Thread: [\[Preview\] Shadow Consoles Shadow Updates](#)

antigeek - March 31, 2014, 1:07 pm

Okay I added to grab all the IP Address(GEO Location) Added as well. I'm still working on the image of the Flags I keep receiving a few errors. I might need to add a thread or a working for this. Due to the lag issue looking threw a big database of the Geo Locations. Here screen show of update.

Smelly Shoes - March 31, 2014, 1:39 pm

This looks fantastic. It'd be best to keep all the updates in one thread though. A feature I'd like to suggest in case you already haven't planned on implementing would be sorting. ie: Click on IP address column and it would sort either ascending or descending (alternating between each click).
