Thread: ["cast" icon in youtube app not there anymore?](#)

Superkawaii - March 31, 2014, 11:18 am

anyone notice that the cast option is no longer available on the youtube app on both apple and android devices? anyone know why?

for those that dont know what im talking about its an option when your phone/tablet is connected to the same network as your smart tv

when youre watching a video on your phone you can press the "cast" icon and it will play on your tv

i used this a lot because <http://www.reddit.com/r/fullmoviesonyoutube/> so now im pissed

this is what the cast icon looks like , its right beside the magnifying glass

You may be the only person to ever notice this ever.

Adding in an extra "ever" for good measure.

why bro? that thing was so useful

i loved watching documentaries about nature and mexican cartels on my 55 inch tv
