Read what I said, its a fake.

I don't know what are you trying to do. Infect fellow members or just trying to act stupid?

Troye - March 22, 2014, 8:41 pm

evasi0n doesn't support iOS 7.1.

Valinate - March 22, 2014, 8:42 pm

Ohh wait that's there official webpage? <http://evasi0n.com/> then what is this <http://evasion7.6te.net/>

eightz - March 22, 2014, 8:51 pm

Fucking friend, you got my hopes up.

Gambino™ - March 22, 2014, 8:54 pm

This is also belongs in the ios and iDevices section. Just saying....

drugs - March 23, 2014, 12:14 am

LOL. Who would think <http://evasion7.6te.net> is a legit website? Not even the correct spelling; it's evasi0n 7 (evasi0n7 if used in the domain name). And it should've automatically triggered your fake website senses when you see the ".6te".

lol - March 23, 2014, 1:00 am

Oh god you just got my hopes up you silly prick! -.-

g0han - March 23, 2014, 1:05 am

Good find.

This actually isn't a bad idea though to keylog/rat people :o

casemods - March 24, 2014, 9:37 pm

I get this error "The attached device is not activated. You need to activate it before you can apply the jailbreak"

Is there a way around this?

I'm on ios 7.1

Not sure what kind of world you live in

iOS 7.1 Jailbreak DOES NOT exists unthethered for anything. TETHERED jailbreak exists for the iPhone 4 and possibly below. Do NOT try to jailbreak 7.1 until the official sources release a jailbreak, or you will with a 99% chance get keylogged or ratted.

To my knowledge ios 7.1 is not jailbreakable and never will be

OpenSourcerer - April 23, 2014, 8:44 am

Also... Why would the evasion team waste valuable exploits on a firmware update people were told to stay away from if they wish to ever jailbreak? There is slim chance of any more jailbreaks being realeased until iPhone 6 and iOS 8.

Dresmor - April 23, 2014, 8:50 am

Hahaha probaly some iphone backdoor or something x)
