Thread: [Amazing Spreading Method/Personal Experience](#)

ThugWise - March 31, 2014, 3:13 pm

So one day, I got a follow on Twitter, it's a fake page of our school, and it is just posting tons of secrets/confessions of people at the school. Nothing was posted about me, but an idea sparked.

I proceeded to create a Twitter, similar concept and followed 450+ people from my area/school. I simply created a stub, and binded it with a word document. I uploaded the FUD file to mediafire and posted it on the page, which had (100+ followers) and posted the link and put something along the lines of, "Damn, here are 'sexy girl' nudes! Also said who sent them around, enjoy". Over fifty slaves from my school in less than 30 minutes. No, I didn't actually attach a pornographic photo.

I found this method was extremely useful, especially if you're not a huge fan of the people that attend school with you.

If you try this, be sure to use a VPN to make sure the principles of your schools don't do some digging in, and discover you created the page/virus.

Hope everybody enjoys this tutorial/personal experience! ? ?

This user has RAT'd members and is a scammer. BE CAREFUL.

Kind of "off-topic", but thank you for the information.

wow you've rat-ed fellow members, dude thats just brutal you should be banned for real were suppose to be like family here not fucking each other over!!!???

Skylar™ - April 1, 2014, 2:48 pm

This is a great idea! I'm thinking of doing a similar idea.

grady - April 1, 2014, 2:51 pm

Amazing idea, although what the members have said above you doesn't effect this method.
