Thank you for this, I really appreciate it!

(Mar 16, 2014 08:13 PM)DarkTrace Wrote: [\[CITE\]](#) Thank you for this, I really appreciate it!! should probably mention this, but no CID generator works 100%. Mine stores the CIDS and prevents duplication. So everyone keep that in mind. There have been a few valid and 1 banned CIDs from this program.

OpenSourcerer - March 17, 2014, 8:54 am

I can't wait till I get home to try this, thanks op.

(Mar 17, 2014 09:38 PM)G?ry Wrote: [\[CITE\]](#) Whats this supposed to be? Sorry for being a noob. Each PS3 console has it's own unique ID. When your ID get's banned you can no longer use it with that ID that is known as a console ban. But if you have a jailbroken PS3 you can the CID (Console ID) so you are no loner banned. Hope this helps ?

woofdawg23 - March 18, 2014, 12:48 pm

What are some ways to use this? I am new to this

Decentral - March 21, 2014, 1:19 am

What is a CID? I would download but I don't now if I even have use for this lol.

Gundam X - March 21, 2014, 5:08 am

What this program does is generate a CID or Conzole ID which let's you play online if you have a console ban. This generates the possibilities but doesn't let you duplicate them so every time someone generates one you're closer to finding a valid one. Valid ones have been found you just need to be lucky.

rickyzampa - April 2, 2014, 12:14 pm

i'll give it a try!! thanks!!

i hope it works!!

A CID is a Console ID, when Sony console ban you they ban your CID.
With a jailbroken PS3 you have the ability to change your CID to unban your console.

Unfortunately there's no way to do it any faster than this as far as I know.

Anyways thanks for the share man. By the way, what language was this coded in?

Why are people still commenting on this thread? It's from 2014 and I doubt that anyone would still use a program like this. Due to the fact that some forum communities have members posting CID's daily. With the high use of these public console IDs they all die out in under 2 hours or so.
