Thread: [How To: Steal a Instagram/Twitter account!](#)

Reborn Angel - March 25, 2014, 7:41 pm

I just came across this method and it works very well!

Step 1: Hack a GIRLS account. You can do that by whatever method you choose.

Step 2: Find a GUYS high follower account.

Step 3: Follow him and get his number kik etc.

Step 4: Talk to him for a whole day and kinda flirt with him a bit.

Step 5: After you feel that he is comfortable with you do the next step :p

Step 6: Ask him, "Hey bae, can I upload a really UGLY selfie on your "instagram".. He will be bond to say yes because you cant tell a girl. "Nah girl. You might hack my account and I care about it too much" They will never be wimp[/align] like that.

Step 7: Ask for his info but not too needy for it or it will seem sketchy and he will bail out.

Step 8: Get in the account and jack it all up to your own info!

That was the most easy method to jack a account I have ever thought of and did! I have already got 6 instagrams in the first day! All 2kish'ers. (<- lol) but I was just testing it out!

If you enjoyed and thought this was helpful please let me know! If you try it your self give me some feed back to be featured in this post!

I say a girls account because guys asking girls... Wont work out. They will think you are creepy!

If you would like to know how to hack a instagram just google it! I do not want to provide links because most of them are black hat methods that I dont approve of!

So, you basically ask them for their account info..?

Just a long SE method with a little work. Might work lol.

Highly doubt this will work, most people are not that stupid to give out their password to a person they've met online.

And how are you supposed to hack the girls account?

Oh I see!

You hack a guys account and do steps 2-8 and then you hack a different girls account!

But wait, how are you supposed to hack the guys account? just rinse and repeat.

LQ post, some ok info but definitely could be better.

Yes but you basically posted a dead end from the start for almost every user. Why wouldn't they just use their original method?

You need to post a method to get the girls account information in order to make this method a legitimate way to "hack" into peoples instagrams.
