Thread: [\[TOOL\]\[FREE\] Torrent Faker \(Improve drastically your Seed/Leech count\)](#)

BobDarling - March 24, 2014, 5:32 pm

Hello community,

I have developed a tool that could be useful for spreading.

This is a tracker flooder, that can enhance your seed/peers count on every torrents dramatically (work only with http trackers).

Looks like an awesome tool for spreaders. Could you please elaborate that how this tool fake seeds?

BobDarling - March 24, 2014, 5:40 pm

removed method. skids should work before finding these kind of (easy) things.

BobDarling - March 25, 2014, 12:35 am

Also; i made some tuto to fake these with your own tracker; If someone is interested :) no working anymore, ask on this thread if you need a new one

I don't know if it is worth working on DHT spamming and udp tracker spamming as well, someone would be interested ?

Maybe an autoaccount opener on some torrent boards ? Tuto on how to bypass moderation on these sites ?

DCreavers2 - March 25, 2014, 7:43 am

Work like hell huh?

How many install do you get daily?

How many of them are US or Tier 1 installs?

You're just mad you're 4 years too late. If you came up with this 4 years ago, you'd be filthy rich. Now your swimming in Brazilian installs, claiming your methods work like "hell", when your competition doesn't even exist anymore, because it was deemed not profitable.

I laugh how you threaten to -rep me. What are you, 12 years old? I was one of the original torrent spoofing authors. Making around \$700-\$2000 USD daily. You could have asked for tips & tricks, and I would have gladly helped. Hell, I even still have a shit ton of my torrent tools.

I'm not sure if you can see my stats on torrentportal, but I've uploaded 900+ fake torrents. That wasn't just to torrent portal, that was to every torrent site out there.
(Excluding demonoid, and other invite membership ones).

I was generating well over 10,000 installs a day. Are you coming close to this? Or is your definition of "work like hell" equivalent to 100 useless installs a day?

BobDarling - March 25, 2014, 8:02 am

Dude, i don't care of what you have accomplished. Right now, you are just raging over a thread that you don't need to take care of; and the only thing i see is that you need to show your balls.

You are an apathic person, which is taking time to fuck with peoples. I've been using this method since a few years too.

I don't care of your "competition" or whatever you are calling it. I don't care how many installs you get a day.

I'm posting a useful tool for newbies which are struggling to get ONE install.

As i say, go disturb someone else.

MrTing - March 25, 2014, 8:28 am

Can we stop acting like little Kindergarten children and read a thread like normal people?

BobDarling - March 25, 2014, 8:36 am

MrTing => yep, and i'm part of it. Sorry HFUber :)

Auto account opener will be coming soon but will need some captcha-resolving services payment. But first, i'd like to work on the DHT poisoning. I will keep this thread up to date.

If some modo come here, could he remove the "Kindergarten" part of the thread plz ?

Edit : THx modo.

immortalwon - March 25, 2014, 10:33 am

OP work more on this program, I will pay if it becomes even better. Add proxy support for trackers that are popular. Keep up the good work.

BobDarling - March 25, 2014, 11:53 pm

immortalwon => I will add this sock prox support. :)

nuk - March 26, 2014, 5:50 am

Interesting program you made there :) I'm downloading now to take a look at it... I have no need for it, but it still looks great :) Good job!

ayushanand - March 26, 2014, 7:27 am

THANKS BRO

YOU MADE MY DAY ..

GOOD JOB KEEP IT UP ..

immortalwon - March 26, 2014, 7:32 am

By the way, it doesn't work for piratebay with the trackers in the program.

BobDarling - March 26, 2014, 8:43 am

ayushanand & nuk => Thx for support :)

immortalwon => pirate bay don't use trackers to retrieve peer/seed count. I think they use DHT. Am i right ? 'cause each time i upload a torrent, i get banned one way or another without any explanation.

Working on proxy support; expect a release this evening.

Mattyice - February 9, 2016, 12:05 am

how do you use? its not letting me drop anything where it says "drop here"

BobDarling - February 9, 2016, 4:21 am

The whole application is setted to be the recipient of drag & drop.

A text appear in the onsole confirming you have dropped the torrent ok.

You must click on Launch Torrentswarmer, then you wait for X tor instance to launch, then itll increase leecher/seed count.

WOUUUUUUPS mouhahaha. That's was just some testing :D

I can see that my program is being hitted hard by all sort of decompiler/memory analyzer and so on. Chill guys, it's safe. Just an ad, every 40 min, which should popup.

Yes, and give me your address, I am willing to come to by your house to explain to you how to push two butons.

Screenshot if you have an eror message, correct and in details exaplanation if there is a bug; That's the way to go !

You are not retarded, this is an actual bug, but for understanding, i need you to screen the following steps : Launch the app->click start->wait20seconds->send me the video.

(Feb 10, 2016 02:20 AM)Destroyers Wrote: [\[CITE\]](#) This make u r torrent banned.

Only if you manage very badly your "introduction" campaign :)

A few rules :

- your account on the torrent board must be old (months/years)
- you must use that account regularly
- you must upload a few crappy torrent to fake "normal" usage
- then, you must forge your torrent with only http trackers.
- then, it should work a bit.

Remember guys, there is no such thing as easy money ;)

Yes i saw that it was rest of some testing , at least its better to find hidden porn torrents than backdoor ?

First you should remove all the testing data (and change your private key from the french tracker, if

you know what i mean ?)

And then maybe try to decrease the size or remove unnecessary external lib ?

Then, it must need a dependencie i havn't included. I need more informations about that, and if one of you could give me a 10 min access to the computer were the soft crash, it can be solved in a day. If i can't reproduce the bug, i will not play to find it, since it would take forever.
