Thread: [Win 10\\$ PayPal - Suggest a name for an online business](#)

Broda - March 26, 2014, 4:36 am

Suggest us a brandable(?) name for our webhosting business. It doesn't have to contain the word host/webhost/hosting. The best suggestion will win 10\$, even if we decide not to pick any of your suggestions. Please check the domain availability before posting, <http://namecheap.com>. If there is only extensions like .de and .in available, we won't even consider the name. More available TLDs = better chance of winning.

Hi, hope I can help you out.
What about these 3?

Transporthost
Bestfield
Brandou

I personally hate hosting sites with the word 'host' or 'hosting' in it.

What about something like:

terainternet.com

etc.
