For all of you League of Legends fans who are also fans of Tengen Toppa Gurren Lagann, riot is making a new skin for the champion Rumble that sounds like it will be TTGL themed. Go and listen to the sound files below

If you do not enjoy the super manliness of the most manliest of manly anime ever then you don't deserve to be in AA

Why did you post this? It has a very weak relation to the anime in question and if the people in this section played league why would we care when its literally just voice files on the pbe. Not even a in game model. Think before you post.

I miss the old days where people would just go with it instead of look if it's "AA Worthy" or not.

On-topic: buy buy buy buy buy

I bring you the image
