Thread: [SurveyLocker](#) | [Top Quality](#) | [C++](#) | [Only 30\\$](#) | [Lock Everything](#) | [Builder](#)

Qmz_ - March 17, 2014, 12:37 pm

You won't be disappointed. This is the best survey locker you have ever seen, or will see. Stop using those .NET / VB6 shittwares. This is THE locker.

Builder: 300\$

Bin: 50\$

Doesn't require any dependencies such as:

- > .NET Framework
- > Java
- > CRT (C Run-Time Libraries)
- > Etc.

Tested on the following OS's:

- > Windows 8.1 X86
- > Windows 8.1 X64
- > Windows 7 X86
- > Windows 7 X64
- > Windows 8 X64
- > Windows XP X86

Here are the main features:

- > Terminate all processes, except processes on the whitelist
- > Prevent user from using tools, such as:
 - > Task manager
 - > Regedit
 - > Workstation
 - > Password changing
 - > Commandline
 - > Fast user swithing
 - > Normal shut down
 - > Normal log off
 - > User account control
 - > System restore
 - > Safemode/Safe boot
 - > Msconfig
- > Plus other applications or actions that the user might try for unlocking his PC.
- > Process & Registry key is hidden by using ring-3 hooks. [Backup protection]

-> If user manages somehow to download/get a tool(av-like) to forcefully restore his system, he is not able to execute and or find it. [Next release] See example:

https://hostr.co/file/970/ngetlwJa5wJg/screen_2014-03-23.png

-> If the application doesn't have the necessary rights, UAC Social engineering is used in order to achieve the needed privileges. If the SE fails, it keeps social engineering the user several times, with a XX seconds between the SE attempts.

-> A lot more features, that aren't mentioned. There isn't any unnecessary code, and everything is made for the best compability for all windows OS's and to prevent target from unlocking his PC without completing the survey. Total lines of code is over 5000 lines.

Unlike other lockers, this survey-locker actually forces the user to complete a survey in order to unlock the PC.

This is for people who is interested on using surveylockers, but haven't yet find any locker that is capable of totally locking the PC.

Any inexperienced/average PC user is NOT able to unlock the computer.

The amount of completed surveys per executed file is very high - unlike in other surveylockers.

Questions/comments & Answers

Q: Can I purchase via paypal/payza/any other than bitcoin?

A: No. Only bitcoin is accepted.

Q: How hard it is to remove it?

A: Very. We've blocked nearly everything to prevent user from unlocking PC without completing a survey.

Q: What are the main usage cases for this software?

A: Is someone using your PC without access? Lock your PC - only you are able to recover it!

Q: What crypters are compatible with this?

A: Any crypter with selfinjection should work with the EXE. We haven't tested any commercial crypter, only a basic C++ crypter with selfinjection.

Our survey locker gets you really what you're paying for. This for users who wants to make money by purchasing a surveylocker, not for people who wants to loose money by purchasing a surveylocker.

Most lockers sold on hackforums(generally made in vb/c#) that costs ~1-5\$ per bin, aren't really worth purchasing. If this costs 60\$ per bin, and you have tier 1/fr/us/etc. bots, you are able to 10x the bin price in no time - because it's nearly impossible to bypass. In most cases where someone purchases a survey locker, they won't make their moneys back because the locker is so easy to bypass.

If someone knows for a fact that their locker has high "completed survey per install", they wouldn't be selling it for such a ridiculous prices. ?

SIM-1230893 - March 18, 2014, 3:48 am

Hey i want to buy it , but i'm french so it works world wide ? and i know with french installations i can make lot of money

Cook John - March 18, 2014, 5:26 am

hmmm.. One thing I notice about survey lockers in HF marketplace is when you run it on startup and you reboot your PC it will ask " would you like to run blah blah blah.." and then when you click "run" the locker will execute if you click the "cancel" nothing will happen which is shitty because the user will just press cancel and he has unlocked his PC.

Does this locker has that kind of problem ? I might be interested in buying. BTW I will be waiting for your builder :) If it cost \$100 I'm good to go as long as we can lock the PC completely. I'll be waiting for the release of it :) it could be the null group best application made :)

Bin stands for a single binary file (that was built using the builder)

This sales thread is still alive just let you know

Qmz_ - May 27, 2014, 6:11 am

Yup, like NL2TP said.

Updated prices, now price is affordable for everyone.

nL2TP - May 27, 2014, 7:39 am

Yep prices are updated Its much more affordable now :D

Prices changed. Contact to purchase.

Stop using these .NET and VB6 shitwares, if you're not looking just for fancy builder gui - but something that actually makes you money, this is your choice.

One thing I notice about survey lockers in HF marketplace is when you run it on startup and you reboot your PC it will ask " would you like to run blah blah blah.." and then when you click "run" the locker will execute if you click the "cancel" nothing will happen which is shitty because the user will just press cancel and he has unlocked his PC.

Does this locker has that kind of problem ? I might be interested in buying. BTW I will be waiting for your builder :) If it cost \$100 I'm good to go as long as we can lock the PC completely. I'll be waiting for the release of it :) it could be the null group best application made :)

?? Thank you for the advice and we are happy to say u are nice man and good man u have all the qualification s ?
