Thread: [\(\\$2.50 USD\) SMSBomber with auto-throttling Functionality](#)

Stack Overflow - March 12, 2014, 8:14 pm

I have made a custom SMS Bomber with an auto-throttler. The auto-throttler will ensure that your Gmail account will not be timed out or banned from the client-to-SMS function of Gmail. The maximum amount of texts per session is 47. Anything above that will be throttled and will make the process a lot slower.

The cost of the SMS Bomber is \$2.50 USD and is quite worth it. Not only will it throttle the messages to avoid timeouts or bans, it will also change the number numerically by one each time. How does this benefit you? Well, because the number is changing, it is impossible to block it and they must sit through the entire spam.

I do not recommend targeting a single person and making their lives miserable because the texts they receive are not free of charge and will add up overtime. In other words, don't use this as a malicious tool, but merely as a prank or a minor inconvenience.

Wow, I have seen many SMS bombers but nothing like this one. Works like a charm and with an easy to navigate gui. I would rate this program 10/10! Thanks much Poon, good luck!
