Hello, today I'll be using my jailbroken device for this the app is "PopU" I will be sending 100-500 followers or likes but it will take 24-48 hours to be finished.

I will need your instagram username and password, I only have to log on it through the app and send the followers / likes then you are free to change the password.

I will be doing this for a long time , so if interested kik or private message me the information so I can instantly send the followers or likes.

When the followers/likes are done you go to instagram.com then edit profile , applications and revoke the permissions of the app.

I have those and 3 other tweaks I purchased , some people don't have smart phones or are just to lazy.

I just have time on my hands to do this. ?
