Thread: [ScareFriends - Scare your friends and your members of family.](#)

Artirtiti - March 28, 2014, 7:33 am

ScareFriends

ScareFriends is a software that displays screaming pictures with a countdown time.

ScareFriends is a software that displays screaming pictures with a countdown time. You just simply select a scary picture, a screaming sound and the countdown time. When the time reach 0:0:0 the picture will be displayed. You can scare friends, members of your family etc.

Why ScareFriends is better than others?

It is very simply to use. It has got 8 scary pictures and 4 screaming sounds. It also have the HIDE function that will hide ScareFriends and no one can see it unless you want.

Scarefriends can be used only if you know that the person that you want to scare will not have a heart attack or something else. And also don't scare childrens under 6+ years.

It offers the ability to hide the application so the person can not find it. But you can because you know that ScareFriends is at notifyicon.

Download it from Softonic www.scarefriends.en.softonic.com

Seems like a simple application.

Your GUI could use some work and a few more options would be nice.

Also, please change the font color of the OP. It is very hard to read.

So simple, I see you're new to this language. Your GUI looks crap aswell.
