Thread: [\[Helpdesk\] Beginner Hacking Help Desk](#)

-zERaIT - March 20, 2014, 5:50 pm

Dear HackForums members,

Introduction:

In this thread we'll answer all of your hacking related questions.
Post count or reputation are not involved here, feel free to ask us anything!

Please note: None of your questions are considered as stupid as long as you did some proper research.

Current helping members:

- [Zayne](#)
- [Tamaki Suou](#)
- [Goodies](#)
- [Semizias](#)
- [Abide](#)
- [The Man In Black](#)

Abilities:

How to get support?:

In order to gain support you'll have to fill out to form below.

Quote:What is your problem?:
Explain your problem as good as you can:

Usefull guides:[How to be a Hacker](#)

[Union Based SQL Injection](#)

[Tips & Tricks](#)

[Start your own Stresser / Booter](#)

[Index of Web - Hacking Tutorials](#)

Rules: We're here to give out information, and point you in the right directory. We're not going to spoonfeed you anything.

If you have a problem, be sure to fill out the form above correctly to gain support. If not, we can decline you from our service.

We are NOT going to crypt your stub.

Last, keep this thread nice and cosy.

Thanks for viewing our Help Desk.

Goodies - March 20, 2014, 5:53 pm

I'll be lurking as always :)

Nice job guys!

bob128 - March 20, 2014, 5:54 pm

I just recently done a fresh install of everything and my ports are working again. I was able to get it working on myself but when I test it on the machine that is running the virtual for dark comet it runs but the client doesn't appear. Not sure if I have to have no ip configed in dark comet and I have it running separate

-zERAI - March 20, 2014, 6:04 pm

(Mar 20, 2014 05:53 PM) Goodies Wrote: [\[CITE\]](#) I'll be lurking as always :)

Nice job guys!

Thanks man, we're trying to help people out and improve ourselves within the hacking scene.

(Mar 20, 2014 05:54 PM) bob128 Wrote: [\[CITE\]](#) I just recently done a fresh install of everything and my ports are working again. I just PM'ed you with more instructions.

Next time, please fill out the form correctly in order to receive help from us.

Kind Regards?

Sevadus - March 20, 2014, 7:46 pm

What is your problem?:

What's a good coding language to start?

Explain your problem as good as you can:

Well I want to start coding because it seems fun and interesting and I already know HTML + CSS however I assume knowing that will have nothing to do with actual coding. I am starting to learn C++ but is that the best first language to do?

vaggie_talez - March 20, 2014, 7:53 pm

sub'd to lurk as well and absorb science

Goodies - March 20, 2014, 7:55 pm

When deciding which language to start, you should first decide for what reason you'll be coding.

If you're interested in Web Design, I suggest PHP and/or python (using Django or a similar framework) as well as Javascript/JQuery, SQL, and possibly C#/ASP.net, Java, etc...

If you're interested in networking and development, I highly suggest, again, Python, as well as Lua. Other great scripting languages are Perl and Ruby. However, Lua is used quite often in scripting engines for programs like Nmap, Wireshark, Snort, and other common applications/services.

If you're interested in working with the lowest level of systems and interacting with the kernel/CPU directly, I can't recommend C/C++ and ASM enough. Personally, I chose to learn NASM (Assembler) as well as C.

Th3PonyWizard - March 21, 2014, 5:16 am

I don't really see the point of making yet another one, could've just used mine

<https://hackforums.net/showthread.php?tid=4119795>

but oh well good job

-zERaIT - March 21, 2014, 5:37 am

(Mar 21, 2014 05:16 AM)Th3PonyWizard Wrote: [\[CITE\]](#) I don't really see the point of making yet another one, could've just used mine <https://hackforums.net/showthread.php?tid=4119795>

but oh well good job

Sorry, the idea already came in my mind a while ago.

Although both of the helpdesks are here to help people out and prevent the amount of threads in the "Beginner Hacking" section.

Kind Regards?

I could help you with that PM my ur TV

lordnelsonii - March 21, 2014, 9:47 am

Hi guys, I need help to spread my rat, I ve tried every thing, went through tutorials, bought 2crypters.... Etc. Have been banned from sevrsl sites, also from piratbay...
Is it posdible to get a help?

Impress. - March 21, 2014, 9:59 am

(Mar 21, 2014 09:47 AM)lordnelsonii Wrote: [\[CITE\]](#) Hi guys, I need help to spread my rat, I ve tried every thing, went through tutorials, bought 2crypters.... Etc. Have been banned from sevrsl sites, also from piratbay...

Is it posdible to get a help?

Well, you could try to get your own methode otherwise you could look below.

Spreading through FaceBook (pretty much people will click on it when it sounds cool to them.)

Youtube. Download a video from youtube for example "Black ops prestige hack" upload it and put your RAT in the description.

Chatroulette/omgle spreading. This one is pretty slow and won't get you much results but you could try to SE them to download your RAT.

Virtual cam whore. This one is pretty self explained. you download a VCW (you'll find them in the E-whore section) and go spam some chats with your skype (don't use your own skype make a new skype with a girls username) here you pretend that you are a girl and you have a "video" from yourself doing some hot stuff. (when he said "Yes I want to see it" you give him the RAT link.)

I hope that this helped a bit if not then come up with your own methode?

Im gone brah - March 21, 2014, 1:01 pm

Greetings,

I will now answer any of your questions.?

-zERaIT - March 21, 2014, 3:41 pm

I'm currently available to help people out with their problems / questions.

As I said before, feel free to ask us anything guys!

Lol, no not spamming in the help desk, just spam as a topic. I'm trying to better understand spam in general and how one would go about sending spam

Terry A. Davis - March 21, 2014, 5:26 pm

You should add me to the OP.

Zayne you fgt vouch for me!

(Mar 21, 2014 05:23 PM)vaggie_talez Wrote: [\[CITE\]](#) Lol, no not spamming in the help desk, just spam as a topic. I'm trying to better understand spam in general and how one would go about sending spam

You would need to either A: Get your hands on a VPS and set up a pop3/smtp server on it.

Or B: Make an email from Yahoo/Gmail/Hotmail then make a program that spams from there. Option A is slightly better since you have no risk of being shutdown, only getting your VPS suspended.

vaggie_talez - March 21, 2014, 5:45 pm

ok so lets say I have a VPS and 100k email addys in a document. How does one decide what

content goes in the mails and how does one start sending those mails?

Thanks a ton for the info, spam is something I find really interesting!

bob128 - March 21, 2014, 6:32 pm

I still need help an will DC still work on a phone in the same way

Komodo - March 21, 2014, 6:35 pm

Most of the members working here also supported my Help Desk, and were very helpful. Best of luck to you and all the current members.

Ironlion - March 21, 2014, 7:44 pm

Well all in all I would say I'm a total beginner. I know some c/c++ and java, not sure if it's relevant. I don't know where to start in terms of programs, nor do I totally understand how to use such programs.

Brule - March 21, 2014, 8:16 pm

Looks like a good helping desk with people carrying and answering on questions regarding almost anything. Good job!

Goodies - March 21, 2014, 9:09 pm

(Mar 21, 2014 07:44 PM)Ironlion Wrote: [\[CITE\]](#) Well all in all I would say I'm a total beginner. I know some c/c++ and java, not sure if it's relevant. I don't know where to start in terms of programs, nor do I totally understand how to use such programs.

I'm not sure if that was supposed to be a question. Seems like a statement to me.

0x03a8 - March 22, 2014, 12:56 am

(Mar 21, 2014 06:32 PM)bob128 Wrote: [\[CITE\]](#) I still need help an will DC still work on a phone in the same way

Where fo you still need help with?

DC is a RAT and was build for (windows) pc's and thus will not work on a phone.

Pheonix21 - March 22, 2014, 2:17 am

hi im trying to learn how to use dark comet rat and Oracle VM VirtualBox i dont know how to set the vm box up says there no boot

Terry A. Davis - March 22, 2014, 2:25 am

(Mar 22, 2014 02:17 AM)Pheonix21 Wrote: [\[CITE\]](#) hi im trying to learn how to use dark comet rat and Oracle VM VirtualBox i dont know how to set the vm box up says there no boot

You need an operating system, I recommend Tiny 7 if you're at a loss for hardware requirements.

Acrobix - March 22, 2014, 3:42 am

Hello, I see this is a very successful help desk, with many members to contribute. I would like to know if anyone could help me with a RAT GUI? I very bad at making designs. Please don't tell me to just drag things into a box, I tried that and it was absolutely terrible.

Thank you.

As The Man In Black already said, in order to set - up your VirtuaBox properly you'll need an OS (Operating System).

I suggest to follow the tutorial below in order to set - up VirtualBox properly.

Quote:<https://hackforums.net/showthread.php?tid=4031024>

(Mar 22, 2014 04:01 AM)Acrobix Wrote: [\[CITE\]](#) Hmm, but do you know how I could make a custom background design? (VB)

Well, I used to program a lot in Visual Basic, but never really used a GUI since I didn't really bother about the GUI.

I'd suggest to make a thread in the Visual Basic section, there are some great programmers out there which made there own GUI and can deffinitly help you out.

Visual Basic section:

Quote:<https://hackforums.net/forumdisplay.php?fid=118>

I just searched around a bit and maybe these tutorials will help you out a bit:

How to use themes:

Quote:<https://hackforums.net/showthread.php?tid=1166197>

How to create a custom tabcontrol with tabs on the left in VB.Net with GDI

Quote:<https://hackforums.net/showthread.php?tid=3525123>

Sorry that I can't help you any further.

Kind Regards?

xzzzzx2 - March 22, 2014, 6:45 am

Hi! I have a question. What's the best way to secure your slave? I mean if he installs an AV and it detects for example the RAT, anyway I could have a backup RAT lurking around in my slave if the other one gets deleted?

Like I had read that somebody used to rat like this. He said he rats the guy and after that he backdoors his server to not lose him. So, what does this all mean and what's the best way to secure that your slave will always remain inbound? Can I have 2 rats on the same slave? Very curious.

bob128 - March 22, 2014, 8:14 am

Once I have DC working will I be able to move everything to another computer then? Also, what I want to do is spread it through a picture using fb message will that work? like if I use one picture an they click too see it or how should i do that?

0x03a8 - March 22, 2014, 9:50 am

(Mar 22, 2014 06:45 AM)xzzzzx2 Wrote: [\[CITE\]](#) Hi! I have a question. What's the best way to secure your slave? I mean if he installs an AV and it detects for example the RAT, anyway I could have a backup RAT lurking around in my slave if the other one gets deleted?

Make sure your rat / bot is FUD, that's the easiest and best to do.

Goodies - March 22, 2014, 2:27 pm

No. That's simply not possible. You've been a victim of hacker propaganda. It's simply not possible to spread a rat through pictures on facebook.

Terry A. Davis - March 22, 2014, 2:41 pm

bob128 Wrote:Once I have DC working will I be able to move everything to another computer then? Also, what I want to do is spread it through a picture using fb message will that work? like if I use one picture an they click too see it or how should i do that?You can, but you have to redistribute your stub to all slaves and reportforward to the new computer.

Best way would be to bind the RAT to a picture, zip it up and then send it over, if you get the right people they'll fall for it.

bob128 - March 22, 2014, 4:44 pm

that's what I figured but, i didn't know if you could do it that way an it work or not

ThatOneGuy12 - March 22, 2014, 10:52 pm

i'm wanting to know where i can get a Rat at. I want to download one from somewhere but i dont want a rat in a rat situation any help would be appreciated

bob128 - March 22, 2014, 10:56 pm

You can get both CG an DC form there main sites

Asuryan - March 23, 2014, 12:26 am

Not sure if this is exactly the proper place to put this as I am new here.

I was wondering if there is a programing language that is more useful than the others for hacking as I have just started and am not sure.

Terry A. Davis - March 23, 2014, 12:34 am

Asuryan Wrote:Not sure if this is exactly the proper place to put this as I am new here.

I was wondering if there is a programing language that is more useful than the others for hacking as I have just started and am not sure.A lot of debate comes down to what you want. C# is good for UI and ease, C++ is good for speed and asm calling. However it takes longer to learn what you want. What would you want to do with the language?

Asuryan - March 23, 2014, 12:39 am

I am not sure I figured that I would see what seem the most useful generally or easiest to start with and go on but in the end I want it to be useful and not dead weight.

Terry A. Davis - March 23, 2014, 12:39 am

Asuryan Wrote:I am not sure I figured that I would see what seem the most useful generally or easiest to start with and go on but in the end I want it to be useful and not dead weight.Python then, easy to use and it's slowly getting better and would let you jump to another language.

Goodies - March 23, 2014, 12:46 am

I was wondering if there is a programing language that is more useful than the others for hacking as I have just started and am not sure.

That's entirely contingent upon what you want to do

For system level exploitation, nothing beats C, but that requires a certain acquired finesse that doesn't come with a week of learning C - ____ -

i'm talking about exploiting race conditions and thread sanitizing and things...

I always suggest python as a great place to start.

0x03a8 - March 23, 2014, 3:27 am

(Mar 23, 2014 12:39 AM)Asuryan Wrote: [\[CITE\]](#) I am not sure I figured that I would see what seem the most useful generally or easiest to start with and go on but in the end I want it to be useful and not dead weight.

I suggest going with either python or C.

C is not that complex compared to C++ and takes less time to master. It's a good start and from C you can move to C++ or C# or perhaps even Java or python. If you can master C you can master the other languages too (give it enough time)

Im gone brah - March 23, 2014, 3:42 am

Yes. It's not P2P. It's completely through a centralized bank with RTN numbers that are linked to your name/info. The only way I can think of is to actually start a company and use that as your contact info.

<http://www.sba.gov/community/blogs/how-open-small-business-bank-account-online>

Even still, it's highly sketchy and I highly recommend against it.

As an independent satanist, I see nothing wrong, morally, with taking money back from the bastard. However, if that story is bullshit and you're really just looking to scam someone, that's shameful.

i?irXa™ - March 23, 2014, 11:16 am

As an independent satanist, I see nothing wrong, morally, with taking money back from the bastard. However, if that story is bullshit and you're really just looking to scam someone, that's shameful.

It's not a made up story. I'm using Venmo it's an app like paypal. He paid me through that and i'm transferring it to my bank. When it transfers i'm going to be deactivating my account. He scammed Cole for dropshipping. He bought 5 iPhone 5's and he just blocked him on skype. I'm trying to get the money back for Cole so he doesn't have the Debt collectors knocking on his door.

bob128 - March 23, 2014, 11:19 am

I'm still waiting on someone to help me with my Dark Comet issue :/

-zERaIT - March 23, 2014, 3:23 pm

(Mar 23, 2014 08:41 AM)smoothkid Wrote: [\[CITE\]](#) hey, so i got a question: i got a bot for a game called aion but i need to buy licensie codes for it to work isn't there a way to change it so its free to use ?

You should Google this, we're not here to crack your games nor to provide you from a licence, sorry.

(Mar 23, 2014 08:59 AM)razer11 Wrote: [\[CITE\]](#) can you change the description of the rat fille that you are sending?

im not talking about the name of the file.

when the slafe runs it and it shows up in the taskmanager it says on the description "remote service application". how can i change that?

You should provide us with more details, which RAT are you using? If DarkComet, than yes. It's a server setting when creating your stub.

(Mar 23, 2014 11:19 AM)bob128 Wrote: [\[CITE\]](#) I'm still waiting on someone to help me with my Dark

Comet issue :/

Sorry, I noticed your send me your Teamviewer details but you closed it when I noticed your message.

I can help you out tomorrow, since I'm still on my work now.

Kind Regards?

Terry A. Davis - March 23, 2014, 10:04 pm

I'm online ready to help in anyway I can.

If I don't reply to any questions feel free to shoot me a pm.

KL Lyons12 - March 23, 2014, 10:40 pm

Looking for a cryptor for my RAT so that it's FUD

Goodies - March 23, 2014, 10:48 pm

(Mar 23, 2014 10:40 PM)KL Lyons12 Wrote: [\[CITE\]](#) Looking for a cryptor for my RAT so that it's FUD
There are many for sale in the [Marketplace](#).

As for free crypters, none will make your RAT FUD

KL Lyons12 - March 23, 2014, 10:53 pm

don't really want to pay for something that I am only going to use once

Terry A. Davis - March 23, 2014, 10:59 pm

KL Lyons12 Wrote: don't really want to pay for something that I am only going to use once You're in a way forced to.

If you use a free one, a lot of people are going to scan on Virus Total to ruin it, however if you buy a paid one, the developer will make sure it stays hidden.

Goodies - March 23, 2014, 11:02 pm

(Mar 23, 2014 10:53 PM)KL Lyons12 Wrote: [\[CITE\]](#) don't really want to pay for something that I am only going to use once

You can also purchase a single crypt. Many people offer this service.

Impress. - March 24, 2014, 12:15 am

(Mar 23, 2014 10:53 PM)KL Lyons12 Wrote: [\[CITE\]](#) don't really want to pay for something that I am only going to use once

What goodies said you could always buy a single crypt but make sure you see him crypt YOUR file.

bob128 - March 24, 2014, 8:08 am

Unable to Attach File

The type of file you're trying to attach isn't allowed. Please try again with a different format.

I have my RAT made an working but, when I try to test it through a Facebook Message I get that

(Mar 24, 2014 08:34 AM)bob128 Wrote: [\[CITE\]](#) I have it bound to a picture but it don't like the exe extension

How do you mean? Whats your exact file name at the moment? And did you bound it properly into your image?

millswah - March 24, 2014, 9:36 am

What is your problem?:

Ive looked at tut's on how to set up RAT. How do i know if it is working (might be a totally stupid question)?

Explain your problem as good as you can:

I downloaded DarkComet

Ive created NOip

[\[img\]http://s28.postimg.org/o9j3wm5q1/NOip.jpg\[/img\]](http://s28.postimg.org/o9j3wm5q1/NOip.jpg)

I checked both ports 1604 and 20000 with canyouseeme.org (port 1604 was success but now it isnt) (port 20000 is a success)

[\[img\]http://s13.postimg.org/5m5l90qv7/port_1604.jpg\[/img\]](http://s13.postimg.org/5m5l90qv7/port_1604.jpg)

[\[img\]http://s21.postimg.org/9ks9w8mk3/port_20000.jpg\[/img\]](http://s21.postimg.org/9ks9w8mk3/port_20000.jpg)

Ive port forwarded both ports (1604 and 20000)

[\[img\]http://s23.postimg.org/xe99znfvr/port_forwarding.jpg\[/img\]](http://s23.postimg.org/xe99znfvr/port_forwarding.jpg)

On darkcomet is says both ports (1604 & 20000) are listening)

[\[img\]http://s22.postimg.org/62srzom8t/PORT.jpg\[/img\]](http://s22.postimg.org/62srzom8t/PORT.jpg)

This is the tut i followed

<https://hackforums.net/showthread.php?tid=3210006>

I just dont know how to use it haha, or how to test it. Thanks

Done server module - full editor and then built the stub.

looks like this....

[\[img\]http://s11.postimg.org/9j39se7u7/stub.jpg\[/img\]](http://s11.postimg.org/9j39se7u7/stub.jpg)

not sure how you work it. or if it works

vaggie_talez - March 24, 2014, 11:49 am

Greetz,

Still looking for more details on spam operations when someone grabs a spare minute.

Thx!

cyberducky - March 24, 2014, 11:50 am

(Mar 24, 2014 11:49 AM)vaggie_talez Wrote: [\[CITE\]](#) Greetz,

Still looking for more details on spam operations when someone grabs a spare minute.

Thx!

What exactly do you mean by spam operation? Like how to spam emails?

vaggie_talez - March 24, 2014, 11:57 am

(Mar 24, 2014 11:50 AM)Abide Wrote: [\[CITE\]](#) What exactly do you mean by spam operation? Like how to spam emails?

Basically yea. I'm interested in how one would setup a spam operation. Man in black earlier said to have a VPS w/ email server installed. I asked about if I had a VPS and 100k email address list, how would one go from there? The whole point of spamming is to try and generate revenue so I'm also curious as to how this works as well.

In the interest of full disclosure, I don't intend to actually set this up, I just want to know the details in how it all works for my own morbid curiosity lol

bob128 - March 24, 2014, 1:12 pm

(Mar 24, 2014 09:00 AM)MaskedMyS Wrote: [\[CITE\]](#) How do you mean? Whats your exact file name at the moment? And did you bound it properly into your image?

407149_n2?gpj,.ex
.exe

It's bound right when it runs comes up with the picture bound to it

i put it in a compressed folder but, shows up an application

-zERAI - March 24, 2014, 1:24 pm

(Mar 24, 2014 01:12 PM)bob128 Wrote: [\[CITE\]](#) 407149_n2?gpj,.ex

marinacatherine - March 25, 2014, 10:07 pm

so my free trial is up and before I could export my database they pushed an update and I can no longer access the database even when I disable internet access. I downloaded again as a free 30 day trial but when I try to import the backup from the old database it's blank. The backups are in zips together with db file and and xml file. Is there some way I can modify the backups or find a config file and change it to allow access?

software is called the redx,
they take info from the mls that I pay for access to then scrub it against phone records. I don't want to pay these douches 69 more dollars for a database that I scrubbed....help please!!!!
here is part of the config file I found in the zipped backup.

would I change the name in the config file to the new username that has the new free trial??

```
<?xml version="1.0" encoding="utf-8"?>
<TheRedX.RolEDX.UserSettings>
<LastSalesDialersSyncDate>2014-02-08 00:00:00.000</LastSalesDialersSyncDate>
<LastArchSyncDate>2014-02-08 00:00:00.000</LastArchSyncDate>
<StormOfferDate>0001-01-01 00:00:00.000</StormOfferDate>
<StormOfferPageDisplaying>Invitation</StormOfferPageDisplaying>
<ContainingFolderIDsReallyFixed>True</ContainingFolderIDsReallyFixed>
<ContainingFolderIDsFixed>True</ContainingFolderIDsFixed>
<HideMojoButton>True</HideMojoButton>
<LastMOJOSyncDate>2014-02-08 00:00:00.000</LastMOJOSyncDate>
<MRMLSMessagesShown>0</MRMLSMessagesShown>
<UserName>foygroup</UserName>
<CustomerKey>334</CustomerKey>
<NetworkUserIndex>0</NetworkUserIndex>
<DatabasePath>C:\ProgramData\REDX\RolEDX\foygroup.db</DatabasePath>
<U
```

Terry A. Davis - March 25, 2014, 10:14 pm

```
<UserName>foygroup</UserName>
<CustomerKey>334</CustomerKey>
```

Those two I guess. I'm not to sure how the software works, and I'm to lazy to even bother doing it.

We try to keep this desk away from ratting since there is an entire section dedicated to it. Anyways, I guess it doesn't really matter. DC doesn't have Java dependencies like JRat does.

vulpixbrinley - April 4, 2014, 4:26 pm

Ah, my apologies! Thank you for the help!

There really are no books that just spoon feed you. It's not hard to learn. There is an incredible amount of information available online. I'd say you just have to know how to look, but honestly you don't even have to do that. You should know how to google though. That's important.

Zapu - April 4, 2014, 5:04 pm

Trying to exploit a buffer overflow

```
(gdb) `python -c 'print <payload>
```

```
return address is little endian, and it runs through /bin/sh bu then I get "illegal instruction"
help
```

Goodies - April 4, 2014, 5:11 pm
