Ah... I see you just learned about viruses and tried to infect us with a trojan?
Nice try:

Agreed, Text files dont show up as trojans..... so there not text files. plus you have 8 posts. its kinda sketchy.

I agree, I definitely wouldn't trust this.

These are probably just the same 1000 hacking and cracking tutorials you can find anywhere. I wouldn't trust this download, but if anyone is interested, Just google for the same tutorials on a more trustworthy source.

If these are not legitament downloads I highly recommend you take these off this site. What

happens when someone that knows what they are doing is bored and downloads these just to have fun with you?
