Thread: [WWW.LUKESINSTABOT.X10.MX | INSTAGRAM BOT | HASHTAG LIKER BOT | BRAND NEW |](#)

-???- - March 16, 2014, 8:18 am

Credits to a friend of mine for the source (dubsteponion)!

This bot works on a basis of you put in the hastag you want to like and how many of them you want to like and it will go through all pictures on instagram with the hashtag #HF for example and like them, 50% of the time people will see you liked their photos, after this they basically always follow you back and like most of your photos in return!

It's not an autoliker/autofollower for your own profile, but it sure does earn you a lot of followers and likes.

When choosing how many to like I usually go for 1,000,000, that does the trick.

I currently have around 2,000 followers from this on my main account and around 150 likes on most of my photos! (Not giving out my username for obvious reasons)

Well, enjoy guys!

Hey guys, just ing this thread, I spent time on this site and this thread never got any attention.

• ????c??? • - March 30, 2014, 10:55 am

Considering this redirects to a login page for instagram, it looks a bit fishy to me as if you are trying to phish accounts.

-???- - March 30, 2014, 10:58 am

I can show you the code.

It goes to Instagrams actual site to authorize the application.

eightz - March 30, 2014, 10:59 am

It has HTTPS authentication, it's secure Addiction. :)

I believe you, don't worry about that. Sorry if it came across as more of an accusation.

Can you elaborate on how this works? I may set up a new insta if it will help me get followers quicker.

eightz - March 30, 2014, 11:03 am

Working well so far.

Nice job, OP.

Once you authorize the application with your account you can type in a certain hashtag in the text box on my main site and choose how many to like, e.g 1,000,000 it would like 1,000,000 (if that many was on IG) under the hashtag you typed, for example #swag or #a will have more than a million, so choose one of those.

It will like all pictures with those tags automatically.

99% of the time when you like someones picture they usually follow you, or like all of your pictures in return.

:)

May I ask what tag you entered?

It'd help me with the problem.

TheSoul999 - March 30, 2014, 12:38 pm

Worked for me, thank you very much!

#nike

Was relevant to the picture I uploaded and has the same hashtag included in the description.

Don't put the "#" in the text box; just "nike" :)

Make sure you leave a vouch afterwards Addiction<3

'ing this thread!

Hoping to get more members, took me a while to code it.
