Thread: [Z3r0xb0t Core Public Release \[v2.0 - 2010/05/10\] USB/MSN/UDP DDOS](#)

wernesgruner - May 9, 2010, 9:28 pm

THE EXPLOITS ON THIS SOURCE ARE OUTDATED (12 Feb of 2012)

LINKS UPDATED 2013-04-11

Hello!

I know that I stated that I would not release any more version of z3r0xb0t Core. But as I am leaving the scene, I am releasing a second Public Version for you guys. I hope that rippers and noobs coders will be very pissed when they will know that you can get some very good quality stuff for free. This is the only real version of z3r0xb0t and the most advanced at the moment. Of course, the usb spreading 0day exploits and some valuable code lines were removed and replaced by less advanced stuff so I can still make a bit of money ? .

So yea I hope you guys enjoy and don't forget that a word of thank is always appreciated. Note that I am using l1nkbucks to get some money out of this. I usually use \$harecash but I decided that I wouldn't use it this time to make it easier for you guys to get the source. So please I ask you to be understanding and to not repost/rip my stuff.

Please note that if you do [prefix]version (ex: !version) you will see that this made from z3r0xb0t core and this function is implemented in precompiled libraries. So if you want to download this source to rip it, pass away. But if you are a skilled programmer you should find how to remove this little limitation.

Finally, this is based on Asper Core but it is greatly improved, you can always download Asper Core and compare it with this z3r0xb0t public release and you will see what I mean.

I know this source lacks memory management but I will most certainly provide a fix in the v2.1

Features:

- Supports all Microsoft operating systems
- No duplicate bots. (Mutex)
- Registry Persistence (User cant remove bot from startup.)
- Firewall Bypass
- UAC Bypass (Doesn't work anymore for !download - 2011-29-11 12:30PM)
- Backup IRC server Support
- Small Bin Size
- Good Update / Download command! (No more crappy update rates!)
- Silence Command. (Bots dont spam channel)
- Visit Command (Silent, and Normal!)
- Ping Pong to prevent bots from pinging out

- UDP DDoS (optional without price change. DDoS lowers stability, as with any bot, but if you really want it you can have it)
- Direct IRC information encryption(Don't get your bots stolen)
- Coded in C++, no need for .NET! (More infections.)
- Highly optimized routines and a very clean code for HIGH stability.
- New security features

Compilation Instructions :

LINK WAS REMOVED DUE TO IT BEING BROKEN. WILL PUT THE SITE BACK UP

For Educational purposes only! Only infect your own network with our products. Using this product with any criminal intends might a be a criminal offence punishable by several years of jail time and an enormous fine. Do not use this product to conduct any illegal activity.By using our products you agree that you will not use our products for criminal intends and that you will not held us responsible for your actions. Reading this is mandatory.

Commands:

Code Login - !login <password>

Logout - !logout

Private Login - !privlogin <password>

Join - !join <channel>

Part - !leave <channel>

Update - !update <fileURL> <tmpfilename> <version>

Download - !download <fileURL> <tmpfilename>

Silence - !silence <1/0>

Remove - !remove <ID/ALL> EX:!remove 4343 Or !remove ALL

Version - !version

Visit - !visit <url> <1/0>

MsnSpread -!msn <message>

Cycle - !dc <TimeInSeconds>

Find Bot Stealers - !protect <1/0> <ProtectPass> | 1 = Protect and 0 = Unprotect | ProtectPass is used to bypass normal login so no one knows your pass

UDP Flood - !udp IP Port NumberOfPackets PacketSize Delay(Seconds Timeout(Seconds)

Notes for DDOS:

NumberOfPackets = Will determine the length of the flood.Once the number of packet send reaches 0, the bots stop flood and go back to your channel.

PacketSize = Only use the following range: 1024 to 102400

Delay = This will be the distance in second between each packets. Use 1000 to 100 for better performance. Use bigger latency for slow networks.

Timeout = This is a security measure only. This is the ABSOLUTE MAXIMUM length of your flood. This is to prevent bot loss its a slow computer

1>z3r0xWrMod - 0 error(s), 26 warning(s)

The login command not working...

wernesgruner - May 9, 2010, 10:45 pm

Ok.

First you have no errors. Just a warnings that doesn't affect compilation. Second, the login might not be working before you didn't respect the case when configuring your channel name. Don't forget that everything is case sensitive. You can try to login using !privlogin if this works this means that there is a problem with your channel name.

BFF HA Y AN BOI - May 9, 2010, 10:48 pm

(May 9, 2010 10:45 PM)wernesgruner Wrote: [\[CITE\]](#) Ok.

No idea what you mean, but the bot joins. I just can't login to it.

I do !login pass

No response.

wernesgruner - May 9, 2010, 10:53 pm

(May 9, 2010 10:48 PM)BFF HA Y AN BOI Wrote: [\[CITE\]](#) No idea what you mean, but the bot joins. I just can't login to it.

I do !login pass

No response.

Lol. You really should have read the docs I provided with the bot...

In the config there is the following instruction. What it does it decided weither your bot will answer to your commands by sending a confirmation or not.

Code BOOL silenced = TRUE;

So all you have to do is toggle silence in the source or by using the following command:

To make the bot verbose

Code !silence 0

To silence the bot.

Code !silence 1

Then the bot will display a confirmation if you enter a command.

Oxidium - May 9, 2010, 11:03 pm

Edit: Sorry didn't see the post above me.

Double Edit: Nope still won't work and I'm pretty sure it's not just that it's silent because I did the login command and then the remove command and nothing.

BFF HA Y AN BOI - May 9, 2010, 11:06 pm

Thanks for the help! Great bot.

bblokar - May 9, 2010, 11:17 pm

Does this bot support ms08-67 mass spread?

wernesgruner - May 9, 2010, 11:19 pm

No, not natively. But you can easily implement the exploit or use an external spreader exploiting ms08-67 leak.

Anyways this is pretty old and ms08-67 was patched A LOOOOONNNGGG time ago.

dotatoad - May 9, 2010, 11:23 pm

looks kinda cool and hell yeah i think im gonna try out shitcasg too
so their pay is good ;P

wernesgruner - May 10, 2010, 12:34 am

The documentation is up! Fell free to register and ask you question there for a quick answer!

can you help? im pretty noob at compiling c++ bots

wernesgruner - May 10, 2010, 11:02 am

You opened the wrong file. Open "z3r0xb0t.vcproj" in Visual C++ 2010

Make sure you aren't compiling in debug mode but release mode.

xnightmare - May 10, 2010, 11:05 am

allright,ill give it another shot,thanks!

GoS AnThonY - May 10, 2010, 11:09 am

I need a good botkiller now != Thanks for the release broskito

dime111 - May 10, 2010, 11:23 am

cant be compile under c++ 2008 ?

and thanks for free release

regards

xnightmare - May 10, 2010, 11:27 am

yea i was gonna ask that too,can we compile it with c++ 2008?

wernesgruner - May 10, 2010, 11:31 am

It can be compiled if with VC++ 2008. It was made on VC++ 2008 and ported to VC++ 2010.

EDIT: Wow why does my thread got 1 star? Its a pretty big release im doing here and its free. Why would some one do that?

hockeyman271 - May 10, 2010, 11:58 am

Sweeeet! I loved just your base of zeroxbot, can't wait to start spreading this one!!!! Thanks!!

edit: id 5 star if i was leet! sorry for people being fucking dickheads ?

bblokar - May 10, 2010, 12:12 pm

Make sure you ain't using ad blocker that blocks l1nckbucks.

SevenEleven - May 10, 2010, 12:50 pm

thanks, just trying bots for the first time today. Going to give yours a shot.

proXace™ - May 10, 2010, 1:05 pm

does the crypter FUD any file?

or just your bot?

wernesgruner - May 10, 2010, 1:28 pm

The crypter prevents server hexing its not intended to make anything FUD.

Kiproko - May 10, 2010, 3:21 pm

Wow awesome release! Works like a charm! Took me 5 minutes to compile!

GRRREEEEEEAAAATTTTTT stuff in there.

wernesgruner - May 10, 2010, 3:54 pm

The FAQ now contains a compilation tutorial! Read it before asking question!

hockeyman271 - May 10, 2010, 4:56 pm

i cant do any commands! i can login, use the version command and thats it! nothing else works!!!
not even the remove command works? help anyone?

wernesgruner - May 10, 2010, 5:14 pm

Have you looked at the FAQ?

Make sure that you respected the case when configuring your bot.

<http://sgpup.com/zbtfag/index.php?action=artikel&cat=3&id=5&artlang=en>

And try the following command chain

!privlogin PASSWORD | !silence 0 | !visit <http://google.com> | !logout

If this works then it means that this is your problem.

hockeyman271 - May 10, 2010, 5:17 pm

(May 10, 2010 05:14 PM)wernesgruner Wrote: [\[CITE\]](#) Have you looked at the FAQ?

(May 10, 2010 05:49 PM)Witch Wrote: [\[CITE\]](#) Ah...where's the ssyn flood...I loved that in old z3r0b0t ;(

Oh well. Too bad it didn't work without your bots pinging completely out.

wernesgruner - May 10, 2010, 7:01 pm

Yes well, if the arguments were correctly filled, they wouldn't pingout.

BFF HA Y AN BOI - May 10, 2010, 7:11 pm

Wenesgruner.. If you add SSYN and possibly SSL you'll have the best public bot available.

wernesgruner - May 10, 2010, 7:15 pm

SSL is already implemented in z3r0xb0t. I've had used YaSSL and it works great! The thing is that it's really confusing and hard to install. It also has big compatibility problems with some with WK2 and WK8.

witchitized - May 10, 2010, 8:11 pm

Can haz ssyn source?

:3

StephenRoos - May 10, 2010, 8:28 pm

With SSYN and UDP flood this would probably be the best free IRC bot available.

Do the spreads (MSN, USB) work pretty well?

wernesgruner - May 10, 2010, 8:46 pm

Yes they actually work great!

witchitized - May 10, 2010, 8:47 pm

STOP IGNORING OUR PLEA AND BEGGING FOR SSYN!

We must have it :3

SSYN OR I SHALL DECLARE.....nvm. Can't really do anything about it if you say no :|

wernesgruner - May 10, 2010, 9:02 pm

Well I don't even have the old script and I am busy doing something else at the moment.

inFerneT - May 10, 2010, 11:50 pm

is stable bot ??????

bblokar - May 10, 2010, 11:57 pm

Lulzy release, thanks!

Kyle. - May 10, 2010, 11:58 pm

is it stable? also it looks good

wernesgruner - May 11, 2010, 12:34 am

Yes... its an old private blot...

AdV - May 11, 2010, 12:42 am

I like how in an 8 pages thread no-one has spotted the fairly critical bugs in the code. Looks like everyone is a leech here? :)

L@g - May 11, 2010, 6:54 am

oo yea nice job
thanks :)

anonymous-1664 - May 11, 2010, 8:27 am

Well I've been saying all these asper based bots are filled with crap ?

I guess all the leeches likes crap a lot ?

I must say this source gave me a couple ideas on what to work on, but yeah I really don't like how they are implemented really :/ Like the visit code. More error checks and handling could go in there, this would also makes it that much harder to guess commands.

I also don't get what's with the login command... Asper has an host auth going as a base, and I really don't see what's wrong with it. Almost impossible to bypass IMO if your IRCd is well configured.

Anyways, again thx for the source gave me ideas, and people please continue on using it, will make less bots running in the long run ?
?

Yall ugratefull lol

Ciall

BFF HA Y AN BOI - May 11, 2010, 2:50 pm

What's the bug?

Cause I'm using this bot.

wernesgruner - May 11, 2010, 3:51 pm

Memory leaks. The program doesn't free the memory its using and so its keeps consuming more and more memory. But well that grows slowly and a simple reboot will make it good to go for at couple a days again. Its just fail for very slow machines.

BFF HA Y AN BOI - May 11, 2010, 4:02 pm

Can I get a fix soon?

StephenRoos - May 11, 2010, 5:15 pm

75 warnings when compiling it...but hey, it works.

Also 131 kb bin is fucking gigantic, but not that big of a deal after you bind it i suppose.

Da Loser - May 11, 2010, 8:26 pm

(May 11, 2010 05:15 PM)StephenRoos Wrote: [\[CITE\]](#) 75 warnings when compiling it...but hey, it works.

Kraiser - May 12, 2010, 1:55 pm

If u would add TCP flood and fix memory leaks surely it will be best free irc bot out here.

StephenRoos - May 12, 2010, 2:01 pm

Oh I forgot to ask, does this infect all windows up to 7?

wernesgruner - May 12, 2010, 2:14 pm

Yes! It does of course!

anonymous-1664 - May 12, 2010, 3:03 pm

(May 12, 2010 02:14 PM)wernesgruner Wrote: [\[CITE\]](#) Yes! It does of course!

Had a look at the code to see where you bypass Win7 UAC and couldn't find it, could you please point me to the snippet that does it?

thx ?

Also had a look at the code for your leaks... why don't you just stick to stack in the first place?

StephenRoos - May 12, 2010, 8:24 pm

Does the MSN spread automatically transfer the infected file to them over MSN, or do you need to include a link to a download of the file in the MSN message that you command them to send?

alreshedi - May 13, 2010, 12:25 am

Does not spread in the usb

Please make sure

About How many ram does application takes after 24 hours ?

witchitized - May 13, 2010, 6:50 am

It takes 4 bytes every time you issue a command (as far as I know).

I've left it on for 2 days on myself, and currently, it is only using 1,568K.

The memory leak is very small...even if you spammed them user with 25 UDP floods a day, it would only amount to an additional 100 BYTES which is basically nothing.

And when they restart their PC, the leak is gone so its back to normal size, making this nearly undetectable as far as finding it from seeing the huge memory usage on it.

AdV - May 13, 2010, 3:23 pm

(May 13, 2010 06:50 AM)Witch Wrote: [\[CITE\]](#) It takes 4 bytes every time you issue a command (as far as I know). This is false. You're talking about the leaks in swarm bot, and even then it's not accurate.

The string decryption function (which gets called a dozen times with much longer strings than 4 bytes) leaks all of the string size in memory. on top of that it also has the same 4 byte leak that swarm bot has in its random number function and a variable sized leak (size parameter given with the command) every time you give an UDP flood command.

Bottom line is, if you know about the leaks it takes less than half an hour to fix them. Hell, it took me under 5 minutes to find them. If you can't fix these leaks you have no business with using a botnet.

wernesgruner - May 13, 2010, 3:54 pm

Its already fixed. I am just releasing the fix in the 2.1

(May 9, 2010 09:44 PM)Clay Wrote: [\[CITE\]](#) Okay mister i release everything i code via shitcash link.
?

Thanks for the release, it's appreciated.I thought that very same thing... Then you whine if we upload it elsewhere. Fail.

watinator - May 29, 2010, 3:22 pm

I must have shit luck, but doesn't make it onto IRC at all.. :\

Would be cool if someone could help :<

Zimton - May 30, 2010, 2:15 am

AWESOME, I was looking for something like this and stable! Even though some of the commands are missing its still great for a public release.

Da Saint - May 30, 2010, 2:18 am

Oh my god, thanks for the non shitcash link xD, beast program :) thank you

Poman - May 30, 2010, 5:46 am

How it is correct?

```
char cfg_channel[] = "#(cripted_channel)";  
or
```

```
char cfg_channel[] = "(cripted_channel)";
```

and..

After reboot bot kills explorer on xp sp3
???

wernesgruner - June 5, 2010, 3:00 am

Yes its a known bug. Fixed in the 2.1

Sorry guys I've been busy lately.

Kraiser - June 6, 2010, 9:36 am

(Jun 5, 2010 03:00 AM)wernesgruner Wrote: [\[CITE\]](#) Yes its a known bug. Fixed in the 2.1

Sorry guys I've been busy lately.

Can you just make UDP stronger and then bot will be awesome :-)

nosferatu - June 9, 2010, 1:04 am

get it startup on win7 ?

and where can i take 2.1 version? :)

Naven - June 9, 2010, 10:47 am

Any ETA for 2.1? And will be it free also?

xoptik - June 9, 2010, 5:50 pm

thanxs dude i will check it out :D

wernesgruner - June 17, 2010, 7:24 pm

No problems! I believe that more people should share thier work.

Resistance - June 17, 2010, 8:51 pm

Thanks for the release..

[to short]

qwertylol - June 18, 2010, 7:50 am

I love this bot, i use at as base for my own bot... It would be awesome if you add some strong ddos cmds indeed :) And use threads so you can do !stopfloods

crimepack - June 18, 2010, 8:06 am

so you changed a few function names, copy pasted a few functions, and call it 'your core' ? i pity whoever bought this cp job

qwertylol - June 18, 2010, 8:09 am

I don't call it my core lmao... I said i use this as base for my bot, i mean, i added some functions, changed a few things and removed some things.

WrZz - June 18, 2010, 8:38 am

(Jun 18, 2010 08:09 AM)qwertylol Wrote: [\[CITE\]](#) I don't call it my core lmao... I said i use this as base for my bot, i mean, i added some functions, changed a few things and removed some things.

Crimepack was speaking about the title of this thread itself, in fact.

Mar0x - June 19, 2010, 8:00 am

Awesome work. I'm having fun with the source, thanks for the share.

N00B3R - June 20, 2010, 7:44 am

On compiling I'm getting this: (VB 2008 c++)

I do not have a anti virus installed, so it can not be anything to do with that.

n00bz0r - June 22, 2010, 4:50 pm

nice share, I am currently trying to learn how to code and this source is definetely a good way to start!

N00B3R - June 23, 2010, 3:21 pm

Hi there wernesgruner,

Today I have been testing the bot again and again. What I noticed is that the bot doesn't connect when testing on a VM but it does on a regular computer.

Is this normal?

Second question is about the supported OS's. It says all OS's supported, is that also the 64-bit variants of those OS's?

Another one: when I execute this on a VM, the Wireshark says that the bot is connecting to the IRC, but it doesn't enter it whilst it does enter when executing on a normal PC. Also, the Wireshark gives out unencrypted IRC log-in codes which isn't meant to be.

Further on the Wireshark exactly gives out the DNS the server is connecting too.

Can you clear these things up please?

Thanks in advance.

Sensenmann - June 23, 2010, 3:42 pm

not hard to create your own project file. create a new project n just import any res files, c files, h files etc into the appropriate folders.

(Jun 23, 2010 03:21 PM)N00B3R Wrote: [\[CITE\]](#) Hi there wernesgruner,

depending if this bot has antis or not determines if it will run on a select few virtual environments. however seeing as the bot shows its connecting on the vm in wireshark just not joining i am not sure of.

also there isnt anything in this bot that you can just compile off the bat and the traffic be encrypted you have to take the time and get the ssl libraries to work with its irc connection and that your IRCd has ssl installed so you can start a secure socket layer port for the bot to connect to.

dont expect this to come without a price, your bot will be in the range of 1-3mb with the ssl libs. not worth it, just change all your cmds on the ircd (JOIN NICK PART etc dont touch topic unless you know what your doing.

and make your irc bot operate using the new modded ircd commands.

hope this helped.

regards.

Thanks for your reply, so in other words:

- 1) I have to enable SSL on my IRC-server?
- 2) I have to change the commands on the IRC-server?

Ok now... How does the second thing help the bot connecting?

On Wireshark I see that the bot tries connecting to the VPS but it always returns with a: No connection can be made or something equal to that.

Sutton2k9 - June 24, 2010, 9:53 am

I have compiled the bot easy like all the rest but i can't seem to login to the bot, it shows in my irc but the commands don't seem to work. is there something i did wrong

Kraiser - June 24, 2010, 9:58 am

U should add a feature which will inject the bot into for example explorer.exe instead of creating another process for bot.

Sensenmann - June 24, 2010, 10:01 am

(Jun 24, 2010 09:58 AM)Kraiser Wrote: [\[CITE\]](#) U should add a feature which will inject the bot into for example explorer.exe instead of creating another process for bot.

the src is public along with probably half a dozen public injection snippets, c/p it to the apps main initiation and your good to go.

N00B3R - June 24, 2010, 10:52 am

Try "!!login yourpassword" => "!!silence 0" => "!!version" or "!!login yourpassword" => "!!silence 0" =>

"!logout" => "!login".

regals61 - June 24, 2010, 2:11 pm

looks good bro.. mabe this costs money or free?

wernesgruner - June 25, 2010, 5:52 am

I originally planned on implementing SSL so thats why we didn't bother with antis. Traffic encryption would have been the best solution but, packing ssl libraries in a botnet was just ridiculous, the size of the bin was massive.

So yea, if I wasn't that busy and lazy I would have used yassl but I don't know shit about these libraries.

Itz_Thymine - July 2, 2010, 7:59 pm

wow, this has to be the best free irc bot out right now.

t0fx - July 3, 2010, 5:34 am

it's nice to share your work, but I have a problem compiling in debug or release config I still have 4 errors :

```
Code install.cpp(9) : error C2065: '_snprintf_s' : undeclared identifier

I'm currently trying this right nao :P

Splodge0007 - July 5, 2010, 8:34 pm

Would be good if it actually responded to commands such as !login

watinator - July 5, 2010, 8:35 pm

(Jul 5, 2010 08:34 PM)splodge0007 Wrote: [\[CITE\]](#) Would be good if it actually responded to commands such as !login

did you switch silenced to false...?

Splodge0007 - July 5, 2010, 8:36 pm

(Jul 5, 2010 08:35 PM)watinator Wrote: [\[CITE\]](#) did you switch silenced to false...?

No. It doesn't respond at all. After trying the kill command it didn't work as it didn't part either.

Nvm thanks i sorted it. Changed the silenced to "True"

watinator - July 5, 2010, 8:39 pm

(Jul 5, 2010 08:36 PM)splodge0007 Wrote: [\[CITE\]](#) No. It doesn't respond at all. After trying the kill command it didn't work as it didn't part either.

Nvm thanks i sorted it. Changed the silenced to "True"

it's suppose to be false, but ok

BravoTwoZero - July 6, 2010, 4:49 am

Can someone just re-upload it!!

CowzFTP - July 6, 2010, 5:59 am

HSN - July 6, 2010, 7:00 am

Hey how can i buy the Priv8 Version ?

wernesgruner - July 6, 2010, 2:28 pm

There ain't no private version of this.

hklcf - July 7, 2010, 8:17 am

Very nice, thanks for share. Let's me try!

Grrr...Trolls - July 7, 2010, 4:42 pm

thx again for share, one question:

Do the bots attempt to connect endlessly? Like... If it fails, does it try connecting to IRC server again right after?

I want to only turn my server on when I decide to use my bots, for security reasons... I just dont want it to take 1 hour to get my bots back on the server

gerardoxd - July 8, 2010, 2:03 pm

Command does not work: !visit
or anyone knows how to operate?

wernesgruner - July 8, 2010, 2:55 pm

!visit <url> <1/0>

1 stands as silenced and 0 unsilenced.

gerardoxd - July 10, 2010, 11:27 am

When I run this command I get this:

<@ Wir> !visit <http://google.com> <1/0>

Opened in Hidden mode <http://google.com>

How can I not be in stealth mode?

wernesgruner - July 10, 2010, 11:30 am

Stealth Mode

!visit <http://google.com> 0

Visible Mode

!visit <http://google.com> 1

Sex-Android - July 10, 2010, 12:37 pm

Only one thing to say:

this is a beast !

It's so f*cking stable, it works so well, thank you wernesgruner.

gerardoxd - July 10, 2010, 12:58 pm

It works perfectly =D....

Anyone know where I can get or buy a cryter to make the botnet z3r0xb0t FUD

Anyone who has or sells the crypter send a PM

shakethefloor - July 10, 2010, 1:14 pm

is there any reason why the crypter is kicking out the same file every time, no matter what i put nevermind, wrong file name D:

maore - July 10, 2010, 1:21 pm

Thaks man :)you helped me alot

shakethefloor - July 10, 2010, 2:30 pm

sorry to post again, anyone know how to fix this? i've googled and tried every solution, copied it into

my projects etc etc, can anyone help please.

Code Error 22 general error c10100b1: Failed to load file ".\Release\z3r0xb0t.exe". The system cannot find the file specified. mt.exe z3r0xWrMod

wernesgruner - July 10, 2010, 4:26 pm

(Jul 10, 2010 02:30 PM)shakethefloor Wrote: [\[CITE\]](#) sorry to post again, anyone know how to fix this? i've googled and tried every solution, copied it into my projects etc etc, can anyone help please.

You're antivirus is deleting the output file.

Whit? - July 10, 2010, 7:18 pm

hmm my issue with this is, i compile it after setting up irc HEY PRESTO it connects.. go to sleep wake up try it again never connects, have it download executed onto about 300 bots... none connect??? whats the issue any1 have any idea pm me if u can help

wernesgruner - July 11, 2010, 9:44 am

Thats a pretty weird issue. Is your IRC on your own network?

XurXes - July 11, 2010, 10:19 am

do i edit irc.cpp to edit the details to my irc, if so where?

illu444 - July 11, 2010, 10:48 am

Look through the Header files, there is a file called config.h, there you should edit the details.

Edit:

Wernesgruener, what do you mean with crypter have to support double ep?

wernesgruner - July 11, 2010, 11:40 am

Double EP means that there is two layers of Entry Points as there is another bin in z3r0xb0t's exe.

illu444 - July 11, 2010, 12:11 pm

Ah okay, btw. i like your nick, cuz i love wernesgruener lemon :D, such a wonderful beer-mix :D

gerardoxd - July 17, 2010, 10:47 am

Someone knows what is the command to spread by USB?

I hope your answers

Whit? - July 17, 2010, 7:55 pm

(Jul 11, 2010 09:44 AM)wernesgruner Wrote: [\[CITE\]](#) Thats a pretty weird issue. Is your IRC on your own network?

hosting on a friends vps... sorted it out but now trying to add botkiller to use incase i get some bots killed payback on every1 :D anyway neally complete :D

imabeastonyou - July 17, 2010, 8:31 pm

ii\t wont downl;oad muust be something r\wrong pm me

AstriK11 - July 25, 2010, 4:41 pm

thanks for the bot i love it :)

Taylor Swift - July 26, 2010, 11:04 am

Odd, Only the !version command seems to be working.
Am i doing something wrong?

BearTheGreat - July 26, 2010, 5:49 pm

I got bot all up and running how do i spread

BearTheGreat - July 28, 2010, 7:38 am

Got it up and working Thanks:d

wernesgruner - July 29, 2010, 1:13 am

Thanks for the share

Just tested it, it works good.

newbie88 - December 4, 2010, 12:12 am

i got question here

1) why the bot login nick like this [3241|USA|XP|Z4R0x]

2) how to change botnick?

sk8tr100 - December 4, 2010, 1:03 am

Great XD thanks for all your work

Flowz - December 4, 2010, 1:03 am

Thanks ! This is the first time I got a bot compiled ! looks epic, x100 thanks !

Dickyb0b - December 4, 2010, 5:07 am

does the exe need crypting?

newbie88 - December 4, 2010, 8:24 am

how to change this botnet nick ??

biasa199 - December 4, 2010, 11:24 pm

Thank you for the very helpful share!

~ Biasa199

Dickyb0b - December 5, 2010, 2:47 am

where is the .dsw solution file?

DvS - December 20, 2010, 12:36 pm

I'm having trouble login in, I can't seem to login, but the server works.

I type !login (my password) and it doesn't work!

Lehmkau - December 20, 2010, 1:10 pm

dude are you stupid, type silence 0 (0 for false, skid)

DvS - December 20, 2010, 3:07 pm

(Dec 20, 2010 02:10 PM)Lehmkau Wrote: [\[CITE\]](#) dude are you stupid, type silence 0 (0 for false, skid)

Figured it out already "skid" ?.

??h™ - December 20, 2010, 3:31 pm

This is my favoruite bot. :)

derpyderp - December 24, 2010, 4:01 pm

I cannot compile it with Visual Studio 2010, any ideas? :|

jurre1990 - December 24, 2010, 4:14 pm

[/b]@wernesgruner

Thanks man for making this public

Cobra7 - January 8, 2011, 11:25 am

The links dont work for me

Flowz - January 13, 2011, 2:05 pm

I love this bot<3

Registry persistence is epic.

Boing - January 14, 2011, 8:34 am

Hey, someone knows a good FREE crypter for this botnet? I really need it =/

Cobra7 - January 14, 2011, 10:34 am

(Dec 24, 2010 05:01 PM)derpyderp Wrote: [\[CITE\]](#) I cannot compile it with Visual Studio 2010, any ideas? :|

Use the 2008 version, works for me :)

(Jan 14, 2011 09:34 AM)Boing7898 Wrote: [\[CITE\]](#) Hey, someone knows a good FREE crypter for this botnet? I really need it =/

Owens private 1.8 works for me, try the free one it may have been updated

MARVID - January 22, 2011, 2:32 pm

When compile, the bot connects but does not respond any ideas?

Cobra7 - January 22, 2011, 5:13 pm

After login i type !version and they respond

YaBoiScRiBBLeZ - January 22, 2011, 5:20 pm

Nice Free Bot For beginners pretty stable.

MARVID - January 23, 2011, 8:28 am

(Jan 22, 2011 06:13 PM)Cobra7 Wrote: [\[CITE\]](#) After login i type !version and they respond
It wouldn't login but I fixed the issue.

Vitali - January 29, 2011, 5:56 am

anyone here interested in compiling this for me to the server i will give him , for money ? :)
send me pm if u can

I can, sended you a PM :)

Chris - January 29, 2011, 9:35 pm

It wont let me login?!?!?

Talc - January 30, 2011, 9:50 pm

Hi, I am new to all this, But I have a good handle on it. IRC server is up, I know all the info, ect, ect,
So I was able to compile it and every thing, But when I run the .exe in the Release folder it lunches
it and it runs as a processes, but only does that. Doesn't copy any files to the system files, or
anything. Nor does it connect to my IRC. So I honestly don't know what I am doing.
Any help would be Great! Thanks~

SuckMyDong - January 31, 2011, 11:08 am

Aighhtt compiled and working in 10minutes ?

Great tut thanks bro!

Rating/+rep added ?

Peace

Cobra7 - February 1, 2011, 11:11 am

Talc, I tested mine on some zombies until it appeared in my IRC and i was able to login etc, try that way first (download and exec or whatever), you may want to change the mutex every compile

relentless187 - February 1, 2011, 1:36 pm

how can i compile this in 2008 the project wont even open

van1lle - February 1, 2011, 2:25 pm

Oh my god it works so damn nice!

I had no problems configuring it!

VC++ 2010 convertet it automatically.

Hit [F7] -> BAM! -> Profit!!

Thank you very much!

relentless187 - February 1, 2011, 3:12 pm

ya but i cant use vc+2010 how can i compile in 2008

Talc - February 1, 2011, 3:17 pm

I clearly am doing something wrong.

My IRC is set up so when you join it auto sends you to the Chat area. Then you can join the "Botnet area" with the /join #"Channelname"

This Channel has a password. It never prompts me to enter a password I have to do /oper "username" "password" command

Then i can join the channel.

But I believe my problem is with the bot its self. I am either compiling it wrong or doing something. It doesn't give me any errors when compiling and after its done it makes the "Release" folder. I go in that folder and run the .exe, but nothing connects to my IRC.

If any one can help it would be Awesome. Been working on this for like 3 days now.

Andblood123 - February 1, 2011, 4:45 pm

Work man , thanks you very much !

Talc - February 1, 2011, 7:25 pm

(Feb 1, 2011 04:17 PM)Talc Wrote: [CITE](#) I clearly am doing something wrong.

Never mind my ignorance. I got it to work. I always seem to post for help then get stuff to work. damn...Thanks anyways tho.

Cobra7 - February 1, 2011, 7:26 pm

Talc, not sure where your sending it in your IRC but just send it to the channel where the bots are supposed to go and not to the chat area.

Dont encrypt any of it and just test the release exe on a naked zombie until you see it appearing, once you know its working then go about encrypting it.

Relentless187, open VC++2008, go to file/open/project/solution and navigate to where the z3r0xb0t project file is, double click it, to test if it compiles just select the build tab and click build solution. It should create the bot in the release folder.

z3r0d3f3ns3 - February 1, 2011, 7:35 pm

My name is z3r0 : D

sucka.

relentless187 - February 1, 2011, 10:01 pm

please help how can i compile this i 2008>>

Andblood123 - February 2, 2011, 6:33 am

Guys, can give me good command for udp ?
one example ..

Cobra7 - February 2, 2011, 9:01 am

(Feb 1, 2011 11:01 PM)relentless187 Wrote: [\[CITE\]](#) please help how can i compile this i 2008>>
Someone cant read ?

relentless187 - February 2, 2011, 9:25 am

um i read it all very well but the project doesnt open in 2008 i followed all instructions the tutorial was for 2010

Cobra7 - February 2, 2011, 9:54 am

I already posted above how to use in 2008, if its not loading the project perhaps its corrupt, try unraring another.

wernesgruner - February 2, 2011, 1:08 pm

I finally decided to release a 2.1 version. I will update the UAC bypass, implement ssl and correct the meglan() memory leaks.

Stay tuned.

bichenso - February 2, 2011, 1:18 pm

Its been a while since I came here. The links appear to be dead so I will try to find the source and re-upload it. I'm pretty sure I have it saved somewhere.

we are waiting for upload.

thanks very much

wernesgruner - February 12, 2012, 3:18 pm

The source has been re-uploaded.

Enjoy!

ironhazee - February 12, 2012, 6:52 pm

can you fix Tutorial pls

Cute - February 12, 2012, 7:24 pm

The bot builds just fine, I use C++ 2010

B00b5_ - February 12, 2012, 7:45 pm

you should use silly bot 1.3 instead it is better

ironhazee - February 12, 2012, 11:18 pm

Bot is working but there is a big problem.

i use crypter.When i crypt file, crypter corrupts file...

When i try to run the file, it gives error...

[img]<http://img31.imageshack.us/img31/1299/z3rbot.jpg>[/img]

without crypter there isnt a problem.

So this bot is not compatible with some crypters.

How can we crypt this file? What should we use?

Are there any free compatible crypters with this bot?

Vuln3rability - February 13, 2012, 10:56 am

Everyone here who is a "hacker" that complains about shitcash makes me lol. Use a hckd pp, buy premium, download.. (Blackhat methods always win)

S P O N G E - February 15, 2012, 5:29 pm

I need A booter so if anyone knows any good ones pm me

xAnarchy - February 15, 2012, 6:05 pm

Piece of shit bot.

It's really no use at all. Unless you want 10000 pingouts.

Hello,

When you use a .NET crypter, you'll need a .NET runtime.

And z3r0xb0t is only compatible with crypter that doesn't touch exit blocks.

hottopo - April 10, 2012, 2:26 am

hahahahahahaha

i will try it now thanks

ironhazee - August 31, 2012, 10:36 am

please repair links

links are not working

wernesgruner - April 11, 2013, 1:14 pm

Links updated as requested. Thank you.

Bloodhawk - April 17, 2013, 11:33 pm

Very nice post my man imma go head and test these files out tonight I-)

Vouch, outdated projects are the best.

I would definetly recommend this one instead of the others that has a lot more features and has active development ?
