Thread: [Pernicious | Unofficial | Hacking | Programming | Now Recruiting](#)

Shellow5 - March 13, 2014, 6:03 pm

Leader: Schmidt73 and Sky

Owner: Zayne

Who are we?

Pernicious Developers is a hacking group looking for new blood. We are just now re-opening the group to HackForums members. We aren't just any "hacking" group and we don't let anyone join. We are a skilled groups of hackers and developers looking for others to work with us. We focus on web hacking, server hacking, development of malware, development of payloads, and development of exploits. We focus on all aspects of hacking with the exception being RATs and Botnets as we consider those to be tools.

Why join?

If you like to hack and like knowledge this group is for you. We want people that are committed to hacking and learning, so we can strive. As a group we bounce ideas off of each other, plan to build projects together, create challenges to complete, and learn something. We have people who are skilled in almost all aspects of hacking and we hope to accomplish a lot.

How do we communicate?

Currently we communicate via Skype.

Requirements

You must be skilled at hacking.

You must contribute something to the group.

You must know or be willing to learn at least one programming language.

You must have knowledge of computers and how they work.

You must not be a skid.

Use this format when applying.

Quote:Skillset: Write here

Why do you want to join us?: Write here

What do you specialise in?: Write here

How can you contribute?: Write Here

Timezone?: Write here

Current recruiting status: Reopened

Pernicious Developers has recently been reopened and we have increased our requirements to join!

xhflhkeuhwguu34 - March 13, 2014, 6:23 pm

what are you developing?

hacking tools? lol.

Shellow5 - March 13, 2014, 7:15 pm

(Mar 13, 2014 06:23 PM)XenOn Wrote: [\[CITE\]](#) what are you developing?

hacking tools? lol. Exploits and post-exploitation tools. Exploits can be things like Buffer Overflows. Post-exploitation tools can be advanced rootkits, specific worms, etc.

Th3PonyWizard - March 14, 2014, 5:57 am

This is a serious group for serious people, the sort of people we're after are the ones empathizing activity and abilities. Vouching it is.

Im gone brah - March 14, 2014, 6:32 am

I'm the owner of this group along with schmidt.

For any questions regarding information or anything else, feel free to contact either me or Schmidt. We look forward to working with you.

Kind regards,
- Zayne

Zapu - March 14, 2014, 6:54 am

Goood luck to your group Zayne, seems like people could learn a lot.

Reminance - March 14, 2014, 12:35 pm

Can you teach me how to use ProRat if I join?

?ash - March 14, 2014, 1:31 pm

"We focus on all aspects of hacking with the exception being RATs and Botnets as we consider those to be tools."

Thank god, i was starting to think everybody on this forum is retarded.

Shellow5 - March 14, 2014, 3:05 pm

(Mar 14, 2014 01:31 PM)?ash Wrote: [\[CITE\]](#) "We focus on all aspects of hacking with the exception being RATs and Botnets as we consider those to be tools."

Thank god, i was starting to think everybody on this forum is retarded.

I totally agree with you. People be like I sent a RAT to my friend that I made myself, I am such a good hacker!!!!!! No. You built it with a tool that makes controlling other computers extremely.

Goodies - March 14, 2014, 4:43 pm

This is not a group for general knowledge or basic hacking skills or CEH bullshit.

This is for people who are serious about exploit development and/or security. Please provide experience and/or proof of your skillset.

Thank you.

Bibl - March 14, 2014, 4:59 pm

Skillset: WebDeV, Programming in java, python and a bit of php, Web-Based Hacker, vuln finding, app exploitation, reverse engineering malware.

Why do you want to join us?: 2 meet new people, have fun and chill with people who likes the stuff I like

What do you specialise in?: Right now I'm in school for computer science, but I specialise in exploitation.

How can you contribute?: Help write exploit code and help write TuTs

Timezone?: MST

Shellow5 - March 14, 2014, 6:56 pm

Currently, all applications have been denied. If you are going to apply please make sure you know what you are doing, are not lying, and definitely make sure you are not a skid.

Goodies - March 14, 2014, 7:08 pm

Note that poorly-written or grammatically atrocious applications will not even be considered. We are looking for mature, intelligent members with experience. We are not looking for pre-pubescent "squeakers" with a botnet or a RAT, sorry.

Loomaanaatii - March 14, 2014, 8:27 pm

Skillset: Coding

Why do you want to join us?: Why not?

What do you specialise in?: Coding

How can you contribute?: Alot. I can code.

Timezone?: Pacific

Goodies - March 14, 2014, 10:49 pm

Timezone?: Pacific

This is ridiculous. I sincerely hope this is not a legitimate application.

Aura - March 14, 2014, 10:51 pm

(Mar 13, 2014 07:15 PM)schmidt73 Wrote: [\[CITE\]](#) Exploits and post-exploitation tools. Exploits can be things like Buffer Overflows. Post-exploitation tools can be advanced rootkits, specific worms, etc. sigh

Are you going to release publicly your "post-exploitation tools" on HackForums ?

Guy_Fawkes - March 14, 2014, 11:27 pm

Skillset: I can do some website hacking along with profile hacking. I am good with people (SE) and can get a pretty good Dox in a few minutes (I don't do it to HF members).

Why do you want to join us?: I want to join for two reasons. 1) I love learning from like minded individuals. 2) I want to get better with "real" hacking.

What do you specialise in?: I specialize in Doxing and SE.

How can you contribute?: I can dox just about any target (person). I can also get information on the virtual target through SE.

Timezone?: PAC Standard.

Shanks - March 15, 2014, 12:58 am

I wrote my first application on my Mobile, so decided to make another one.

Skillset:

DDoS'ing:

When you have the word DDoS, I'm quite sure you thinking of any cheap Booter but that's not the case here.

I'm probably the most experienced and with largest Attack powers here on Hackforums, I do use the main attack forms such as icmp syn udp http data, but I have other ways to take down website - Were I usually need 1/10 Of the power someone else would need.. if they could even down it.

Doxing,SE and Account Recovery:

I started with this in a very young age, I guess it all started when I was trying to Hack Runescape accounts - like many more people started.

Than this grow and now I'm quite sure what I'm doing here.. That includes being safe, any kind of security.

Contacts:

This might sound odd, but the thing I have most is probably contacts.. After all I'm quite a lazy human - But I got friends that all have different skillsets, so if I ever need something I ask them.. and I help them if they want something in return, maybe I will have to question another person to get his question.. I have always been and always liked being some kind of middleman.

Why do you want to join us?: I'm not fully sure yet, seems like interesting team to talk to, maybe some new contacts that could be useful ?

What do you specialise in?: I'd say I specialise in my skillset above, I do have basic knowledge in other things as well , but that's mainly what I focus on.

I like working in teams with projects, the last year.. not much have happend, so another project would be great. (I work in projects,team)

How can you contribute?: You name it, I can help with everything I'm capable of.

Timezone?: UTC/GMT +1 hour (Sweden)

Im gone brah - March 15, 2014, 5:09 am

Note:

(Update 3/15/2014)

New members will be sat at probation before becomming a real member of the group.

Mad76e - March 15, 2014, 5:37 am

Thinking about joining.. Will PM you with questions Zayne

The Commander - March 15, 2014, 5:37 am

(Mar 14, 2014 01:31 PM)?ash Wrote: [\[CITE\]](#) "We focus on all aspects of hacking with the exception being RATs and Botnets as we consider those to be tools."

Thank god, i was starting to think everybody on this forum is retarded.

I have to agree with you sir, this group seems like it could go somewhere and if it becomes official even better.

Mad76e - March 15, 2014, 6:46 am

Skillset:

Wifi-Hacking
Pentesting
ARP poisoning / MITM
Honeypots, Evil twin
Brute forcing
Wardriving/warroofing

... And more

No hacking skillset, but still as important to hacking..

Networking
Virtualization
Information Gathering
Hardware hacking/OC/Building PC

Have started with python programming

Why do you want to join us?:

This is something that am very intrested to join. Some serious ppl brought together to do some serious research and hacking. This will help me and you to grow and become even better at hacking and penetration

What do you specialise in?:

Well, my skillset are somewhat all over the field except web-hacking. However my passion are WiFi-Hacking and Pentesting

How can you contribute?:

Well, First i will support you all in those areas that i got some knowledge in. In the mean time i will strive to learn new things and share with the group.

Timezone?: GMT +1

Zapu - March 15, 2014, 7:09 am

(Mar 14, 2014 10:51 PM)Aur? Wrote: [\[CITE\]](#) *sigh*

Are you going to release publicly your "post-exploitation tools" on HackForums ?
No. We don't create things that someone on HF could figure out how to use.

Aura - March 15, 2014, 7:17 am

(Mar 15, 2014 07:15 AM)schmidt73 Wrote: [\[CITE\]](#) No. We don't create things that someone on HF could figure out how to use.

Maybe not. But if you spread them, it will be my job to find how to remove them. But I have to do this everyday so.

Goodluck with the group. I know that Pony respect that group and Zayne is a good guy so.

Shellow5 - March 15, 2014, 7:19 am

Also, please remember that DDoSing, DOXing, Social Engineering, spreading, and more we do not consider hacking. We consider those to be things done by people who don't know how to hack and are pretty skiddish.

Im gone brah - March 15, 2014, 7:20 am

You need proficiencies and be cognizant that we wont accept novices.

NotCoolBro - March 15, 2014, 7:45 am

(Mar 15, 2014 07:19 AM)schmidt73 Wrote: [\[CITE\]](#) Also, please remember that DDoSing, DOXing, Social Engineering, spreading, and more we do not consider hacking. We consider those to be things done by people who don't know how to hack and are pretty skiddish.

Social engineering can be extremely useful. The real type that is. I know of a guy that used social engineering to pretend he was a network engineer and gain access to the main server room of a medium sized company with several locations around the world.

Dorrance - March 15, 2014, 11:51 am

Skillset:

Marketing ~ I give very desecrate and good ideas and advice to earn profit.

Programming ~ I been coding a little I understand the basics but I need more knowledge to become a master it to start making exclusive things.

Monetizing ~ I have found numerous ways over the past years to earn profit off PPA, PPD, YouTube & Etc. to gain traffic to earn profit.

BackTrack & Pentesting & BruteForcing ~ I have been doing these since 2012 I do these to test vulnerability on things & Recovery.

Social Engineering ~ I Have various ways to manipulate for what is need or helping others. I also have lots of Social Engineering methods to gain or get things.

E-Whoring ~ I am very knowledge and know ways to I have manipulate people and have been doing it for about a month and made not much a lot of profit but getting there.

Rats & Botnets ~ I am familiar with both, I am more stronger on the RAT side, I am very good at spreading, and setting things up for people. I have as mush time on my hands to help others out. Stresser. I had a RAT, but it was for getting started with tools as it. I also am good with stresser's and booters, I can set them up with ease for others who need help, same with RATs. I am also good with setting up VPS & VPN over very well knowledge on them.

Why do you want to join us?: Hopefull I can learn more on things

What do you specialise in?: SEigng, Backtracking, Brute Forcing, Pentesting

How can you contribute?: In ideas, knowledge, And if the group needs help on project willing to work and If Need To Donate other things.

Timezone?: Eastern

Goodies - March 15, 2014, 12:15 pm

(Mar 15, 2014 07:45 AM)NotCoolBro Wrote: [\[CITE\]](#) Social engineering can be extremely useful. The real type that is. I know of a guy that used social engineering to pretend he was a network engineer and gain access to the main server room of a medium sized company with several locations around the world.

I have done that as well and, from personal experience, can say that it really isn't all that difficult. Tell him to set up an RPi or BeagleBone to be able to get back in the networkwork.

If he wants to be really crazy, set up port mirroring on the main router port to a port connected to the RPi/BeagleBone and run TCPdump. I had a script that, after TCPdump made a 100MB file, it

would compress it and send it to me using dd and nc :)

It may still be on my Beaglebone if he wants it. It's really useful.

As for social engineering, he's referring to the morally questionable receiving of paid goods for free that people claim is a "skill" which, I guess it is, but it's not what we're looking for.

HIGH PAID FELLA - March 15, 2014, 4:50 pm

Not much people will get in there since 80% or more don't know "real hacking" is.

NotCoolBro - March 15, 2014, 4:55 pm

this is hackforums, its more like 99.8%

drzfinestplaya - March 15, 2014, 9:54 pm

Skillset: programming

Why do you want to join us?: Would like to expand my knowledge

What do you specialise in?: programming in c#

How can you contribute?: i built my own pc piece by piece so if anyone needs help ill help them =)

Timezone?: (UTC-05:00) Eastern Time (US & Canada)

1336plus1 - March 16, 2014, 7:55 am

Timezone?: ISTDelete your PMs so people can actually message you.

XBatt - March 17, 2014, 3:31 pm

What is the purpose of this group/what do you want to achieve?

Shellow5 - March 17, 2014, 3:51 pm

(Mar 17, 2014 03:31 PM)XBatt Wrote: [\[CITE\]](#) What is the purpose of this group/what do you want to achieve?

We strive to learn and to hack. We don't really aim to achieve anything specific yet, but we will (hopefully soon) start a project that everyone can work on and contribute towards. This would be a private project of course.

-ZYMOTOM - March 18, 2014, 2:05 am

Skillset: Coding, hacking.

I know HTML, CSS, JS, PHP, SQL, VB.net, C#, a bit of Perl, python and then also a bit of C++.

I've probably forgot some language, but I have a bit of knowledge on most languages, even if I don't know them indepth I've dipped my toes into it.

Then to hacking, I know about many diffrent methods and exploits but I'm not as practiced on using them. Webhacking is the only one I'm truly practiced in, and that involves CSRF, XSS, SQLi, RFI, LFI and rooting.

Why do you want to join us?: Because Pony recommended the group to me, seems that it could go somewhere aswell so I might aswell try to join it and make an application.

What do you specialise in?:

I specialize in webdevelopment and webhacking. Hacking itself is not main my skillset, but I learn to hack to make my applications and systems safe.

I pretty much do coding overall though, PHP and VB.net are the languages I know the best and do most work in.

How can you contribute?:

I can contribute in a number of ways, what I'm best at is coding so I guess that's where I'll be contributing the most.

Timezone?: GMT+1 which is the same time as Copenhagen, Paris and so on.

Stealth - March 18, 2014, 7:03 am

Skillset: I have experience mainly with servers. Whether it is Windows or Linux (CentOS), I have a lot of experience running, managing, and securing servers. I have a degree in Information Systems Security, this is where I learned a lot of my hacking techniques. Sometimes it takes a hacker to catch a hacker. I know how to setup and manage IRC networks, botnets, VPN's, VPS's, etc etc. I have experience with RAT programs as well as Crypters. I have been out of the game for a little while, but I am looking to get back into a group to share my knowledge and expertise.

Why do you want to join us?: I am looking for a group again that I can contribute to, and bounce ideas off of. A tight nit group is like a family to me.

What do you specialise in?: Everything computers. Mainly same things in my Skillset. I am always looking to learn new things however. I have an open mind and I am a quick learner.

How can you contribute?: I feel like I have a lot to bring to the table. I am a dedicated and loyal person. Once you have my loyalty, I will never look back. I can assist in securing or setting up servers for seeding and I am always looking forward to learning new things. I want to learn everything that I can that can further improve the group as a whole.

Timezone?: Eastern USA

Im gone brah - March 18, 2014, 10:04 am

Yes because this group is pulling off such illegal activities that the government would even be arsed to read their logs, nevertheless bring them to trial.

YovielMarrero - March 21, 2014, 1:09 pm

(Mar 21, 2014 12:51 PM)FFHE Wrote: [\[CITE\]](#) Yes because this group is pulling off such illegal activities that the government would even be arsed to read their logs, nevertheless bring them to trial.Even if they weren't doing any illegal activities.. no one should use skype. Skype sucks big cock and the FBI goes after anonymous members for ddosing so even if it's small they would go after them.. That's what they pay them for

01L 5P1LL - March 21, 2014, 8:23 pm

01L 5P1LL's ApplicationSkillset:

Knowledge on 802.11 and Attacks:

Wireless Network Setup

Wireless Hardware

ARP Spoofing/Poisoning

WEP,WPA Cracking

Session Hijacking

Packet Analysis

Security involving Encryption:

Encrypting with Truecrypt

Full Disk Encryption

Encrypted Containers

Hidden Volumes

Password Practice:

Although it seems like basic knowledge I am listing this because it is very important without proper password practices any encryption you use will become useless if a proper secure password is not generated.

Knowledge of Secure Communications/Staying Anonymous:

Encrypted Communications

Anonymous Networks

VPNs

Knowledge of Linux:

Distro

Using Bash

Using Package Managers

Useful for Servers, Developing Bash scripts, Installing software, and knowing linux speeds up the learning process for new tools we may develop/use.

Why do you want to join us?:

As soon as I read the description of the group I realized that this group is for me. I like that the description of the group is very straightforward. Being straightforward is obviously a plus when looking for a group because that's the type of person I am. The group sounds like the like minded people I've been looking for and it would be great to share my knowledge as well as learn from others in the group.

What do you specialize in?:

802.11 Has always been my specialty because it's the one that I have had the most practice in. I couldn't get online couple of years back. I couldn't pay for internet access so I had to learn to Crack APs in order to get online from there I became interested in 802.11. I have learned a lot about the technology and the various attacks.

Very recently I've been very involved and interested with things involving Cryptography and Anonymity networks. Seeing as a lot of people have problems understanding these topics this can provide to be very useful to members of the group.

I pretty much specialize anything that is in my skill set. I chose to not list things that i'm not familiar with in my skill set like coding. Although I have knowledge of coding I am not very proficient in any languages which is why I did not list that in my skill set.

How can you contribute?:

I can provide information on the topics I'm familiar with, listed in my skill set. I'm pretty much a full time linux user now so I can help people with any questions they may have. I can bring in new ideas for the group whether it be, how we communicate or a new project we can work on,I will share it with the group.

Timezone?:

GMT-8

*Credit to Abide for the format

\$lick - March 21, 2014, 11:53 pm

Skillset: Creating Malware, And SQL exploiting

Why do you want to join us?: Because I want to be part of a cool group without the flashy titles

What do you specialise in?: Coding

How can you contribute?: Tutorials and free software.

Hi there...

Well you might have a point. But because something "is old" it doesn't automatically means that its bad, I haven't brought an internet connection since 2005 thanks to that.

And Its still the nr1 way to find vuln AP:s in the neighborhood.

I don't like bragging about my skill as you often see in here from the average skid. Also, that's why i lay my dedication on things like tuts, helping others and so on. and i think that's why i was accepted! Not because i can root a bloody server if necessary.

I do not brag about this in an open forum, its just asking for trouble

Information has been sent. We've had a lot on our plate.?

jamie45 - March 27, 2014, 8:50 am

Skillset: Web application security and basic priv escalation

Why do you want to join us?: I want to be part of a group

What do you specialise in?: I code in python, some PHP, and beginning in C.

How can you contribute?: I have a large stash of ramen noodles.

Timezone?: UTC-06:00

Sh0kkL0rd - March 28, 2014, 3:31 pm

Skillset: Virus development, Exploit development and The Studying & Reverse engineering of protocols, SQL injection(IDS/IPS Evasion n such)

Why do you want to join us?: I'm tired of doing stuff alone and I think I could learn new things.

What do you Specialise in?: Virus,bot,etc development, Exploit Development.

How can you contribute?: Im actually very unsure about this question, I can help people and do favors for people like Reverse Engineer protocols, i actually also want to join this group to work with others on projects, and to improve my programming skills by looking at someone elses code from their perspective.. And maybe making my programs more neat.

Timezone?: GMT/GMT+1 (Northern europe).

Oh and a project i started work on 2 days ago?

EDIT: Censored?, PM me for link(tiny pic)

*All in all maybe 4 hours of work due to distractions(I also had to learn the Win32 API so i feel proud 4 hours to learn an API is OK)

Im gone brah - March 28, 2014, 5:13 pm

Will review applications in a couple of days.

Tokyo ? - March 28, 2014, 6:27 pm

First of all I would like to state that I am more "whitehat" than "blackhat", and my skillset will show this. However this will not affect my ability to learn more "blackhat" hacking considering I am always open to new skills.

Skillset: Proficient Doxing/Web De-Tracing

Social Engineering/Reverse Engineering

Computer Customization & Hardware

Computer Security & Breach Removal

Mediocre at HTML/Java/C/C++

Video Editing & Production

Server/Web Protection

Staffing/Management for Businesses, Entrepreneur

Why do you want to join us?: Seems like a very interesting group to join and I believe I can be of some valuable use to the organization in terms of management and "whitehat"/security help.

What do you specialize in?: Computers, Security, Tracing, Acquiring Information, Management.

How can you contribute?: In-Depth research and info gathering for the team as well as management and security.

Timezone?: U.S CST.

Olatunji09 - March 29, 2014, 1:49 pm

Skillset: looking to learn php and c++

Why do you want to join us?: Bored

What do you specialise in?: Malware

How can you contribute?: Can teach people

Timezone?: idk

?????? - April 2, 2014, 12:17 pm

I'm interested in this, but not yet in this group, simply because I don't have the skill or knowledge. However, I do know Java and Python and I am learning C (which is turning out to be quite fun) - it shouldn't take long to become at least proficient in that as I am a quick learner. However, my main problem is that I don't have real-world coding experience (i.e. give me an algorithm, I'll code it, but I have no idea in terms of developing real applications and actually hacking). I'm learning pentesting at the moment, along with C. I'm reading up on networking alongside C, and after I consider myself proficient in C, I'll move to ASM. Once I read up a bit on networking, I'll start reading about network pentesting and local exploits, at which point I'll apply.

Is this sort of what you're looking for? I know that this isn't a skid group - I've talked to a few people from here and I know that they aren't skids. I'm definitely aiming to join at some point, when I get the time and when I learn more.

Odoye - April 2, 2014, 9:01 pm

Skillset: I have been programming in a multitude of languages for about four or five years and have become proficient in quite a few. I have also started learning web hacking through SQLi and XSS. I am always trying to learn more. I have also built my own computer after deeply researching every piece, so I know how a computer works fairly well, if I have to say so myself.

Why do you want to join us?: I am always looking to be surrounded by others with similar interests. I love working with computers, programming, hacking, and anything in between. I want to both help others and learn other methods.

What do you specialize in?: I specialize in protection of servers, working with others on programming problems, I am becoming better daily in web hacking and development. I am trying to get better at it as much as I can. I am also good with Java, databases, and other things. I can work in many languages.

How can you contribute?: I can write tutorials, teach others what I know, and help plan just about anything. I will definitely learn more as time goes on and will continue being able to contribute more and more.

Timezone?: CST

Natecat33 - April 3, 2014, 5:32 pm

Skillset: Java/C# and python.

Why do you want to join us?: Need some coding projects.

What do you specialise in?: Coding

How can you contribute?: I can code (These questions are starting to get redundant :P)

Timezone?: PDT currently.

Prototype123 - April 4, 2014, 3:16 pm

I would want to join but im a ps3 hacker/Modder I have a CFW ps3 on a developers firmware called DEX im good with stuff like that if u guys wan't I could also host hacked blk ops 2 and mw3 hacked lobbies includeing call of duty Ghost only on ps3 but I guess that does'nt have to do with this oh I got Linux installed on my Ps3 too beat that lol

No Effort - April 5, 2014, 2:53 pm

Skillset: RATing, eWhoring, Social Engineering, SQLi (Learning), Visual Basic, Java, Lua, Batch, Python & C++ (Learning)

Why do you want to join us?: I've always loved the art of hacking, I used my knowledge for personal gain & for good (hacked & took down multiple paedophiles), but after seeing this group I want to put my skills to something bigger then myself, I want to interact with others that have the same interests as me while still increasing my knowledge of hacking.

What do you specialise in?: Coding, eWhoring & Scaring People Shitless :P

How can you contribute?: I already have posted numerous HQ Hacking Tutorials on HF and I have received positive feedback for my tutorials. I can contribute by teaching others as well as creating more tutorials. I can also help code if its ever needed.

Timezone?: EST

Regards,

Iconic

0Boy - April 5, 2014, 3:17 pm

Skillset: I know Python, C and Assembly. I write alot of pentesting and scanning scripts on python. i used to do reverse engineering and exploit writing. I started to learn about RATs development and Network Programming. Just to mention few.

Why do you want to join us?: I used to work alone, and i want to be envolved in group, i like working in group.

What do you specialise in?: Anything mentioned above, but for now, i want to specialise more in RATs development and exploitation Kits

How can you contribute?: Scripts, common development of RATs or exploitation kits

Timezone?: GMT+1

How can you contribute?: Make hacking programs.
Timezone?: EST

Aura - April 8, 2014, 7:01 pm

(Apr 7, 2014 01:32 PM)Th3PonyWizard Wrote: [\[CITE\]](#) We're still looking boys. Our chat is beyond reflexive and can satisfy knowledge in most fields in a way I've yet to see any other HF group do. Sorry, denied. Our student quote is full.
Can I join with only Computing, Malwares Removal and Analysis and intermediate Java, C#, HTML, CSS, PHP, SQL and ASP.NET knowledge ? ?

SupltsDillon - April 9, 2014, 8:30 am

Skillset:
I am quite skilled in things such as HTML and PHP. I also know a fair bit of java and I have made a few little projects in Visual Basic. I currently have 4 paid domain names and I can host files and other things on them if needed. I have also made quite alot of trojans and some malware.

Why do you want to join us?:
I would like to join because I want to share my skills with others who I can trust. The group isn't just a crew, clan or whatever, its like a family, people who you can trust and work with.

What do you specialise in?:
I mainly specialise in HTML, but I say I am quite good at developing trojans and malware.

How can you contribute?:
I can contribute my knowledge quite alot. For one, I am a very helpful person. If somebody can't do something, i'll help them. I will be working on programs for the whole group to use, which will help them make hard tasks easier.

Timezone?:
I am currently in GMT 1:00

Long Morrison - April 9, 2014, 12:59 pm

Skillset: Hosting, hardware and android in many ways.

Why do you want to join us?: Sharing and gaining knowledge, meeting new people.

What do you specialize in?: Windows & linux servers, android phones. I also know how to fix weirdly broken phones and hardware problems on PC.

And yes, i can do basic skid injections, i visited police because of that.

How can you contribute?: Not sure, but i can definitely help with android and PC's. Im also in datanomy school (i think there is no real english word for that) so there is no need to study basic things.

Timezone?: GMT +2 (helsinki, tallinna etc)

Chaorii - April 9, 2014, 1:07 pm

Dear Sirs,

Skillset: Basic knowledge of coding, languages i have learnt are vb, python, java, css, and HTML, i didn't go really deep with each language, but will do.

Hacking : Botnet and basic SQL injection. Will be learning more.

Why do you want to join us?: Learn, share and meet some new peoples.

What do you specialise in?: I am really interested with web penetration testing.

How can you contribute?: I will just share to everyone what have i learnt.

Timezone?: UTC+00:00

BeatHimUp

ObscureCoder - April 9, 2014, 1:15 pm

Skillset: HTML, CSS, JS (w/ jQuery too), PHP (w/ MySQL), Java and some C++.

Why do you want to join us?: I'm not too sure about joining, I just wanna see what this group is all about before I try jump in.

What do you specialise in?: Web Development and Programming

How can you contribute?: I can create sites (responsive too - which don't rely on bootstrap) and program applications.

Timezone?: UK Time (Greenwich Mean Time Zone UTC+00:00)

I'm not much of a hacker but I am willing to learn more than simple SQL injection and practise web

penetration.

I really just wanna see what this group is all about. HMU! :)

Urg, make it for Windows (at least a Windows variant) and I'll be happy to test it out. Even if I don't get part of Pernicious, you can always send me a PM or message me on Skype if you need someone to test your malwares on Windows and attempt to remove them (which I will ?).

There is no way to compile a Linux based rootkit on Windows. Linux and Windows operate in different ways so rootkits need to be coded differently. If you want a variant you won't find one as some things possible on Linux are impossible for Windows. ?

Also, Linux > Windows.

Aura - April 9, 2014, 2:42 pm

(Apr 9, 2014 02:38 PM)schmidt73 Wrote: [\[CITE\]](#) There is no way to compile a Linux based rootkit on Windows. Linux and Windows operate in different ways so rootkits need to be coded differently. ?

Also, Linux > Windows.

I don't know, maybe Zayne could make a Windows version of his RootKit and ask me to compile it because I run Windows.

Also, I agree that GNU/Linux > Windows but as an IT Student, it's not always possible for me to make that choice when everything you learn now a day is mostly Microsoft-dependent ? I'll eventually move to dual-booting Windows and a GNU/Linux distro, just have to find the right one first.

Im gone brah - April 9, 2014, 2:47 pm

That means that everything needs to be re-coded for windows, it wouldn't be the same kit anymore. As far as my knowledge go, you cannot use a .sh file as installer in windows.

The rootkit only hooks shit in linux, so it would be useless if I could make it compile it for windows. Tldr; it wouldn't even know where to hide.

Aura - April 9, 2014, 2:48 pm

Errors - April 20, 2014, 6:43 am

Skillset:

Monetizing

AdSense Exchange, Trafficking, Marketing, PPD,PDA

DoS & DDoSing

I know very a lot about Botnets, Stressers, Booters, and how to setup and make DDoSing Scripts

Gaming

competition, Xbox modification, Genres such as Fighting, Adventure, Action, Shooting

Backtrack & Penetrating

Exploits on how to backdoor things and inject things to check the vulnerability.

Coding

I been coding in C++ for visual basics not a very good at it and I know a little HTML, XSS, and PHP.

E-Whoring

I Have done this for 6 months and manipulated people and made profit my SEing skills is involved in this.

Ratting

I Have known about Rats since 2011 I started using them in 2012 and I know very useful and easy tactics to spread a rat.

Social Engineering

I Have been doing this since mid year 2012 my persuasion skills are high. I have use these tactics for good or getting what's need to finish something. It helps me with Doxing,

E-Whoring, Hijacking things

Why do you want to join us?:

I feel while in this group I could grow more in the community and get a more "broad horizon."

What do you specialise in?:

See above.

How can you contribute?:

I think I could be a valuable asset by doing such as learning and teach new ways to help others out. And I could give things away that are useful, donate, and make things in the name of Legion. And give good ideas to the Legion group and help evaluate problems to improve in and as a group.

IllGate - April 23, 2014, 11:52 am

Skillsets:I have many years of general hacking experience in "the wild" and schooling(Pentesting,Programming, and network security auditing). I have a CEH certification, amongst several other legitimate certs.

Why do you want to join us?: I have been undertaken several projects, while continuously learning new programming skill-sets. I am no way a master of this craft and in constant state of learning new information. The set-back here is that when working alone you do not have the collaborative aspect to share you thoughts and share your mistakes/advancements with. This "loner" style of learning I find can lead to an incredible waste of time. With that in mind I began to search for a group that has relative goals to what I have. My passion in hacking is -all things Malware(coding,creation,analysis). From what I read, that seems a main focus of this group, so I didn't hesitate to apply!

What do you specialize in?: General Pen-Testing and Network Security Auditing. My specialty and interest has been coding. My knowledge base in programming includes: C++(my first language and preferred),C,VB6,Delphi(working knowledge),Html5. I'm currently self teaching MASM.

How can you contribute?: I can collaborate in group-related coding projects, teach some coding, share my resources/libraries, and be an active group participant.

Timezone?: GMT -6 central

Shellow5 - July 19, 2014, 3:23 pm

Pernicious Developers has been reopened and we have increased our requirements to join!

?????? - July 19, 2014, 8:11 pm

I myself am more of a programmer than a hacker, but as you said being a good programmer gives you the knowledge required to hack people. The only hacking I do is whitehat, grayhat at best, and I am much more involved in the programming side. I will develop exploits, rootkit features, malware, and occasionally find vulnerabilities in software, but I will never act upon it and use it to learn or make money.

Python is used a lot of those things. Not for any real reason it's just a lot quicker to write than other cross platform languages. It's used for exploits in linux servers because by default (most, if not all) linux server distributions come with python pre-installed so it's an ideal language.

I'm sure I've already posted on this but what are the requirements?

Tirus - July 20, 2014, 6:32 pm

We'll know if you're lying.

You must be skilled at hacking. - I'm willing to learn more but I can do basic stuff such as SQLi, ratting, XSS, cookie session hijacking, and right now I'm currently getting a grasp on directory traversal.

You must contribute something to the group. - Depends on what would be considered a contribution.

You must know or be willing to learn at least one programming language. - I know: HTML, CSS, JS (w/ jQuery + JSON), PHP (w/ MySQL), Java and fundamentals of C++, C#. I'm also a quick learner, I learned the basics of python and wrote a man in the middle RPC server in it for a Jtag exploitation online tool written in JS. I'm also very interested in programming disassembly. For example, I wrote a tool in Java that fetches games offsets from XRPC tools written in a .NET language by referencing opcodes in the PE.

You must have knowledge of computers and how they work. - I'd say I have a pretty strong grasp on subjects like how computers manage memory etc. I'm learning bitwise operators in C++ (and Java but C++ is more ideal since the Microcontrollers that I've worked with use it)

You must not be a skid. - I can't recall ever being called one so I dunno...

We'll know if you're lying. - I'm not lying.

Well, that's my 2 cents.

Tirus - July 20, 2014, 6:46 pm

Do you have any knowledge in C++11?

potatopete54 - July 20, 2014, 6:52 pm

Do you need someone who can make 'really' cool deface web pages?

ObscureCoder - July 20, 2014, 6:53 pm

(Jul 20, 2014 06:46 PM)Tirus Wrote: [\[CITE\]](#) Do you have any knowledge in C++11?

A bit. I'm currently trying to learn what I could actually use my knowledge for. Everything that actually does something such as GUI etc. requires outside libs like Qt. It's not as quick for prototyping as Java since in Java there's built in classes for doing GUI such as swing but I use JavaFX now.

I'm definitely looking into things to try out in C++. A lot of things that I do easily in Java such as GUI and networking etc. require libs though.

Puller - July 20, 2014, 8:33 pm

Skillset: Web exploitation: SQLi,XSS,LFI,SSI,command injection,LDAPi e.t.c

Programming: Not much here, I know the basics of Python,php,Java, and C++, right now I'm fully learning Php and Python

Why do you want to join us?: I want to learn and help out anyway I can. I also want to interact with other people interested in the same thing as I am.

What do you specialise in?: Web exploitation

How can you contribute?: A chill personality and someone that gets along with others. Helping out with projects as well.

Timezone?: EDT

Tirus - July 20, 2014, 8:55 pm

(Jul 20, 2014 08:52 PM)ObscureCoder Wrote: [\[CITE\]](#) What are the main languages that Pernicious focuses on using?

We focus on web hacking, server hacking, development of malware, development of payloads, and development of exploits. Which means you'd have to be advanced in PHP, C, Python, C++.

ObscureCoder - July 20, 2014, 8:57 pm

(Jul 20, 2014 08:55 PM)Tirus Wrote: [\[CITE\]](#) We focus on web hacking, server hacking, development of malware, development of payloads, and development of exploits. Which means you'd have to be advanced in PHP, C, Python, C++.

What amount of knowledge would be considered advanced in PHP and C++?

Puller - July 20, 2014, 8:57 pm

(Jul 20, 2014 08:55 PM)Tirus Wrote: [\[CITE\]](#) We focus on web hacking, server hacking, development of malware, development of payloads, and development of exploits. Which means you'd have to be advanced in PHP, C, Python, C++.

So is this requirement just for him since he's applying for programming or is it for everyone applying?

cause this: You must know or be willing to learn at least one programming language.

soatok - July 20, 2014, 9:32 pm

This intrigues me. I've been working (currently on pencil and paper) on a crypter for PHP reverse shells (and other payloads), mostly due to boredom with the usual trite `eval(gzinflate(base64_decode($blob)))` snore-fests you find in the drive-by RFI scanners. Would this be of interest to you? Do you have people in your team that would be willing to critique it and help me grow even further as a developer? :)

Skillset: PHP is the language with which I wield the most proficiency. I've been building sites for over 12 years with it. (I started right before 4.3.0 was released, and I'm currently looking forward to 5.6.0 so I can stop using Double-HMAC tricks to avoid timing attacks in my crypto libraries, as the length-constant time comparison loop approach is unreliable in PHP.) Proof available upon request, but I will not post it publicly.

Why do you want to join us?: I don't feel adequately challenged by my day job, and I hate complacency. Even the local PHP meetups are boring (mostly overweight beta males talking about their preference in unit testing methodologies, yet until this weekend phpunit didn't GPG sign its .phar so they could have been owned for years and been blissfully unaware).

What do you specialise in?: The cryptography and engineering side of things. Exploitation is not my strong suit.

How can you contribute?: In addition to what has been stated/alluded to above, I find myself to be rather successful at white-box vulnerability analysis (i.e. the source code is available).

Timezone?: Eastern US

(Note: While exploitation isn't my strong suit, that doesn't mean I can't do trivial things like SQLi + directory disclosure -> payload in web root.)

One example of a project I'm developing right now is [FurBB](#), though its still in its infancy.

(Jul 20, 2014 08:57 PM)Puller Wrote: [\[CITE\]](#) So is this requirement just for him since he's applying for programming or is it for everyone applying?

cause this: You must know or be willing to learn at least one programming language. I think (from my reading of the OP and the post you quoted) his point was, if programming is the basis for acceptance, you'd better be damn good at it. If your skillset is about abusing and bypassing remote systems, but your programming skills are mediocre, you'd probably qualify.

Forgive me if I'm wrong; I could be totally off-base.

severos - July 21, 2014, 12:59 am

Skillset: understanding code (can't code but I can read and understand) with some modifying skills (currently modifying some exploits)

Why do you want to join us?: because I want some help with my project, also can be of some help for others.

What do you specialise in?: using stuff in a way they're not supposed to be used?

How can you contribute?: I can use metasploit/armitage/BeEF and other pentesting frame works so I can help others using them (yep, I can't code but I can use them and better than some people who can code, quite ironic)

Timezone?: UTC +2

loyal_learner - July 21, 2014, 6:52 am

Skillset:

- html, css, php, js, C#, SQL etc.
- SQLi, xss, LFI, RFI etc.

Why do you want to join us?: I am looking for a serious group. I have been in several good groups where I've got some experience from there. I am patient, targetted and up to things that the group wants to achieve. I prefer to stay low profile in forums, but I am active in unofficial groups all depending on the group itself. Hit me up, if I can join.

What do you specialise in?: Windows security.

How can you contribute?: I might have some scripts that may be useful + priv8 exploits, we can talk about that if its relevant for the groups focus-points.

Timezone?: EEST +1

Inkling - July 21, 2014, 7:12 am

Skillset: Any programming language with a documentation that is written by the creator, basic web development, the ability to exploit other people's poorly written code.

Why do you want to join us?: My friend Tirus is in here, and I think it would be a good opportunity.

What do you specialise in?: I specialize in linux networking and administration.

How can you contribute?: I can contribute with my broad knowledge on computers and networking.

Timezone?: Eastern Standard.

Pony is no longer a member of Pernicious, so I don't think you'll need to worry about said 'drama'.

~Arcane ?

Antigen - July 22, 2014, 11:34 am

Skillset: White hat security

Web Security

Programming in C/C++, PHP and Java

Good knowledge in Computing (CS Graduate)

Why do you want to join us?: Knowledgeable members (I really mean it).

I could learn and practice under a hood

Group's interests are also tend to be mine as well which is Web Security and Programming

Good to chill with cool members

What do you specialise in?: Whitehat Security

How can you contribute?: Participate group projects & activities

I could write tutorials with group as I've been written some.

I'm friendly and nice so I'll do good in skype chat.

Timezone?: +5:30

Thank you,
Good day/.

Handsome-Jack - July 22, 2014, 12:10 pm

Skillset: Social Engineer/Vb6 programmer *Skill-set

Why do you want to join us?: Because this group looks like its going some where.

What do you specialise in?: BEeF exploits and Grammar. *Specialize

How can you contribute?: The ability to social engineer and deliver payloads without a hacking trace.

Timezone?: Dark all the time. (Gotham city.)

Tirus - July 22, 2014, 12:14 pm

Just a tip for all applicants, put some effort into your application; you'll have a better chance of making it into the group that way. Best of luck.

Antigen - July 22, 2014, 12:46 pm

(Jul 22, 2014 12:14 PM)Tirus Wrote: [\[CITE\]](#) Just a tip for all applicants, put some effort into your application; you'll have a better chance of making it into the group that way. Best of luck.

I just wrote my application flat plain, I don't want to include glittering graphics and images that are

created by others to the thread to look it more "appealing". I hope that's okay with you guys.

Tirus - July 22, 2014, 12:57 pm

(Jul 22, 2014 12:46 PM)Antigen Wrote: [\[CITE\]](#) I just wrote my application flat plain, I don't want to include glittering graphics and images that are created by others to the thread to look it more "appealing". I hope that's okay with you guys.

Being flashy vs actually putting effort into it are similar, we aren't looking for you to make a entire graphic post design just to be accepted, we want you to take your time in your application and actually put some effort into it, not just 3 lines for your entire application.

Antigen - July 22, 2014, 1:01 pm

(Jul 22, 2014 12:57 PM)Tirus Wrote: [\[CITE\]](#) Being flashy vs actually putting effort into it are similar, we aren't looking for you to make a entire graphic post design just to be accepted, we want you to take your time in your application and actually put some effort into it, not just 3 lines for your entire application. Exactly, I hope you are referring the above application as "3 line app". I wrote what I believe I have skills.

Vicellus Drum - July 22, 2014, 1:09 pm

This being an unofficial group, I doubt majority of the applications are going to be quite as extensive as you may wish.

On top of that, being a "skid" isn't allowed to join the group. I see nobody that's posted on this thread other than Vinnie and Sky that I wouldn't consider either a skid, or a graphics/web designer.

This for example:

(Jul 20, 2014 06:23 PM)Zayne Wrote: [\[CITE\]](#) Python is commonly used for exploit writing. Sorry Zayne, I love you, but that's one of the skiddest things I've heard all day.

soatok - July 22, 2014, 1:19 pm

How can you contribute?: be dumb and.. deface with root access

Timezone?: Dunno, i can only deface with root access dunno how to google.

Can i be leader pls, should fit in

You think you're funny now, do you? It doesn't limit our knowledge, neither does it make it a less good job.

You're acting big. Just stop. Do you even know what XSLTP inclusion is? Do you know how to protect against it?.. No.

Tirus - July 27, 2014, 5:56 pm

Best of luck to all the applicants. Trolls/Flamers will be ignored instantly.

Ch1m4zz - August 3, 2014, 12:34 am

Skillset: Well I know SQLi,XSS,I'm also learning RFI,LFI. I can code Python and I'm a skilled Linux and windows user! I'm good with computer hardware and I'm also interested in network hacking! I have basic knowledge in VB.NET. I love to learn stuff.

Why do you want to join us?: You seem like a nice team of people also like the kind of group I like! I have always wanted to be apart of something so a group seem'd nice!

What do you specialise in?: I specialise in network and a little web hacking! I also specialize in Python coding!

How can you contribute?: I can contribute with Python coding and hacking! I'm also someone who have the same timezone as Zayne! So that might be good! I'm also already in the prophetic skype group so if you want to contact me just send something there Arcane!

PS. You also got my skype Arcane

Timezone?: Well I have a Swedish timezone

PS. I'm not l33t but I will get 3p1c soon

Sky - August 7, 2014, 10:23 am

Pernicious is still recruiting. Please put time & effort into your application unless you want to be ignored point-blank.

~Arcane ?

Helios. - August 7, 2014, 6:21 pm

Skillset: I have experience (very good knowledge) to these programming languages:

PHP, MySQL, javascript, VB.net/C#, python, lua.

I'm experienced on finding exploits on web applications such as SQLi, XSS (im very good with XSS), LFI/RFI, CSRF ect... (I know how they work behind the scenes, how to prevent them and

exploiting them. My SQLi is basic.)

I've got experience/knowledge on rats, botnets and how malwares work in general (i'm self-taught), I'm also a g2g trainee so I can learn more in depth about malware removal.

I have very good knowledge on how windows work (being using windows for my entire life, from windows 2000 to win8), so windows is my thing.

About linux i know the basics (not actually the basics, i have some experience but not that enough).

Why do you want to join us?: I want to join the group so i can learn things and improve my skills on a various things (pentesting, coding etc...). And share my experience/knowledge to whoever wants my help.

What do you specialize in?: Mostly Everything that i posted above. But my thing is web applications and coding malwares.

How can you contribute?: I will share my knowledge, create some tutorials (if it is necessary), i will code different programs/tools etc...

Timezone?: GMT+3

420 Blaze It - August 8, 2014, 12:56 am

Skillset: Hacking- SQLi, Basics (Log), WiFi Cracking, WH- Security, Ghosting Etc. BH- Edu.Grad.Mod, BTC

Why do you want to join us?: Zayne and Elu are great people, wish to share my knowledge and learn more about hacking.

What do you specialise in?: I specialise in Marketing and Services.

How can you contribute?: I can contribute to Pernicious with marketing, GFX, entertainment and skills.

Timezone?: GMT +10

Timezone?: GMT +10I don't think your gaming skills are as decent as this group would need

Pavilion - August 12, 2014, 11:27 pm

My Skillset:

I am familiar with languages such as Java, Javascript, HTML, CSS and a bit of C++. I have an interest in developing and exploiting mobile applications as well as web applications. My experience varies within my interests as I am still learning some other components, although I have familiarity

and experience with most of the subjects listed above.

My Contributions:

The most important things I can contribute to the group is my knowledge in Java, HTML, CSS and Javascript. I am willing to dedicate time to the group in order to share my knowledge with other members of the group. I would like to help others learn these languages and help them succeed in their objectives.

Why do you want to join us?:

I have been interested in joining a group for a while now, and I just couldn't find a group that I was interested in. I stumbled upon Pernicious Developers and from the looks of it I think it is an adequate group for me to join. I have seen other groups doing related things and they were far from high quality. Pernicious seems to include knowledgeable individuals willing to share and learn, which I like to see within a group.

Time Zone:

Pacific Time Zone (UTC-08:00)

Thank you:

Thank you for reading my application, I am looking forward to learning a lot and sharing some of what I know with other members of Pernicious.

Tokyo ? - August 13, 2014, 5:32 am

-My Skill Set-

Web/Database Forensics

Basic Python/HTML Coding

Computer Customization/Repair

Very Basic development of Malware/Viruses (Learning as of current, extremely interested)

Very Basic Networking (Learning as of current, extremely interested)

-Why Am I Interested?-My interest in becoming more experience in the hacking and software development is at a peak, I have never been so interested.. and this seems like the group to join in order to learn about these things. I'm willing to put 110% effort into learning as well as assisting in any way possible. I am an extremely fast learner, I catch on extremely quickly. I am friends with some of the members and they have said that this is a fantastic group, and I thought I'd give it a shot in applying. To learn is the main aspect as of why I am applying today.

-What I Specialize In-As of right now, I specialize mainly in Web/Database Forensics. I took an extreme interest in this and it has paid off: <https://hackforums.net/showthread.php?tid=4264151>
That being said I have been getting into Networking and Malware/Virus development, but extremely basic..

-How Can I Contribute-I can contribute by being an active learner, as well as assisting with any Forensics needs, due to this is where my skill set mainly lies. That being said, when I am good at Networking and MW/V Development, I can assist in this constantly.

-My Timezone-My timezone is: GMT+01:00 (Central European Time)

Im gone brah - August 17, 2014, 9:00 am

Funny, I think we've accepted around 3-4 people in 27 pages.

CypherOSINT - August 20, 2014, 9:10 am

My Skill Sets

I am a network admin with various certs and experience with servers , security , Physical security exploits as Network exploits are my things , i don't hack for unmeaning full reasons i consider myself a grey hat i don't like scams and i don't like abusers with intention to exploit for harm. I am taking a 4year course on cyber-security with minor in computer science right know. I did and associates on network administration. Also i know html5 and css3.

Why do you want to join us?

I want to increase my skills and i all-ways love a good challenge.

Contributions

Optimize computers, Network security audits for the group , Advice and also assistance if it means the criteria above.

Time Zone

(UTC-08:00) Pacific Time (US & Canada)

Thanks

Wardow - August 22, 2014, 3:19 am

Application from ?????? on Hackforums.

Skillset: Solid knowledge in AutoIT ! Solid knowledge in RAT/Botnet/Miners/Lockers/Stealers (Installation and using) too.

Why do you want to join us?: I want Learn, Code, and do things with a great groups like you.

What do you specialise in?: Programming.

How can you contribute?: I can code in AutoIT for any projects you need, I can install and manage Botnets, VPS, Dedicated Servers, and stuffs !

Timezone?: GMT + 2 - France

So I'm french and i learn for have a better english.

I have a good level at the moment but it have to be better.

Final Words :

In this group i want do : Learn other language than AutoIT, Learn more in Exploiting, and Have fun with HQ members.

Thanks to take full consideration of my low knowledge and accept me :)

S?kid - August 23, 2014, 11:05 am

Skillset: None (Currently learning C++, Assembly (x86 and x64), and PHP.)

Why do you want to join us?: I need a knowledgeable group of people t

What do you specialize(You had a typo here.) in?: I hope to learn system based exploitation.

Making MalWare and what not.

How can you contribute?: I'd be a loyal and grateful student.

Timezone?: Central.

Repentant - September 11, 2014, 5:02 pm

Skillset:Rooting Servers [FTP/SSH]

Cracking Logins [Emails, and other type of accounts]

Doxing [In depth doxing, not just the "regular information found online]

Pentesting [Checking for Vulnerabilities using Metasploit, and more..]

Linux [Experienced at Kali, Debian, and CentOS]

HTML/CSS/PHP/MySQL [Average Coder, not the best, but know the basic.]

Hacking WEP or WPS Networks

Heart Bleed attacks, Man in the Middle attacks, SSL STRIP Attacks... And alot more.

Why do you want to join us?:

The reason why I want to join and be part of Pernicious is because I'd like to help a group and teach or maybe even learn more about the fundamentals of hacking, as well as to be in a group to protect each other and help each other out.

What do you specialise in?:

Linux and Social Engineering.

How can you contribute?:

I can contribute to the team by helping other fellow members on anything, such as mentoring and showing them what I know and or helping them in anything they might need. ?

Hope my application is accepted, please disregard my reputation, I was recently rep fucked for a misunderstood there was going on.

Regards,

~Young Armani

f3m1n4z1 - September 12, 2014, 12:16 pm

Skillset: Web Design, Ruby, Python, Linux Guru, Web hacking, Backdooring, Exploiting, Cracking, Social Engineering.

Why do you want to join us?: Share knowledge to improve each others skills.

What do you specialise in?: Exploiting and Designing.

How can you contribute?: Helping others and doing group events.

Timezone?: GMS +1:00 Berlin ETC.

Regards,

EGFX

Eeluminati - September 13, 2014, 3:57 am

Pernicious is a highly skilled group of HF, best of luck to the group and applicants.

GI recruiting and GI applying.

?Zero - September 13, 2014, 4:54 am

Might as well give it a shot. ?

Skillset:

Will be starting to learn a lot more C# (Not like I know anything now) when I buy my slick new gaming desktop today. Once I think I'm ready to move on I will go on to C++ and/or JavaScript.

Why do you want to join us?:

Like above, I really want to learn how to code. Sorry but I won't give you a long ass back story on why I would like to learn how to code, it's a waste of time.

What do you specialise in?:

I can make a mean sandwich. I know how work with HTML a little bit, I have made my own websites with someone else's template but that's pretty much it, I bet I can make a mean website if I work hard AF tho. Coding is really my thing (besides sandwiches/food).

How can you contribute?: Not money, that's for sure. Like I said, I can make a mean website if I work hard AF, unless you want me to ship a sandwich to you.

Timezone?:

Eastern USA. No fancy EMT + shit

I'm not joking about shipping that sandwich by the way. I'll put that fucker in a box and FedEx it to your ass

Best Healer EU - September 13, 2014, 7:31 am
