Thread: [how i open the lock folder](#)

oberoy - March 13, 2014, 5:33 am

i use the folder access software and lock the one folder but when i update my window then that software is discarded and but the folder which i lock by the folder access now not open....i re-install the folder access but again the folder is not open .when i double click on that folder control panel is open ..i want to open that folder guide me....

Sacred Symmetry - March 13, 2014, 7:14 am

This just blew my mind, please explain this with proper grammar

JackChitt - March 13, 2014, 7:35 am

What the fuck are you talking about?? Try again...

LordHello - March 13, 2014, 8:28 am

I think he meant to say that he used something to lock his folder and he deleted it. Now he cannot open the folder that he locked, since the program was removed from his hardware.

oberoy - March 14, 2014, 3:13 am

yes lord hello you are right now how i solve this problem

Pluxo - March 14, 2014, 3:20 am

You can solve this problem by explaining in detail of what you did with proper grammar.

oberoy - March 14, 2014, 3:22 am

i use the folder access software to lock the folder but that software is deleted from me and the folder which i lock by that software is not open now ...

Pluxo - March 14, 2014, 3:25 am

Can't you reinstall the software and open it back up again?

oberoy - March 14, 2014, 3:26 am

ya i reinstall & backup it but that folder again not open..when i double click on that folder control panel is open

Pluxo - March 14, 2014, 3:31 am

Hmm... I honestly think that you cannot get it back open. What was in the folder?

oberoy - March 14, 2014, 3:33 am

that folder contain books related to hacking

Pluxo - March 14, 2014, 3:38 am

Can't you just redownload them, or can you not find them anywhere?

Beretta - March 14, 2014, 6:40 am

Have you tried reinstalling the program and going on from there mr?

oberoy - March 15, 2014, 2:16 am

i tried but it is not working.....its tough to find that books again which i download

Under_the_hood - March 15, 2014, 2:28 am

Try "system restore" and see if things work out.

oberoy - March 15, 2014, 7:10 am

how i do this.....system restore.....guide me

Under_the_hood - March 15, 2014, 9:43 am

(Mar 15, 2014 07:10 AM)oberoy Wrote: [\[CITE\]](#) how i do this.....system restore.....guide me
Search "system restore" on your pc.

For Win7 : All programs > accessories > system tools > system restore.

oberoy - March 17, 2014, 1:02 am

i add that lock folder into the archive now that folder is open in archive mode but if i extract that folder again the lock folder is come..how i save the data from archive mode.....

ChaosTheory50 - March 17, 2014, 3:23 am

i doubt you can save it from now on, sorry man

oberoy - April 9, 2014, 6:59 am

hey how i hack the gmail account i.e change the password of someone gmail account.....

Perfectionist - April 9, 2014, 7:02 am

I don't know if this guy is being serious or just... yeah.

Anyway, theres pretty much no way to change someone else gmail password by "hacking".. as far as I know. You could try to RAT or keylog the user though
