Thread: [Is it possible to convert/extract a .ismv file?](#)

origins - March 22, 2014, 8:44 am

I downloaded an episode of house of cards on my iPad using universal video downloader and the video file is .ismv which is about 1.5 GB...

I'm wondering if its possible to convert or extract the file to a watchable format such as mp4... Is there a way?

[This article has what you need to convert a ISMV file into an MP4 file, though there isn't a user interface, only a command line with parameters. Post back, and follow instructions.](#)
