Thread: [Removing objects from the image in 30 seconds or less!](#)

James Threewell - April 2, 2014, 7:35 pm

Like the background? Hate the object?

Perfect!

We are starting with this image;

Use the quick-selection tool, as shown in the first image, select around the object you wish to remove like so:

Now press shift+f5 to open the fill menu like so: Press OK

Boom Object gone (Tinker to get it right!)

Add a gaussian blur to it!

add a fade and some text. Done. Easy background!

Full res:

DEADPOOL - April 2, 2014, 8:12 pm

This is a pretty good tutorial I may have to use this in some of my graphics.

Blvck Scvle - April 2, 2014, 8:21 pm

This is a pretty cool tutorial, I don't know all the tricks off Photoshop like this. Thanks OP. ?

Beware - April 2, 2014, 8:22 pm

Digging this tutorial man, really nice job!

James Threewell - April 2, 2014, 9:08 pm

Thanks, I might make some more sooner or later.

JoeHandy - April 4, 2014, 4:48 pm

wow that was fast and useful thanks for the guide

Vincitore - April 5, 2014, 2:42 am

known method, but sometimes the result is not satisfactory , and must be finish by hand

Narrate - April 5, 2014, 2:50 am

Spoiler ([Click to View](#))

Looks like it makes the car go predator up in this bitch.

If you don't know what I mean,

Eeluminati - April 5, 2014, 4:33 am

There's already a tutorial for this, but good to see you're trying.

James Threewell - April 5, 2014, 1:43 pm

(Apr 5, 2014 02:42 AM)Sharkas Wrote: [\[CITE\]](#) known method, but sometimes the result is not satisfactory , and must be finish by hand

True, but it's really useful if you want to blur the background.

James Threewell - April 12, 2014, 1:25 am

I might make another tutorial along these lines soon, anyone need to know anything specific?

Loofah - June 1, 2014, 7:35 pm

Here is what I ended up getting :

BEFORE: <http://4walled.cc/show-1423630>

AFTER : <https://i.imgur.com/k5yUDuZ.jpg>

I used the lasso tool instead because I felt like the maganute screwed me up with the quick selection. :)

YetiByBlue - June 2, 2014, 2:25 am

I used the lasso tool instead because I felt like the maganute screwed me up with the quick selection. :)yours looks good. I like the background with a slight blur.

CounterStrikeGO - June 3, 2014, 2:04 am

I saw the exact same picture and tutorial from somewhere else.

Talu - June 3, 2014, 7:19 am

Great tutorial, this can actually come in handy. Thanks.

DidntDolt - October 17, 2014, 11:07 pm

Thanks, great tutorial really helpful!

James Threewell - October 18, 2014, 6:09 am

(Jun 3, 2014 02:04 AM)CounterStrikeGO Wrote: [\[CITE\]](#) I saw the exact same picture and tutorial from somewhere else.

I searched the image on google, it was a good example, I found how to do it on another forum, also, I posted this on around 2-3 forums.

Exile Graphics - October 18, 2014, 8:01 am

nice tutorial OP! I will definitely try this!

Jasmineran - October 18, 2014, 9:52 am

I just learned about this thanks again for refreshing my memory thanks!

explicitjnr123 - October 18, 2014, 12:20 pm

heh that actually looks pretty good too, thanks man

PA3HH - February 3, 2015, 10:16 am

Which photoshop version is that one? I use Adobe Photoshop 7.0 which actually helps me do my job and is processing faster than the newer editions but from what I just saw, it lacks from several new additions :p

Sahaj - February 20, 2015, 12:03 am

Thanks for posting this tutorial. Helped me a lot. :)

Rusty_ - April 13, 2015, 5:46 pm

Nice tutorial! Will be using this later, thanks man.

stanek666 - April 14, 2015, 9:58 am

Wowwow ! awesome tutorial very big Thanks :P

Hulk - April 15, 2015, 5:53 am

add a fade and some text. Done. Easy background!

What you mean with the "add a fade"

But really nice tutorial, and easy dude didn't thought it was easy as that.

T0ucaNSaM - April 15, 2015, 12:54 pm

Thanks for this i really want to get into using Photoshop much more

Fudster - April 15, 2015, 12:57 pm

Which software is this tho? Photoshop?

Warp - April 15, 2015, 1:01 pm

Awesome tutorial. I've always wondered how people did this so fast.

It doesn't work 100% of the time though. Content Aware needs to be something Adobe really looks into.

T0ucaNSaM - April 15, 2015, 1:21 pm

(Apr 15, 2015 12:57 PM)Fudster™ Wrote: [\[CITE\]](#) Which software is this tho? Photoshop?
of course ?????

Anything and everything photoshop

zie619 - April 19, 2015, 4:16 am

very nice tutorial , if i dont want to blur do you have any other method?

Stratocastr - April 19, 2015, 10:48 am

super helpful, takes alot of trial and error to get it just right.. well worth it :)

James Threewell - April 19, 2015, 11:53 am

But really nice tutorial, and easy dude didn't thought it was easy as that.
Add a gradient from black to transparent on all borders.

xFreesnacher - April 21, 2015, 12:48 am

Nice tutorial, I'll use it some time, but I really wanna know what font you used, I really like it.

| KHALIFA | - April 25, 2015, 7:10 am

Really good tutorial dude, helped me a lot. Keep good work.

Thanks
-Igna700

Getsuga - April 26, 2015, 10:00 pm

What font did you use to make what you wrote

Goodies - April 26, 2015, 10:03 pm

Can someone please remove the statue of liberty from this picture?

[img=300x350]http://advancedgraphics.com/wp-content/uploads/2013/08/373%20Lady%20Liberty.jpg[/img]

tetrahy - April 27, 2015, 9:17 am

Nice quick and clean tutorial! <3

James Threewell - April 27, 2015, 9:16 pm
