What do you think? Its a simple question. You give them proof. If you cant, you either BS or leave.

I got a question about VCW im setting everything up, got manycam open with flashplayer, everything is good, but on skype, its says "can't start video, try closing other programs that might be using your webcam." but i got nothing open, tried restarting and everything

Something is interfering with your webcam, check your options on ManyCam and on Skype. Close any other program. I've seen that happen before when I have someone ratted, you might want to do a scan on your PC using MalwareBytes "https://www.malwarebytes.org"

If you still have an issue contact me on Skype.

Blak32 you will need a picture pack which can be found here on HackForums, and/or a VCW which I have listed 2 legit and great sellers below.
Then if you want to secure yourself get a VPN and a way to accept payments. (PayPal or Amazon Gift Card or there are other merchants that will allow payments)

This sounds like it isn't properly linked with the source file - if you are able to, re-run the original VCW command file and make sure it's linked with the video of the girl properly. If not, I'd say switch VCWs.

You can't post anything say your selling nudes or anything like that LOL you will get ghosted. There are threads on here by Devour "I think" that will do a phone verification for you.

You can try google voice, to verify it.

Change IP address, Clear Flash Cookies and LSO and you should be unghosted

when trying to verify your phone with anything, you should use this website:

<http://receive-sms-online.com/>

It lets you view a text message online, which means you can put that as the number and type in the CL verification PIN (if they even have one!)

And do what BM-King said in the post above! You may also want to try to purchase a VPN with a lot of servers so that when one gets ghosted you can switch to another!

best of luck eWhoring!!

Okay so how the actual hell am I even supposed to eWhore using VCWs? The chat loop on my VCW is only 16 seconds, it's hardly believable that my eWhore is actually real unless we can negotiate within like 30 seconds or so and have shit paid for. End the call and tell him that he will see more of you after he pays. If he asks for some sort of proof that you are real, like "call me and wave" or "call me and rise 2 fingers" then switch on the respective video and call him back (assuming that your VCW has the command he is asking for). What kind of VCW do you use? Flash based or videos in manycam?

And as for Craglist, delete your browser history and install Better Privacy. This is an add-on on Firefox that will delete flash cookies and localStorage.

also owned by BM_King!

as for how to keep them, don't be straight up trying to sell nudes, get alot of contacts say on the

saturday, then on the Tuesday start messaging them saying you just got an eviction notice and unless you pay x then you'll be out. Then start saying about how you will do anything for some money, and if you can get the ones who are horny, offer them pictures or a liveshow in order for some money!

I mean Chat-Avenue is just filled with people who wants shows for free. Also.. can you guys show me an example how to get to it? Like how do you do the small talk first, and how do you tell them you're offering shows for money while still getting their interest?

It really depends on how do you advertise your self.If you are spamming chatrooms or cragslist,ask them directly if they want to pay for a cam show as all of your victims have their dicks hard when they contact you and all they want is a quick fap.If you are using dating sites to get victims,chat with them a bit (even a few days if you consider that the person is worth your time) until you get to know each other and the person gains trust in you.While chatting focus your attention on the persons mindset.This will help you figure out how does your victim think,what kind of person he is and helps you discover his vulnerable spots(the key to success in ewhoring).Think about how could a girl convince/manipulate you to send her money for her rent,college expenses,plane/train ticket (whatever your niche is) and act like above.

Need some suggestions:

Let's say I have an adult fan page that has about +3000 active french fans. How should I monetize

this with CPA without getting banned from either the CPA network or FB? What should I offer them?

How should the page be setup so it won't get terminated?

That's more complicated then it sounds, lol. A play on word's would be in your best interest, try to make a offer that doesn't breach rules or regulations. Offer them w/e you'd like to, just try and make it sound as business like as possible. Nothing straight forward and obvious will work in that situation.

Cam Software?

You can eWhore and spoof and bind your RAT to look like a video....

Like a webcam/live streaming software/method in which you don't need your own FMS or host and all you have to do is send them a link to the streaming site. Not trying to infect anyone.

When they ask you why they can't hear you, say something like:

"Oh, my little brother borewed my microphone, Let me take a look on his room."

few minutes later:

"Sorry I can't find it :("

Ofcourse, you don't say it litterally like that, just something inbetween these lines :p

Take pictures of the girl when she's in the show, or get a girl who has pictures of her, or even go onto google & find an image you can use...

You shoul't then, if you're serious about it, look into a special sort of package where you get say 500 friends & 30 likes on a facebook profile picture (Seems pretty normal, you DON'T want to have all these thousands or it will seem too good to be true.)

Hope this helps!

It's because you should open the .SWF file in the Flashplayer.

If it still automatically closes try following this tutorial:
<https://hackforums.net/showthread.php?tid=3886548> - Tutorial fixing flashplayer

If you don't have a Stand Alone flashplayer:
http://fpdownload.macromedia.com/get/flashplayer/installers/archive/fp10_archive.zip (this is from the official adobe site. Look for a flashplayer in this .zip that contains SA, wich stands for Stand Alone.)

Thx.

Social media fame is probably what your looking for. Any site will work for this, facebook, twitter, IG, ect. Cam websites and so forth will be a good place to try it at.

If you mean on a forum, where others are aware of what you are doing, then live streaming is always a good start.

Social media services are potentially the best way to start , also if you find a few other e-whore's that e-whore through facebook you can possibly set something up with them like some shoutouts & tags in statuses (e.g: Chilling with the girls tonight xoxo [tag here])

Hi there

I succeed in finding people in chatavenue and then in Skype, I've got a vcw etc but they all ask preview then I show the preview nobody pays, are they fuc*** broke? How do you find some "serious" buyers?

Well in the preview what are you showing ? If you show nudity than that is why they run away after , only supply proof such as waving , fingers , standing up , etc.

Another way to actually get serious buyers is to advertise your Skype by saying you are selling cheap camshows , you will probably get less adds but overall you will get more serious buyers adding you

Perelman - May 8, 2014, 8:05 am

I must be unlucky then cause I first ask them what they want to see since I've been scammed lot of time and it'll be quick. They usually say " wave me" "blow me a kiss" " stand up" " show 2 fingers" , I look if I can and I do this , they say Ok, I buy and then block me...

Well it could be your SE skills than , e-whoring requires you to actually act & type like a girl , make sure you're typing like a ' naughty little girl ' so you get there full attention & get them excited , if you know what I mean , also make sure you're not typing while your VCW is away or not typing on the computer , this will make things pretty obvious that it's fake

Perelman - May 8, 2014, 8:18 am

I always make sure i'm typing while she's typing , maybe it is my SE skill, but I think they all are broke pervs who just want free shows.

I'm going to think about a method that will provide me with retard riches old guys, they may be the best targets

Well best advice I could give you for gaining SE skills or knowledge on it is to talk to actual sluts on Facebook , twitter , wherever these hoes may lurk , take notes on how they talk to you & how they type , another way is to find some livestreams to watch on e-whoring that you can get some ideas from

Also do not limit yourself to just one site , lurk around & find many more , what I do is I tend to advertise my Skype on many different chat rooms & sites than I go back on Skype & will have lots of adds & more than likely there will be a few interested in paying

Perelman - May 8, 2014, 8:31 am

Okay thank you Stitch , I'll try and give feedbacks to the community

I, myself, use mediafire to upload my nudes in a .rar file.

I guess they don't check the content of your .rar files. (I could be wrong about this)

The only problem is that the costumers often don't have winrar or 7zip.

That might be a problem, I'm still working on improving that part.

I don't really understand the question, though I can see what your getting at. If your ad's are not being (Ghosted) then no, you would not. If they are, A proxy/VPN may manage to keep your ad up, you can see our thread on updated and quality VPN's.

On Craigslist a ad is pretty much similar to a thread on Hackforums except the people interested in responding with reply to your e-whores email , not on the ad

Use hashtags like #sexy #nudes #kinky #naughty etc. to attract potential customers. When they message you just chat with them a bit until they gain some trust in you before you ask them for money

Those hashtags can't be used on Instagram, they censored out lots of hashtags, before you use a hashtag search up the tag in the 'explore' section of Instagram, if nothing comes up then that means that the tag is most likely banned from being searched, which means there is no point, the only way to get past this would be putting two words into one hashtag (e.g: #Weed = Banned / #SmokeWeed = Good) same thing applies for hashtagging your photo to attract people to your e-whores pictures

I've been ewhoring for a few days through craigslist and I've already made \$250 because Ive been going through an approach that I dont know if many others have tried. Regardless, its really tough to make new craigslist posts and for the most part they get flagged before anyone can see them, I make sure to have all thats in it appear really casual and I never once hint to selling anything.

The biggest thing keeping me from making more is just how time consuming and difficult it is to get a valid craigslist post up, if you could help me with that I'd really appreciate it!

My friend Gabe838 who I've been working with on this put up a post in the main sub but I figured id ask here.

What you can do to make your VCW work faster is to click on the VCW's "View" tab go to "Quality" and set it to Low. Let us know if that changed anything.

This has probably been asked many times, but I've searched a lot and couldn't find an updated answer.

I can't get the VCW to play in my browser.

Chrome uses its pre-installed updated version of adobe flash player and even if I disable it in chrome and install an older version on my system, it doesn't show up in chrome.

And in firefox I managed to open the VCW fine, but today it's not working.

Any ideas? Thanks.

Try using the Stand Alone version of adobe player,

here's the .rar of the official adobe site with contains all versions of adobe flashplayer 10

Look for a version wiith SA in the name, SA stands for Stand Alone,

A sin?

You're getting money from pedophiles, in my case - who think they're paying an underage child for a liveshow... If you're worried about your religious views or morals then eWhoring is not for you.

Just keep going, even when you earn nothing, you'll learn.

After some experience you'll see what people will not pay so you can instant block them.

The key thing of e-whoring is: Never give up!

Goodluck with e-whoring.

You can expect that, some times I've ignored some people to talk to one person as he seems the most interested, but alot of people are just trying to stall you & get the free stuff. Just try to not let it demotivate you & keep on going, hopefully you'll get a paystreak soon!

You can expect that to happen on a casual bases. Sometimes, no matter how good of an (E-whore) you are, some people won't pay. Time wasters and attention seeker's, there's a few lists on the forum you can find several named and well known waster's.

Use the option to capture a part of your desktop with manycam.
make that 'square' as big as needed (so it only covers the video.)

Then go to skype and go to video settings and change your cam to manycam source or something like that.

I don't have the programs open right now, but something like that.

That's because you record that part of your screen.
You should either use 2 screens,
or make sure you don't open anything in fullscreen.

Or just force your flashplayer to the foreground (don't know how).

If your Paypal is registered in another country you could purchase a VPN & set the location to Canada

Depending on how you use the pics, you can keep them from google images. Google actually does a big sweep of there images, depending on how active the site is and the amount of traffic it receives. If the picture is removed from the source, it will be from google images.

For more in-depth help, I'd suggest PMing one of us.

You give your mail and you get amazon gift card (which they pay for, similar to paypal but you need to provide them this link

https://www.amazon.com/gp/product/B004LLIKVU/gcrnsts?ie=UTF8&qid=1403713550&ref_=sr_1_1&s=gift-cards&sr=1-1

When they pay, you get code of that gift card in your mail then redeem it on the amazon site, and you get your money on amazon, I earned my first \$10 with it :) ALSO, some nice trick worth trying. When you receive your gift card, put it on e-bay auction, you can double that money :)

BTW, anyone here using Uploadbucks or some similar PPD/affiliate site, I have some questions to ask in PM? :)

download fake camera to make it look like you're sending pics from the camera.

And you can't really prevent people from "scamming" you with leaving after you send a picture. However, don't send more than 2 - 3 pics.

I don't want to use paypal as payment method? Is there any other way? I would love to accpet amazon giftcards, but I don't have any amazon account, but can I still receive them? So I can sell those giftcards for btc, is it possible?

If there's any other way around let me know ?

EDIT: Btw is it possible to get caught e-whoring and getting jailtime? Do you suggest a VPN?

You can use Amazon, simply sign up for an account with just your email address. It takes about 5 minutes.

I've never heard of anyone getting arrested for eWhoring, but it is illegal and possible.

Just stay on a VPN youll be good.

PM I'll link you to the paid VPN I use.

If you dont want to pay then HackForums has a section for VPNs [VPN, Proxies, and Socks](#)

I use something called Hola, you should check it out at <http://hola.org> its a Google Chrome extension that you can use for a specific webpage, so if you go to paypal or whatever, you can just click on the hola thingy and click on the country you want your IP set on that site (It has +- 100 countries). Very usefull if you ask me O_o

I have a question

My personal paypal is limited for 180 days (around 30 days have passed) I am afraid to get money directly to my fake paypal as if it got limited i will loose all my money

Is there any ebook or something autobuy website the will save my money and then i can request a payout to my real paypal?

Xzedin - July 31, 2014, 9:49 pm

Is it true that if you make a Canadian PayPal that you don't need a credit card? I tried to make one but it would accept the postal code. And also with Amazon if the pedos what do I give them the email or what?

how safe are amazon giftcards ?

is it safe enough to whore via VPN and then redeem the amazon giftcard code without VPN on your REAL amazon account ?

I think it's safe enough to do that yes.

I'm not really into the amazon giftcard 'business' so,
if someone else could confirm if it's safe that way,
That'd be appreciated.

It's the same shit as with paypal. It's secure until you start scamming your victims as amazon giftcards can be charged back too and eventually your account will get banned

Make a premium canadian paypal account for your whore, the only thing you have to verify is you email address and then you can transfer that money to your main paypal. or you can take amazon.

E-whoring is illegal but the chances of someone actually contacting law enforcement are slim , do you really think anybody will contact law enforcement saying " I just bought some nudes/show from a girl & she wasn't a girl "

If your worried about being caught just use a VPN , I recommend nVPN

natesta23 - August 18, 2014, 4:23 am

Whats a good AutoPilot Method? I tried selfy, but keep getting banned on there

TheKingsGuardian - August 18, 2014, 4:13 pm

Can you recommend a good method for someone who has been out of the game for a while?

My old favourite was CL, but, I'm rarely turning potentials into cash anymore. Once every few days I try. I like the idea of the KIK method, but all the addy's I receive are too young to have proper disposable income. Can you recommend a good guide to follow that has a high potential to gain? I know you can't give away too much, but I can't do it anymore! lol
