Thread: [\[BRAND NEW\] Updated: MalwareBytes Anti-Malware 2.0.0.1 \[BRAND NEW\]](#)

T e s s e r a c t - March 15, 2014, 10:56 am

Hello All Computer Security Enthusiasts, including myself, so Hello MaiTriCks

I am surprised that nobody had created a thread on it, but that old MalwareBytes GUI has totally been ravaged and revamped! It is official and has exited the Beta stage. All can now update to it. And if you haven't gotten malwarebytes, get it today. It is recommended for optimal protection, and it is better than most anti-virus scanners, and catches things under the radar.

Goodbye to:

[img]http://blog.malwarebytes.org/wp-content/uploads/2013/10/mbam-pro.png[/img]

And Say Hello to:

I thought you would all be interested to know.

A Word From The Creator

Spoiler ([Click to View](#))

"Posted 29 January 2014 - 12:26 PM

I am overjoyed to announce the first public beta of Malwarebytes Anti-Malware 2.0. I know you've been waiting a very long time for this and so have we! The purpose of this beta is to get feedback from the people we care most about -- our users!

Malwarebytes Anti-Malware 2.0 ships with a completely redesigned user interface to make the product easier to use, more informative, and provide quicker access to key functionality. We have built in and improved our Anti-Rootkit and Chameleon self-protection technologies that have been in beta for the past year. Additionally, we've rewritten Malicious Website Blocking and improved native x64 support. Most importantly, our detection and removal engine was significantly improved under the hood and kicks even more malware butt! This is the biggest rewrite we have ever undertaken, and we hope you're thrilled with the result.

With the launch of 2.0, we'll also be moving to a subscription licensing model, \$24.95 per year. As more and more people have come to rely on us for malware protection and cleanup, our costs in bandwidth, hosting fees, infrastructure, salaries of our researchers, QA department, and more have grown immensely. Though our company is about more than just making money, we are a company and we do have to make money to pay our staff to continue doing what they love, which is fighting malware. The subscription model will help us to be sustainable for the future while staying true to our roots that we will always make malware cleanup free for everyone.

We will continue to honor existing lifetime licenses, meaning any users that already have a lifetime license for 1.x will continue to have a lifetime license for 2.x. We'll be offering a few thousand more

lifetime licenses during launch as well. On top of all of that, new subscription licenses will be valid for 3 PCs, not just 1.

We could have gone other routes to make our business more financially sustainable, like adding toolbars or advertisements like many other security products have, but that's not the company we are. We believe that products should be nag-free and cleanup shouldn't cost our users a dime, and we're going to stay true to that. Scanning for and removing malware will be free in version 2.x and beyond! You didn't pay to get infected, you shouldn't pay to clean it up! :)"

SUMMING UP DIFFERENCES: BRAND NEW USER INTERFACE

MORE INFORMATIVE

BUILT IN ANTI-ROOKIT AND CHAMELEON SELF-PROTECTION FOR INTEGRITY

REVAMPED WEBSITE BLOCKING AND IMPROVED ON 64-BIT OSs

SUBSCRIPTION LICENSING, \$25 P/Y

NEW PAID SUBSCRIPTIONS VALID FOR 3 PCs, NOT 1

It is time to go over the new elements of MalwareBytes Premium 2.0:

We now have a dashboard, scan, settings and history tab, friendly UI IMHO.

There are three types of scans, Threat Scan, Hyper Scan, and Custom Scan.

Then we have General Settings, this includes everything:

I think they made scanning so much more fun, here's my first scan <3:

As you can see, scanning includes new sectors: A Pre-Scanning Operation to check environment conditions

System Drivers

Master Boot Record

Physical Sectors

Memory Objects

Start-Up Objects

Registry Objects

Filesystem Objects (finally)

Heuristic Analysis, and once again, this is truly the second line of defense in fighting malware.

This looks like something i'd invest in. The GUI is much more professional, and the additions made are fantastic; just about every thing that users from mediocre to l33t would need for their virus removal purposes.

And no, it is still not an anti-virus. ?

[The reason why you have not heard of it till now is because it is not listed as a Beta on their website. You guys just have me, the one band R&D here. ? Enjoy the download everyone!](#)

[- Download MalwareBytes Anti-Malware 2.0 for FREE](#)

-

/discuss (it may look fake, but its' virus scanning engine is so efficient, you won't even know your running a full system scan)

Null Byte - March 15, 2014, 11:02 am

To be honest I still prefer the the old UI. Sometimes less is better.

phybe? - March 15, 2014, 11:07 am

I did not know about this, thanks for the share! Will definitely check it out!

T e s s e r a c t - March 15, 2014, 11:08 am

(Mar 15, 2014 11:02 AM)Null Byte Wrote: [\[CITE\]](#) To be honest I still prefer the the old UI. Sometimes less is better.

It may seem like a lot, but there are hardly 25 new settings that they have created. I am a simple, yet complex guy. This seems like a magnificent upgrade and restructure of the previous MalwareBytes Anti-Malware Pro edition.

Since I have a full time license, this is one amazing deal here since they've added lots of configurations desired by me. I am not so sure about you nully, but I like variation and option in my software, it makes it more customizable to my liking. It is worth every bit and byte.

DpzFAsq4UEK8 - March 15, 2014, 11:10 am

For some reason the look of it reminds me of those rogue AV's...

xhflhkeuhwguu34 - March 15, 2014, 11:14 am

I liked the old one. It's going to look bad. :C

Jony Blaze - March 15, 2014, 11:16 am

I like the old one. It is light and simple.

-Red Dragon

Tenaxium - March 15, 2014, 11:17 am

If I download this will I still be PRO like I am now?

(Mar 15, 2014 11:17 AM)TENAXIUM Wrote: [\[CITE\]](#) If I download this will I still be PRO like I am now?

The real-time protection module is a complete joke KFC, but I like the new UI. It reminds me of the Windows 8 UI, and it would fit perfectly (even though I don't support Windows 8). Actually, I thought that the newer interface looks descent, and nothing too hard core or too mediocre. It is a malware removal application, so I am not so sure what kind of a GUI you were expecting.

The scanning heuristics are what it is known for, that playing field has just been upped clearly. Rootkit scanning is impressive too, and a self-protection module has also been implemented. It is slowly leaning to the anti-virus-side of computer security, but still remains Anti-Malware.

The UI looks similar to a matte-themed UI which is what is currently in "style". If you looked at Windows 8, they too somewhat embrace the matte theme, flat, simple. They are trying to keep it simple, yet complex. I like that. The features added are cherries on top, some people could do without the cherries and I understand that. This is a good heads up to not upgrade when malwarebytes wants to install a "New Version" for you people ?

Eventually you guys will have to move on, and the current UI is not any better IMHO.

You will remain "PRO" like you currently are, Tenaxium. "PRO" has been changed to Premium, and you can install the older version of MalwareBytes if you feel it is appropriate.

Null Byte - March 15, 2014, 11:29 am

The new UI is bloated, flashy, and overdone. I bet the only people who will like it are the same people that prefer Windows 8 ?

T e s s e r a c t - March 15, 2014, 11:34 am

(Mar 15, 2014 11:29 AM)Null Byte Wrote: [\[CITE\]](#) The new UI is bloated, flashy, and overdone. I bet the only people who will like it are the same people that prefer Windows 8 ?

I suppose I'm the exception. It seems perfectly fine to me, and the features it now contains far outweigh its UI, all new UIs get "taking used to" which is primarily why people were afraid to venture into Windows 8. In honor of my reserved reasons, I know I dislike Windows 8. I am now seeing that live affect take place here, which is pretty funny ?. It is more logical to upgrade for the features than the UI. Functionality over fashion. And as you stated, the only people who will like it are the Developers who enjoy Windows 8, and people who like some more functionality than just the wheel.

Null Byte - March 15, 2014, 11:40 am

(Mar 15, 2014 11:34 AM)MaïTriCks Wrote: [\[CITE\]](#) people who like some more functionality than just the wheel.

Same scanning engine. Bloated UI.

I guess some people prefer GUI > functionality/stability

T e s s e r a c t - March 15, 2014, 11:43 am

(Mar 15, 2014 11:40 AM)Null Byte Wrote: [\[CITE\]](#) Same scanning engine. Bloated UI.

I guess some people prefer GUI > functionality/stability

It is more organized than bloated, features are added, the scanning engine is improved clearly, not arguing that one ?. It is full functional, and I have not experienced any instability yet. In fact, it is much faster than MalwareBytes 1.75, the engine has increased in stability and speed. The window won't hang if I move it around as it would have on the older version of MalwareBytes.?

Perfectly fine. I couldn't tell if there was a scan in progress since its so nimble, efficient and light weight.

Tenaxium - March 15, 2014, 11:48 am

Well then.

Downloaded this, wile it was installing it removed my current version of malware-bytes and randomly crashed

/seemslegit

help pls

EDIT: Redownloaded and worked fine, weird.

T e s s e r a c t - March 15, 2014, 11:51 am

(Mar 15, 2014 11:48 AM)TENAXIUM Wrote: [\[CITE\]](#) Well then.

/seemslegit

help pls

Really? Well, have you tried re-opening the application? First time use does take some time to load configurations such as licensing, the new scheduling process, and what not. It did the same for me, but now its smooth sailing. Please keep in mind this is a Beta version, and nothing released to the public. Yes, it is legit. I don't have time to go and imitate a potential MalwareBytes GUI and infect

you all.

Tenaxium - March 15, 2014, 11:51 am

(Mar 15, 2014 11:51 AM)MaiTriCks Wrote: [\[CITE\]](#) Really? Well, have you tried re-opening the application? (Mar 15, 2014 11:51 AM)TENAXIUM Wrote: [\[CITE\]](#) Redownloaded and worked fine, thanks!

Glad to hear that it is up and running. It is great to support a tool that you've used for a long time. It does not hurt the company and helps it by sending anonymous usage information. ?

If anybody should experience the same thing, it is not your computer, but Malware Bytes getting acustomed to your computer. It is pretty d**n amazing what they did here, the scanning engine is super efficient! ? I've never seen something like that except in ESET.

Jagster™ - March 15, 2014, 12:09 pm

The best part about this is the enthusiasm/excitement from Maitricks :D

OT: Maybe will switch later tonight, cbf to do it atm. Also, I don't like the UI tbh, but I say that to everything I update with different UI's, I just need to get used to it.

T e s s e r a c t - March 15, 2014, 12:20 pm

(Mar 15, 2014 12:12 PM)Ni:12 Wrote: [\[CITE\]](#) Now it just looks like one of those fake Anti-Viruses/Anti-Malwares.

I won't argue with that, it does look like a fake AV, even though it is 100% legit, a bit cartoony? I'd try it out if I were you, those several first post guys are missing out, big time. The features are the dopest dope i've ever doped.

Null Byte - March 15, 2014, 12:40 pm

Not stable.

Jagster™ - March 15, 2014, 12:41 pm

lolololol

yah figured these reports would be coming in soon enough

Sniperzzzz - March 15, 2014, 12:42 pm

Looks really bloated and the type of application with advertisements laying around here and there. It's overdone, I prefer the old GUI.

T e s s e r a c t - March 15, 2014, 12:43 pm

(Mar 15, 2014 12:40 PM)Null Byte Wrote: [\[CITE\]](#) Not stable.

Yes that is exactly what happened for me one time for a little bit, if you leave it alone it will re-bounce back and not hang, its operating really perfectly right now for me ?

Null Byte - March 15, 2014, 12:44 pm

(Mar 15, 2014 12:42 PM)Sniperzzzz Wrote: [\[CITE\]](#) Looks really bloated and the type of application with advertisements laying around here and there. It's overdone, I prefer the old GUI.

My thoughts exactly. I don't know why people like these bubbly polished designs over a simple and effective one. Their scanning engine wasn't even changed in the update, it's the exact same piece of software.

T e s s e r a c t - March 15, 2014, 12:49 pm

Wow. I'm sorry its not working out for everyone, its funny how my crappy i7 operating @2.1 can run this Beta really smoothly. It never hurts to try, and I can't wait for a stable release. MalwareBytes is IMHO excellent only for second opinion scanning, that is pretty much it. Website blocker, not that bad either.

(Mar 15, 2014 12:42 PM)Sniperzzzz Wrote: [\[CITE\]](#) Looks really bloated and the type of application with advertisements laying around here and there. It's overdone, I prefer the old GUI.

(Mar 15, 2014 12:44 PM)Null Byte Wrote: [\[CITE\]](#) My thoughts exactly. I don't know why people like these bubbly polished designs over a simple and effective one. Their scanning engine wasn't even changed in the update, it's the exact same piece of software.

(Mar 15, 2014 12:44 PM)KFC Watermelon Wrote: [\[CITE\]](#) Here is a list of the new features I could findBetter exclusions

Different interface

Self-Protection Module prevents any modification of the files, including changing of permissions. However, you can still kill the latest version through image file execution options (lol'd)

Malware protection module now prevents potentially unwated programs and modifications. Finally.

Better rootkit scanning for malware outside of userland

Malwarebytes isn't that great, it just has a decent heuristic engine and is good at detecting unwanted applications.

(Mar 15, 2014 12:45 PM)Ni:12 Wrote: [\[CITE\]](#) Yea, it's not even opening.
I'll stick to version 1.75.

Well, I have to apologize to those who it is not working out for. I think it is perfectly fine, and the newly added features work great. The engine is more efficient than the prior one which would freeze up on me, and my computer is not even all that great. Its running an Intel i7 clocking @2.1 Ghz, which is horrible. Oh well, it is going to work for some, and not for others. There is a reason why this is Beta. MalwareBytes is pretty damn good.

Null Byte - March 15, 2014, 1:44 pm

Dat self-protection module

Spoiler [\(Click to View\)](#)

Jagster™ - March 15, 2014, 1:53 pm

^^^ lulz --- thats some hardcore haxes

that was goood. +1

NinjaTaco - March 15, 2014, 4:39 pm

Not bad. I like the new features and the better stability!

Aura - March 15, 2014, 8:47 pm

(Mar 15, 2014 11:02 AM)Null Byte Wrote: [\[CITE\]](#) To be honest I still prefer the the old UI. Sometimes less is better.

I'll have to agree with you on that one. I think they should had kept the old GUI and just add the new features. I don't know what's the deal with companies wanting to make all their applications "flashy" and "cool". Most of the time, a simple GUI that covers all the basic needs is better than a "bloated" GUI.

Weebex - March 15, 2014, 8:56 pm

My god their UI now just looks too busy, I rather keep the old one, or at least make the damn ui not look all over the place.

Aura - March 15, 2014, 9:01 pm

(Mar 15, 2014 08:56 PM)BlueTigerSlayer Wrote: [\[CITE\]](#) My god their UI now just looks too busy, I rather keep the old one, or at least make the damn ui not look all over the place.

(Mar 15, 2014 08:57 PM)KFC Watermelon Wrote: [\[CITE\]](#) A good UI is one that is organized and easy to navigate. This is a prime example of a bad user interface IMO.

So glad to see that I'm not the only one thinking that.

Tesseract - March 15, 2014, 9:07 pm

(Mar 15, 2014 09:01 PM)Aur? Wrote: [\[CITE\]](#) So glad to see that I'm not the only one thinking that.

The UI is horrid, its just that the new functionality out numbers the GUI. It is not impossible to navigate, and can be navigated with ease. Don't think about the UI, and all will be well. There are more important things to worry about than a UI ?

Aura - March 15, 2014, 9:08 pm

(Mar 15, 2014 09:07 PM)MaiTriCks Wrote: [\[CITE\]](#) The UI is horrid, its just that the new functionality out numbers the GUI. It is not impossible to navigate, and can be navigated with ease.

It's not impossible but I still find it bloated. Will stick with the old version for a bit. Anyway, it's not like I'll get infected any time soon.

Tesseract - March 15, 2014, 9:14 pm

(Mar 15, 2014 09:08 PM)Aur? Wrote: [\[CITE\]](#) It's not impossible but I still find it bloated. Will stick with the old version for a bit. Anyway, it's not like I'll get infected any time soon.

Same with me about getting infected. I just found it extremely thrilling they've made a new version, and they are working on improving the dull current UI. The newer one seems bloated since there is so much things.

Tenaxium - March 16, 2014, 3:13 pm

I defiantly like this, not only the design but along with my first scan I found 2 AdWare applications the old version did not pick up.

Well done.

Tesseract - March 24, 2014, 12:02 pm

It is official all. MalwareBytes has been updated and exited the Beta stage. Time to get the word out there for all the old timers!

HellaCrow - March 25, 2014, 4:25 pm

I think the older one looked better and was cleaner but I guess this can be an upgrade if I can get used to it. Thanks for the share.

Strixk - March 26, 2014, 12:02 pm

I like the new style, it's more modern, sleek. People are stubborn when it comes to change, I imagine most people haven't even tried it out on there computers.

Talking business now, they have changed the style to make it more user friendly to apply to more people. Obviously then more people will buy premium and there profits increase.

Esme - March 26, 2014, 12:05 pm

Looks much more bloated and doesn't seem as simple for someone, say, my mother for example to use.

+mK - March 26, 2014, 12:11 pm

I don't know how I feel about it. I'm up for a change, I think the settings within the previous versions was rather lacking.

Crashed - March 26, 2014, 9:21 pm

I updated the day it came out. The UI doesn't matter to me, It's not a AV for me, I system scan every few weeks.

SIM-1676753 - March 26, 2014, 9:40 pm

User interface looks really inauthentic like of those fake anti-virus programs.

Reptar - March 26, 2014, 9:53 pm

I like it honestly, but the dashboard looks really stupid.

Didn't even have to find a new key to make it premium too which is a surprise.

Aura - March 27, 2014, 4:13 am

(Mar 26, 2014 09:40 PM)Dark Temptation Wrote: [\[CITE\]](#) User interface looks really inauthentic like of those fake anti-virus programs.

God, I thought I was the only one to think that about the new GUI.

Malwarebytes Scamware 2.0 ? ?

Mahoneys - March 27, 2014, 4:17 am

The UI looks fine to me, didn't know of this update. Thanks for this :)

Cyber Saint - March 27, 2014, 5:34 am

I didn't even realize this came out, thanks a lot for the share, OP!

Aura - March 27, 2014, 5:49 am

You probably summed up everything that I hate about Scamware 2.0 right now.

Xycon - April 7, 2014, 4:16 pm

I forgot one actually.

I hate I cant decide what I want it to log and what not.

Constantly keep getting logs of blocked connection in uTorrent to something.

Fine, block them, only good, just don't hog my logs full of it so that I cant find anything important if I wanted to.

franzl - April 7, 2014, 4:17 pm

(Apr 7, 2014 04:09 PM)Xycon Wrote: [\[CITE\]](#) -Don't like that it does not update its database anymore automatically on a daily bases. Though its very easy to make an task for this.

In the settings, the tab next to last is where you can make the settings for auto update and auto scan.

I believe I already said it was very easy to make an task to do this?

Inkling - April 7, 2014, 4:25 pm

Seems this version is actually more stable for me than 1.75 haha.

franzl - April 7, 2014, 4:34 pm

Oh yes, awkward. Sorry. I read the sentence and thought, he, I just saw this.

OK. It's late in the night here, I am little bit tired. ?

Novo - April 7, 2014, 6:19 pm

The new layout looks awesome, I really like what they have done. And yes they are hands down the best for protecting your computer.

Well, it isn't the "Best" as Malwarebytes won't beat the efficiency of a real Antivirus.

-?MW- - April 7, 2014, 6:21 pm

I hated the new GUI, so I went and downloaded and earlier version again

Same here. I still have my MBAM 1.75 installer and I'll keep it for a long time.

Almighty Sosa™ - April 7, 2014, 8:06 pm

Thanks for the share! I like the old UI better tho.

cyberducky - April 7, 2014, 8:07 pm

Just got the MB update today. The new design is kinda, weird..

Null Byte - April 7, 2014, 8:18 pm

After restarting my computer, MBAM automatically updated itself to this. FML.

I have copies of MalwareBytes 1.75 (version before this) if anyone would like a copy, shoot me a PM. ?

It looks old fashioned and it is easy to install.

DUDE! Could you PM me a download link to this?

Thank you lord and savior ?

BestThreadEver - April 8, 2014, 4:28 pm

It looks like the new Malwarebytes also comes with a new features like the built-in Anti-rootkit, and the GUI is not the only thing that's changed. So wouldn't it be worth installing the new version?

Aura - April 8, 2014, 4:34 pm

There's also Malwarebytes Anti-RootKit if you need it, it's a separate program. But I think it's still in BETA.
