Help desk brought to you by www.bandors.net

Bandors presents: The Ewhoring Help Desk

Lots of new people have questions about Ewhoring, so I decided to start a help desk.

I have been in the Ewhoring business for about two years, and it has been one hell of a ride. I've dealt with chargebacks, cops, and very wealthy clients. I've been in all kinds of situations, and learned the quickest and most profitable outcomes. You would not believe half of the stuff that I have done Ewhoring for money. I'm positive that no matter what situation you might be in, I can help you.

I am not charging for this service, it is simply done in the name of my new blog www.bandors.net. I bitch about life on here and tell shitty stories. Check it out if you want.

Please remember that any answers from people other than myself may be false, and are not my official statements.

Help desk status:

OPEN

If the help desk is closed, please do not private message me. I'm probably super busy with something. Simply post your situations or questions right here and I will do my best answer them when the help desk is back online. Don't worry, I'll try my best to make sure it's always online.

Question: Why are you offering this help desk?

Answer: There are several new members flooding this section that just need a quick answer, or a simple opinion. It should cut down on common threads.

Question: Are you even qualified?

Answer: I have been Ewhoring with public and private methods for a couple years, and I have purchased a car with my earnings.

Questions: Is it really free? No hidden strings?

Answer: YES! This is 100% free, honest, and professional help desk.

Is a really popular FB account I have a good way to ewhore? What's a good story??

Huskar - April 1, 2014, 5:45 pm

I get a lot of people but I can't get them to pay ?

Any ideas ?

Should I be straight forward ?

or should I make this long as story and make them fall for me (which they might bail out at the end)

Create a direct link with them in it using sellfy.com

Use this link to get 2.5% fees.

<https://sellfy.com/>

If ya' don't want to sign up with that link just go to sellfy.com

Lure them on, but you have to use your wits to see who is serious.

Don't make them 'fall for you,' you're a WHORE, remember that.

Perhaps, as you can use a business name.

May I ask what you recommend? I mean, I don't want them to see my name, So the only thing I can think of is a buisness account, I don't use any other form's of payment.

You can create two separate accounts , one in your e-whores information & than your paypal account to transfer the money to

I recommend taking western union in that setting. If you REALLY don't want them to see your name, you can go ahead with a business account, but remember there's a risk.

What sites have you tried to whore on in the past? If you're a guy over 18, (I don't encourage CP in any way) gay Ewhoring is EXTREMELY profitable.

Can't do western union mate, I have had a few issues when paying for items, Seller was legit but money etc wasn't going through, Took three phone call's to sort out. :/

If you need to hide your name then the only other way would be to use a business account.

Well I just posted an add on Craigslist fairly vague but I said what I was looking for and it was removed really quickly. I can't use my phone to verify a new ad considering I just used it on there so are there any other good sites you could share that might be profitable?

I want to move my money from my fake to my real. i could send it over awhile ago, but now i can't send it. im getting "We're sorry, but we can't send your payment right now.", Any advice?

EDIT: i made new paypal, any way to Not get the error? or get limited?

There are several reasons for that. The name could be really fake, you could be on a VPN, you could be on the same IP with multiple paypal accounts. Or maybe you're just flagged.

Uh, have a friend verify it for you? Seems like a simple spam block. I know people that sell drugs on CG.

Very good thread and nice of you to be helping people out.

Mikar25 - April 5, 2014, 5:29 am

So I have been eWhoring now for multiple hours and still haven't got any earnings.. My method is

just going to chatrooms(Most traffic I get from chat avenue) when they add me on skype the conversation most of the time is very short.. and when I ask them that I charge like 15\$ for a show most of the time they just say okeey and never say something again.. And I got question, when they ask for a preview do you let the cam on for the whole time till end of show (if they payed) or do you let the cam on for 1-2 minutes and close call and wait for them to pay? And could you maybe give an example of an succesfull conversation? thanks!

What is a VCW?

How do I get them to send me the money because I dont think many men of older age have a paypal and having them having to make one would be a complicated action.

What do I say I need money for?

Do you mind sharing some of your stories with us? For example, chargebacks (how do people chargeback if there's no funds? since you transfer them to your real account), cops (like actual cops that showed up at ur door? so they actually traced you through ur vpn..?) and wealthy clients? how much did they pay you haha.

Sorry for all the questions but i wanna hear from someone who's been in this business for two years :D

How can I tell if a picture or set of pictures is saturated?

If they are saturated, is it possible to make them seem new and unique?

Right click the image and search it on google. If it pops up, it's saturated!

So you're suggesting we make long term relations with the person, and then make them Gift us something or the other?

What if they wanna talk on call or something? ?

Actually the amount I have earned e-Whoring is ZERO. I have never been able to make anything out of it. Bought e-books so that I learn, but what I learn there was stuff that everyone says on HF. But nobody goes into the step by step instruction. People who are just starting up, need a little more than just hints, right?

Really appreciate you creating this Help Desk. ?

What are the alternatives to using PayPal as a payment method? PayPal really frustrates me, I'm constantly getting limited and need an alternative.
