So I took your guy's feedback and decided to upgrade and work harder and better on my montages. I would love feedback and for you guys to tell me how I did!

It Wasn't bad!

but did you edit this with Windows Movie Maker? [Just asking not trying to be rude]

SIM-1179501 - March 13, 2014, 6:09 pm

Thats brave going after another person with an op set in your inv and no pots.

Also it was a 2v1 (1:24) so that makes it like 100000x more lq.

No I used Sony Vegas and render videos in 1080i

The 2v1 was because that kid had his whole faction jump in on my 1v1 with a member in their faction. Naturally they get butthurt and three more guys jump in to 4v1 me.

So my friend was 1v1'ing Kinnon and I was taking on BeastBoy, once I beat BeastBoy I ran over there to back up my crew.

It is brave going after them with no pots, the thing is the server is not OP. God apples are rare, if anyone were to have a "stack" of god apples, then they would be rich. Every servers economy is different.

Hello there, care to explain why do you refuse to use hacks?

??????????????

Proof: https://www.youtube.com/watch?feature=player_detailpage&v=5R_K_m1Y7Qk#t=55 (Fixed link this time) In case you don't see your fail, you can't hit anyone while eating something ?

Elara - March 13, 2014, 7:54 pm

Diplomatic - March 13, 2014, 7:56 pm

I had -27 3 days ago, you've had 25 for the last 3 months :)

Before I was repfucked I had 36 rep so you can fuck off :D

You're still a shitty pvper and you're unliked. Your edits are bad and you should feel bad.

Definitely not enough bloom and not enough camera shake. Bump up the saturation and make things a bit more vibrant by decreasing the brightness and increasing the contrast.

On a serious note: All of this editing done to this video makes me want to puke. Record at 120 fps if you plan on slowing down like that.

Just overall of that statement and grammar made me almost cry while laughing xD. Please don't talk down on other Hackforums members. Will lead to flame wars, which I can't stand -.-

Integrity™ - March 14, 2014, 8:22 pm

This seems like Call of Duty all over again.

ZerFallen - March 14, 2014, 10:17 pm

It's pretty decent, I really don't like the blur effect. Other then that I would give it an 8/10.

Thank's bro, I been trying new effects and audio effects.

Really trying to find that "perfect" effect setup for the upcoming videos!

LoG?c - March 15, 2014, 8:27 am

It looks like you're over editing on your videos and having too many effects added.

I think you should try having less effects in your video/montage and try something different.

Only have around two effects added and some tweaks to the color corrections in the video. So I don't know what I could really change.

Here are my problems with your video. Your color correction was way off with the style that Minecraft goes for.

You were probably recording at 30-40 fps, and slowing down the video makes it really choppy = bad production quality (My opinion.)

Your sneaky killaura was on... (Hitting people while eating golden apples.)

Improving on these faults can help you in the future.

Hope I helped you OP!

Hope I helped you OP! he doesn't really care about the killaura. he was called out on it on his very first video with it, but yet he continues hacking.

your tp is godawful in my opinion.

Well the kill aura, its hackforums and I can care less.

If I have kill aura on or not. It's hackforums people shouldn't rant off about others using the clients made on hackforums -.- It's just ignorant.

The color corrections I will improve no doubt, I'm glad you brought it up. I am newer to PvP montages so this feedback helps me out alot!

I record PvP at 60 FPS, showed on this video

Spoiler ([Click to View](#)) [Video: http://youtu.be/INOhT_Vvx0E?t=51s] The FPS doesn't cause the CHOPPY in videos, it's something I have to fix in Sony vegas that I have fixed since then, but thanks!

LeVendetta - March 16, 2014, 12:55 am

Lol this didnt take any skills on pvp on 0:56 at FF doe lol

delpai - March 16, 2014, 2:51 am

Looks like a complete overedited piece of shit, next time dont overedit so mutch and dont use hacks in a pvp montage..

badvibes - March 16, 2014, 6:16 am

We're not being ignorant you imbecile.

You said you're 'getting better at PvP' and you use killaura. If you're going to hack don't hide it and pretend that you can PvP, just leave it normal. How about you just play legit and record without mixing your shit layout and just edit out parts where you're not pvping.

If you could stop being so LQ that'd be great.

It was decent, over edited imo. I can pvp better than both of you stop QQing

Did my neutral on you make you butthurt? Oh well, tis a shame ?

Just use a client and put on terrible dub step and call it a client showcase channel.
