work does anyone have any other ideas? It has to make me more than \$4-5 minimum per 2-3k clicks.

Thanks!

EDIT : most clicks are USA/UK (tier 1 countries)

Alright, you asked me to post here, so just need a bit more info, what're the main interests of the people who have followed your account/what is your account targeted at?

No targeted traffic, I have one for music and one is just general (everything)

both get around 1-3k clicks

Would you be able to post them on here (or pm me) because i have an idea how you could make a bit of money by promoting certain products that could be considered quite "cool" in your niches. So for example music, if you have people who are interested in certain songs or headphones, then you can link via an affiliate program a good pair of headphones and people may buy, it takes 1 person to buy and you've got double your money (depends which headphones etc but you catch my drift)

Amazon or ebay affiliate programs have a good shot at making you a lot more money if you toss one in every so often. It should be really easy to get at least one conversion per thousand people. That could be over \$10 per conversion too, which would be a great improvement.
