Thread: [Project Sparkle - Mining Pool \(pool.omnicoin.cc\)](#)

Doctor Blue - March 31, 2014, 1:54 pm

I'm somewhat busy at the moment. If there are any problems with the pool and it's very urgent, feel free to send me an e-mail at webmaster (a) doctor-blue.net.

Project Sparkle

Most of you seem to be looking for a mining pool, so here I am, answering your prayers (one more time).

Running the latest version of MPOS I'll offer all of you an opportunity to get the most out of this coin.

We give omnicoin the best wishes and support it to the fullest. Once another pool comes online we will start limiting the amount of registered users, to make sure they are spread evenly. With this, we hope to gain your trust, that we do not intend to abuse the coin in any way.

Details

Website: <http://pool.omnicoin.cc>

Stratum proxy: stratum+tcp://pool.omnicoin.cc:3333

Fee: 1%

Instructions

Want to be prepared for the omnicoin launch? Well that's what I'm here for!

Remember, if you stumble upon any issues in this tutorial, please take a look at the troubleshooting section before asking.

Preparing is simple, but it depends on your operating system and the hardware you intend to use for mining. I'll only cover the procedure for Windows, as I don't have any opportunity to try it out on a Mac but it's exactly the same once you get the miner installed.

The way I see it there are three good miners available:CGMiner 3.7.2 - [Download](#)

It is important that you use version 3.7.2, as newer versions don't support GPU mining nor script mining and those are the things you need. CGMiner is one of the best miners available for AMD GPU's, and AMD's hardware is generally better than NVIDIA when it comes to mining, so pick CGMiner if you use an ATI/AMD graphics card.

CUDAMiner - [Download](#)

CUDAMiner is a fork of CGMiner which specializes in mining with CUDA cores. A CUDA core is the same as a stream processor or ALU, only NVIDIA has made it 'smarter' and capable of more complex things. This means there are fewer of them on each graphics card as they're naturally more expensive to produce and physically larger to fit on the die. This is one of the major reasons why AMD outperforms NVIDIA. Get CUDAMiner if you are using NVIDIA graphics.

Pooler's CPUMiner - [Download](#)

If you don't have a graphics card (using onboard or integrated graphics instead) your only option is to mine with your CPU. It doesn't come close to the performance of the GPU miners listed above, but you can still participate and earn some omnicoins to play around with.

Once you got hold of your miner of choice you'll need to join a pool. Now because this thread is mainly about my pool, my choice should be obvious. Go register on <http://pool.omnicoin.cc>.

Now that you have an account you should log in and go to "My Account" >> "My Workers" to set up your rig. The username and password you use here doesn't matter, it just has to be set so the pool can recognize your miner. Bear in mind, that if you create a worker with the name "example" and

your username is "DoctorBlue" on the website the workers username will be "DoctorBlue.example".

Let's get back to the miner.

Open notepad and put the line corresponding to your miner.

CGMiner: cgminer.exe -o stratum+tcp://pool.omnicoin.cc:3333 -O username.workername:password
--script

CUDAMiner: cudaminer.exe -o stratum+tcp://pool.omnicoin.cc:3333 -O
username.workername:password

CPU Miner: minerd.exe --url=stratum+tcp://pool.omnicoin.cc:3333
--userpass=username.workername:password

Save the file in the same directory as the miner. In the save dialog you will need to save it as the type "all files", after which you have to name it something ending in .bat.

Save it and doubleclick it, and now you should be mining.

If you're using cgminer or cudaminer you might need to tweak it a bit, as the defaults are trying not to load your graphics card too much so you can still use the computer.

Find your graphics card on this list and you can see which options people have had the best results with.

Guardian™ - March 31, 2014, 2:19 pm

It's nice to see a pool ready for launch.

Just wondering, is pool.omnicoin.pw the official pool or something? Since your website is:
Website: Hidden until 2nd of April

Doctor Blue - March 31, 2014, 2:24 pm

Yes, it is.

I merely hid it because stratum is running on a test network for potcoin at the moment so if you didn't pay enough attention you'd be wasting mining power on something worthless.

Thanks for making me aware that I missed a spot ^^

potatopete54 - March 31, 2014, 6:23 pm

Come up with an interesting name, Blue's Sparkling Pool? xD

d0s000m - April 2, 2014, 1:52 am

Hopeful it lunches today.

Any news? Its 2 April already :)

Eeluminati - April 2, 2014, 2:52 am

Thanks for posting this pool. Sucks OMC was delayed.

Doctor Blue - April 2, 2014, 2:53 am

(Apr 2, 2014 01:52 AM)d0s000m Wrote: [\[CITE\]](#) Hopeful it lunches today.

Just need to do some minor config changes when I get home and then it's ready.

killer34000 - April 2, 2014, 2:58 am

is this coin minable with Plasma RAT ? ^^

Eeluminati - April 2, 2014, 3:05 am

(Apr 2, 2014 02:58 AM)killer34000 Wrote: [\[CITE\]](#) is this coin minable with Plasma RAT ? ^^
The coins not even out yet. I am not Crypto genius but I don't see why it wouldn't.

Doctor Blue - April 2, 2014, 3:35 am

(Apr 2, 2014 02:58 AM)killer34000 Wrote: [\[CITE\]](#) is this coin minable with Plasma RAT ? ^^
Yes, Plasma RAT supports scrypt and stratum.

EziNet - April 2, 2014, 8:22 am

Finally we have official pools, thanks Dr.

iNuke - April 2, 2014, 10:21 am

Thanks a lot, I loved mining on your previous pool!
Keep it up man!

Doctor Blue - April 2, 2014, 2:08 pm

Allrighty, ready to take registrations at pool.omnicoin.pw!
Sorry about the delay... not that it really means much as long as the coin isn't launched yet.

EvanLB7 - April 2, 2014, 9:01 pm

Layout looks great man! Good job, I am officially registered. Now, just 2 more days of waiting.

Doctor Blue - April 2, 2014, 11:47 pm

(Apr 2, 2014 09:01 PM)Furroh Wrote: [\[CITE\]](#) Layout looks great man! Good job, I am officially registered. Now, just 2 more days of waiting.
Well... It's the default theme.
I only like it a little bit, it's basically just the bootstrap template, I might change the colors to something HF-like.

EvanLB7 - April 3, 2014, 6:16 am

(Apr 2, 2014 11:47 PM)Doctor Blue Wrote: [\[CITE\]](#) Well... It's the default theme.

Yeah I knew it was bootstrap, but it looks fine. I'd touch it up and make it purple or blue w/ black.

Doctor Blue - April 3, 2014, 8:25 am

(Apr 3, 2014 06:16 AM)Furroh Wrote: [\[CITE\]](#) Yeah I knew it was bootstrap, but it looks fine. I'd touch it up and make it purple or blue w/ black.
Exactly, but I'm too busy playing Portal 2 at the moment ?

The Flying Dutchman - April 3, 2014, 8:27 am

So when is the pool going online? Or does it already work..
Im kinda new in this mining. So i tried to do what you said but it isnt working that well yet :)

-TFD

Doctor Blue - April 3, 2014, 12:35 pm

(Apr 3, 2014 08:27 AM)The Flying Dutchman Wrote: [\[CITE\]](#) So when is the pool going online? Or does it already work..

-TFD

It is because the coin hasn't been launched yet, I've merely published the website so people can prepare.

Check the sticky in this forum for more information :)

KING KING - April 4, 2014, 4:05 am

Well shit, it gets released at around 5:00am where i am ?

d0s000m - April 4, 2014, 4:57 am

Awesome. Just registered. Cant wait until it works!

iNuke - April 5, 2014, 12:31 am

I made the file to make a loop to make it retry until OMC is released, is it normal that when I open it I have this:

Nature - April 5, 2014, 12:35 am

(Apr 5, 2014 12:31 AM)iNuke Wrote: [\[CITE\]](#) I made the file to make a loop to make it retry until OMC is released, is it normal that when I open it I have this:

What miner program do you use and take a screenshot of your .bat file.

iNuke - April 5, 2014, 12:40 am

(Apr 5, 2014 12:35 AM)Nature Wrote: [\[CITE\]](#) What miner program do you use and take a screenshot of your .bat file.

I use CG Miner 3.7.2

Screenshot:

<https://puu.sh/7WBIM.png>

Doctor Blue - April 5, 2014, 5:03 am

(Apr 5, 2014 12:40 AM)iNuke Wrote: [\[CITE\]](#) I use CG Miner 3.7.2

Screenshot:

<https://puu.sh/7WBIM.png>

Yes, it's just because CGMiner doesn't output anything until it can connect.

iNuke - April 5, 2014, 5:13 am

(Apr 5, 2014 05:03 AM)Doctor Blue Wrote: [\[CITE\]](#) Yes, it's just because CGMiner doesn't output anything until it can connect.

So at about 7pm (France Time) it'll automatically mine OMC? ?

Doctor Blue - April 5, 2014, 5:51 am

(Apr 5, 2014 05:13 AM)iNuke Wrote: [\[CITE\]](#) So at about 7pm (France Time) it'll automatically mine OMC? ?

If stratum works when I start it, yes. With my luck it's probably going to fuck up because there's so many things that could go wrong when compiling the wallet.

iNuke - April 5, 2014, 7:10 am

(Apr 5, 2014 05:51 AM)Doctor Blue Wrote: [\[CITE\]](#) If stratum works when I start it, yes. With my luck it's probably going to fuck up because there's so many things that could go wrong when compiling the wallet.

So I should also setup it on the other pool?

Doctor Blue - April 5, 2014, 9:21 am

(Apr 5, 2014 07:10 AM)iNuke Wrote: [\[CITE\]](#) So I should also setup it on the other pool?

Yes it would be a good idea to prepare another script just in case my things get messed up so you won't miss the first couple of minutes and then switch over to mine again once it starts working (If you're really obsessed about mining exactly at launch)

Obli - April 5, 2014, 9:23 am

What if I rented a mining rig? What should I do in that case?

Sorry, kind of new to this whole thing. I would greatly appreciate your assistance.

xhflhkeuhwguu34 - April 5, 2014, 9:31 am

(Apr 5, 2014 09:23 AM)+Oblivious Wrote: [\[CITE\]](#) What if I rented a mining rig? What should I do in that case?

If you're renting the best thing to do would be to just manually switch.

ROHFF - April 5, 2014, 9:59 am

my config is ok ?

<https://gyazo.com/45c4cfd6a06a495ceb09bd4341616217>

Doctor Blue - April 5, 2014, 10:04 am

Well I told him I couldn't compile it in 5 minutes, so a lot of things have just caused a delay here.

Don't worry, everything is back on track and I'll be ready soon.

iNuke - April 5, 2014, 10:04 am

This one is not working for me. Is it working for some people?

(Apr 5, 2014 10:04 AM)Doctor Blue Wrote: [\[CITE\]](#) Well I told him I couldn't compile it in 5 minutes, so a lot of things have just caused a delay here.

Don't worry, everything is back on track and I'll be ready soon.

Alright, cool! Good luck resolving everything.

EvanLB7 - April 5, 2014, 10:08 am

I have already started mining. Is it up?

ROHFF - April 5, 2014, 10:14 am

i started mining with plasma rat is the pool working?

Doctor Blue - April 5, 2014, 10:14 am

I suggest you go mine on Xen0ns pool instead... this could take a while...

iNuke - April 5, 2014, 10:15 am

(Apr 5, 2014 10:14 AM)Doctor Blue Wrote: [\[CITE\]](#) I suggest you go mine on Xen0ns pool instead... this could take a while...

He's compiling too. The pool isn't working neither :)

Doctor Blue - April 5, 2014, 10:20 am

(Apr 5, 2014 10:15 AM)iNuke Wrote: [\[CITE\]](#) He's compiling too. The pool isn't working neither :)
Okay, well Crypto Miner made the same mistake as a lot of other developers simply forking other coins: Not adding the makefile for leveldb.

Moreover I did say, twice actually, that it's simply impossible to download, configure and start everything in "a couple of minutes". I never really got an answer though...

Oh, and I was told the release was at 6 PM GMT, not 6 PM BST. GMT is not affected by summertime, but appearantly nobody knew that.

EvanLB7 - April 5, 2014, 10:21 am

It's funny, because if someone actually read my messages and reacted to them, this would have went a lot smoother.

Things like providing a wget friendly link (or github link) instead of mediafire (So I have to download and then reupload), making it obvious which timezone we were following, providing the source to the pool owners 15+ minutes before launch (Honestly it doesn't make sense to distrust the omnicoin team itself on this), having someone check that it'd compile on a fresh server installation and probably other things I've forgotten in my frustration...

I can imagine your frustation, and I know the feeling when you say something good, but your "partners" anyone else don't listen to you, but don't worry it doesn't matter if there is a little delay Doctor Blue. Thanks a lot for you pool!

Doctor Blue - April 5, 2014, 10:31 am

Rebooting the server because something... I don't know what... is blocking the rpc port.

BLURRYF?CE - April 5, 2014, 10:32 am

Okay, apparently solo mining doesn't work, at least 2 of the node servers are up but I can't mine using either one of them.

ROHFF - April 5, 2014, 10:35 am

let's all wait for the pool to work, i hope it doesnt take long because it will give a bad image of omnicoin..

DLT. - April 5, 2014, 10:37 am

Yes i provided Doctor Blue a media fire link also Xen0n, i should of probably gave him the mediafire link 15 minutes or so before to give them chance to download (i went on my download rate and thought 5minutes is plenty) but me and crypto agreed on 5minutes. Either way ALL coin launches provide the source code at launch time and pools manage to upload the source minutes after launch so i dont really see a problem there.

Doctor Blue - April 5, 2014, 10:39 am

Okay, we're up...

The server is being spammed with massive amounts of low-difficulty shares so expect some rejected ones at first. It should even out with time.

EvanLB7 - April 5, 2014, 10:40 am

(Apr 5, 2014 10:39 AM)Doctor Blue Wrote: [\[CITE\]](#) Okay, we're up...

Did you add a worker on the website?

You might get some connection errors, they happen because I restart stratum to fix the settings.

iNuke - April 5, 2014, 10:45 am

(Apr 5, 2014 10:44 AM)Doctor Blue Wrote: [\[CITE\]](#) Did you add a worker on the website?

Yes I did.

Guardian™ - April 5, 2014, 10:46 am

Yes! i am finally mining. Thanks Doctor Blue!

Edit:

Is it normal that my rigs is falling out and in.

and that my best rig only shows 500kh/s on the website when it should have 5700kh/s?

Cole ??? - April 5, 2014, 10:46 am

Should I keep solo mining or use a pool?

Nature - April 5, 2014, 10:47 am

Amazing work Doctor blue, really amazing pool! :D

iNuke - April 5, 2014, 10:47 am

Alright DOCTOR BLUE, I resolved the problem. It was a mistake on my .bat file

Now I'm mining, thanks a lot!!

Am I doing this good?

Guardian™ - April 5, 2014, 10:50 am

i like how i have 1/4 if the pool hashrate:

Doctor Blue - April 5, 2014, 10:53 am

(Apr 5, 2014 10:45 AM)iNuke Wrote: [\[CITE\]](#) Yes I did.

lol...

In that case your worker username is iNuke.iNuke and the password is 1.

To make it work, add a worker with the username "1" and the password "x"

(Apr 5, 2014 10:46 AM)Guardian™ Wrote: [\[CITE\]](#) Yes! i am finally mining. Thanks Doctor Blue!

Edit:

Is it normal that my rigs is falling out and in.

and that my best rig only shows 500kh/s on the website when it should have 5700kh/s?

It's because the blocks are being solved immensely fast so a lot of times you might not be able to submit any shares before you have to start over...

Once the network difficulty evens out it should start running at full capacity.

(Apr 5, 2014 10:47 AM)iNuke Wrote: [\[CITE\]](#) Alright DOCTOR BLUE, I resolved the problem. It was a mistake on my .bat file

Now I'm mining, thanks a lot!!

Am I doing this good?

200 KH/S is okay for a single GPU, so yes, you are. If I were to take a guess you're using a 7950 or the equivalent R9 card.

System.out.println - April 5, 2014, 10:55 am

Thank you Doctor Blue for the pool, mining on it right now ;)

Guardian™ - April 5, 2014, 10:56 am

Doctor Blue - April 5, 2014, 11:22 am

(Apr 5, 2014 11:19 AM)Furroh Wrote: [\[CITE\]](#) The pool is cutting down my rate. So now I am losing more money?

I saw your message about the CPU limit, but no, it's not limited, it's just not fast enough.

EvanLB7 - April 5, 2014, 11:23 am

(Apr 5, 2014 11:22 AM)Doctor Blue Wrote: [\[CITE\]](#) I saw your message about the CPU limit, but no, it's not limited, it's just not fast enough.

I did delete it because I spoke wrong. But why do my rates keep getting taken off? Is it wasting my hash rates?

Angel™ - April 5, 2014, 11:25 am

(Apr 5, 2014 11:23 AM)Furroh Wrote: [\[CITE\]](#) I did delete it because I spoke wrong. But why do my rates keep getting taken off? Is it wasting my hash rates?

No, it's because his server isn't fast enough. To run a pool you need to buy a vps with fast internet. From my understanding it looks like it's just delaying by a couple minutes

1n9i9c7om - April 5, 2014, 11:26 am

Time Since Last Block 26 minutes 30 seconds

Est. Avg. Time per Round (Network) 50 seconds

Est. Avg. Time per Round (Pool) 22 seconds

Est. Shares this Round 7208 (done: 13846.56%)

Something's wrong here...

Obli - April 5, 2014, 11:26 am

So he needs a VPS? I could contribute if funds are needed, but since I rented rigs, I only have 0.07 btc left...

Doctor Blue - April 5, 2014, 11:27 am

(Apr 5, 2014 11:25 AM)Angel™ Wrote: [\[CITE\]](#) No, it's because his server isn't fast enough. To run a pool you need to buy a vps with fast internet
Internet is not the problem, it's on a gbit connection, I tested it to make sure it worked optimally.
Networking isn't really that important after stratum came into the picture though, it doesn't consume much now that the clients generate their own work.

EziNet - April 5, 2014, 11:29 am

Somehow Sh1eld getting all the power ?

Dr.Cooper - April 5, 2014, 11:30 am

I don't know why we didn't post a good thread in Bitcointalk as well. They would have helped with pools so much.

We barely have 2 pools running.

MPOS is extremely inefficient, I'll see if disabling some statistics will help the slow lookups. The only reason it times out is because it wants the mysql server to list and order 100 MB of shares everytime someone goes to the website.

The pool works fine, it's only the website you're having issues with.

Obli - April 5, 2014, 2:20 pm

The pool works great. The site itself is a bit slow.

Ruzka - April 5, 2014, 2:20 pm

I am at least able to mine now. Thanks for that.

Forezza - April 5, 2014, 2:21 pm

Having no issue whatsoever with your pool now. Hasn't cut me off once and I'm getting full khash/sec. Site is a bit slow, but once set up, it doesn't really matter.

VRUMM - April 5, 2014, 2:26 pm

Doctor Blue, please process the transfer/cash out.

Thak you

Guardian™ - April 5, 2014, 2:28 pm

Yeah i got my full MH/S to, but the only problem is that pool haven't found a block in a long time:

VRUMM - April 5, 2014, 2:30 pm

I am on xenon's pool right now, and it is working fine.

Yes, you ought to get them all. Right now my problem is just that the omnicoin RPC is only listening on IPv6, and that doesn't really work out for mpos. I'm trying to figure out how to fix that, but nothing seems to work.

Tried bind=0.0.0.0 and bind=127.0.0.1 and a lot of other things. Even compiling without IPv6 support makes no difference... It's still listening on ::43555 but not on 127.0.0.1:43555

iNuke - April 5, 2014, 4:05 pm

So the coin is very hard to mine or what? Damn I miss the good old times with OMC v1

lucky. - April 5, 2014, 4:13 pm

(Apr 5, 2014 04:05 PM)iNuke Wrote: [\[CITE\]](#) So the coin is very hard to mine or what? Damn I miss the good old times with OMC v1

The difficulty rose fairly quick, so it is a little hard now. With all the preparation (And Sh1eld) the hashrate was high.

Doctor Blue - April 5, 2014, 4:54 pm

Yes the new Omnicoin is harder to mine, but bear in mind that the block time is higher and the reward is 67 instead of 1000.

Naturally this will also be reflected in its value later on.

EDIT: I managed to fix the website, now it's just a bit slow, but it works without timing out at least.

rhombus - April 5, 2014, 5:09 pm

im a bit confused on the miner commands. i am using cpuminer so can anyone explain it to me like where do i go to get it?

Went from

-snip-

to

-snip-

They must be in your wallet now somewhere..

They've always been in the wallet, the website just didn't account for your shares because of the delays. They should be counted and that amount of omnicoins seems correct.

killer34000 - April 6, 2014, 3:05 am

Hello Doctor Blue can you tell me how to cash out the coin i have on your pool please? it's ok i just found out!

Doctor Blue - April 6, 2014, 3:08 am

(Apr 6, 2014 03:05 AM)killer34000 Wrote: [\[CITE\]](#) Hello Doctor Blue can you tell me how to cash out the coin i have on your pool please?

Sure.

Go to My Account -> Edit Account.

Enter your payment address and your PIN code and click save.

Now you should just enter your pin in the "Cash out" box and press cash out.

commandzombie - April 6, 2014, 7:10 am

Edit:

Thanks for the tutorial!

Fixed my problem.

It looks like it working, not sure if it is lol

What do you mean? You say they should be counted, and at the same time that the amount of confirmed omnicoins is correct. But I have never seen 800 coins in a round go to 50 coins confirmed. That doesn't seem correct. Is there still a chance I am getting it back or?

Thanks for taking the time to reply to me.

24/7 - April 6, 2014, 8:00 am

Currently mining crypto currency for the first time, wanted to wait till omnicoin came out before starting.

Having 47.19 KH/s atm which is pretty decent for 1 server and a pc.

~Where am I able to fill in my omnicoin address and get paid out?

Doctor Blue - April 6, 2014, 8:55 am

It's because we're using the pplns payout scheme. The actual earnings will depend on a lot of different things, and if the pool hashrate is too low you might not even receive anything for that round because the pool didn't earn anything.

800 unconfirmed should always result in 800 confirmed but I didn't even have 800 in my wallet at that time so it sounds a bit odd.

You can leave it as it is, but it probably won't be mining for up to a day's time or so.

'Psyduck - April 7, 2014, 2:04 am

Hello Dr.Blue,

When I try to add a shortcut in the folder x64 - it says: "Cannot find cudaminer.exe".

Am I doing right? I right click in the folder and then add a shortcut.

Shit it feels like it is late for me to mine, I was stuck with this since yesterday haha.

kind regards,

pic: <https://gyazo.com/70efd42bf7682b7c296ca8f1fbaae87a>

0x03a8 - April 7, 2014, 4:01 am

How do you set up the failover server with GUIMiner (cgminer)?

'Psyduck - April 7, 2014, 6:11 am

<https://gyazo.com/58fcc16d0ae46f38cbd5e866b4765384>

Okey I solved my problem, can someone judge if I mine or not?
and how where do I see how much I recieved? xD

Okey I solved my problem, can someone judge if I mine or not?
and how where do I see how much I recieved? xD

Yup, that means it works!

You can see how much you received on the website.

Bear in mind that I will switch everything over to pool.omnicoin.cc (Omniscient's official domain) in an hour and a half. Remember for the love of all that is good to change the stratum server, as I will shut down my backup stratum server in a couple of days.

You can keep mining on the current stratum server if you'd like, but if you switch over you might get fewer stale shares.

I'll also make sure the old website will redirect to the new one :)

EDIT:

Forget about the failover! Keep mining the way you always did, and I'll make sure the domain switches you over seamlessly. I'll leave the old stratum servers running for a week's time so everyone gets a chance to change the domain. If you already used pool.omnicoin.pw your miner should switch over automatically. If you used 91.xx.xx.xx you will need to do a manual switch.

The new stratum server is already up and running so change the IP address when you have time!

?ord Frieza - April 7, 2014, 7:56 am

I need help setting up my miner.

I downloaded cgminer btw.

0x03a8 - April 7, 2014, 8:15 am

This doesn't make a lot of sense to me, but I'm not complaining.

edit: yes i'm the only one mining on that worker

This doesn't make a lot of sense to me, but I'm not complaining.

edit: yes i'm the only one mining on that worker

First of all you should change server to 170.107.98.160 as that is the new stratum proxy.

Second I'm currently working on a couple of odd issues, so the server is down for a while. It shouldn't be much longer though.

h4h - April 7, 2014, 9:35 am

Why does it say no fees in the title, but there is in fact a 1% fee?

Doctor Blue - April 7, 2014, 9:38 am

(Apr 7, 2014 09:35 AM)Lodestar Wrote: [\[CITE\]](#) Why does it say no fees in the title, but there is in fact a 1% fee?

Sorry, I forgot to change that.

I changed it a couple of hours ago. Omniscients request, because he's paying for the servers.

hihihih565 - April 7, 2014, 9:50 am

Says I have 235,124 valid shares but no unconfirmed balance?

Angel™ - April 7, 2014, 10:06 am

Yo dr blue. I am currently mining with 1.2mh and I am not even getting 1 transaction.

How long does it take to show up?

eightz - April 7, 2014, 2:24 pm

Quote:Let's get back to the miner.

Open the folder you downloaded the miner to and rightclick inside it. Go to New and click Shortcut. A dialog will now open and ask you for the location of the program you want the shortcut to run.

This is where the tutorial is split up, you have to enter the miners command in the box before continuing, so here are some examples on what they look like.

CGMiner: cgminer.exe -o stratum+tcp://91.121.105.176:3333 -O username.workername:password --scrypt

CUDAMiner: cudaminer.exe -o stratum+tcp://91.121.105.176:3333 -O username.workername:password

CPUMiner: minerd.exe --url=stratum+tcp://91.121.105.176:3333 --userpass=username.workername:password

When I do this, it says the file cgminer.exe could not be found? I did it exactly how you say it. It's quite irritating as I'm very stressed due to other problems. Also, I believe I'm supposed to put in my info where it says "workername" and "password" right?

Doctor Blue - April 7, 2014, 2:27 pm

There's two reasons for that.

1. The difficulty is insane at the moment
2. The pool hashrate is pretty low. Would be nice if someone were to even it out across the two pools.

Infinit? - April 8, 2014, 2:13 am

Yes, I've noticed.

What do you mean two pools...isn't there only one? And yeah. That 0.352 was what I got in like 30 minutes this morning. Still no more since that. Still new to this whole mining business, only know how to set it up and keep it running, no idea of the whole protocol behind mining, pools, hash rates and all that business.

I'm using a 660 at the moment. I've got a space PCI slot and a spare 550Ti. Would that help? Or not much due to the current difficulty.

(Apr 8, 2014 06:50 AM)BitMoney Wrote: [\[CITE\]](#) Given to the Block finder after 120 Validity and cut Pool fee.

Stop lying, lol.

The pool is running a PPLNS (Pay per last N shares) payout scheme, which is just a more advanced form of PPS (Pay per share) where you're paid depending on the amount of shares you get.

Basically you're paid depending on your hashrate.

The amount of coins you have mined should update within 2 minutes of every block mined by any user on the pool.

The reward is 66.85 OMC IIRC

Jack Bauer - April 8, 2014, 7:09 am

A sudden increase in hashrate caused a short-term denial of service. It's back now.

This usually happens if stratum's base difficulty is too low for the miners connecting to it and they'll end up sending so many shares the server won't be able to handle anything else until the difficulty is readjusted.

I'll set a smaller readjustment time.

(Apr 8, 2014 07:26 AM)optimus2112 Wrote: [\[CITE\]](#) how about you guys start selling l33t and ub3rs in omnicoin,after all it is HF's official crypto currency.

Omniscient has it all planned, and I'm not in doubt that he will start accepting omnicoin for different HF things once the price stabilizes.

Uncle Ruckus - April 8, 2014, 8:24 am

Well 99.9% uptime since it started working smoothly, what kind of idiot would host a pool with much less?

I think it's better to wait until there are any actual features to talk about.

Thread designs are overused, and it would just look stupid with the whole instructions section.

Uncle Ruckus - April 8, 2014, 11:03 am

(Apr 8, 2014 08:52 AM)Doctor Blue Wrote: [\[CITE\]](#) So this one? stratum+tcp://107.170.98.160:3333

EDIT: Oh you're having auth issues... Just realized that now. Try sending me the exact worker username and password you're using in a PM. I'll check what's wrong.

It's not unsafe to disclose the worker password as they can't be used for anything else than making money for you.

I got it working, it was a stupid error on my part. Thanks for offering to look into it though.

0x03a8 - April 8, 2014, 1:19 pm

Random round shares

Congratz to everyone :3

A fun milestone that no one really cares about :)

Should be back up now.

We've had some minor issues with the daemons starting up automatically.

Immortal - April 10, 2014, 10:58 am

oh, I see, question I set my autopay out to 3.1 so I would get 3omni coins every pay out but I got 3.03424832 OMC can I ask why it paid more?

Doctor Blue - April 10, 2014, 11:01 am

(Apr 10, 2014 10:58 AM)Imm?rtal Wrote: [\[CITE\]](#) oh, I see, question I set my autopay out to 3.1 so I would get 3omni coins every pay out but I got 3.03424832 OMC can I ask why it paid more?

Payouts are only processed every even minute (0, 2, 4 etc.).

If you have 2.9 OMC when it checks, it won't pay out. If you have over 3, that could also be 3.5 OMC it will automatically payout everything.

Not transferring it all would just be wasteful as you're gonna lose the pretty numbers on things like transaction fees anyway.

Schultz - April 10, 2014, 11:02 am

Hey doc, how many MH/s is your pool currently pushing?

Thanks.

Doctor Blue - April 10, 2014, 11:05 am

(Apr 10, 2014 11:02 AM)Schultz Wrote: [\[CITE\]](#) Hey doc, how many MH/s is your pool currently pushing?

Thanks.

You'll always be able to see that on the pool statistics page, even without logging in :)

<http://pool.omnicoin.cc/index.php?page=statistics&action=pool>

~75 MH/s over 37 workers at the moment.

Raijin - April 10, 2014, 11:06 am

Even though I'm not on your pool I'd like to say thank you for the 3.7.2 download.

I've been searching for a clean non survey download from a trusted source.

Been using sgminer up till now.

Question about being a donor what are the benefits? I have seen some pools(not for omc) that if your a donor it cost less of a fee and stuff like that... KI have no problem helping out the pool but was just wondering.

Doctor Blue - April 10, 2014, 11:22 am

(Apr 10, 2014 11:18 AM)Imm?rtal Wrote: [\[CITE\]](#) Question about being a donor what are the benefits? I have seen some pools(not for omc) that if your a donor it cost less of a fee and stuff like that... KI have no problem helping out the pool but was just wondering.

Well if you donate 1% it wouldn't make sense to remove the 1% fee so that sounds like a weird idea.

If you're thinking of monthly payments then no. I don't think I even have a public donation address anywhere. The litecoin address at the bottom of the website is for mpos, and I personally think TheSerapher has earned that spot.

I have two suggestions if you'd like to donate though.

- 1) Set donation percentage for the pool (50% goes to me, 50% goes to Omniscient)
- 2) Donate directly to Omniscient (100% to Omniscient)

I'm not taking direct donations. I don't need them so I don't want to be begging for them either :) Remember Omniscient is paying my bills.

Immortal - April 10, 2014, 11:37 am

I compleatly agree but, Im talking about for people that donate more than 2%

no Donation 0%-2% Donation 2% or more Donation got that info from (
<http://pool.omnicoin.cc/index.php?page=statistics&action=pool>)

are there any plus sides other that keeping the pool running?

Doctor Blue - April 10, 2014, 12:28 pm

Not at the moment, no.

I don't know if I'll add anything in the future, I'd probably just add most of it for free.

Goldbach - April 11, 2014, 12:50 am

Anyone know if CPU mining is even worth it?

Doctor Blue - April 11, 2014, 1:19 am

(Apr 11, 2014 12:50 AM)Goldbach Wrote: [\[CITE\]](#) Anyone know if CPU mining is even worth it? It's not.

CPU mining is never worth it when you can do literally 100x with a GPU at only double the price and double the power.

Sutorimu - April 11, 2014, 3:34 am

Not worth to mine it with your own computer...

Getting 200khash only with my gpu.

Doctor Blue - April 11, 2014, 3:38 am

(Apr 11, 2014 03:34 AM)Sutorimu Wrote: [\[CITE\]](#) Not worth to mine it with your own computer...

Getting 200khash only with my gpu.
If you save the coins for later it might pay off though

Sutorimu - April 11, 2014, 4:11 am

(Apr 11, 2014 03:38 AM)Doctor Blue Wrote: [\[CITE\]](#) If you save the coins for later it might pay off though

Even though its HF's official crypto currency i still dont think it will be worth much unless omni will intergrate it with HF, upgrades, stickys, donations, everything.

And whats worse is that people are minning omc on slaves, thats just sad.

Omni should disallow it.

Doctor Blue - April 11, 2014, 5:56 am

(Apr 11, 2014 04:11 AM)Sutorimu Wrote: [\[CITE\]](#) Even though its HF's official crypto currency i still dont think it will be worth much unless omni will intergrate it with HF, upgrades, stickys, donations, everything.

As far as I can tell he's working on it a lot right now.

(Apr 11, 2014 04:11 AM)Sutorimu Wrote: [\[CITE\]](#) And whats worse is that people are minning omc on slaves, thats just sad.

Sutorimu - April 11, 2014, 8:29 am

(Apr 11, 2014 08:24 AM)Imm?rtal Wrote: [\[CITE\]](#) lol my first block :F

How much do you get per block?
And how can you mine blocks instead of in pool?

Doctor Blue - April 11, 2014, 8:33 am

(Apr 11, 2014 08:29 AM)Sutorimu Wrote: [\[CITE\]](#) How much do you get per block?

And how can you mine blocks instead of in pool?

Solo-mining is not very profitable, just stay in a pool.

He mined a block for the pool, it earns the pool the block reward which is then spread between the miners depending on the amount of work they put into it.

~Jay~ - April 11, 2014, 8:35 am

losing connection and getting Cloudflare error pages. Until it becomes stable again I'm going to be switching pools.

It's not unstable, it's just under attack.

Since the primary stratum server also holds the wallet, attacking that also takes down the secondary stratum server. Bear in mind that the secondary is just one I set up while we had issues and I'm not providing it for backup reasons, only for people who haven't gotten it together to change yet.

??? ??? - April 12, 2014, 4:27 pm

It's up right now?

Just configure another pool as a failover and your problem's solved.

Cryptic™ - April 13, 2014, 8:10 am

Looks like most people are using xenon's pool at the moment. Highest worker on this pool is 1.5MH/s

Doctor Blue - April 13, 2014, 8:19 am

(Apr 13, 2014 08:10 AM)Cryptic™ Wrote: [\[CITE\]](#) Looks like most people are using xenon's pool at the moment. Highest worker on this pool is 1.5MH/s

It's because of the instability lately.

Usually it's about 1/3rd or more, sometimes it drops low.

w?rlokt - April 13, 2014, 10:57 am

I really like your pool, having a nice Hashrate on it! Good job!

Quiver - April 14, 2014, 12:49 pm

Keep us updated on when you get everything secure from anymore DDOS attacks. :)

Doctor Blue - April 14, 2014, 3:24 pm

Shutting down all services to enable DDoS protection. Downtime should be 10 minutes tops unless something unexpected happens.

EDIT: Maintenance done. Please make sure to move your miners to the new IP (192.99.42.54)

Nicodemon - April 14, 2014, 9:31 pm

It's strange, but when i change to the new pool ip, i don't see any stats updating on the pool, or even see my workers, but they are mining ?

Just went back to last ip for now, which works fine ;)

Omniscient - April 14, 2014, 11:18 pm

Everyone needs to get off the old pool IP 107.170.98.160 within 48 hours because the server will be shut down.

The new pool ip: 192.99.42.54

Doctor Blue - April 15, 2014, 2:05 am

(Apr 14, 2014 09:31 PM)Nicodemon Wrote: [\[CITE\]](#) It's strange, but when i change to the new pool ip, i don't see any stats updating on the pool, or even see my workers, but they are mining ?

Just went back to last ip for now, which works fine ;)

Should be fixed now, sorry for the inconvenience. Please switch back to the new server :)

There are some issues with the payout cron, but they don't seem to affect you. If something weird happens with regards to your balance then this is probably the issue. You're not losing coins, they're just not being counted before the script is fixed.

Doctor Blue - April 16, 2014, 7:51 am

Server is down, allegedly because of a DDoS attack.

I can't know for sure until I get word from Omniscient.

Naveen - April 16, 2014, 7:56 am

Mining pool is not available. May be DDOSed. Check it out.

24/7 - April 16, 2014, 9:37 am

You should update the 'Getting started' to the new ip.

Doctor Blue - April 16, 2014, 12:47 pm

Yes it can be a bit slow. This usually happens with the latest transactions, but shouldn't be a concern.

Cryptic™ - April 20, 2014, 1:36 pm

Been using this pool since day 1. It's been rock solid since the switch to OVH.

Doctor Blue - April 20, 2014, 3:45 pm

At long last the e-mail issue has been resolved.

Configuring sendmail is more retarded than I initially thought, but I did manage to get through it.

'Fox - April 21, 2014, 5:33 pm

How come you didn't make the link to the site in the original post clickable :(i have to copy and paste it everytime Q.Q

If you set it to 1 you should be paid whenever your confirmed amount passes 1 OMC. Keep in mind that payouts are only processed every 5 minutes, so if you earn more than 1 OMC in that time you'll just receive everything in one transaction to save you some fees (and save us some work).

Yes it broke again, it seems our transactional e-mail service started removing support for some TLS ciphers and left are only some not supported by sendmail.

I've already contacted them for support on the matter. I will disable the two-factor check now until I get it working again.

Also this may be a good chance to remind everyone to enable automatic payouts. The more coins we hold, the more attractive we will be to hostile users. If you withdraw them they'll be safer with you as well!

GrumpyOldGit - April 24, 2014, 11:49 pm

/rant

Yes, sometimes if they're lucky they actually manage to kick off the omnicoin daemon. I'm not exactly sure how because it's impossible to connect to the RPC from outside (Which means it can't connect through other means than localhost).

Now is an extremely good time to start mining because the difficulty will probably go up for a while due to Omniscient's excitement boost (getting added on an exchange and smashing through the poll on coinpayments). It's still around 2, last time it hyped we hit 30.

qwerty101 - April 26, 2014, 2:06 am

When I mine it shows speed and block data in the miner, but it still shows that i am mining at 0mh on the website.

Any ideas?

XBatt - April 26, 2014, 7:32 am

Looks like I've taken first place!

hello im me - April 26, 2014, 8:34 am

This is my first time mining, (I haven't even been mining BTC) and everything works fine. This might be a stupid question, but how do I transfer my OMC earnings to my OMC wallet?

Im sorry, im just new to this ?

Edit: Found the answer! Thanks!

Cryptic™ - April 26, 2014, 1:09 pm

Been mining for the past few days with no hiccups.

Spoiler ([Click to View](#))

killer34000 - April 26, 2014, 4:37 pm

i would like to mine again omc, but i want to know something are you going to change the ip again or it will stay like that stratum+tcp://192.99.42.54:3333 ?

last time i was mining omc and you changed the ip :(i was mining 1 week for nothing.

thank you

Doctor Blue - April 26, 2014, 4:40 pm

I was actually going to do it but then we switched to Omniscient's server and domain. I'm not sure why he's even using cloudflare, but meh.

Malevolent - April 26, 2014, 6:39 pm

Tried to mine using cuda miner and I don't believe I was doing it right...

Omniscient - April 26, 2014, 7:20 pm

Quote:I was actually going to do it but then we switched to Omniscient's server and domain. I'm not sure why he's even using cloudflare, but meh.

Sir. I'm not so dense that when I added the A DNS records for the nodes that I didn't disable the Cloudflare protection so it's a direct connect. They are only dumb DNS hosting the omnicoin nodes.

Please test yourself. I'd also rather use the domain address A records for the nodes in the conf file but you said it didn't work. You didn't at the time say why though. I had assumed the script didn't allow A record checking and DNS resolving.

No no no, you don't get my point.

The A record pointing to the website is routed through Cloudflare, and you cannot use stratum through Cloudflare. So either the @ and www A records should go around cloudflare or you could create another A record named stratum or mining or whatever pointing at the same IP.

You might be thinking of the nodes :)

Also I noticed you're not doing it anymore, so I'll just swap out the IP in the threads etc.

VRUMM - April 29, 2014, 10:49 am

Disappointed in this pool. The first time I used this, I lost 60% of my hashing power. I used it just now and it was down for a very long while losing nearly 50% of the coins I would have mined. XenOn's pool.

This one

As you can see at one point, I lost nearly 50Mh/s of power

Fatboy Slim - April 29, 2014, 11:47 am

-snip-

If you pay attention to the x-axis that was for an approximate 5 minutes.

I'm sorry if that comes out wrong, because I agree with you. This isn't acceptable performance. I'm actually in the middle of replacing stratum with NOMP and doing some optimizations right now, mostly because of today's instabilities.

I'm hoping to get it up and running tonight, worst case tomorrow morning-ish.

This is not the kind of thing that triggers warnings with me because it usually means something is wrong with the miner, so if this happens to anyone again, please send me a PM so I can look into the matter. I'd be ever so grateful :)

I'm terribly sorry of the inconvenience.

(Apr 29, 2014 12:44 PM)Abstractionz Wrote: [\[CITE\]](#) First time I used this pool (2 days before

DDoS), I got 96 OMC in about 8 hours of mining...

In the last 3 days worth of mining (about ~60 hours), I have earned a grand total of 40 coins - wtf? Ehm. That has nothing to do with the pool, that's just your hashrate versus the network difficulty. The amount of coins you earn will change depending on the network hashrate and difficulty. Sorry, but I won't take the blame for that.

Fatboy Slim - April 29, 2014, 1:32 pm

Also, it's not always been like this, it worked perfectly yesterday.

Keep me updated about the status. ?

VRUMM - April 29, 2014, 2:44 pm

In 1 hour, I lost about 10mh/s using this pool. I don't see why it shouldn't be taken seriously.

Doctor Blue - April 29, 2014, 2:48 pm

(Apr 29, 2014 02:44 PM)Sh1eld Wrote: [\[CITE\]](#) In 1 hour, I lost about 10mh/s using this pool. I don't see why it shouldn't be taken seriously.

I am taking it seriously. That's exactly what I'm saying.

NOMP seems to be running great. I'll take it out for a test spin for ~10 minutes and see if the invalid count gets better or worse in a short while.

VRUMM - April 29, 2014, 3:00 pm

I am sorry, but this maybe the last time I use your pool. I thought I could trust it to give it a try again, but I was really disappointed.

Doctor Blue - April 29, 2014, 3:16 pm

(Apr 29, 2014 03:00 PM)Sh1eld Wrote: [\[CITE\]](#) I am sorry, but this maybe the last time I use your pool. I thought I could trust it to give it a try again, but I was really disappointed.

Okay, you're free to have your opinion, I respect that.

Just switched over to NOMP now. catching up and determining the different difficulties will take a while, after which it should stabilize and the rejected share count should be significantly reduced.

Keep in mind that it can take a while to actually connect while this is happening.

EDIT: Okay, so we're still getting quite some invalid shares. I'll continue my search tomorrow. I promise I'll get to the bottom of this!

Winners - April 29, 2014, 3:55 pm

Could someone please help me set this up? I am new to mining and have everything downloaded. Thanks.

Doctor Blue - April 29, 2014, 9:43 pm

Yes. I just checked my own uptime monitor, I wonder why it didn't trigger a warning.

It was unavailable because I hit + instead of 0 in the configuration without noticing. Luckily my cursor was still in that spot when I realized something was wrong, so it was relatively easy to fix without having to scour through log files and all that.

Stratum was still 100% unaffected though, so you haven't lost any money, it was only the website.

Ping got a hundred times better when I switched to NOMP :)

Robust - April 30, 2014, 10:24 am

Title says no more pool fee, the top of the thread says the pool fee is "not" waived. What?

Colorado - April 30, 2014, 10:26 am

Not more than a few minutes.

Which miner and configuration are you using, and on what hardware?

Can you give a screenshot of the miner when it's running?

(Apr 30, 2014 10:24 AM)Robust Wrote: [\[CITE\]](#) Title says no more pool fee, the top of the thread says the pool fee is "not" waived. What?

Great... I meant to write "now", hehe. Fixing it not ?

Just wondering if im mining at a decent speed? Using a AMD Radeon 7950 3GB.

Xerotic - May 1, 2014, 6:24 am

Is mining in this pool efficient if I have about a 200k hashrate?

Doctor Blue - May 1, 2014, 7:13 am

(May 1, 2014 04:19 AM)Lune Wrote: [\[CITE\]](#) Just wondering if im mining at a decent speed? Using a AMD Radeon 7950 3GB.

I've seen most people with a 7950 get a lot more than 50 (200+ actually), so I wouldn't say it's good. Try tweaking the settings.

(May 1, 2014 06:24 AM)Xerotic Wrote: [\[CITE\]](#) Is mining in this pool efficient if I have about a 200k hashrate?

Pool mining is always more efficient unless it's extremely unstable.

It's just a matter of picking a pool and make sure you have a failover if something suddenly goes wrong, and then your pool choice doesn't matter much :)

Infobesity - May 1, 2014, 5:36 pm

If I were to rent a rig, would the algorithm be "Script". Just wanna verify, I believe the answer is somewhat on the original post.

Quote:as newer versions don't support GPU mining nor script mining and those are the things you

Take the average mining rate of each and every one of your rigs and add them up.
Take the percentage of each miner (for instance worker1: 30%)
Now you just take 30% of your total mined coins and you have the mined coins for a specific worker, shouldn't be too hard, but can be a little bit inaccurate.

Cryptic™ - May 2, 2014, 2:21 am

I just rented my first rig.

95 MH/s for 24 hours @ 0.6365 BTC = ~ \$283 USD

It will earn around 7335 OMC, let's assume at least 7000 OMC.

OMC rates will be around 1:20 soon so $7000 \text{ OMC} \times 0.05 = \$350$ assuming I sell it right away.

I currently have over 80K OMC and I plan on holding for long term.

Spoiler ([Click to View](#))

I think it's like that due to the fact that the coin was made for a community that you are apart of. All other coins (like BTC/DOGE/LTC) their just coins to us.

But OMC has more meaning to us than that. It's technically a part of us, if you know what I mean.

are you supposed to fill in username and userpass? cuz for some reason it doesn't open once i do that..

Don't change userpass, change username, workername and password.

Your username is the one used on the website, workername is what you wrote when you added the worker, and worker password is the password you put for the worker.

An example:

```
Code minerd.exe --url=stratum+tcp://192.99.42.54:3333 --userpass=DoctorBlue.alpha:x
```

Cryptic™ - May 3, 2014, 3:35 pm

I'm not sure if you have to put the --script tag for minerd, if it does not work then you should try adding it.

Doctor Blue - May 3, 2014, 3:38 pm

(May 3, 2014 03:35 PM)Cryptic™ Wrote: [\[CITE\]](#) I'm not sure if you have to put the --script tag for minerd, if it does not work then you should try adding it.

cpuminer assumes script by default. That being said, it's -a script, while --script is cgminer and cudaminer :)

Target™ - May 3, 2014, 5:21 pm

how much coins can you make on average from cpu?

i know it isn't much but eh

is it better to set up a rat then mine?

.Matt - May 3, 2014, 5:25 pm

Might be a stupid question, but how much coins can you mine @ 345 khash/s?

Doctor Blue - May 4, 2014, 12:09 pm

(May 4, 2014 02:24 AM)Alex™ Wrote: [\[CITE\]](#) I was testing out the pools to see how much they could handle and started cranking up the mh/s using a rig. Yes. ("List index out of range" error when it changes difficulty)

It's because you're stuffing everything under a single user and you're exceeding the maximum difficulty. NOMP is still in a beta-ish phase so it might just cause errors and disconnect. I'll heighten the limit when I can connect to the server.

I need to talk to Omniscient about something first...

Douchebag # 145 - May 4, 2014, 2:13 pm

(May 4, 2014 09:09 AM)Stewie ? Wrote: [\[CITE\]](#) Might be a stupid question, but how much coins can you mine @ 345 khash/s?

You'd be mining about 18 OMC/day with the current difficulty (25).

At 20 difficulty, 23 OMC/day.

At 30 difficulty, 15 OMC/day.

Stewie ? - May 4, 2014, 3:10 pm

Just wondering, what exactly is the threshold and what happens if you go over? Does the pool then take all the earnings?

There's a setting on the pool which wants users to keep less than X OMC in their account. You have exceeded that threshold so it wants you to withdraw your coins.

I recommend turning on auto payouts.

Doctor Blue - May 6, 2014, 12:02 am

(May 5, 2014 04:24 PM)Abraham Lincoln Wrote: [\[CITE\]](#) Just got this warning on my account while holding 1600+ OMC in my account:

Just wondering, what exactly is the threshold and what happens if you go over? Does the pool then take all the earnings?

All it's saying is you should really withdraw your coins. Pools are very susceptible to theft.

Also, not I am getting Error -55. ?

Hmm. As far as I can see, people having this issue either need memory, or need to allocate 100% of their graphics card.

On two new lines above the one in your batch file, try putting this:

```
setx GPU_MAX_ALLOC_PERCENT 100  
setx GPU_USE_SYNC_OBJECTS 1
```

Which graphics card do you have?

ven0m - May 6, 2014, 10:48 pm

Do you have a physical graphics card in your PC? Because that sounds a lot like on board graphics meaning you can only CPU mine.

KappaPride - May 6, 2014, 10:51 pm

Just dropped 4 mh on the pool hope to get some good omc :3

Doctor Blue - May 6, 2014, 10:53 pm

(May 6, 2014 10:48 PM)ven0m Wrote: [\[CITE\]](#) Does not help. I have Graphics Chipset ATI Radeon HD 4600 Series.

4630, 4650 or 4670?

There's quite a difference.

(May 6, 2014 10:50 PM)Cryptic™ Wrote: [\[CITE\]](#) Do you have a physical graphics card in your PC? Because that sounds a lot like on board graphics meaning you can only CPU mine.

Radeon and Radeon HD are dedicated graphics card series.

ven0m - May 7, 2014, 12:26 am

(May 6, 2014 10:50 PM)Cryptic™ Wrote: [\[CITE\]](#) Do you have a physical graphics card in your PC? Because that sounds a lot like on board graphics meaning you can only CPU mine.

Yes, I have external physical graphics card.

(May 6, 2014 10:53 PM)Doctor Blue Wrote: [\[CITE\]](#) 4630, 4650 or 4670?
There's quite a difference. My apology for the incomplete information. It is 4650.

Cryptic™ - May 7, 2014, 12:56 am

ven0m Wrote: [\[CITE\]](#) My apology for the incomplete information. It is 4650.
There is really no point for you to mine with that card.

<http://digitalcoin.co/forums/index.php?topic=327.0>
https://litecoin.info/Mining_hardware_comparison/raw_data

According to that your card is capable of ~ 25-40 kh/s.

If you still want to mine use this config

Code -l 14 -g 1 -w 64 --thread-concurrency 3200

Doctor Blue - May 7, 2014, 1:04 am

If you still want to mine use this config

Code -l 14 -g 1 -w 64 --thread-concurrency 3200

Probably how I would have put it. Everyone wants to try, regardless of the outcome. It's a simple, fun experiment. It's like printing money, but legal.

ven0m - May 7, 2014, 1:16 am

Quote: There is really no point for you to mine with that card. Honestly I do not mind. I am not into online monetization let alone crypto-currency. The recent Omnicoin integration peaked my interest, that's all. ?

Another query, where do I put the line?

Code -l 14 -g 1 -w 64 --thread-concurrency 3200

Thank you for your replies. Much appreciated. ?

Trival - May 7, 2014, 5:57 am

What's the maximum hash rate that we can mine on the pool?

Doctor Blue - May 7, 2014, 6:15 am

(May 7, 2014 05:57 AM)Sanders Wrote: [\[CITE\]](#) What's the maximum hash rate that we can mine on the pool?

There's no way to know except if it reaches a point where it stops working.

I haven't had any way to test it, but I generally just suggest going with several smaller rigs instead so it doesn't all come smashing down at the same time.

Trival - May 7, 2014, 6:19 am

He wasn't kicked. The connection dropped because the difficulty couldn't go any higher and NOMP is still in beta so the error handling didn't prevent it from disconnecting.

Since then I raised the difficulty limit from 4096 to something far higher I don't quite remember so it shouldn't be an issue anymore.

Saroya.Jutt - May 8, 2014, 8:55 am

atm i am mining with 200mh/s and i have plan to mine with 300+mh/s tomorrow, as i am renting the rigs, is there any possibility to kicked me off or i am in safe position?

You're reasonably safe. As Blue has said previously, the system he uses is experimental and can have some defects but it seems he has ironed out the kinks so far.

I suggest spreading the load of your hashrate to avoid loss due to downtime etc etc etc.

Saroya.Jutt - May 8, 2014, 10:25 am

(May 8, 2014 09:10 AM)?att Wrote: [\[CITE\]](#) You're reasonably safe. As Blue has said previously, the system he uses is experimental and can have some defects but it seems he has ironed out the kinks so far.

Oh okay. I wasn't sure because some pools keep them on separate servers. So even if the sites offline, it's still working.

.Matt - May 8, 2014, 2:31 pm

(May 8, 2014 01:36 PM)Cryptic™ Wrote: [\[CITE\]](#) Oh okay. I wasn't sure because some pools keep them on separate servers. So even if the sites offline, it's still working.

Nah even if they are on diff servers it still loses the users hash. the MPOS has to be online for hashrate to be registered and awarded.

xhflhkeuhwguu34 - May 8, 2014, 3:45 pm

(May 8, 2014 02:31 PM)?att Wrote: [\[CITE\]](#) Nah even if they are on diff servers it still loses the users hash. the MPOS has to be online for hashrate to be registered and awarded.

yeah no

stratum logs it all in a mysql database

i considered separating our frontend and backend, but didn't. it's easily done.

0x - May 8, 2014, 3:53 pm

I'm really impressed with the results of this pool. Mining at around 75mh and everything is running smooth.

Only thing is, you should put something on the homepage instead of having it blank ?

Doctor Blue - May 8, 2014, 4:27 pm

(May 8, 2014 10:25 AM)xerox™ Wrote: [\[CITE\]](#) thanks buddy, i will spread the load but i want answer please from Doctor Blue ?

What Matt said was pretty much what I would have said.

(May 8, 2014 11:24 AM)Pillows Wrote: [\[CITE\]](#) The website looks like it's offline. Am I in risk of losing my hashrate?

I wasn't there to see it so I can't say for sure, but my external uptime monitors didn't trigger any alerts so it was most likely a DDoS attack which was mitigated after a few minutes (5 minutes trigger warning emails to me). In that case mining would have been affected, but 1-2 minutes is insignificant. Even if it wasn't so, I wouldn't be able to do anything about it.

(May 8, 2014 12:47 PM)?att Wrote: [\[CITE\]](#) If the frontend is offline then yes you're losing coins. All coins when frontend is down goes to the pools wallet as it can't connect to MPOS.

Not true.

As long as omnicoind, stratum and mysqld stays up you will still be able to mine. They are completely independent of MPOS. MPOS just gets its details from the database, so essentially nothing is connecting to MPOS except the users.

(May 8, 2014 02:31 PM)?att Wrote: [\[CITE\]](#) Nah even if they are on diff servers it still loses the users hash. the MPOS has to be online for hashrate to be registered and awarded.

The coins are awarded when the payout cronjob is run. The time between those runs doesn't matter, it will account for all new shares in the database, and they stay as new until mpos has been through them.

(May 8, 2014 03:45 PM)Xen0n Wrote: [\[CITE\]](#) yeah no

I considered that as well, but if you stop to think about it, the immense amount of information going

back and forth between MPOS and mysqld + stratum and mysqld you can't really do it without causing a significant impact on performance (unless both servers are on the same local network).

0x - - May 9, 2014, 6:10 am

I can't seem to turn on the monitor feature for my worker. It's returning a token error when attempting to switch it on.

Moon Rock - May 9, 2014, 7:48 am

Seems like the website's offline, I try to connect and I get this

Yes, my stratum server crashes when MySQL goes down (Sturdy development/sarcasm).

I can't monitor it externally because it's not externally accessible (and it really shouldn't be).

As you can see on the graph, the pool had a hashrate at all times:

<http://pool.omnicoin.cc/index.php?page=statistics&action=graphs>

Spoiler [\(Click to View\)](#)

Naturally it went down a lot because people were moving their miners, but it worked just as it should.

The high numbers at the end is a miscalculation caused by vardiff...

The high numbers at the end is a miscalculation caused by vardiff...Awesome i'm glad people never lost anything out of it :) I seen on your uptime robot that you had US.STRATUM? Do you have an EU.Stratum too?

Doctor Blue - May 10, 2014, 2:42 am

(May 10, 2014 02:38 AM).Matt Wrote: [\[CITE\]](#) Awesome i'm glad people never lost anything out of it :) I seen on your uptime robot that you had US.STRATUM? Do you have an EU.Stratum too? Nah. I had a server in france temporarily, but us.Stratum is just because MPOS requires that naming scheme to show flags in the uptime monitor.

<http://pool.omnicoin.cc/index.php?page=statistics&action=uptime>

I have considered adding another stratum server, but I'm still trying to figure out how to do it without causing a significant impact in performance. Stratum sends a lot of information towards the database and mpos reads a lot of information, so the solution might be something like a database cluster. I don't know yet, I haven't had the time to research it properly.

Doctor Blue - May 11, 2014, 7:40 am

Just fixed the blank index page.

Well, fixed as in rewrote it to the dashboard because it seems redundant with all the news being here on the forum.

FantaSec - May 11, 2014, 8:15 am

What uptime monitor do you have/use? Looks really sleek and efficient :)

.Matt - May 11, 2014, 8:18 am

(May 11, 2014 08:15 AM)FantaSec Wrote: [\[CITE\]](#) What uptime monitor do you have/use? Looks really sleek and efficient :)

It's uptimerobot.com :) They have a great API. Blue is using the Built-in MPOS uptime monitor theme for it :)

Doctor Blue - May 11, 2014, 8:59 am

I usually go with pingdom.com, but I wanted to try something new (and use something supported by mpos so I could implement it), so I checked out uptimerobot.com. It's a lot better, except it doesn't check as often as pingdom does.

.Matt - May 11, 2014, 9:10 am

Credit means coins credited to your account. Those are transactions from my mining address to the address used to hold your coins apart from other users. Coins transferred out of the pool itself will be labeled Debit_AP or Debit_MP (Automatic/manual payout).

So the credit entries you're seeing is just the coins being added to your account on the website.

I also replied to your PM where I addressed the rest of your questions.

Ergo Proxy - May 13, 2014, 5:52 pm

I just rented some mining power which I will receive tomorrow. I hope this pool doesn't go offline during that time lol. I will donate 1% XD

Cryptic™ - May 14, 2014, 12:41 pm

(May 14, 2014 01:25 PM)erhassettbg Wrote: [\[CITE\]](#) That's exactly what it shows. Any ETA of when it will be up?

Yes, it should work now.

Apparently, when you update the php-fpm packages in yum it decides to change the ownership of the unix socket and the temporary data directories to apache, which is not good because I use Apache. So that meant 3 minutes of extra unexpected downtime.

Sorry for the inconvenience!

erhassettbg - May 14, 2014, 1:43 pm

Nicodemon - May 15, 2014, 8:46 am

i shifted to another pool for a change last night,for pretty much the first time since starting mining, but it was nothing to do with fees ?

I was just getting most of the coins to myself as it was only me and another person on lol.

Gave it another quick shot today and the pool has gone down.....so back to old faithful Omnicoin.cc pool.

I noticed hoppedup has almost caught me up on the blocks ? best get cracking.

.Matt - May 15, 2014, 8:50 am

All should even out between all of the pools hopefully once all of the fees are re-introduced :)

Chaorii - May 15, 2014, 2:09 pm

I think that is a good idea of fees is returning,
which will give out more opportunity for other pool owners.

BeatHimUp

Doctor Blue - May 16, 2014, 3:45 pm

I hope you feel the pool has been running better lately, I have been silently tweaking some settings to make it less loaded.

If you experience any problems with it, please let me know so I can investigate it further.

The pool fee has been updated.

Congratulations to killahrepublic, you mined block number 20.000!

Sahar - May 16, 2014, 4:41 pm

Kindly, I need your help

- I'm using cgminer for my ATI Radeon HD 4870 X2, it's mining with 17 Kh/s when it's supposed to mine with 100 Kh/s or more since it's X2

- pooler cpuminer is always timing out when connecting to the pool

- cgminer connected once to the pool and now it's not connecting although it's running

Here is an screenshot

.Matt - May 16, 2014, 4:51 pm

Press [G] and then [I] and set it to a number between 1-30 for which intensity is best for your GFX card. you can find what's best by using the litecoin mining wiki

Sahar - May 16, 2014, 5:12 pm

Dear Matt,

Thank you for your reply and help

I'm using GUIminer and I'm getting 10 and 9 Khash/s now, how is this ?

When I used Bitcoin at it's first days, I was hearing the sound of my card high because of the speed fan.

OMG, and I have X2 !!

Dr.Rockzo - May 16, 2014, 6:03 pm

minerd.exe --url=stratum+tcp://minerd.exe --url=stratum+tcp://192.99.42.54:3333
--userpass=eans_eons.user:password it opens and closed right away

Gt403cyl - May 16, 2014, 9:37 pm

I honestly don't mind paying the fee, I just donate 1% instead of 2%, I understand it takes work to keep the pool running so hey I benefit from giving something back !

Sorry for this...maybe its a stupid question

No --userpass is telling the script that the next information will be the username and password, you only need to change the "username.workername:password"

Hope this helps!

Abe Washington - May 23, 2014, 4:29 pm

Yeah, I kept that rate for about 6hrs yesterday. Ended up mining around 5k OMC.

.Matt - May 24, 2014, 12:51 pm

Yeah. I guess i'm to blame for the super hashing for 5 mins at a time. I started it by just testing my pool. People found the site i was using and now it's a clusterfuck. Sorry guys.

Doctor Blue - May 24, 2014, 4:05 pm

(May 24, 2014 12:51 PM).Matt Wrote: [\[CITE\]](#) Yeah. I guess i'm to blame for the super hashing for 5 mins at a time. I started it by just testing my pool. People found the site i was using and now it's a clusterfuck. Sorry guys.

It's a five minute average of ~40%, I think we're good for now ^^

We have 8 virtual cores, so a load of 4.0 is equivalent to 50% load.

I just thought the spike looked funny.

Abe Washington - May 24, 2014, 4:33 pm

How much do you think your pool could handle? Like completely maxed out for a long period of time (12 hrs or so)

.Matt - May 24, 2014, 4:44 pm

Put it this way. If you can afford it for 12 hours the pool can handle it. My pool which i believe is the same specs only uses 35% peaks with 2.7gh/s I got to. Just please don't throw too much and kill the coin.

Doctor Blue - May 25, 2014, 3:46 am

I don't know, I never had the chance to test it.

It'll usually just peak in CPU usage for a few minutes until the worker difficulty is adjusted down and from thereon it shouldn't require any more work than the other workers.

Ortek - May 28, 2014, 3:55 am

Hello bud, i dont know if i should post this here, but the pool is down....fyi ;)

Ble\$\$eD - May 28, 2014, 6:25 am

~OMC~ - May 29, 2014, 6:07 am

I'm just gonna leave a short review of the pool here.

I, personally love it. I've been mining on it for a while and have mined over 25,000 OMC on it in total. Never any issues, either. It's fast and hardly any down time (other than the other day).

Also, when you've actually mined coins they come to confirmed balance fast, and the withdrawing is easy!

You did a great job, Doctor Blue. Well done.

CobraCode - May 29, 2014, 12:04 pm

Just started mining now, here we go.

Edit: Mining with my Gridseed. It's cool as fuck, really fast and is only like 8W!

Aceman - May 29, 2014, 12:54 pm

I love how reliable this pool and you have been Doctor Blue <3

Thank you!

It wouldn't have been worth anything if it wasn't for Omniscient though. I don't have the money to keep up with this sort of hardware (I usually only have \$200 per month available).

Nizam ? - June 1, 2014, 10:08 am

Just started mining now, and i can say this is a very nice pool to mine on :D

Invincible. - June 1, 2014, 11:13 am

It says unconfirmed on all of my latest transactions, why is that?

Abe Washington - June 1, 2014, 11:44 am

(Jun 1, 2014 11:13 AM)Donwessie Wrote: [\[CITE\]](#) It says unconfirmed on all of my latest transactions, why is that?

It takes 60 blocks after the one you discover to "confirm" the coins you mined.

Sometimes a block is mined and if the pool instantly paid out they could possibly lose money because another pool found the block just before the pool and since only 1 pool gets credit.. Hope that makes sense.

Invincible. - June 1, 2014, 11:58 am

Alright yeah, I get it I'll just wait, got some unconfirmed coins

Doctor Blue - June 1, 2014, 2:42 pm

(Jun 1, 2014 11:58 AM)Donwessie Wrote: [\[CITE\]](#) Alright yeah, I get it I'll just wait, got some unconfirmed coins

Like Dallas said it's because two pools can mine the same block at the same time, but only one of them will be rewarded. So without confirmations it'd cause a lot of major fuck ups :)

Moreover the mined coins are locked for 60 confirmations by the omnicoin network, so even if I wanted to give you the coins, I couldn't do it.

Payout scheme changed to pay per share to isolate some weird issues with the payout amounts. I suspect it could be related to the PPLNS settings, so this is a simple way to check it.

Pool is back to PPLNS again.

Alessyo - June 3, 2014, 8:42 am

Well, this is strange. I've been mining for like 30 minutes and at the start I could see what speed I get and actually get shaeres, but now I realised I only mined 0.2 OMC after 30 minutes. In the

CGMiner on my CMD it was showing a lot shares, but on the server not... What could the problem be ? DO I need port forwarding or what ?

Doctor Blue - June 3, 2014, 8:53 am

(Jun 3, 2014 08:42 AM)Alessyo Wrote: [\[CITE\]](#) Well, this is strange. Shares and coins are in no way the same thing. Shares are just parts of the work and it's backend stuff I don't know why the MPOS developer thought everyone should have on their dashboard.

The value of a share depends on the difficulty of the share and the total amount and difficulty of shares. You can't use the share count for anything other than seeing if your miner is experiencing hardware errors.

SIM-2090815 - June 3, 2014, 12:27 pm

Because the pool doesn't know your hashrate, they're just guesses based on your sharerate and difficulty.

The average is usually in the ballpark of your hashrate anyway.

Ch1m4zz - June 5, 2014, 4:56 am

(Jun 5, 2014 04:56 AM)Ch1m4zz Wrote: [\[CITE\]](#) Why doesn't it know my hash rate and how do I make it know it?

Because even if your computer sent the actual hashrate, the pool wouldn't know if you tampered with the number, so it's just calculating it from the amount of shares you send in instead.

It spikes a bit up and down, but it's not important anyway.

Trisomy 21 - June 6, 2014, 3:41 pm

So I put some BTW on NiceHash to try out mining, I used stratum+tcp://192.99.42.54:3333, and it said the status was dead, I got a refund but did I do something wrong or is there something going

on?

As far as I know it's also in part a problem with the KGW implementation. Someone has been planning to deploy a fix at some point, but I don't really know who or what.

That being said, stop mining like this, some of us think it's slightly annoying that it takes 60 minutes to get 4 confirmations on a network where it's supposed to take 12 minutes.

Aceman - June 13, 2014, 11:24 am

Well, since you seem to have quite a lot of invalid shares, it's most likely kicking you for sending that much invalid work, which in turn happens because people jump on/off with extreme hashrates all the time. Maybe the other pools don't use NOMP and thus don't have any automatic kicking mechanism. Do you get ~50% invalid shares with them as well? It seems a bit odd if this would be a

pool issue, because you're the only one with a low efficiency.

?Ñâzg?! - June 13, 2014, 5:14 pm

(Jun 13, 2014 04:53 PM)Doctor Blue Wrote: [\[CITE\]](#) Well, since you seem to have quite a lot of invalid shares, it's most likely kicking you for sending that much invalid work, which in turn happens because people jump on/off with extreme hashrates all the time. Maybe the other pools don't use NOMP and thus don't have any automatic kicking mechanism. Do you get ~50% invalid shares with them as well? It seems a bit odd if this would be a pool issue, because you're the only one with a low efficiency.

Well I have been mining on your pool for about a month or so and this never occurred until I noticed it about a day ago

I tried to mine on some other omnicoin pool --> <http://mineomni.pw/> but had the same issue for now I'm just going to mine litecoin on pool-x.eu until i find a way to deal with this issue

Edit: its perhaps just one of the NOMP Attack Mitigation feature

It's not the pools at all. The same issue happens with my pool but after a minute or so when the worker difficulty sorts its self out it goes back to 99%. Nicehash seems to trigger some of the NOMP warnings but i've had no real trouble with it. If people are mining with nicehash they can't just mine for 2 minutes. I would suggest atleast a 30 minute mining session, otherwise you will run into errors.

Tbh. I really do think that people would profit more from using betarigs now. Nicehash just messes up the difficulty and blocktime as seen last night whereas betarigs works almost flawlessly. Sure you make a couple coins less but is it really worth it to get 50 coins extra for your 10\$ and ruin everyone elses mining?

GreyPhantom - June 15, 2014, 5:48 am

I can't earn OmniCoin due to my Poor Specs.

ANT. - June 16, 2014, 3:56 am

awsome!... so if im right, i can mine OMC through the omnicoin.cc pool and my AMD GPU?

when are the coins confirmed in a pool?

Jaw?h - June 17, 2014, 9:40 pm

How do we change the settings? Use the list of video cards and found mine, not sure where to change each value.

Also, do i need any kind of wallet or change anything to send it to a current wallet? Or does it send it all to omni-blu/pool.omnicoin.cc ?

New to this, so bare with me.

Doctor Blue - June 18, 2014, 4:20 am

You add it at the end of the line in the batch file you created.

You need a wallet, because you only have the choice of sending everything at once from the pool (This is intentional). Remember that pools usually don't take any special precautions with regards to the wallet. It IS insecure and hence we don't want to hold your coins.

Download the wallet and make sure to pay out regularly from the "My Account" page.

Jaw?h - June 18, 2014, 6:25 am

Usually that means that the server is down, but that is not the case. If you're at a school, workplace, campus or somewhere else with a shared/public connection, you might not have access to use that port. In that case, you can either contact the IT administrator or route it through tor (which can (very) basically cloak it as HTTPS traffic).

Ch1m4zz - June 18, 2014, 1:44 pm

Where's everyone mining at right now? I have over half the current hashpower on the official pool yet I'm still not getting a lot because it seems others have switched their hash power elsewhere? Where are all you guys?!

.Matt - June 22, 2014, 12:41 pm

(Jun 22, 2014 12:36 PM)Just Reading Wrote: [\[CITE\]](#) Where's everyone mining at right now? I have over half the current hashpower on the official pool yet I'm still not getting a lot because it seems others have switched their hash power elsewhere? Where are all you guys?!

My pool appears to have a higher hashrate at the moment but this is due to one person doing a 68Mh/s mine. The network hashrate is only 99Mh/s so there isn't really anywhere else to go bar blues pool. Which adds up almost perfectly to the hashrate.

Grumpy - June 22, 2014, 1:03 pm

Is it worth CPU mining OMC? I have a extra dedicated machine with a E3 v2 sitting around I might fire up.

/jeremy/ - July 2, 2014, 5:44 am

(Jul 2, 2014 04:28 AM)ROUTERMELTER Wrote: [\[CITE\]](#) Is it worth CPU mining OMC? I have a extra dedicated machine with a E3 v2 sitting around I might fire up.

Nope, not at all unfortunatley. GPUs or ASIC miners are the only way to go right now.

nickchan - July 4, 2014, 12:29 am

Hey everytime I'm trying to mine the coins this happens.

<https://i.gyazo.com/df5150fbd2cb408f055ce877e16a9bc5.png>

Me and my friend [zSteve](#) are doing this.

The current bat file is this.

```
cgminer.exe -o stratum+tcp://192.99.42.54:3333 -u z0mb1esteve.zSteve -p thatoneguy --nocheck-golden --chips-count 6 --ltc-clk 328 -S //./COM3
```

HashRate

<https://puu.sh/9WfpB/ff34ad48ea.png>

Worker Info.

<https://puu.sh/9Wfq2/f4000c988a.png>

Share Info (why Is my efficiency so low?)

<https://puu.sh/9Wfqv/31ff7f8d04.png>

Unconfirmed Coins

<https://puu.sh/9Wfux/d95263fda6.png>

Alright so my questions are

Why is the Hash rate so high. The miner I bought is only 1.3M

Why is the Efficiency so Low.

Why in my cmd it's not telling me the speed.

:c

Doctor Blue - July 4, 2014, 2:07 am

Why is the Efficiency so Low.

Why in my cmd it's not telling me the speed.

:'c

I never tried using ASICs, so I can't really help you. CGMiner says there are hardware errors, you might want to look into that. Maybe the clockrate is too high.

Moen - July 6, 2014, 12:21 am

I read up on theese and it seems like they do this when the share diff on the pool is to low.

Firenet - July 11, 2014, 1:03 pm

nice thread . i love to start mining OMC . but i am noob to it .

may be using it . ?

Deathmaul - July 30, 2014, 6:30 am

If someone would be so kind to help me find the problem I am having here. I would be eternally grateful.

I am trying to mine with Cudaminer and I have a NVIDIA GeForce GTX 650 graphics card.

Been working on this for weeks and this is the farthest I have gotten. Really starting to get into the crypto currency and I would love the help if someone had the time.

PM me or Reply here, either way I will get what you leave me. Make sure to quote me so I see it if you reply here please. ?

Here is a screen shot of the Command prompt: Spoiler ([Click to View](#))

Dont mine with your CPU you would make hardly anything.

Doctor Blue - August 4, 2014, 2:10 pm

(Aug 4, 2014 12:50 PM)Dt31 Wrote: [\[CITE\]](#) Whenever I run the CPUMiner it stays on screen for about a second, I tried both the website and page version, but the window just closed with a message I cant read.

Quoting 'Snorlax's helpdesk thread:

If you want help from me, then post on the thread. Include as much information as you can. I need to see a picture of your batch output window.

I need to see your configuration (remove your password). And I need to know what kind of gear you are mining with (eg. which graphics card).

Error: Your batch window opens and closes immediately.

Part solution: Type "pause" (no quotation marks) on a new line. Save the file and open it. Post a screenshot here for help.

Error: Your batch window outputs "Unable to query CUDA driver version! Is an nVidia driver installed?"

Solution: Download and install [THIS](#)

Error: Error -1001: clGetPlatformsIDs failed (no OpenCL SDK installed?)

Solution: Update your AMD drivers to the latest version. Download and install [this](#). Reboot when done. If it still doesn't work, then remove all your drivers including the SDK and then install the latest AMD BETA driver.

Error: 'xxxx' is not recognized as an internal or external command, operable program or batch file.

Solution: Either you forgot to put the batch file (run.bat) into the miner folder.. or you need to specify the full path. Instead of cgminer.exe, cudaminer.exe, or minerd.exe in the batch file, put in the full path like this: C:\username\desktop\cudaminer\cudaminer.exe

Error: Stratum authentication failed

Solution: Either your username, worker name, or worker password is wrong. Make sure it matches the info on the pool site.

More will be added as I find them.

Mohatu - August 11, 2014, 7:19 pm

My Fury came in today, testing it out on the pool as I type this.

Mellowmz - August 18, 2014, 7:54 am

Mhm any idea on how to fix that ?

[2014-08-18 16:44:22] Started cgminer 3.7.2
[2014-08-18 16:44:23] Probing for an alive pool
[2014-08-18 16:45:23] No servers were found that could be used to get work from.
[2014-08-18 16:45:23] Please check the details from the list below of the servers you have input

When you have a low hashrate like that, it will take a while before it appears on the pool. It'll pop up eventually, don't worry.

segdeh - August 28, 2014, 1:57 pm

Oh. Thanks. That explains it.
Thanks for the help!?

EDIT: One more potential problem.
I forgot to add the OMC address when I set up my account.
I edited and changed it successfully, but the payments are still being sent to a null address(the field is empty in the table, not sure exactly where they are going). No confirmed or unconfirmed OMCs have arrived at the client. Thanks again in advance.

Doctor Blue - August 28, 2014, 11:59 pm

Did you remember to put your PIN when changing the payout address?

segdeh - August 29, 2014, 4:27 pm

Yes I put my pin into the box when I updated, and when I click on 'edit account', it displays the proper address in the field. It is only missing on the transactions page. The 'address' field is empty for fees and credit. (screenshot)

[img]http://it-likes.us/screenshot.JPG[/img] let me know if the screenshot does not work

Thanks for the help.

Abraham Lincoln - August 29, 2014, 4:29 pm

-snip- let me know if the screenshot does not work

Thanks for the help.

Those transactions are crediting OMC to your account from mining. They aren't sent to any address. Once they confirm then you can payout to your address.

segdeh - August 29, 2014, 5:16 pm

Oh. Thanks. I did not notice the 'cash out' box at the bottom of the 'edit user' page.

Thanks again to Doctor Blue and Abraham Lincoln for the help.

If anyone needs help setting up a pool and fixing setup problems i'm open to help but i can't make a pool for anyone as thats just asking for a problem.

Doctor Blue - September 8, 2014, 1:50 pm

(Sep 8, 2014 09:17 AM)causevd Wrote: [\[CITE\]](#) Why is that? Are you going to make an official pool? Most people are mining on his pool which where I am going to mine soon too. And it's the best. We're just making it fair-game for the other pools. There isn't anything wrong.

Abraham Lincoln - October 13, 2014, 1:19 am

Just a heads up to anyone mining, the pool has apparently crashed. It's been down for 7+ hours and so no new blocks have been mined.

Doctor Blue - October 13, 2014, 3:34 am

(Oct 13, 2014 01:19 AM)Abraham Lincoln Wrote: [\[CITE\]](#) Just a heads up to anyone mining, the pool has apparently crashed. It's been down for 7+ hours and so no new blocks have been mined.

Unfortunately those things always happen a couple of hours past midnight, right when I go to sleep. I can't get in touch with the server, but I am working with Omniscient to resolve the issues.

Trapology - October 13, 2014, 7:09 am

Still down ehh? Anyone got an update?

pekopon321 - October 13, 2014, 8:02 am

that's why i can't go to the pool's website, i hope the server will go up now, i want to try this xD

Doctor Blue - October 13, 2014, 11:06 am

(Oct 13, 2014 07:09 AM)TyZoR Wrote: [\[CITE\]](#) Still down ehh? Anyone got an update?

Yeah. Both Omniscient and I are busy men, and when we have to wait for eachother it can take a while.

I got the server back online, but for some reason omnicoind is no longer listening for RPC connections...

SIM-2090815 - October 13, 2014, 11:12 am

Good luck with resolving this issue, but maybe this is a good thing so the hash rate will be spread ?

Doctor Blue - October 13, 2014, 11:28 am

(Oct 13, 2014 11:12 AM)Dispaced Wrote: [\[CITE\]](#) Good luck with resolving this issue, but maybe this is a good thing so the hash rate will be spread ?

It should be fixed now. Payouts might be slightly delayed, as I just created a new wallet to speed up omnicoind loading time and reduce I/O on the server. This means that I manually had to mark some blocks as confirmed and the block statistics can act a bit weird.

SWS. - October 19, 2014, 2:26 pm

I would just like to point out that [Ortek](#) has now become the first person to have mined over 1 million OMC on the pool which I think deserves some recognition.

So congrats to my good friend Ortek.

His mails were just delayed. I have helped him out :)

The token expiration problem simply occurs because The Serapher (creator of MPOS) has set a rather low expiration time on CSRF tokens. I might increase those timers to some more sane values, like a few hours.

EliteTM - November 21, 2014, 11:58 pm

Is it recommended to leave the miners on 24/7? Or does it depend on how the CPU/GPU is cooled?

SIM-1456221 - November 22, 2014, 5:25 am

(Nov 22, 2014 12:58 AM)EliteTM Wrote: [\[CITE\]](#) Is it recommended to leave the miners on 24/7? Or does it depend on how the CPU/GPU is cooled?

The latter.

And Dr. Blue, I'm mining here for a while, I had no idea you owned it ?

Doctor Blue - November 22, 2014, 8:42 am

(Nov 22, 2014 12:58 AM)EliteTM Wrote: [\[CITE\]](#) Is it recommended to leave the miners on 24/7? Or does it depend on how the CPU/GPU is cooled?

Think of it like this: The more you use it, the more it wears. The hotter it is, the faster it wears during use.

gudkumar - November 22, 2014, 10:10 am

Thanks sir for hosting a nice pool like this.. I just contribute 100 Mh/s of mining hash to your pool..

Thanks

NiktoKan - November 22, 2014, 10:35 am

Any miner want to sell OMC? I need some fresh coin

lucky. - November 22, 2014, 9:21 pm

Oh yes, that reminds me that I need to update the block reward in the configuration for the estimates to be correct.

Doctor Blue - November 26, 2014, 2:15 am

It seems like the server just needed a restart. I apologize if the downtime has caused any trouble.

potatopete54 - November 26, 2014, 4:54 pm

Can't wait to start using this! Looks amazing.

Doctor Blue - January 5, 2015, 6:15 am

Sorry for all the downtime. The server should be running again now.

mti1993 - January 5, 2015, 7:11 am

why is the difficulty too low , even when the hash-rate goes up ??

Abraham Lincoln - January 5, 2015, 10:09 am

(Jan 5, 2015 08:11 AM)mti1993 Wrote: [\[CITE\]](#) why is the difficulty too low , even when the hash-rate goes up ??

The difficulty doesn't respond to the hashrate increase immediately. It takes a little while.

Doctor Blue - January 5, 2015, 11:56 am

It seems we're still having some issues processing payouts. I'll write an update as soon as the issue is corrected. Everything except payouts should be working.

EDIT: The payout issue is resolved.

Doctor Blue - February 5, 2015, 11:34 am

Unexpected downtime:

The omnicoin daemon running on the server is generating errors and fails to start. This breaks mining functionality. Backup is ready soon.

FRANKIE - February 5, 2015, 11:35 am

You have effort unlike anyone I have ever seen with every project you work on.

Keep at it lad.

Doctor Blue - February 5, 2015, 11:40 am

Backup is running and mining can be resumed. Payouts and statistics will be on hold until the primary coin daemon is back up and running.

Doctor Blue - February 7, 2015, 7:43 pm

Payouts should be working again now. Some statistics may be inaccurate, but I guess that's not as important as getting your money :)

Raoul Duke - February 8, 2015, 6:22 am

I have mined something like 2600 OMC during the downtime (hard to be accurate due to the difficulty fluctuation) and I only see 57.479709 OMC on my account

Doctor Blue - February 8, 2015, 10:39 am

(Feb 8, 2015 07:22 AM)Raoul Duke Wrote: [\[CITE\]](#) I have mined something like 2600 OMC during the downtime (hard to be accurate due to the difficulty fluctuation) and I only see 57.479709 OMC on my account

I need a username to look you up. It sounds a bit weird, as I've done this exact thing before and nothing was lost.

Gt403cyl - February 9, 2015, 9:03 am

seems the site is down

<https://gyazo.com/de3c6f2ee370a258c0a08cc331c3d4a9>

Those are shares that are counted by stratum, but a new block has been found and so the work in them is invalid.

These stratum packets are invalid. They are completely invalid shares, not just incorrect block solutions.

At least, that's what I understand from talking with Dr. Blue.

Aceman - March 3, 2015, 1:03 pm

(Mar 3, 2015 01:43 PM)Abraham Lincoln Wrote: [\[CITE\]](#) Those are shares that are counted by stratum, but a new block has been found and so the work in them is invalid.

At least, that's what I understand from talking with Dr. Blue. Trying to understand what's going on to further my knowledge so I hope you guys won't mind if I probe your brains a little bit. What would a normal share vs an invalid stratum packet look like?

Abraham Lincoln - March 3, 2015, 1:13 pm

(Mar 3, 2015 02:03 PM)Aceman Wrote: [\[CITE\]](#) Trying to understand what's going on to further my knowledge so I hope you guys won't mind if I probe your brains a little bit. What would a normal share vs an invalid stratum packet look like?

From what I understand, it's just json encoded data.

I'm not sure what Dr. Blue is receiving. I'd assume it's just not valid JSON data.

You can read more about the stratum protocol here: <https://mining.bitcoin.cz/stratum-mining>

Doctor Blue - March 3, 2015, 2:17 pm

(Mar 3, 2015 02:03 PM)Aceman Wrote: [\[CITE\]](#) Trying to understand what's going on to further my knowledge so I hope you guys won't mind if I probe your brains a little bit. What would a normal share vs an invalid stratum packet look like?

It's just data where something doesn't make sense to stratum so it's basically ignored. Anything that it cannot read is an invalid package. Invalid shares are shares that solve a problem that doesn't exist (That wasn't what I meant).

Usually this kind of thing comes from a broken or outdated miner.

As for the amounts not shown on your pool accounts this is just due to a stuck cronjob (An automated task running regularly in the background). All it does is check which blocks the pool has mined and indicate how much should be credited to each miner (the findblock cron, for the MPOS people). When I get it working, all the coins mined while it was stuck should be credited, so no work has been wasted whatsoever.

EDIT: If you give it a few minutes it should be catching up now.

EDIT2: Everything should be back in working order.

MusleHF - March 10, 2015, 5:24 pm

Hi, i have just a skid questions,
i have some BTC miner (sha-256) that i don't use anymore.

Would like to know if i can mine omnicoin with that ?

Thank you

I expect to empty the wallet and dump the database on monday, so if everything goes as planned, it should be working on tuesday :)

Ahhh great! cant wait to try mining this on my rig! ?

Doctor Blue - July 1, 2015, 5:31 pm

I have reinstalled the server (to get rid of the very troublesome CentOS installation) so now it's running Debian instead. NOMP has also been replaced by UNOMP to avoid some unpatched exploits found in NOMP. MPOS was also given a long overdue update, so the web part should also be faster.

You will have to create a new account on the pool, as upgrading the old database would be very prone to error. I will create a web page where you can log in with your old credentials and see/withdraw your balance from the old installation.

Have fun mining!

sv1cdr - July 8, 2015, 1:35 pm

why cant i register....>!!!!!! :{

Doctor Blue - July 8, 2015, 4:42 pm

(Jul 8, 2015 01:35 PM)sv1cdr Wrote: [\[CITE\]](#) why cant i register....>!!!!!! :{
You should be able to register. Can you be more specific about the problem?

Doctor Blue - July 9, 2015, 6:08 pm

The cluster on which the server is hosted, is having some issues. Therefore the pool, omnicha.in and the official nodes are currently unavailable.

EDIT: Everything is back up.

Doctor Blue - July 11, 2015, 11:41 am

It seems like there has been some issues sending a confirmation e-mail to new users. E-mail confirmation is now disabled, please try again. If you find any further issues, just shoot me a PM and I will look into it. I have activated all existing users.

Wardow - July 12, 2015, 4:50 am

The pool is up and running right now!

Go signup and mine guys!!

Best Regards, W?????.

sv1cdr - August 11, 2015, 6:45 am

trying now i hope this works

Doctor Blue - August 11, 2015, 8:11 am

(Aug 11, 2015 06:45 AM)sv1cdr Wrote: [\[CITE\]](#) trying now i hope this works

If it doesn't, be sure to send me a PM so I can fix it straight away. I don't see any reason why it shouldn't, though.

You most likely have, the cronjobs have stalled again. Give it 10-30 minutes and the funds should show up on your account.

(Aug 30, 2015 03:39 AM)Enter Down Wrote: [\[CITE\]](#) possible can minners with linux ? ...

Yes you can mine on Linux.

<https://rumorscity.com/2014/01/04/compile-and-install-cpuminer-on-linux-centos/>

If you're on Debian/Ubuntu you will want to swap

yum install git automake gcc make curl-devel

with

apt-get install git automake gcc make curl-dev

It's because you are mining with the CPU of a server. It almost never yields anything and when it does, it's not worth it at all. It's too inefficient to even show up on the pool.

Phreakdaline - September 4, 2015, 10:28 am

Just getting into this, using this pool. Looking promising. ?

LordCoder - September 20, 2015, 2:33 pm

Pool is discovering blocks but not paying.

Doctor Blue - September 20, 2015, 3:47 pm

Oh yep there they go lol, paid out.

Hispanic - September 20, 2015, 4:12 pm

CUDA Miner not available for download any longer?

NVM Found one, but I didn't find any configs for my GPU, GTX 960 4GB Windforce.

LordCoder - September 21, 2015, 12:38 pm

(Sep 21, 2015 12:26 PM)jameshaswon Wrote: [\[CITE\]](#) Doctor Blue, I am mining with your pool etc and my workers are not linking between the cgminer program and the website as they are not displaying as active etc.

Could you post an screenshot of your commandline?

RumbleFrog - September 27, 2015, 9:25 am

Apparently, my account was locked out and I didn't receive any email about how to unlock it. PMed you about it.

I have the latest complied version of cudaminer. let me know if you want it
ccminer is a shame it doesnt work with the latest maxwell cards.

I am getting not even double the speed with gtx 980. i am getting like 620 KH/s

I used to get 450 with radeon hd 7850 lol

Web-Weave - October 7, 2015, 10:50 am

Vouch for this pool wil always use it:D

Emoticon - October 13, 2015, 3:34 pm

Gonna hit it with the full force of my 3 PCs, each of which have decent graphics cards on them. Hopefully will generate 1MH/s or higher.

Later tonight, when I'm ready to go to sleep, though.

5.83 KH/s lol

Enjoi0523 - October 14, 2015, 4:09 pm

Hey, Doctor Blue, I can't send a PM yet but was wondering if I could ask you about the limitations of the pool. I'm assuming you're the one who owns the pool seeing how the other day it was down and you were able to get it fixed.

Doctor Blue - October 15, 2015, 11:56 am

What exactly do you mean by limitations?

It's not able to brew coffee, but it does a pretty decent job at pooling miners.

w?rloctt - October 26, 2015, 10:08 am

Is the pool still online? Can't open the website...

It does this sometimes. The best I can do right now is ask Omniscient to restart it. Weirdest part is that I don't get any downtime notification from uptimerobot anymore.
