I keep getting this error, anyone else having it? Couldn't get online for about 10 minutes, site right now is really slow. Had it a couple of times trying to click the new thread button.

I'm guessing it's a DDoS attack?

I have been able to access the site without a problem on my iPhone and Laptop. Do you have a proxy or VPN on right now? This could be the reason why you are having this issue.

It's working fine for me. Are you sure it's not your ISP's DNS servers?

keviniscool - March 13, 2014, 12:37 pm

no just me testing LOIC against cloudflare network sorry about that ?

JammyJ - March 13, 2014, 12:38 pm

I also received this. Working fine now though.

I am getting this quite a lot to man.

Baws. - March 13, 2014, 1:21 pm

Did you try to go on the website with a different browser ?

Nickelodeon - March 13, 2014, 1:27 pm

I had the exact same problem for about 30 minutes. It's working fine for me now though.

Cochau - March 13, 2014, 1:28 pm

I'm having the same problem, its so annoying, now the website is slow as fuck

Omniscient - March 13, 2014, 1:40 pm

10-15 minutes of connection problems are not something to be alarmed about.
