The shadow is WAY too small considering where the light source is coming from....

Damn it still looks neat! Great job!

What all did you do asides from put a render on an image, and a large spot in the center? Might want to soften the shadow on the girl, and place it properly.

It's cool but that light tho. Plus the trees look so real but the guy doesn't

Free Hugs - March 30, 2014, 10:24 am

I have to agree with the shadow thing lots of light not so much shadow. ?

Do me a job and find that image without the render, then tell me what I did.

Read about light and how it works. This lighting is so wrong.

Put more time into the piece and build a better knowledge of lighting.

The shadow is way too small for that light. Also the girl looks rather fake compared to the trees but otherwise Great Job

Skylar™ - April 10, 2014, 6:22 pm

It's not a bad project. The shadow doesn't seem to match the lighting, I always would get the eraser tool and lower the opacity of the tool to 30-50% and erase the edges of the character a bit along with the shadow so that it looks a little more realistic.

7/10. Beautiful bg but the person looks very out of place.

Looks really good, as per usual.

Taught me everything I know I'm photoshop XD
