Thread: [BigKesh/Big Kesh/Bigkesh.com \(Orgy\) - A scamming member who runs a host?](#)

Schultz - March 15, 2014, 5:54 am

He offers "300Gbps" protection in, [THIS](#) thread yet he's just another reseller for a OVH or CNServers.

This host owner also has multiple scam reports on him, here on HF. Why would you trust someone who has multiple scam reports, some for thousands of dollars! [HERE](#), [HERE](#), [HERE](#), [HERE](#) , [HERE](#), [HERE](#), [HERE](#), [HERE](#) & [HERE](#).

In [THIS](#) interesting thread, Orgy released confidential data (private email) pertaining to one of this clients for a stress-testing service because the client engaged in a "chargeback" with him.

BigKesh, more like ScamKesh to me. I'd never trust my data on this website from a person who is a known scammer and potentially affiliated with illegal activities. This is my personal opinion and not a representation of the community themselves or these scam reports and I do believe a community warning on this company/limited liability company is valid on the basis of the owners existing scam reports on HF.

Will be posted on WHT, [LEB](#) & a few other forums to clarify the seriousness of this issue.

User appears to be engaging in some kind of spam to piss off a staff to delete the entire thread, staff please take note this is a legitimate community warning.

Sorry about your illness bro!

Also by your definition Logitech are affiliated with carders just because some carders use their keyboars/mice?

Exactly,so what if Bull was using his services for something else??

just seeing an bot seller reply to his thread doesn't mean that he is selling illegal services.

actually laughed out loud.

this thread is a joke. i can't believe OP is so mad that he's trying to use someone's vouch as proof of illegitimacy. like what the fuck haha.

professional mode.

We don't condone any illegal activities on our servers. Upon finding sufficient evidence of illegal activities, we suspend the server and notify the client. Repeated offenses result in termination. Sometimes I even ask clients beforehand because we simply don't want the trouble. See below:

@OP: As for your "Scamkesh" comment, Big Kesh is a registered business entity in the US and is separate from any of my past deals and deal disputes. Move along, kid.

Oh, and shameless advertisement:

25% off any of our VPSes with coupon code "BIGNL".

Cogent, Tata, Level 3, Global Crossing, Seabone, NTT, Telia, Opentransit, T-System.

Look at how many companies OVH resells for. I'm writing a community report on them right now. Not to mention they're in France, which is obviously offshore of U.S and can be used to host illegal content.
