Hello Nexus my old friend.

What is League of Legends?

League of Legends is a fast-paced, competitive online game that blends the speed and intensity of an RTS with RPG elements. Two teams of powerful champions, each with a unique design and playstyle, battle head-to-head across multiple battlefields and game modes. With an ever-expanding roster of champions, frequent updates and a thriving tournament scene, League of Legends offers endless replayability for players of every skill level.

What is Nexus?

Nexus is a League of Legends based group! That's right.

[img]<http://x.hackforums.net/uploads/ficons/nexus-f.png>[/img]

If you have never heard of League of Legends and are interested in joining, please sign up here:

<http://signup.leagueoflegends.com/?ref=51607da61be5b138837210>

If you need assistance and are new to the game, please check out this Riot sponsored guide:

<http://forums.na.leagueoflegends.com/board/showthread.php?t=556519>

If you are interested in joining, recruitment will be held a bit far out from now. Currently, I am setting up the subforum for the future of Nexus. If you are interested in joining now, you are more than welcome to buy in. If you would like to purchase a spot in Nexus, please PM me. The price is \$25 for a lifetime spot in Nexus, unless you violate a subforum rule. (Which can include missing a check-in, if you follow all rules completely, you will never be removed) BTC will be accepted soon. If you would like to join Nexus AND Instinct, please click [here](#).

Please PM me for more information.

Now accepting BitCoin.

After payment, make sure to [PM me](#).

These applications are not set in stone, you do not have to follow this format if you do not, but it is highly recommended. Please keep in mind I enjoy thought out and lengthy applications.

Not sure if I'm understanding; is this application for being accepted to buy-in or is this for applying now and then reviewed at a later date?

If the latter, here's my application:

Lolking: [Phyze](#)

Age:I'm in college (older than 18). I hope that's enough for my age.

Gender:Male

Time spent playing League: Since S1. I have skins/icons only available from that time to prove it. According to WastedOnLoL, I've "wasted" 1008 hours (42 days).

Do you engage in e-sports related activities (LCS)? Yep, I'm participating in a tournament run in my home district at the moment, and I also watch LCS. I'm active in e-sports casting as well, having guest-star casted in a few local Riot-sponsored tournaments. I love to compete, and I'd be happy to join any competition in Nexus's future.

What can you offer to Nexus? As an avid player, I can contribute a lot of in-game knowledge, ranging from game theory to mechanics to getting out of this so-called "elo hell" (which really doesn't exist). Personally, after being stuck at 700 elo in S2 and Silver 4 in S3, I know all about ranking. In the last two weeks of S3, I went from Silver 4 to Gold 3. Since then, I've been rising.

I can also offer something supremely powerful: friendship. The power of friendship extends far beyond any supernatural force harbored on this planet. I will bring that to the members of Nexus.

Activity - I'll definitely be active in a LoL group. I'll be happy to set up tournaments, get in contact with Riot for sponsorships, and fix up schedules for events. I do love posting on topics I think I can contribute in, and I'm sure after three years of LoL, I can post a few things :)

500 words about yourself: There are a bunch of resume words I could use like "determined", "passionate", "communicative", or "ambitious." But in reality, those are just... "steroids." Who am I really? I'm a guy who genuinely enjoys playing League of Legends with other people. In fact, I rarely solo-queue unless it's for ranked. It's the reason why I don't rank too often, but I always find myself derping around with my friends and just having a great time overall. I'm easy to talk to, I never get angry over games or insults, and I always keep a cool head when dealing with sensitive individuals. I know there's diversity in the world, and I make sure to always respect everyone. I'm a fun-loving guy. I can be your best-buddy or I can be your butt-buddy. I will sacrifice my League life just to get you out of a four-man gank, I will throw down my Gangplank ult so you can escape with a sliver of health, I will tank Baron for you as an ADC because you're scared of dying if the enemy team counters us. And I'll probably KS you when I can because it's fun to do so.

What are your expectations of HF in general? HF? I expect HF to be the same as it has been since I've joined. I expect there to be skids, 12 year olds, and marketers who make \$4,000 a day alike. I expect there to be programmers, developers, and logic-thinkers. I expect there to be retards, geniuses, and average joes. But most of all, I expect there to be a community I can fit in due to the diversity here.

The HF members? Not much. I haven't met a lot of members who really impress me with anything. Yeah, there are a few guys I can really look up to and wish I could be like them, but for the most part I probably don't really expect a lot of out anyone here. If you can speak English, good for you.

Are you willing to join us in our local TeamSpeak?Of course.

Applications for this recruitment will probably be read in a month or so.

You could do either or.

If you wish to buy-in, I do not request any application.

Marauder ?? - April 3, 2014, 12:27 am

This is the application that I've posted for Skiltz's recruitment, I've incorporated the necessary aspects that you've requested :)

Marauder's Nexus Application

Name: Marauder

Age: 16

Timezone: -10:00 GMT (Hawaii Time)

Availability: Late Weekdays and weekends

Gender: Male

Why I want to join Nexus:

I want to join Nexus because I love gaming and especially league of legends, I have around 2000 matches played and have probably pumped \$500+ into the game. I really want to find a good group of guys to play with. I joined respawn with these intentions but after remaining in the group for a few weeks, nothing had happened. I'd love to participate in gaming nights and play League with other Nexus Members, I have yet to find anyone who is fanatic about League as me!!! (Although I sure hope I find some!) I'd also like to join so that I can contribute through giveaway's and guides and maybe pick up some tips for myself! Since hackforums has some excellent League players I hope that we can have some really fun times together! I have already met some amazing HQ members but I would really like to meet even more people who enjoy league as much as me :)

My Experience With Gaming:

Well I've been gaming since the N64 and Gameboy Color I've owned pretty much every console and gaming device to ever come out since I got interested as a child. However I soon would find that my love was strong for PC gaming and in 2010 I discovered that I truly loved league of Legends. I still play other games like World of Warcraft, Planetside2 and other PC games but spend most of my waking hours playing league. All of my friends are hooked as well and we usually queue up for Ranked 5's or Duo Queue. (They still can't keep up with my sheer fanaticism :))

What I can contribute to the group:

So even though I am currently only Silver II I believe that through dedication I could make some real contributions to Nexus. I am currently writing a large jungling guide and could use some input from Nexus members to help me out. I plan to release a guide for each role and hopefully under the Nexus name. Perhaps with all of the excellent and positive input that I get, the guides could one day become stickied! Another way that I think I could contribute is through donations/giveaways! I run a

Homework service here on Hackforums and would be glad to do some RP giveaways or skin giveaways in the name of the group!

Sample guide I wrote a while back that wasn't too detailed, I hope to make more like this but in a much higher quality! : <https://hackforums.net/showthread.php?tid=4049037>

About Me:

I am a 11th grade honors student currently living in Hawaii. I play on my school's varsity tennis team and am part of the National Honors society. When I'm not on the court or doing school work I'm usually on Teamspeak or Skype with my friends playing some League of Legends. It's been my total addiction for the past 4 years and I can't think of any other game I'd rather be playing. I'm open minded and try to take constructive criticism as well as I can to improve myself in school, tennis and league! I'm typically a cheery guy and try to bring a positive atmosphere wherever I go. I really look forward to joining in with some good guys that actually want to do some gaming! I thought respawn was really for me but just like everyone else that left, I just felt no gaming was really happening :P

Skills I bring to the Table

-Leadership: I am treasurer of my school's chapter of the National Honors Society and Parliamentarian for our Skills USA chapter. Both involve a relative variety of leadership opportunities and responsibilities that I hope will serve me well here

-Responsibility: From being a good and tryhard student (XD) in general I have developed a self proclaimed decent sense of responsibility, I will complete the requirements to remain in the group well before the dates that they are due and do so with the utmost quality

-Trustworthiness: After being entrusted with power through these leadership opportunities and carrying out plenty of deals on HF I have gained a sense of trustworthiness and will never deal wrongly upon another member. I'll middleman or perform any services needed for my fellow members!

-Gaming: I'm a relatively good gamer and play other games besides league. Hopefully I can teach a few other members some things, and pick up some things for myself! I can also just provide a buddy to play with in a wide variety of games (Not only league) and would love to play a wide variety of games, not only league, with Nexus Members, I'm always looking for chill people to play with and this just looks like the perfect place to do it!

-Intelligence: I'm not trying to brag or pass myself off as too smart here but I'm a pretty decent student in school and would be willing to do some free work of my Homework service for members, help them edit guides or whatever kind of things they need!

-Outgoing: As a member of Nexus, I will try my absolute hardest to be outgoing and provide a positive atmosphere to everyone in the group and do my best to contribute to the overall quality of the group whether it be by giveaways, guides or even just talking with members :)

-Passionate: As in anything, I try to put all of my effort towards participating. I am incredibly passionate about league of legends and would love to participate in game nights, team games, or any kind of League of Legends related activity!

-Coding Knowledge: Well I'm a bit of a noob in this area but I know some basic Batch and a little bit of Java, I could do some basic things if needed. I'll also add that I'm currently studying for my CCNA certification and would be willing to help others enrolled in the course for free!

-Recruiting: Although I am still once again only Silver II I think that I am a decently good judge of character and would love to help interview members that you are considering allowing membership. It could even play against/some of the prospective members or those who want to become teachers ect to see if they are truly at the elo that they claim!

Whats going on in my life:

So Although I am currently in 11th grade I have quite a bit of clubs and activities that I need to make sure I attend, I also need to keep my above 4.0 GPA up if I hope to get into the college of my dreams (Cal Tech or MIT to study Nuclear/Civil Engineering). I will however no matter what make time for leauge and the Nexus family :) Gaming is an integral part of my life and without it I would not have met the friends that have motivated me to do what I currently do today. Most of all I would not have wandered onto HF (looking for game cheats XD) And found what a wonderful (Most of the time) family we got going here! My love for leauge and this site are going to be staying here for quite a long time!

So I've been playing Leauge since Season 1, (End of it though). I've been unranked in season 1 since I was leveling to 30. In season II I was Bronze V (I know right :)) and Gold V in Season III. In terms of Season 4 I'm trying to climb out of Silver II. I follow all of the major LCS Teams as well as a bit of OGN. I really love watching all the streamers (Mostly TSM) and learn quite a bit from them!

So below I will be including my Champion Pool, these are just the champs I am strong with, perhaps this will help you in deciding whether or not I'll fit into one of Nexus's teams!

My Expectations for HF

Well I'll be honest, I came to HackForums looking for Game Cheats and Garrysmod Gamemodes, I went inactive for a year, then came back and really got into the whole forum mojo. I bought Leet and been loving it up ever since. I got more into the gaming and Buissiness aspect of Hackforums though and currently run a successful homework service. Most of my posts have been in the Leauge of Legends section, I just enjoy giving people advice, making posts, or just having fun with fellow leauge players! After I hit about 50 rep and 300 posts I applied for Ub3r and much to my delight I was accepted! This just spurred me to do even more transactions and make larger contributions to the community! I hope that by joining Nexus my contributions to the Hackforums community will once again spike as I collaborate with fellow members to produce some HQ guides and giveaways!

Closing

So as a last comment I'd just like to express how much I'd like to join Nexus, I've put quite a bit of time and effort into this app and will continue editing it as I think of new things to add, I'd like to contriubte to a REAL group on HF that actually has a solid leader and solid membership base, The only official group I've been in was respawn and as I say earlier in this app, the expereince did not really work out for me. I'd like to put some real effort into being a contributing member of Nexus, guides, gaming, or whatever really! I'd love the experience of being with a tight knit bunch of players who share the same interests as me! I'd like to help make Nexus something great, even if my impact isn't as drastic as donating 100's of dollars like Skiltz can :) I'll sure try my damn hardest to do as much as I can! Thanks for taking the time to read my incredibly long application (A whopping 1700 words!) !

Time spend playing League: Around 3 games/day and more in the weekends.

Do you engage in e-sport related activities(LCS)? I watch almost all LCS games and keep myself up to date on the pro play stadium. For Esports myself I do competitions with my friends.

What can you offer to Nexus: I can offer my knowledge of league and esports, I can play a lot with the people of Nexus in duo or in (ranked) team play.

500 words about yourself: I'm an active HF member with experience of HF groups. I play a ton of league and watch a ton of LCS. I see myself as a calm and nice to talk to person who can work good in teams. I think I would fit into Nexus because I'm addicted to HF and LoL.

What are your expectations of HF in general? I think that Nexus will work out great because there are a lot of League players here on HF.

Are you willing to join us in our local Team speak? Sure!

Thanks for giving me a chance to get into Nexus ?

I would say about less than a week because I am new to the game.

Yepp.. I know..

Do you engage in e-sports related activities(LCS)?

If you mean gaming then yeah.. I can.

What can you offer to Nexus:

I can't really offer anything to Nexus at the moment because I am new to the game as I said. I just wanna play with people from here and they can teach me how to be a good player.

500 words about yourself:

Well let's see here. I am Vish (preferred name) I am 22 years old. I live in Australia but I am from Germany. I like to play a lot of games and I have been playing games since I was 6 years old which is a long time and I am a social player which means I like to play for fun most of the time. I am gay and I have a boyfriend who is actually a member on HF which is good but he is shy. Hmm what else. I like music, especially the genre metal but I like most music which is good. I fucking hate life but I try to be happy and move on. Yes I may seem all happy and warm on the outside but I am cold and sad on the inside but I don't let that show or bring me down. I don't care what people say about me since I don't give a fuck about people's opinions. I try to help people in anyway possible and I am always nice and respectable. Sometimes I do get in a bad mood but I will let you know that I am in one and that will warn you that I might lash out.

Seriously.. I don't know what the fuck I am saying.. LOL! XD

Age: 17.

Gender: Male.

Time spent playing League: 5-12 hours a day.

Do you engage in e-sports related activities(LCS)?

Depends what you mean by engage. Obviously I am not an LCS player so if you mean engage like that, then no. However, I strongly support Fnatic (up to the point that I buy their branded goods. lol) I started strongly supporting them and their eSports career in season 3. I thought they were underdogs for some reason because they were on a big losing streak so decided to support them, now I realise that they are not under dogs at all and I am very happy that I chose them to be the team that I follow and support.

Also, I am planning to go to a few LCS events next split in Germany with a few of my friends.

What can you offer to Nexus?

I can offer fun, serious play and general enjoyment to Nexus. I understand fully that I am certainly not the best LoL player out there. I am probably in the lower 50%. However, I constantly try to improve my skills and help those who are worse than me. So, I may not be able to bring amazing play qualities to Nexus, but I will be able to bring unique help and support where I can, fun and un-pressured playing environment where we can all improve together, no matter what the skill level, and a high quality mindset.

500 words about yourself?

I believe greatly in certain philosophical ideas that can be applied to every single aspect of life, be it gaming, working at school, or eating your dinner. I believe in respect, trust and dedication. For me, it is impossible to be good at ANYTHING without following these three simple principles. (for example in LoL you have to respect your enemy, trust your team and be dedicated to playing if you want to improve). That is a small bit of information about the way I think. Me personally, I live in the UK, I study at secondary school (highschool) and am in most cases a nice guy. I try my best to help people no matter what because I strongly believe that in life you get what you give and thus, if nothing is given then nothing will be received. It makes me happy to help people because I feel that I am fulfilling my personal obligation and duty to them. Also, I know that I have been helped a lot and in a somewhat sad way I feel like I am repaying those who have helped me throughout my life by helping other people back. Next, I am not rich but I get by with what I have got and am generally a happy guy, I got straight A's in my GCSE's with a few A* to nicely top it off. I think that I am pretty smart but try to be unboastful and arrogant. If I had to explain a quality of myself that I do not like it would most certainly be the fact that I always rush

into things. If I have £100 I will have to spend it almost instantly. I need to stop that. Sorry this is not 500 words but I really don't have that much more to say!

What are your expectations of HF in general?

My expectations for HF are extremely simple. An eye for an eye, a tooth for a tooth. Give what you want back, get what you give and receive what you want.

Are you willing to join us in our local TeamSpeak?

Of course. So long that there are other people my age.

Time spent playing League: I've been playing since around the end of Season 2 I believe, maybe the start of Season 3. Not 100% sure because when I first started I wasn't all that into it and didn't really know much at all about the game.

Do you engage in e-sports related activities(LCS)? I watch LCS occasionally on Twitch which is always fun. It helps me sometimes to watch players that play roles I like to play and see what they do. If I'm having a bad day or something I just like to watch some LCS rather than lose games.

What can you offer to Nexus: I'm a pretty active player and love to play League of Legends, and I enjoy helping people out. I'd be able to help people get better at the game and get better myself.

500 words about yourself: I'm a 16 year old guy who is doing online school and loves sports. I play lots of Tennis, enjoy hanging out with friends, and I'm on my computer most of the time. I've always enjoyed playing video games and stuff and more so playing them with other people. League of Legends is probably one of my favorite games that I have played and I definitely play it more than anything else. I enjoy learning and improving at everything I can so that I can be the best I can be. My grades aren't all the best because I don't put as much time into school as I should, but I do learn a bit and they're improving the less lazy I get. I like talking to or being with other people whether it be online or wherever.

What are your expectations of HF in general?: I expect HF to be a high quality forum where people can come and learn about what they want to learn about. Also to have discussions about everything, and it's doing that well with the News, SSRP, monetizing, lounge, general hacking, and many other sections. I also expect it to be a place that people can enjoy rather than just browse for a few minutes and quit.

Are you willing to join us in our local TeamSpeak? I would enjoy to join your teamspeak.

Lolking: <http://www.lolking.net/summoner/euw/30832326>

Age: 16

Gender: Male

Time spent playing League: Playing it for round about a year and a half and gradually becoming more of a skillful and co-operative player.

Do you engage in e-sports related activities(LCS)? Recently I have been watching this and near enough watch every e-sport tournaments and such on twitch. Not only that but me and a few friends

of mine create our own tournament and usually gamble our money with each other according to who wins and such and we usually set ourselves little challenges also(not that it will interest you at all).

What can you offer to Nexus: I can offer to Nexus my tips and tricks of how to gradually get better at the game. I have had much experience in the past and both willing to learn from people and to teach people also. I usually main jungle and have been doing so for near enough the last six months so I am willing to teach people around the jungle so they become more better and skillful. Overall I basically want to join Nexus so I can learn from people and teach some people in the group.

500 words about yourself: Christ, there is a lot of words I can use about myself such as "Humours"..but that's about it really. If I am completely honest I enjoy playing League of Legends and it takes up a huge portion of my time when I'm on the internet. I like to class myself as a pretty 'Cool' guy. I'm chilled most times and am pretty easy to talk to if you ever need anything or such. I never really get angry over games I just play for fun with a few people at times but near enough most of the time I am trying to develop my skills in normals and then use them in Ranked. My aim for this season is to be able to reach Gold. I like to class myself as a team player and a co-operative player who usually likes to get his point across while playing and to ensure that his team-mates make no mistakes. Along side this point I do not get my point across in a negative way I will just tell them what they're doing wrong and give them tips and such on how to recover from that mistake and to ensure that they do not make that mistake again. I know this was a little cluster-fuck of words and probably did not make too much sense but yeah..this is about myself.

What are your expectations of HF in general?: My expectations on the HackForums is to basically be a well known, respectful person who people can go to if they need any advice on something and I would like to perhaps start my own group in the near future.

Are you willing to join us in our local TeamSpeak?: Yes.

Thanks for taking your time to read this,

Time spent playing League: excahv2, you've spent about 353 hours on League of Legends which means 15 days of your life. You are 392028th on EUW servers and 896029th in the world.

Do you engage in e-sports related activities(LCS)? Not at the moment, no.

What can you offer to Nexus: I've been playing League for a while now I have had a lot of accounts, smurfs ETC and I would love to play with more Nexus players.

500 words about yourself: There's isn't too much to tell about me, I'm a 15 year old who loves gaming. that kinda sums it up.

What are your expectations of HF in general?: Uhh, I just come to hackforums to relax and chill with the community.

Are you willing to join us in our local TeamSpeak? Yeah, sure.

Lolking: <http://www.lolking.net/summoner/na/47112486> (Like I say below, I am very new trying to advance.)

Age: 14

Gender: Male

Time spent playing League: About 1 hour in game time. I am new but trying to play everyday now.

Do you engage in e-sports related activities(LCS)? I did on COD and other games for a year. But not on LoL. At least not yet.

What can you offer to Nexus: Another advancing LoL player, that will be very dedicated.

500 words about yourself: I am a PC gamer. I am new to LoL but I played some Dota 2 and WoW. League of Legends is a new game I try to play everyday, I have no friends that play it. ._. So this group would help me find others to help me some what and help me meet other that play the game. I would like to be a great LoL player. I wanna keep going until I have made it the farthest I can, which is never. That is all the way to #1. But there are way better players. I am currently learning the basics of the game. Sadly, I haven't gotten a kill in LoL yet. But I watch LoL Twitch streams and videos on the daily trying to learn. I have been gaming for 6 years, WoW was the first Bird Eye combat game I played on PC, then HoN, then Dota 2, then now LoL. I still play WoW but it is boring. I hope I get good LoL as that is what I am striving for right now. I love playing competitively. I play Competitive COD (eSniper and eSports), Competitive Counter Strike, and Competitive Halo. I learn very fast, so I can get down the best tactics and moves for LoL I think in a fast manner.

What are your expectations of HF in general?:

I expect most users to be as high quality as they can, but some scam, some leech, and some just join to be a(n) annoyance. I try to be as high quality as I can, helping users in every way I can. I expect HF to keep going for a while, I joined HF in 2012 as a inactive thread lurker. But now, I love contributing and helping people!

Are you willing to join us in our local TeamSpeak? Of course!

Lolking: <http://www.lolking.net/summoner/na/34389951> (Main Support)

Age: 17

Gender: Male

Time spent playing League: I play daily, and have played since mid-S3. So I really don't know how many hours that is.. But let's just say a lot. ?

Do you engage in e-sports related activities(LCS)? I have been on multiple competitive serious teams as a support, but I have left them and I need to focus on getting out of my current league considering I play with platinum and diamonds. My friends and I have major LAN parties playing league as well as watching LCS and the World Final on my friend's downstairs movie screen. Absolutely love this game.

What can you offer to Nexus: OP Support for any competitive teams that Nexus may have! As well as another player to tag along in group events and parties.

2000 words about yourself: My name is Cam, I'm 17 and have always been fascinated with computers and graphic design/video editing. I have recently opened my own VFX help desk in the Video Editing sub forum and hope to help new editors achieve their goals whether that be IRL editing, COD montages, or advertisements for products/services here on HF. As far as computers go, I am very active in the Computing sub forum, preferably the white hat help section and the PC customization sections where I help users get the best out of their money as well as fix any issues they possibly have. I am also very interesting in the marketing aspects here on HF, I am more than likely going to start getting into the marketing section and develop products or even set up a new project I have been working on for a while now. I am a top notch salesman/business man and have actually been an entrepreneur for a while now considering I am apart of a company called "Vemma". I am making \$1300 (roughly) a month off of selling products and getting people to join my business, there are no limits as to how far I can go considering whatever work you put into it is what you will get out of it. In terms of league, I have absolutely fell in love with the game ever since mid S3. At first I thought it was super nerdy and was not really looking forward into getting into it, until my friend got me hooked on it. This is his lolking: <http://www.lolking.net/summoner/na/29572240> he is platinum V as he hasn't played ranked in a while, but he has taught me everything he knows. He loves me as a support and says I have potential if I connect with the right people. I am eager to get into a serious team that wants to practice and get insane at the game as a team. My personality is the following: Joker, Happy, Nice, Caring, Thoughtful, Creative, Competitive. I am very excited to join this amazing HF group considering it is a group devoted to one of my most played and Favorite games ever, thanks for checking my application.

What are your expectations of HF in general?: HF is a good and bad community. Although I see more of the good side rather than the bad side. I try to stay as positive and as helpful on this forum as I can as well as keep people happy. My expectations were that I knew there would be trolls and poor humored individuals but I am here for educational purposes as well.

Are you willing to join us in our local TeamSpeak? Yes, would love too.

[img]http://x.hackforums.net/images/modern_bl/groupimages/english/Nexus_UB.png[/img]Do you engage in e-sports related activities(LCS)?: Yes I do. I keep up with mainly the NALCS, some times EULCS, and getting into the Korean scene by a bit. I really like how Korean League videos are so much more entertaining to watch than the other regions. The types of videos and special effects they have really makes it appealing to me, which is why I like it so much. I've also joined online

tournaments such and had experience against some decently known teams, like HotshotGG's last minute challenger team, and the Sirens, and a bunch of other Diamond tier teams.

I was also the team captain of my college's League team, and won a tournament here:

<http://challonge.com/D3leagueoflegendstournament>

My team's name was "FLIGHT KREWE". The finals was streamed here on this twitch channel:

<http://www.twitch.tv/ericcdelgado/b/496634008>

We came in as underdogs of the tournament because nobody of their group has heard of us, similar to TPA smashing worlds but on my own smaller scale :^) Got 3200 RP and a Triumphant Ryze skin. It was a super fun experience for my teammates and I. We felt like gods afterwards lol.

[illegible]

[img]http://x.hackforums.net/images/modern_bl/groupimages/english/Nexus_UB.png[/img]What can you offer to Nexus: Knowledge, Advice, Experience, and help organizing future events if there is any to be held. I'm normally free and most of that time goes into some League of Legends related affair. I also made a "HF Sub-wars" only type of tournament that I was planning to hold weekly, but due to real life encounters (with an absurd amount of midterms and upcoming finals) I have to put that on hold. The original thread was held here: <https://hackforums.net/showthread.php?tid=4066439>

I've made three solomid guides so far:

- [Ezreal Guide](#)
- [Graves Guide](#)

I also had a Draven guide that got removed because it was super outdated, but I was happy. I had like 60k views on it and it was a trinity guide lol. I didn't update my Graves guide because....I forgot the password on that account, and it's Graves. He's pretty much been unchanged for a while.

[img]http://x.hackforums.net/images/modern_bl/groupimages/english/Nexus_UB.png[/img]500 words about yourself: This isn't really 500 words, so I want to give you a condensed version of my bio.

Well with all the general information aside, I'm a first year college student attending a 4 year college because that's how mainstream society is. Get an education and hopefully find a job. With all the time I have on my hands, I usually spend the majority of it playing League of Legends. I find the game really fun and I got hooked up on it through almost all my friends talking about it and playing it. I really regret that I didn't start playing it in beta when my childhood friend showed me the game, and started half way through Season 2 which I really regret. I'm an AD main but I can play every role just a bit worse but still good enough to crush noobs believing in the dream.

I would like to learn more about Online Graphics Designing (GFX), and video editing. I want to one day have a successful Youtube or social media page because there's so many advantages in having one. People know who you are, what you do, and you can make money off doing those things. It's crucial for me because college is beyond expensive. Food, transportation, books and tuitions are ungodly expensive and some money to lessen that impact would be great to have.

[illegible]

I remember when I first joined HF. I tried to be HF and friendly as possible, but sometimes people just pick on you because there's nothing you can do back. Of course there will always be potatoes on this forum that respond violently to comments regarding to one's opinion, but it's the internet.

[illegible]

I am a consist player of league of legends, i do have education to attend though. This means i can not be on 24/7, i do try my hardest though ;). I have recently had a huge spike in my HF love. Been

really involved recently, i would say i have a largeish thread based around league. Please check out my own stats! I am a fun guy, just really up to chill with you guys, would love to join the teamspeak! I can even pay for a few months of the TS server if needed. Please get in touch! I am a GFX student in education and outside, will be happy to make anything for you guys! Trying to get my degree in Graphics and then move onto a job!

Age:20

Gender: Male

Time spent playing League:

Started season 3 and haven't been able to stop playing since with playing at the very least 2 games a day.

Do you engage in e-sports related activities(LCS)?

Hell yes! I watch almost every stream from Riot Games on twitch not to mention the various streamers i like to follow (Imaqtpie, PhatomL0rd and Trick2g to name a few). I also have been to a NA LCS match at the Riot SoCal studio and here is proof WITH PICTURES on a thread i posted not too long ago [spoiler]<https://hackforums.net/showthread.php?tid=4130305>

What can you offer to Nexus:

I can offer Nexus a very active member on League of Legends, Teamspeak 3 and HF. I'm always logged in to my league account even if not playing to receive invites from friends. I have had Teamspeak for a number of years now installed on my computer and also use it frequently for get-togethers. I am also active on HF. I make at least 2 posts a day and also surf around frequently on various sections mostly the League of Legends, Lounge and

Personal Life sub forums. Not sure how much money i can donate but i will definitely donate a few moneys when i get the chance after i start my new job.

500 words about yourself:

I am john and i live in Los Angeles. I am a PC Gamer who has stuck around mainly multi-player games but i can definitely enjoy a good story or two. I started off playing Counter Strike: Source, playing with complete strangers since i never really shared my gaming habits with any school-mates seeing that i just never really felt it was the "coolest" thing to mention. But anyway skip some years and here i am now enjoying various games mainly league at the moment with friends both that i have met online and in high school. Relating this back to league because i have made a number of friends who happen to also play the game it has allowed me to include playing league into my daily routine. Now i am unranked as a player and that may give off a hint of inactivity or lack of skills but let me explain the reasoning for that. Basically it goes back all the way to Counter Strike where i

never really liked competing with other players. I've always liked just casually playing games with a calm and positive attitude. Now i am not sure how "Good" i would say i am i can at least make it to gold seeing as I lane against them pretty often ._. not sure why but in normals i do for some reason. Now i do mostly play Support and Mid champs because being a tank with utility like Leona or going Uber Lazor Lux is always oh so satisfying. My favorite champion at the moment has to be either Ryze or Karma. Ryze because his armor combined with his Q burst and cooldown reduction makes you a walking grenade launcher and Karma because her early game poke is ridiculous with her ult available t level 1 combined with her W slow/stun plus her E shield/Speed buff makes her an all around great champion to play. I really like to play with and duo with friends as a support because communication can pretty much win any game and also it's a more fun and enjoyable experience when you have someone to joke around with and wreck with. If their are not any friends available to play i usually just suck it up and solo queue a mix of 5v5 summoner's rift or ARAM but i can't really say i have played much of Dominion or Twisted Treeline other than a few times with friends when their are 3 of us or when Dominion sounds like fun every once and a loooong while. Aside from the basic gaming aspect of league i also very much enjoy reading up on the lore which always ends up being really interesting like in the case of Warwick and Soraka and their drama. I also can't help but subscribe to a few youtubers such as videogamedunkey or machinima realms to name a few. So that basically sums up my relationship with League of Legends. Other than that i guess i can mention some other details. I am a musician who plays the trombone and have played many different genres of music including but not limited to Ska, Classical and Jazz. I mean it may not be the coolest instrument but i can definitely play some bitchin tunes. I am undecided in my major though I'm leaning toward a degree that'll lead to some sort of councilor type career which at the moment seems like something i would like to do for the rest of my life. Anyways i'll stop there. Hoped that helped give a little insight into who i am :) If you would like to know anything else you can contact me on Skype using the username "schurrsodapop13" to locate me. Thank you.

What are your expectations of HF in general?:

My expectations of HF are basically for it to grow in general. Basically with computers and internet access being a more and more common thing we will see an increase in people with an interest for the various topics around hack forums (hacking,phreaking,support etc.). I mean HF is already huge but it can definitely grow much more. As for the quality i can't really say whether it will increase or not but i mean i guess we will just have to wait and find out and see if any measures are implemented in relation to quality control. But i mean most people on the serious sections of the forums are supportive. I am also starting a HF Summoner Showcase which can be found here <https://hackforums.net/showthread.php?tid=4186752>

Time spent playing League: 2 Weeks

Do you engage in e-sports related activities(LCS)? : Currently, as I am not too advanced in League of Legends, No, I do not take part in any e-sport competitions as I wish to be at least Level 30 Unranked and gain some experience before doing so.

What can you offer to Nexus: This itself is a very general question, so I will be elaborating about the many things I could do to benefit Nexus.

I would like to first say that I am a passionate gamer indeed. As mentioned before, I only started playing League of Legends 2 Weeks Ago as of today, and so far have had minimal help from no one. Even my Friends, in the real world, have only given me minimal advice such as what to purchase from the in-game shop and what the game is actually all about. As I have had not much experience I won't obviously be the best in Nexus, If I were to be accepted, however I would hope that If I were accepted, the more experienced players as a part of your group would be able to guide me in the right direction. I understand no one would tutor me, step by step on how to be amazing, however I would greatly benefit by asking certain questions about the game to members who have been playing for a long time. On to about how passionate of a gamer I am, I have been console gaming since I was the age of around 7 Years Old. I remember the first time I touched a game, it was Sonic the Hedgehog on a Sega Game Console. I remember how I used to come home everyday from school, and constantly play the same game, but never got bored as I wanted to "always try harder" to make sure I was the best. This eventually led on to having my own laptop, which I am currently using now. However, as it is quite a bad laptop, I still am able to play League of Legends, but not on the highest graphics settings. I am hoping to build a Custom PC this summer once I have saved up enough money for parts.

Another way in which I think I could be a use to Nexus is due to my Team Leadership skills. In real life, I do many activities such as being in a Cadet Force which allows me to learn how to keep as a team, and stay as a team. I know what you must be thinking, he must be joking, however I have learnt from my own experiences how to lead a team, and even how to work properly as a team, even if I don't lead it. I think this could be applied in a game situation in League, therefore making myself a useful part of Nexus.

Lastly, one way in which I could be of use is by helping with any promoting or sales as a part of Nexus. I have had quite a bit of experience, off HF in selling and promoting a real life business which I am part of. I also am very basic in GFX and Web Design as I have had to learn these skills in order to make a successful business.

500 words about yourself:Well I would like to mention many things about me as a person, however only have a limited amount of word count to use. Well to start off, I am a 16 Year Old Male who lives in London in the United Kingdom. I currently attend Secondary School and am taking my 11 GCSE's this year. I am considered to be one of the cleverest members of my school, as I have taken a

Maths and Statistics GCSE a year early and achieved an A* Grade in both of them. When I had achieved this, I was asked by many how did you do this so early on in your life, and I have told many people it is all about perseverance, something which I have learnt to have. As a result of having this skill, I have achieved many out of school activities such as achieving Grade 5 Piano (Distinction) and Grade 4 Piano (Pass) this year. I also am a keen person who likes to fix things, and this has led me to have a small business of my own in which I repair iPhones and iPods and other electrical gadgets. I have learnt to do this by myself by again, perseverance and hard work. When talking about what I do at home for relaxation time after I have completed any work and revision, I usually play a lot of GTA 5 on my PS3. I also have an XBOX 360, but stopped using it after I bought my new PS3 last year. I also used to be a huge fan of the Call of Duty Franchise, however I stopped playing it after the newest edition of the game, Call Of Duty Ghosts came out. I actually used to be a competitive gamer, but stopped around 2 Years Ago due to exams and myself actually getting bored of it. Currently as said before the main games which I play are, Grand Theft Auto 5, FIFA 14 (Soccer or as us British call it Football), Call of Duty Black Ops 2 (Sometimes Only). On my Laptop, I also play Garry's Mod and Team Fortress 2 when I want to with my friends. Lastly, I also play League of Legends (Obviously). To sum it all up really, I am a very hard working person in real life, and when I am online on HackForums and whilst playing games. I know you might see me as a noob, but I will strive to achieve Level 30 soon, and hopefully rank up to be a professional League Player one day.

What are your expectations of of HF in general?: I'm guessing the question had a typo when you asked "of" twice. Well when looking at HackForums as a forum, I expect very high standards of people but also I have seen very low quality members as well. However, thats what you can expect on all forums, can't you. There will always be those such as yourself Hexicidal, who stand out from the rest and become one of the most well known members of the forum. However, there are others who just sign up to a forum, such as here to "learn how to hack". I believe that HackForums' expectations for myself are quite high, as I have seen many good things from this forum.

Are you willing to join us in our local TeamSpeak?: I already am part of the Teamspeak, and have been since I started playing League of Legends. I think I have seen you online once or twice as well, but never wanted to disturb your highness.

Thank you very much to Hexicidal and all of the group leaders of Nexus for giving myself and all the other applicants this opportunity. I wish everyone the best of luck!

Time spent playing League: 28 hours.

Do you engage in e-sports related activities(LCS)? No. (I watch streams if that counts)

What can you offer to Nexus: I am willing to help out the team in any way possible to win.

500 words about yourself: My name is Matt I am 14 I play on NA servers I started playing League about two weeks ago I played about 50 games in the first two days. I love League because of the team aspect, if you want to win you have to work as a team. I have met many friends playing League some from HF some not. When I get more money I plan on building a gaming PC because my laptop only runs League at around 30 fps on the lowest settings (3 year old laptop). If I am not on youtube or HF I am playing League. My main champions are Master Yi (Noob champ I know)

Karthus

Nocturne

Fiddle Sticks

Aatrox

Jax

Jinx

Shaco

Hecarim

Blitzcrank

As for my personality I would say I am fairly mature for my age, I can be fun and mess around but I can also be serious when I need to be inside and outside of League. My sleep schedule is very bad sometimes I go to bed at 9 pm and sometimes I go to bed in the early morning. I wake up at about 9 am on week ends so I will most likely be on after I take a shower in the morning.

As you have probably guess I am from the United States I am in EST time zone. My best game on League was a bot game with Yi (The second day I played) I went 47/7/6 I know that is bad for playing as Master Yi but I was completely new to MOBA's (I still am). I am always looking to improve my game and my self. I am a quick learner and always love to try new builds and strategies.

My favorite lane is mid, I always have my best games there but I have started playing top due to me using Nocturne, I plan on purchasing him when I can.

When it comes to HF I am on whenever I am not playing League I enjoy meeting new people. I do not technically run the Sony section but I have a lot of my posts there because I am always helping people out whenever they need help. I have made my mistakes and I regret them but I have also learned from them. I purchased Ub3r 2 days ago and received it yesterday so I am happy about that. But I do enjoy most of my time on here I have also plan on doing some giveaways when I get the money. I am also active on a website called LoLBoards.net which another member from HF owns. I cannot stand people who are trolls/assholes etc. I like to help people and I am always here to talk whenever someone needs it. I am a generally "cool" guy, I have been told I am a like able person. I plan on doing big things with my life I have started getting into programming I am not very good because it is not my main priority currently but I plan to do more with that when my current ventures are over. I have learned a lot from HF like most people. I know this was kind of sporadic but I was not planning it out.

Edit: I also purchased Riot Blitzcrank and Arcade Hecarim on 4/13/2014 mm/dd/yy

What are your expectations of HF in general?: I expect HF to act as if it was 16+ even if it is not. I have come to expect trolls, cool people, douche bags, smart people, dumb people, good teachers, leechers But I guess you can expect these any where you go in life.

But I do try to be HQ as possible but have been becoming more relaxed and have joked around a bit and that has gotten me some negative attention.

What can you offer to Nexus
I can offer myself. I'm friendly and like to communicate with everyone.

500 words about yourself
My name's Andrew. I've been playing league for about 5 months now and I've been really dedicated to playing league. I've played video games since I was a little kid and my favorite game overall has to be runescape. I've not really bothered with it and I'm currently focusing on getting better at league. I may not be the best but with determination I can see myself getting better and hopefully be put in silver/gold next season. I think nexus would be a great group to join for me because I mainly solo queue because there's not a lot of friends I have that play league.

What are your expectations of HF in general?
I expect to be treated equally, and not to be harmed while being on here. I look to hackforums to learn and communicate with variety of members.

Applications for this recruitment will probably be read in a month or so.

You could do either or.

If you wish to buy-in, I do not request any application.

What is the perks of being in Nexus, what is it you can offer that makes it worth to buy in, more than a userbar and people to talk to (lol).

Age: 16

Gender: Male

Time spent playing League: I think maybe a year now.

Do you engage in e-sports related activities(LCS)? I watched last years LCS, the one where FNATIC won.

What can you offer to Nexus: Friendly socialization, I can partake in normals with other members when bored. Or maybe duoing with members around my same skill level. Posting my opinions & help in the subforums.

500 words about yourself: 16 year old who's currently attending school. I don't play any sports, but I occasionally lift. I'm on the computer most of the time, looking to learn Java and C. I love playing games and League has been one of the many fun games that actually requires skill to be good at. I enjoy learning new things and improving my gameplay. I hope to hit Gold this season, but we'll see if I even hit silver ;) But at this rate I think I'll skip B2 and go to B1 if I can get two wins.

What are your expectations of HF in general?: Eh. Lot's of HQ and LQ members. Depending on what kind of member you are & your knowledge you can definitely meet some amazing people here and I have done so and I expect to find and interact with more.

Are you willing to join us in our local TeamSpeak? Yes

Do you engage in e-sports related activities (LCS)?

I watch the NA LCS pretty often, and I enter small tournaments with friends, and I would LOVE to enter tournaments that represent Nexus.

What can you offer to Nexus?

I'm a Platinum 2 ADC main who has been playing for less than a year,

yet I feel like I know more than most season 1 players do about the game as I play with the core purpose of improvement. I can offer an abundance of advice pertaining to not just strategies but to becoming a better player and gaining elo itself. I would also be more than happy to write guides, enter group tournaments, and maybe even coach other players. ?

500 A few words about yourself

I'll start with what makes me a unique addition to Nexus: I actually take the game seriously. This isn't just another userbar to enlarge my HF epenis. I want to be part of a group of people that take League seriously and are willing to enter tournaments, discuss strategies, and improve play. I'm here to find the members that are willing to accept mistakes and grow as players.

What are your expectations out of HF in general?

I'm just here to meet new people who share similar interests, and right now, that interest is LoL. :)

Time spent playing League
I've started at the start of 2011, so just over 3 years.

Do you engage in e-sports related activities(LCS)?

As much as I possibly can. I have loved the professional scene ever since I watched the season 2 world championships.

It's something that I know I will be following and engaging with for an extremely long time. I follow streams and reddit every single day.

What can you offer to Nexus:

I can offer a lot to Nexus.

Playing for over 3 years and being a diamond 1 (once challenger) player, I can offer and contribute my knowledge of the game. I believe that my knowledge is far beyond others.

I am able to stay the high quality member I am in both Nexus and HF.

I am able to have the perspective of players from different skill levels and relate and evaluate to what they are thinking, as I was once myself a bronze (800 elo) player a few years back. I can give my own tips to assist the ones who need it.

I absolutely enjoy helping others. It's in my blood and there's nothing better than seeing someone move forward with my assistance. Regardless of the matter, I always try my best to give quality advice, tips, opinions and thoughts.

As I have stated above, I love following e-sports related events/activities. I love discussions related specifically towards the pro scene, so I'm able to contribute my own personal thoughts and opinions.

Everybody loves free events. I would love to host events/competitions/activities related to LoL for the community and group to participate in. With a large and active group like Nexus, I believe that Nexus will be able to host several events that I can contribute a lot towards.

About myself:

Hey guys, I'm Lee. I'm 17, Vietnamese and I live in Australia (was born here as well). I've been playing League of Legends for over 3 years. I started season 1 with around 800 elo (bronze) in which I was quite happy. Throughout the years, I've been progressing and increasing my skills and mechanics. I reached the Challenger tier a month ago, and it was one of my biggest accomplishments. Being once 800 elo, and now diamond 1 was an extremely wonderful feeling. I love playing with friends and other people.

I've stopped being as active as I used to be on LoL now as I've tried to balance it with school. I'm almost in my last year of school (secondary college) and I really want to make the most out of it. That doesn't mean that I've just trashed LoL though. I follow the LoL subreddit daily, and I love watching streams. Not to mention, I'm a big fan of the competitive scene (OGN & NALCS). I guess reddit and streams keep me active around LoL itself, which is a good thing, since I don't play as much.

I joined HF about 2 years ago seeing one of the "MAKE 200 DOLLARS in 5 MINUTE" ebooks. Finding out that my 50 dollars I've spent on useless money making ebooks was the same as throwing money down the drain, I stumbled upon the LoL section. It was a really cool thing to me because at the time, I was so active. I also didn't expect a sub forum like this on HF. The LoL section was what made me active here (1.2k posts in there). I browse HF every few hours and stay as active as I possibly can. I really want to be as active as I was before for both HF and LOL and I do plan on doing so once I finish my studies.

In the real world, I'm quite a sporty person. I love participating in team sports (soccer) and just being active overall.

At school, I'm quite a smart guy. Not the smartest, but top 10% I guess. I'm really into chemistry, maths and sport.

I've been really interested in the nutrition field, so I've planned on studying something along those lines in university. I dream to become a dietitian for professional athletes.

There's not really any special about me, but I guess this is a brief idea of the person I am :)

What are your expectations of HF in general?:

My one and biggest expectation of HF is being as high quality as possible. HF is an extremely large, wonderful and active forum that only deserves high quality users.

Are you willing to join us in our local TeamSpeak?

It would be a honour to join the Nexus teamspeak channel.

BEST OF LUCK TO [EVERYBODY ELSE APPLYING!]

yourself (referring to the person being spoken to, previously mentioned, the reflexive case of you) (reflexive) Your own self.

Be careful with that fire or you'll burn yourself.

You; used emphatically, especially to indicate exclusiveness of the referent's participation in the predicate, i.e., that no one else is involved.

You yourself know that what you wrote was wrong.

1. a reflexive form of you (used as the direct or indirect object of a verb or the object of a preposition): Did you ever ask yourself, "Why" ? You can think for yourself.

2. (used as an intensifier): a letter you yourself wrote.

3. (used in absolute constructions): Yourself so sensitive, how can you ignore my feelings?

4. (used in place of you in various compound and comparative constructions): Ted and yourself have been elected; a girl no older than yourself.

5. your normal or customary self: You'll soon be yourself again.

6. oneself: The surest way is to do it yourself.

What are your expectations of HF in general?: Don't have any.

Time Spent Playing League:

I have been playing League of Legends since the end of Season 2 and I play almost every day!

Do you engage in e-sports related activities(LCS)?

I watch LCS almost every week if that counts :P. But I do enter in small unofficial tournaments from time to time just for fun.

What can you offer to Nexus:

I am pretty experienced with League of Legends and I can help others improve in multiple aspects of the game. I am also very experienced with Photoshop and other editing programs and can benefit the group by making graphics.

500 words about yourself:

My name is Adam. Online I go by the name Frosty, Frosty M8, or FR0ZTE. I joined HF back in January originally to learn about the hacking side of the internet. I had always wanted to learn how to DDoS or how to hack an account. Yet even after I joined I hardly spend my time on here learning about those things because I soon found out that this website had more to offer than just that. I found that the HF has a huge community of players that play League of Legends. Which I thought was completely awesome because League is my favorite game. Not only that, but there is an entire section dedicated to graphic design! I soon found that this website was the perfect place to be. I don't just play league though. I play a lot of other games on steam and sometimes on Xbox. But most of the time I am playing league or I am making something in Photoshop.

What are your expectations of HF in general?:

I want it to become a more high quality friendly atmosphere that's not full of leachers when they hear that there is a program or skin code being given away on here.

Are you willing to join us in our local TeamSpeak?

Yes I can. I also have Skype, Raidcall, Razer Coms, and Curse Voice

Also this is pretty big so let me know if I should put a spoiler on it :P

Lolking: <http://www.lolking.net/summoner/na/23187612>

Age: 19

Gender: Male

Time spent playing League: I have been playing since Season 1 and have 1500+ normal game wins.

Do you engage in e-sports related activities(LCS)? I actively watch LCS and OGN.

What can you offer to Nexus: Insight on strategies, itemizations, champions, etc. I am open to discussion and am always looking at ideas at different points of view. I will often be available to play with other players and adapt to roles.

500 words about yourself: I'm just your average player that is somewhat quiet but enjoys talking and playing League of Legends. I'm currently studying Computer Information Systems and Network Administrations in post secondary and haven't had much time to fit other things in. I recently got into archery and find it a good way to wind down after a long week. I have been playing League longer than anything I can think of and can offer my opinion here and there. I'm known never to flame and to be generally positive in games. I find myself an open person and never think down on somebody just because of something they say or do. I always try to understand things in their perspective and be a supportive person. There isn't really much more I can say for myself as I have spent the last few years in school and playing league only. Writing has always been one of my poor skills and along with the lack of knowledge to contribute has kept me away from applying to other groups. This was the first group I have found that I believe I would be able to contribute to and have been waiting for application date since I found out about it. I hope to hear back from you soon as I eagerly wait for a reply on my application.

What are your expectations of HF in general?: My expectations of HF are for people to be friendly and helpful when they're able to offer it but to also have fun. I try to contribute my knowledge as much as I can as well. There are young people on here as well as people who are older. In my personal opinion I don't really care about age as much as I do about their maturity. You can be young for a while but you can be immature for life.

Are you willing to join us in our local TeamSpeak? Yes, most likely daily.

Mr.Chow - April 17, 2014, 12:47 am

Lolking: <http://www.lolking.net/summoner/oce/349056>

Age: 14.

Gender: Male.

Time spent playing League: Since 2012; so about 1 and a half years since I started around August.

Do you engage in e-sports related activities(LCS)? Yes I do. TSM! :D

What can you offer to Nexus: I can offer my strategies, champion tips, items and general tips to get better. Although some people may believe that this is very little, some little things can make huge impacts towards something. I can also provide free boosting in OCE, and try to the maximum extent to be able to help others if they're in need of urgent help.

500 words about yourself: I'd rather keep my name hidden, as I'd like to stay 'anonymous'. People can call me Mr.Chow or Xuan (IGN). I'm a friendly 14 year old who enjoys gaming mostly, hence one of the reasons I actually found HackForums. I play many games such as Warcraft, Minecraft, League of Legends etc to Call of Duty and all that. I currently play Minecraft and League of Legends as others are somewhat boring. I am in high school with good grades (I believe), and in general I'm very shy towards speaking to people I don't regularly talk to. I may flame and be rude at times, however that is life and sometimes I need to let go of things that are not necessarily needed within my life. I personally want to become a gamer over the years. However coding etc are also in my interests. I really do hope I get in this group, and I can't wait for your response to my application. Good luck to the other HF members who will be applying. I wish them the best of luck. :)

When I first joined HackForums. I pretty much stereotyped it; a hacking forum. Little did I know was that it had many subforums leading to games, giveaways etc. I became involved with it a lot more and tried to learn the White Hat stuff. Unfortunately I gave up and went onto gaming where I found out League of Legends. From there on I read all sorts of threads to improve my gameplay. I was Bronze last season, and from reading helpful threads I managed to get to Silver. After that the season had finished, and my only goal was to get that shiny and gold border; yes, you guessed it. I wanted to reach Gold.

I finally did however, and all I wanted to say was I want to thank HackForums and its League of Legends members to help me improve as a whole. I want to contribute back by giving me my knowledge to people and tell them many strategies, tips and tricks and a lot more.

What are your expectations of HF in general?: My expectations are for people to be friendly and mature. Although there may be some dicks wandering around, HF isn't really all that bad. The name may sound a bit scary, however behind it is a wonderful community who is willing to share their knowledge around; at least most of it.

Are you willing to join us in our local TeamSpeak? I wouldn't mind, although I'd have to download TS.

What can you offer to Nexus: I can offer one of the most talented gamers on Hackforums

500 words about yourself: I didn't ask to be the greatest, I was just born this way. From my moment of conception, the moment I swam the currents of my mother's womb, that very moment, I was bossing people around. Seriously. Check the ultrasound. I am more than a hero. I am the hero Nexus deserves, the hero Nexus does not need for now. So they hunt me. Because I can take it, because I am more than a hero. I am a dark sentinel ever watching over Nexus. A silent guardian, a watchful protector. Dominick G. I am the most successful gamer in all of Hackforums and I will prove it.

What are your expectations of HF in general?: The question doesn't make sense, you should fix that. I'm really interested in joining a group though as I've never participated in one and I'd like to see how that goes.

Time spent playing League: I've been a member of League of Legends for around 15-18 Months. I love the game and I'm not going to stop until I literally need to and I'm challenger. If I'm not challenger by the time I stop then I'm not going to stop :).

Do you engage in e-sports related activities(LCS)? I do. I watch LCS almost every time it is on, and I learn a lot from it. My favorite team is CLG, my favorite member of the team is CLG Link. I'm very interested in how they play and I do pick up a lot of their tips.

What can you offer to Nexus: I can offer many things to the Nexus group. I can offer general tips on how to lane, places that are easy to bait, lanes in which you must follow to win your jungle lane, etc. I feel like I could help this group drastically because I'm on League of Legends almost every single day and I play with platinum and diamond friends of mine who help me constantly. I'm a very well-rounded jungler, a decent ADC, a decent Mid, and a very well-rounded support player. I'm not just sticking to one lane, I can help anyone with any lane. Top would be my only issue.. Anything needed to help the group would be more than my pleasure. As you can tell by my post count, I'm not afraid to post on a lot of things lol.

500 words about yourself: 500 words about myself.. Well.. I'm a helpful person, I like to talk to others, I like to help, give advice, meet new people, help people who aren't upgraded, etc. I think I'm a good addition to this group since I'm the following. If someone were to ask for help in the group's sub-forum I'd be more than willing to help them out, or even play with them and help them learn a lane even if it meant that I'd lose a game. The object isn't to become the most game played member on the sub-forum, but to help the Hack Forums community to become better players and become more well-rounded in their favorite roles. Although you shouldn't have a favorite role, I can help them to be any role. I'm a great team player, I'm helpful to my team when they're in need, I will take a lane if needed, I can help people personally if needed with the game, and I could even boost accounts from bronze to silver with ease.

What are your expectations of HF in general?: My expectations from Hack Forums in general are that the people should be helpful and considerate. Although, this is Hack Forums so there are a lot of immature young children on here with power that was given to them from other people's creations. I believe if you're the bigger person then you'll be able to outsmart anyone you want to :).

Are you willing to join us in our local TeamSpeak? I am willing to join TeamSpeak, I have a TeamSpeak account myself, and I don't like to play with my friends unless we're on it. This allows us to have maximum communication. If you haven't noticed, LCS has headsets. These headsets aren't

only for better sound and hearing, but to talk to their teammates.

Current Rank: I'm currently ranked Gold V.

Time spent playing League: I have probably spent over 700 hours playing this game in total. Been playing it since June 2012. I took a long break which is why my hours is low compared to the time I have played this game from the start.

Do you engage in e-sports related activities(LCS)? I am not in the LCS (obviously.) However I do follow the LCS and watch most the tournaments. I know all the players and my favorite team is TSM.

What can you offer to Nexus: Other than my ADC and Jungle skillsets and can definitely offer you guys a fun, mature, semi-decent player to play around and have fun with.

500 words about yourself: Well, my name is Simon DeRienzis. I am 14 years old and live in Florida. I haven't been on HF for too long so if you have never seen me don't be shocked. I have been playing LoL since June 2012 and I am an avid ADC/Jungler. My favorite champions are Varus, Twitch, Lucian, Sivir, Vi, and Master Yi. When I am not playing League I am either at school or playing tennis. I am a pretty good tennis player and compete in tournaments across the state. I want to join your group today because LoL is probably my favorite game of all time, and I am looking for some experienced and fun players to share my LoL experience with. I believe by letting me join, I can bring to the table a funny, and mature player all at the same time. I love using my mic to chat with other players like me around the globe so I will always be active in the Teamspeak. Other things you should know about me are, I suck at farming, I will probably KS you (on purpose and accidental.) If I have a bad game... I have a REALLY bad game. All in all thanks for reading this (sorry if it wasn't 500 words.) Looking to see you guys soon ;)

Age: [color=white]Eighteen

Gender: Male

Time Spent Playing League: I don't know exactly how long, but when I started playing Cassiopeia just came out so about 3 and a half years

Do you engage in e-sports related activities (LCS): I absolutely love e-sports and am always actively trying to get more people interested. Every week I watch LCS along with the challenger series with my friends over Skype or Teamspeak and we root for our favorite teams. I also stay up late till around 2:30 am to watch OGN Champions and Masters. I even participate in daily tournaments hosted by Victorious Gaming almost every day and try to improve my skill while also making friends and meeting people that love League as much as I do.

What can you offer to Nexus: I don't say this to brag, but I used to be Bronze and over the years am happy to say I have reached Diamond 4 in solo queue and am working on 3s and 5s. With this, I have learned many things over the years whether it be tips or tricks to help you in game, but also helpful information to be a better player in general from the way you interact with your teammates to how you handle losing and constantly improving yourself. I am more than happy to share this information and hopefully learn more from all the experienced League players I have heard about on HackForums. I am always looking for ways to improve my play and I hear many members of Nexus feel the same way so I bring years of experience and advice to make Nexus not only a smarter group, but a better group in general

500 Words about yourself: I have always been passionate about gaming from the moment I booted up Pokemon Red on the original Game Boy to the day I started to play League. The thing about me is that I always strive to be the best at what I like so as soon as I fell in love with League, my competitive drive kicked in. From watching streams on my phone at school to rushing home to get in as many League games as I could before falling asleep around 3 in the morning. At one point I had to play in secrecy as my parents would not allow me to play as much League as I wanted to. But that didn't stop me because I continued to obsess over League in order to learn everything I could. I analyzed tier lists and watched vods of pro games and basically anything I could to gain even the slightest edge over my opponents. Although I was dedicated, I was never able to reach a competitive level of any game I played until now. With the sudden rise of popularity of e-sports and the endless hours of fun I gain from playing this game I decided that if I couldn't become a pro I would try as hard as I could to be as good as I possibly could be. With this, I began to analyze games I played and identify my weaknesses and ever since then, have been working constantly to improve my skills in hopes of one day becoming a Diamond 1 player. That seems a bit farfetched, but I know if I put my mind to it I can do it. More than anything, I am always looking for new people to play and talk about League with to not only help myself, but help others. I admit I used to be a rager and stressed about every little mistake my teammates made, but have since learned that everyone has bad games including myself and being negative never helps. Now I simply try to encourage them to do better while also giving them advice on what to build and how to lane against the opponent they seem to be having trouble with. With this new attitude I tend to have a more positive experience in League and I can see the difference. I honestly just want to be part of a group of people that are as passionate about League as I am because this game only gets better when you play it with friends, which is why it is considered a team game. For example, when I played World of Warcraft, I hated big guilds that simply spammed invites to anyone because I always preferred a smaller guild that was closely knit filled with people I could trust and enjoyed to play with. I have heard Nexus fits that description well and would be extremely grateful if I could be a part of this team.

What are your expectations of HF in general?: I expect a closely knit family of League gamers that enjoy League as much as I do. A group of people that want nothing more than to become better players and create a great environment for each other. I expect people that are more than willing to help others out in their time of need and being able to expect the same kind of treatment. I simply

want some cool people to play and talk about League with because honestly the more, the merrier

Are you willing to join us in our local TeamSpeak? I am basically on my friend's TeamSpeak whenever I am playing League which is most of the time so I would be more than happy to come and talk to you guys personally

I am not working on ranking with LoL atm XD sry </3
however I am looking to get better as I am on a LoL team now
a e-sports team and I would love to be better for them c:

Age

I am currently 15, and I am turning 16 in January of 2015!
I am planning on applying for a job near by at a POPULAR custom
gaming PC store that my friends own and, I am planning to make
a lot of money there as well as learning a lot!

Also I am planning on getting me a car soon so YAY!

If I where to say my Time spent playing LoL? I play everyday.
Mostly I practice with my E-Sports team The Living Legends!
We do 5v5's 3v3's and Practice games with 2v2's! So it is a lot

of fun! So I would say I play very often!

I do engage in e-sports activities! Besides LoL, I do SC2, Hearthstone and if it's even a thing anymore World of Warcraft!

I can only offer you my love and support, also my ability to do my absolute best to join in any and all activities that you will be doing also, I can offer me helping any other new players to the game as well as being a good representative on HF! c:

I do my best at being, Outgoing, Smart, Helpful I also am a music guy, I love music I would honestly DIE without it! XD
I love having me time even though I love hanging with my friends and my boyfriend but I like just me time where I can relax and think and just enjoy life without noise or worry! Also another thing is I like to be very descriptive and detailed so if I am asked to keep something short and sweet, huehue you got another thing coming!

But what else can I say than I am a cool cat who LOVES adventure time and Ed Edd and Eddy! XD

My expectations of Hack Forums can be pretty low and high depending on the day and who we are discussing. There are very intelligent users on HF who don't want to not be stupid and rude, and unproductive

Also there are plain idiots on here who try to be smart asses and, don't care enough to even learn what there talking about.

So its very difficult to say!

Yes I will join your teamspeak lol! XD

I hope I get in and, I don't know what else to say because I am soooo tired! Lol! I had a long day cx

Time spent playing League: A lot, played since closed beta and i have tons of smurfs, if I wouldn't have all these smurfs I'd have 1900+ wins on my main account, I currently only have about 970 wins on it.

Do you engage in e-sports related activities(LCS)?: I'm aiming to do so, I've recently started playing ranked games and I'm climbing at a pretty fast pace.

What can you offer to Nexus: Ideas, a great player, knowledge and I love helping new players out or players that just can't play so well. I like making people better at the game and giving tips on improving.

500 words about yourself:

Born in 1995, I've always loved gaming, the first PC game I've ever played was Age of Empires and since then I've got stuck with computers. I'm currently studying to become a computer programmer. I love publicity as I've been very popular in Sweden so I wouldn't mind being a competitive player. I'm a very fast learner and I always learn from my mistakes, which makes me improve my gameplay mechanics much faster. I'm a great teamplayer and a great leader, I listen to other people's advice and I'm rarely toxic. I try to calm people down when they get mad and flip out and if they continue I just shut up and let them live their lonely life. That's pretty much it about me I guess.

What are your expectations of HF in general?:

A lot of players that think they're better than others when they're really bad, but there's room for improvement and everyone deserves a chance. I mostly think so because there are a lot of children on HF, and children have the habit of thinking that everything they do is right.

Are you willing to join us in our local TeamSpeak?:

Sure, why not.

Do you engage in E-Sports related activities?:

I watch LCS almost every week and take part in Unofficial tournaments from time to time just to have fun and meet new people. I am not nearly good enough to take part in actual E-sports events though.

What Can You Offer To Nexus:

I am a very experienced LoL player despite my rank and I can help players out with the game and mechanics. I am a very friendly person and like meeting new people. I am also very experienced in graphic design and I believe I could highly benefit Nexus with my skills in Photoshop and other image editing programs.

500 words about yourself:

My name is Adam. I am currently 16 years old and I am in 10th grade. I am an AB student so I guess I am decent at school ?. I am a very helpful and social person, so meeting new people is no problem for me. I have enjoyed playing video games since I was young when my dad brought home a Nintendo 64. Been hooked on Xbox, Playstation, and PC games ever since! I enjoy playing LoL everyday with my friends and even some of my family members. League is probably one of the funnest and most addictive games I have ever played and I have met a lot of really cool people through it and hope to meet more in the future! I also enjoy graphic design, I have been using Photoshop for about 3 years now and I would say I am pretty good with it. I typically use it to help others rather than selling my work. I spend most of my time here on HF in the League of Legends section where I mostly try to help people and learn new things from other players who are more experienced at the game! People in the LoL section have also had a good influence on me, such as a member of your group! He goes by the name Raz and I won a contest that he held and he will be upgrading me to L33T and I am very excited to get it! I plane to give a whole lot back to the hf community and become a more high quality user on these forums! I am a very helpful, friendly, and nice person with a good attitude who would love to be a part of Nexus to learn new things and meet new people!

What are your expectations for HF in general?:

I expect it to become a whole lot popular in the next couple of months. OMC is growing fast and it has such a large community backing it. It will slowly attract other people and make this community even bigger! I also expect HF to stay full of HQ members so it is always a good place to be!

Time spent playing League:

I spend all of my free-time playing league. As of now that's a good 1-2 games a day. I have more free-time on the weekends and less on weekdays (school). Although, as soon as summer starts I'll literally be on 24/7.

Do you engage in e-sports related activities(LCS)?

Yes. I follow the competitive scene, know every player, every team, and even all of the reddit drama

that floats around.

What can you offer to Nexus: I can offer my insight and am 100% all for joining anyone's games in the group. I love having conversations about League and enjoy hearing about other people's thoughts. I believe my input can offer a lot to Nexus.

500 words about yourself:

I'm a 16 y/o male living in the U.S. I've been around HF for quite a bit and usually take a long hiatus when the school year starts, but always join back for summer. I've been playing games since I was old enough to know how, and have progressed since. League of Legends is by far the game I've put the most time into considering the depth and strategy it brings to the table. I love how everyone is given the same stats and opportunity to succeed and that it isn't a pay2win game. I'm the type of guy that will put myself in front of you to save you from that fatal Nidalee spear and laugh along with everyone in Teamspeak when I die. I'm a very competitive person too, so a game like this that incorporates a ranked ladder is amazing. The fact that there is an entire usergroup of people just like me is crazy to think about, and I hope that I can join it to make myself part of something that seems like a great, fun idea that ended up becoming the real thing.

What are your expectations of HF in general?:

My expectations of HF have always been static. I've split everyone into three unique groups: Those who do not care to succeed, those who care to succeed but do not try, and those who succeed because they tried. The amount of people in the middle group is astonishing, and I can't believe that some people won't just get off their ass and make their dream come true! As a website, I think HF will always be a prominent forum. This is simply due to the fact that it isn't just about hacking like the name implies, but instead it has a plethora of subjects to choose from.

Are you willing to join us in our local TeamSpeak?

100% willing ?

Not really but I have plenty of friends who do participate in e sports related activities and participate in plenty of tournaments, and help me out with tips and tricks!

What can you offer to Nexus:

Well I help a lot with new players who come to league by training them and making them feel better about playing the game without stress and people who are impatient. I let them have fun and slowly teach them the mechanics of the game. I know I'm not the best League of legends player but I'm always up for learning and bettering my game from people I'm playing with!

500 words about yourself:

My patience is one of my best attributes and I can be very calm in the most hostile of situations. I try to help those around me as much as I can while making sure to be empathic towards their situations and reactions. I want to continue expanding on areas I help people beyond relationships and innuendo and hopefully to the games field, where I can also learn from those I help and further become a better player.

Age: 21

Time spent playing League: 4-5 hours

Do you engage in e-sports related activities(LCS)? I just watch the streams, I did so last weekend with the Nexus/Instinct Teamspeak server.

What can you offer to Nexus: All I can really offer is a positive attitude, friendliness and activity to the group subforum and the LoL section.

500 words about yourself: I'm just your average American with a variety of interests, which include music, art, theatre and gaming. These games include Pokemon and League of Legends. I also might get into Minecraft since I heard it's great for people who are creative and like to make things. People usually describe me as a very friendly person that's open to making new friend and sharing thoughts and ideas. Despite such friendly traits, I will give my honest opinion on matters if I find myself conflicted with them. I recently graduated from school, got rejected from graduate school and now I'm in a state of limbo trying to figure out what I want to do with my life. One of the core problems with myself is that I'm not comfortable with my female body (FTM transgender: a man stuck in a female body so to speak) and that leads me to feel miserable most of the time since my parents expect me to dress like a girl and be very chatty and shallow with other people. Unfortunately, much to their dismay, I've never been like that and would prefer to play with video games rather than hang out at the mall and obsess over shoes and boys like most other cisgendered females. When I was pre-teen, I discovered Photoshop and its uses when someone showed me how to use the polygonal lasso tool. Over the years, I've explored almost every aspect of the program and learned to edit, design templates and make desktop backgrounds for things I liked. Had I been given instruction, I would have easily jumped into graphic design. Recently, I've also got myself interested in web development since it would pair nicely with graphic design when it comes time to design a website using CSS after setting up the content of the site with HTML. As of now, I'm using CodeAcademy and a few books to learn how to make myself a nice blog for myself that will act as a diary of my transition changes because I do plan to transition into a guy in the next 3 years after my parents leave the United States. Parents aren't very understanding of my issue (I don't think anyone understands, they assume I'm bisexual) so with such a transition, I'm going to have to make some very drastic life changes. Unfortunately, testosterone doesn't increase height (5'6) so I have to make do with what I have. In the meantime, I've sort of gotten used to the female body, sort of biding my time with getting valuable skills so that I can find a job to start funding the money needed for HRT (hormone replacement therapy) and top surgery. Bottom surgery isn't at that point yet where it gives you a working penis so I'll skip that. In short, I'm a FTM transgendered person trying to find my way in life and can't wait to change into my new body but that's a long way off in getting approved for testosterone injections.

What are your expectations of HF in general?: The forums are absolutely amazing, there's a ton of users here that I can talk to. To repay such an atmosphere, I can offer whatever skills I have (just some free GFX and real life advice) in order to give back to such a great place.

Are you willing to join us in our local TeamSpeak? Yes.

[lolking](#)

Me and League

Been playing ever since open-beta. Currently 2-5 games per day.

E-Sports

I like to go watch LCS in Cologne. Am part of a ranked team with some friends, currently Bronz V.

What I bring to the table

I have been introducing about a dozen people to the game, taught them about basic mechanics and what to watch out for in which champion. I can surely help some more people new to the game. Apart from that I am currently playing around with the Riot-API to build a website with statistics about my last games that could be expended for more people.

And well most importantly: I enjoy playing League, always have and am carrying that spirit with me.

This is who I am

I am playing League for fun. I am a person who enjoys life in general. I am studying Computer Science. And I am a big fan of role playing games (Pen & Paper / LARP).

Those are my foundations. When people ask me to describe myself in a single word I choose to use "contradiction" because I unite many controversial things with me and am very proud of it. While I like the useful and usability is a far greater point for my decisions that prettiness I also love the extraordinary (especially whiskey). My mind is analytical and spends big parts of the day coming up with algorithms and solutions for the latest code I am writing, yet I earn my lifting doing design work and am enjoying it quite a lot. I enjoy to be helping people understand new things and am always looking for my next teacher. When people ask me to use 500 I am going on.

Sometimes people refer to me as spiritual and I am very open to believes about the world and things unexplainable by science.

Video Games have been a part of my life ever since they failed to teach me grammar in first grade. Early on I was mainly playing strategy, later role-playing games. As of today I focus on League and play other free to play titles on the side.

How I see HF

I came to HF on a wave of "hacking is a cool thing". Spent my early days grabbing every give-away, diving into every section to try it out. Slowly I developed towards focusing on discussing Java-Development and a bit of everything else on the side. I actually have been away from HF for some time. Recently came back and am focusing on web-development now.

For me HF is a place of people I can ask questions and whom I can help to reach their goals. HF is a place to learn and teach, to explore and go beyond what seems possibly, a place to truly hack ^^

TeamSpeak

I will surely stop by your server and am happy to meet new people.

A few last words

Thank you for reading this far.

I would love to be a part of Nexus and explore this great game together with all of you.

I Hope you feel the same and we soon meet on the fields of justice.

Lolking: <http://www.lolking.net/summoner/lan/540207>

Age: 17

Gender: Male

Time spent playing League: At least 2 hours a day, or more.

Do you engage in e-sports related activities(LCS)? I'm a fan of the lol competitive scene so I watch
it every week and follow it very closely, I have never been to an event or played on a tournament.

What can you offer to Nexus: Well, I don't know if there is a lot of people playing in LAN servers but
if you do you can always play with me :3 I play everyday. I can offer someone to chat and discuss
with, I also enjoy doing tutorials and writing guides even tho I am not in diamond or high elo I guess
my guides can help some people.

500 words about yourself:My name is Yosh, I am 17 years old and I'm from Mexico.

I play on the LAN servers but I do have an NA account.

I've always been a fan of videogames, I think the first videogame I was ever "addicted" to was gta 3
for my playstation2, that was fun times.

Playing with friends and people is for me the most enjoyable part of video games so I normally just
stick to multiplayer games.

I started playing a lot more video games and being in the computer when I found Runescape, but
that's a dark point in my life, I don't regret it but let's just say I was really really addicted.

I was first introduced to league of legends around late season 2 but never played it, I created an
account and completed the tutorial but I never went further, it wasn't until a year ago that I found out
some friends were playing it so I downloaded it again .

I like to think I am a chill person, I don't really rage or get mad at people very often, I play more to
laugh and have a good time.

I play a lot more normal games than ranked games and I try to always play with people.

I'm gold v which I think is not bad considering my consistent 170+ ping on LAN :c

My NA account is unranked but I use it when I need to play with friends or something or when no
one is on LAN.

Other than playing videogames I enjoy a lot going out, learning new things and just talking to
people.

For more League talk, my favorite roll is supporting, I like babysitting.

I think it is a very underestimated role, and yes you might not kill people but I find that more
interesting, learning how to carry without the ability to kill enemies.

I play a lot of support in soloq, and my most played champion is Thresh.

Although I am aware that other lanes are easier to carry games with, I still enjoy supporting.

I placed in silver 2 in season 3 and silver 3 season 4, I carried myself out of silver only playing AP
Sion mid ;)

It works until you find someone that knows how to counter him.

I like testing weird champions and comps to have fun.
Twisted Fate support, Le Blanc, Vel Koz, I'm that guy playing those when I am bored.
I follow the competitive scene closely, I think it is amazing.
My favorite team is TSM, and GMB.
I also watch a lot of streams and videos.
I really do think League of Legends is a very awesome game and I enjoy every aspect of it, I hope I don't get bored of it soon.
Thank you for reading my application.

What are your expectations of of HF in general?: Meeting cool people.

Time spent playing League: Season 2. Roughly around about when Brand was first released. Time Spent: [\(WastedonLoL\)](#)

Do you engage in e-sports related activities(LCS)? Never been/played at a tournament due to my lack of skill. Maybe in the future. Fair to say i watch LCS a lot.

What can you offer to Nexus: As a satisfying League Of Legends player i have a good understanding of the game, play all roles effectively well. I'd be more than happy to help my future Nexus Friends.

I'll be very active and will contribute really well with the team!

500 words about yourself: I'm not as literate as most people on HF, but I'm a cool easy going guy, have gone through a lot of trouble through little time the only escape from all my problems is playing League of Legends, Fascinating isn't it?

I'm friendly most of the time funny, love playing League of Legends with friends that's when it gets most exciting so everyone can witness the plays you/them make.

What are your expectations of HF in general?: I remember joining Hackforums for ps3 jail breaking questions and had like 2 posts for like 3 months of registering on this site, then as i progressed on i started to sneak in other sections and started to become more active. You find a lot of butt hurt people and just a handful of nice easy going people. but hey it's the internet remember?
the only reason why i come on HF is mostly to check out the Gaming section, have 0 interest in

marketing. You'll mostly catch me in the runescape and League of Legends section.

Are you willing to join us in our local TeamSpeak? Of course, I'd love to speak to everyone apart of Nexus and get to know you all.

Time spent playing League:

Over a year, I played League of Legends, a tiny bit of Dota 2 and some Smite. I got my brother into playing LoL instead of Dota 2.

Do you engage in e-sports related activities(LCS)? I watch a lot of LCS through twitch.tv I also watch the games they have so I can learn from them.

What can you offer to Nexus:

I can offer a high quality good jungler. I will most definitely try my best at what I do.

500 words about yourself:

I like to wrestle, play basketball, and football, also track. I am going to learn how to code in college, I am 15. I won the state championship 4 years in a row, with the same team. When my brother gets back to Sweden, we will finish up our new cryptocoin. I like to play CoD on the xbox 360 with my friends from school, we plan to when we get older, to go to actual tournaments. On LoL, I play with my friends that are Platinum/Gold. I lost 2 games, both games had an afk in them, and got put in bronze, so I stopped playing ranked all together and played with my friends. I am a male. I am in the business a lot; I have my own League of Legends referral service, fast and cheap service. I also have a little service I do, details about that: Hello, I am starting this new thing that I will post your business on multiple sites I use, which will increase the sales for you, and in the purchase will have a %10 extra price. (for me) And was wondering if you would like to participate in this. I will say I am not the one doing the job, but I take full responsibility for what happens. (That is the message I send them) When I did play ranked, I knew I was told to carry by using an assassin, so I used Katarina, and a little bit of Fizz. I did carry, but there was not a person that could carry the one team hard enough. I don't see a post in this thread that actually has 500 words, like it says to have. I am currently trying to get a girl that sits across from me in my science class. I seem to make essays in my classes very easily compared to other students; I get a grade on my essays :P. I almost carry the game every time I play Udyr, I turn into 'Godyr' every game I do good. In my placement games, I carried the team by playing Lee Sin, in the jungle. I made sure to give kills to the lane, instead of taking the kills. If I think you aren't going to get the kill, and I can get the kill, I will take it. I hate when people yell at the adc when they ks you; they are the attack damage carry! They are suppose to get the kills. Well, in LoL I main jungle. I have a jtagged Xbox. I know a little bit of photoshop. I recently got into it to make myself thread designs, avatars, and signatures, but haven't really been too good at it. I will still get people to do them for me. I have a HD PVR, I am saving up to get an Alienware computer, so I can stream/record videos of games. I wrote a 500+ word entry to join Nexus because I really want to join.

What are your expectations of HF in general?:

To keep on doing what it has been doing for years. Teaching users, connecting users together. Starting businesses and much more awesome things.

Are you willing to join us in our local TeamSpeak? Of course, I have my own Teamspeak server as well, I am almost always in there.

Time spent playing League: I've played around 1 1/2 years, and I currently play 2-3 hours a day

Do you engage in e-sports related activities(LCS)? My high school had an e-sports team, and I participated in that.

What can you offer to Nexus: I can offer a fun, light-hearted, attitude and a passion for a game we all enjoy!

500 words about yourself: My real name is Canon, I love to listen to music, play my guitar, smoke weed, and hang out with my friends! I spend a lot of time with my girlfriend, and when I'm not with her I'm either with my friends or playing League. Both of my little brothers and I enjoy queuing up together!

What are your expectations of HF in general?: In general, my expectations aren't much... because the members of the community are always changing, my expectations would be too. A community's soul purely depends on the people there. Because HackForums is always changing and getting new people, I don't really hold an expectation. I just go with it.

Age: 19, almost 20

Gender: Male

Time spent playing League: Over 7,000 hours (I've been playing since Jan. 09'

Do you engage in e-sports related activities(LCS): I follow the competitive scene VERY closely, primarily the NA LCS and the OGN. I played on an NACL team for a few games while they looked for a replacement for one of their players as well.

What can you offer to Nexus: General e-Sports knowledge, experience, and dedication. I've been participating in e-Sports ever since I was 12 years old beginning with Counter-Strike. I've been high ELO consistently for the past few years now and I can provide insight and information for the lower ELO members.

A little bit about myself: I'm a university student at a very popular state university in North America. I played football when I was younger, ever since I was 8 years old and I've followed professional and college football closely ever since then. When I was 12 I discovered competitive gaming and was hooked ever since. I participated in countless LAN's and online tournaments for games ranging from Halo 3 and COD4 to WoW and League of Legends. I came across League of Legends through the Friends and Family Closed Beta back in Jan 09' (my friend's uncle worked at Riot for 3 years) and I was addicted. I've competed in a plethora of amateur tournaments here and there, local university tournaments, and even IvyLoL and the recent huge Riot Collegiate Series tournament. I'm an ex-Challenger player and finished S3 with 98LP and I have a never-ending passion for e-Sports, especially League of Legends e-Sports.

What are your expectations of HF in general?: I expect a sense of community from Hackforums and

so far my experience here has been great. I'd love to share my vast knowledge of League of Legends and competitive gaming with people with similar passion. I expect to have several experiences where I can share my information with those who have the dedication to further themselves in-game and out of game.

Are you willing to join us in our local TeamSpeak?: Absolutely. I'm on my PC a LOT and can be in there most of the time.

Time spent playing League: I have spent a lot of time playing league, at least a few hours a day (if i'm at home). According to wasted on LOL I have spent 686 hours in game. ([Link](#)) I have over 350 normal wins and over 5000 kills, as for ranked play I have about 90 wins currently. I started playing LOL about when Lulu was released then took a break came back to it and reached level 30 in the preseason to season 3.

Do you engage in e-sports related activities(LCS)?: Yes, as I reached level 30 I started to get more interested in ranked play, I usually watch LCS games mostly EU LCS whenever I can. The main reason I watch is to improve my play mechanics and to watch brilliant plays such as this one ([Link](#)) (I never saw the full match but this is definitely one of my favorite moments of all LCS).

What can you offer to Nexus: I would like to think I can offer a lot to Nexus, I am an active player and work well in a team. I would be happy to help people who are new to the game, and also interested in advice from better players. I would love to progress through ranked play and better myself as a person not just my account.

500 words about yourself: Well this could take a while.... Anyway lets get started! I'm a 15 year old currently living in the UK. League is my currently most played game and has been for a long time but I also like games such as Sid Meier's Civilization and Hearthstone (by Blizzard). Computers are probably the thing that interest me the most, I spend quite a bit of time per day scrolling through Hack Forums looking at Tutorials and such, I really want to learn more about computers and hacking in general. Just like I want to learn and improve on League, the reason why i'm joining this group to share my knowledge and take advice from others. I would like to set up a shop on HF one day as get into the marketing element. As for education I would like to think of myself as more of an academic than physical person. Getting back to League, my main champion is Orianna: The lady of Clockwork the main reason I play her is because she has a unique play style like no other champion in League. The Wombo Combos you can achieve with her ultimate combined with a champion such as Wukong or Jarvan the ultimate combo is brilliant and can change the tide of a team fight almost instantly. Her use of Command Protect can also be good to protect the ADC and saves lives in combat situations. I would like to think I am not bad at Orianna but definitely some room for improvement. . I usually Duo Queue or play as a team with my friends, I would like to play League with new people and I have an interest in joining an active ranked team (the one i'm in now is not active). I don't play much of the other game modes but i'm open to giving them a try more often than I do now.

You can contact my Skype or PM me if you have any other questions about my application (PM me for Skype)

What are your expectations of HF in general?: Well at first I expected HF to be full of well....hackers, then I realized its not just about that. Its a whole community of people, using the marketplace, helping people who are infected and people gaining knowledge. Yea there are some people out to troll and steal your money and yea its happened to me a few times, but what do you expect ? Overall its a really good community I like being a part of.

Are you willing to join us in our local TeamSpeak?: Yes, sounds like a good idea. No point being in a community you cant talk to.

What can you offer to Nexus: Well I'm always on my Computer and I'm active, and I'm not Dumb. I have a engineering mind and I am a Idea Man.

500 words about yourself: Like I said above, I have a engineering mind. I use it for good. I'm have decent knowledge in the hacking world and knowledge in other areas too. I'm very active on my computer and play many games (CS Go, DayZ, Titanfall, Arma, and other games too) I have experience on other things such as Xbox and PlayStation. I am a HUGE Seahawks fan, I live in Seattle. I have good intentions of going to collage weather it be on a Scholarship for Baseball or Football. I love Sports. I know minor coding. I really love music. Me and my brother have dreams of becoming a DJ. I always like to be talking to someone, don't really know why. I almost always play with music on, it in a way keeps me calm. I do like to rage a little bit when I play league -. I'm very friendly and am a quick learner and I can pickup on things very fast. A lot of my League friends say that I will go through my placements and be in Silver when I get places too!

Do you engage in e-sports related activities(LCS)? Yes, I watch them nearly every single day to learn new plays and tactics.

What can you offer to Nexus: I'm currently an ADC main, who has a 75% win rate with Jinx. I'm looking to meet other ADC's and Supports to play with and share some tips/learn some. I'm a frequent LoL player and spend at least 3 hours per day.

500 words about yourself: I'm an easy-outgoing guy, I spent a good amount of my time learning, along with irl stuff. I joined HF a while back to originally figure out how to hack NeoPets, because who hasn't joined to learn how to hack something, right? Anyway, during my time here, I've met a

large number of people, a lot of them are good at heart people, others, riddled with distaste and greed. By joining this group, I'm looking to meet other players alike, and hopefully get some kind of a tournament going.

What are your expectations of HF in general?: I believe HF has progressed a lot between the years, 2011 was the year I joined, and is very different then from what it is now, more of HF revolves around ebooks, though I'm not a huge fan of that myself.

I'm not going to argue semantics, rather add you back as I know Hex will just do it tomorrow morning or whenever he's online next. The reason I removed you when I was clearing out the group earlier tonight was because of the following;

You're inactive.

You said it yourself. <https://i.imgur.com/uUX39o1.png>

Tons of excuses, yet your [post activity](#) proves you've been posting on the days you said you were gone.

You've been in the group for over a month. You have six posts in the subforum.

You argue that missing a check-in is acceptable. It is not. You're taking advantage of Hex's generosity which really upsets me as he's a close friend of mine. Here is our policy on check-ins straight from the handbook.

Hexicidal Wrote:Check-in policy

Check in threads are like this: // removed url //

Every member is expected to post in the thread to note that they are in fact here and actively posting. The thread is then gone through by the leaders and each member is reviewed during this time. If you plan to leave for an extended period of time, please notify myself and if you are removed from Nexus, everything will be rectified upon return.

Everything is subject to change at any time, please be aware. Thank you all, and welcome to Nexus.

Hell, it even states in the OP of this thread;

Hexicidal Wrote:If you are interested in joining, recruitment will be held a bit far out from now. Currently, I am setting up the subforum for the future of Nexus. If you are interested in joining now, you are more than welcome to buy in. If you would like to purchase a spot in Nexus, please PM me. (Which can include missing a check-in, if you follow all rules completely, you will never be removed) BTC will be accepted soon. If you would like to join Nexus AND Instinct, please click here.

You're arguing over Hexicidal's generosity of adding members back even though they're in direct

violation of policy. Not cool whatsoever.

I've added you back, but stop taking advantage of Hexicidal's kindness.

Thanks for adding me back. I look forward to joining the group, I promise once I get my computer I have some big things planned. I'll check the group everyday to see what I can post in. Right now it with all of the league posts it would be like talking to someone in Dutch who doesn't speak it~

I have to go to bed soo goodnight.

(Jun 15, 2014 10:32 PM)Saturday Wrote: [\[CITE\]](#) There was a check-in that lasted three days. If you were removed it was because one of three reasons.

1) You were in Bandors' Minecraft or Garry's Mod sector. Both sectors have since been removed as well as Bandors from leader.

2) You have failed to check-in in mandatory check-ins. A rule Hex has even underlined in the OP of this thread.

3) You've violated one of the few rules Nexus has and were rightly removed.

As for you, NickChan.

I rest my case at this.

Spoiler [\(Click to View\)](#)

You're inactive in our SF yet post daily elsewhere. When confronted you give nothing but excuses.

You were removed for arguing with other members continuously on a check-in thread. Of all the places.

And what of me? Hexi said he'd look in to it but I am curious if you know the verdict.

I've never removed you. You and I both know it was for arguing with Kinky repetitively. If you have a quarrel, take it to PMs.

It was once over 2 posts by us each. He was just upset because I -3'd him.

Not to mention this wasn't in Nexus, but the Infamous SF.

Solomon Grundy - June 16, 2014, 12:54 am

i also got removed again.....lol.....so amusing

Wirt - June 16, 2014, 7:35 am

I am just curious why I was removed. I sent Hex a PM saying I will not be on because I will be going on vacation, then I got back Friday and posted on the Check-in thread Saturday but a couple hours after I checked in, I was kicked. I was looking to become a very active member in the group when I came back, but I am now kicked for some reason.

D????????????????ark - June 16, 2014, 7:37 am

Got kicked also, expecting hex to add me back in.

This is the second time Saturday has kicked me out wrongly.

I checked in, said my opinion and I was kicked.

Hopefully hex will right this wrong by saturday.

Edit: Saturday is flooded with PM's.

Will let him get through them, I am sure he will help us all.

Sharan - June 16, 2014, 9:18 am

saturday kicked me 2 very sad bout it cos saturday is my fav day of the week. unfortunate.

HAX ME IM FAMOUS - June 16, 2014, 9:24 am

Lolking: Not giving out.

Age: 17.

Gender: Male (Sexist)

Time spent playing League: Roughly two to three years, and around 9000 games.

Do you engage in e-sports related activities(LCS)? I watch it here and there.

What can you offer to Nexus: My knowledge, and my services.

500 words about yourself: I honestly can't be bothered writing 500 words, but I can tell as much as I've been running a boosting service for League of Legends for 8 months on HackForums now, and have had plenty of clients. I peaked myself at Diamond 2, and have been doing alot of coaching too. I left the group because of the subforum, but im willing to give it another go.

What are your expectations of HF in general?: wat

Are you willing to join us in our local TeamSpeak? Im always in the Instinct TS.

Solomon Grundy - June 16, 2014, 12:04 pm

i did check in by making a post of a song i was listening to and bam.....locked out.....is this how nexus leaders treat everyone.....first it was 2hrs after invitation, when i was added back into nexus i quickly made a check-in post and got kicked out in less than 6hrs.....nawa o

G??gle - June 16, 2014, 12:12 pm

Hex, I've sent you a PM regarding the buy-in.

Kosmos - June 16, 2014, 12:14 pm

To those of you who were kicked:

Bandors was removed from leader a few days ago. This means that his Minecraft sector has been dissolved and is no longer needed in Nexus. If you play League of Legends or are interested in starting, message Saturday and he'll make sure that you get back into the group--so long that you are going to be involved with the groups purpose.

Imperious1 - June 16, 2014, 12:28 pm

This is an absolute waste of money. I paid Hexicidal and then got removed from Nexus for no reason. Pretty much like a scam, if you ask me.

Tonight - June 16, 2014, 12:40 pm

It's utterly amazing how so many of you can go days and days without checking the subforum yet the second you get removed it's the end of the world.

If you feel as if you've been wrongly removed, PM me.

I will gladly work it out with you and thoroughly explain why you were removed.

They paid money to be in a group. If you were kicked from a group that you paid money to be in, you'd be pissed too.

I am not trying to start anything. I am just in a neutral position, and trying to empathize with both sides.

Your first post on the sub forum was in the activity check. You didn't even read the topic but just posted a generic comment.

I was also kicked, i did check in (at the time i joined i was switching isp so i was offline for a few days but i told Bandors that before i joined. :/

In the T.o.S. it clearly states that you will not be removed unless you break a rule, this includes missing a check-in. Also all of the MC sector members have been removed as well as Bandors from leader.

I have a stockpile of PMs from members to get back to and I'm currently on mobile. Will respond to all of them by tonight.

D????????????????ark - June 16, 2014, 3:14 pm

Ok guys, I was removed also.

I have a deal with Hex, I shouldn't have gotten removed.

I did check-in also, but I have PM'd Saturday, this isn't the thread for complaining why you were kicked.

PM Saturday, give him a while to reply, when he gets the chance I am sure he will give everyones PM's a thorough look at.

Lets not ruin this thread with negative posts and complaints.

Tonight - June 16, 2014, 4:08 pm

Just messaged all of you back who had issues. Please PM me first before going off on a tangent. I can almost guarantee we can settle it.

Age: 18

Gender: Male

Time spent playing League: Season 1 Beta

Do you engage in e-sports related activities(LCS)? Yes. I was on a challenger team in the past but never got anywhere with the roster. I also watch most of the NA/EUW LCS activities because I find it very interesting. The play style is totally different than SoloQ, so it really adds life to the game sometimes.

What can you offer to Nexus: I can offer help to all users seeking help towards Legends of the League. :) Most people probably say the same thing so I feel that this portion is unnecessary.

500 words about yourself: I'm dedicated and hardworking. I have over 200K youtube subscribers and am starting to stream on twitch.tv. I have always worked to improve myself in League, even after being the highest MMR S1/S2/S3 (platinum, platinum, diamond).

What are your expectations of HF in general?: Members who have the same passion as me and also members who do not rage (like xepher does LOL).

Are you willing to join us in our local TeamSpeak? Yes, but not every day and not for extended periods of time.

I was kicked as well after I bought in. I just PMed you Saturday! ?

?OPTIC - June 17, 2014, 8:28 am

I was kicked for no reason. I followed all the rules.

G??gle - June 17, 2014, 2:22 pm

Considering that Hex ignored a PM I sent him yesterday morning, I'm guessing they stopped accepting buy-ins.

Solomon Grundy - June 18, 2014, 1:18 am

also did send a pm but never got responds back.....why! why!! whyyyyyy!!!

now i got back in.....soooooo coooooool.....download LOL atm

Do you engage in e-sports related activities(LCS)? Yes I do,I prefer to watch NA LCS because I like TeamSoloMid and I think that I can learn much more from NA scene than from EU because NA has more experienced players in general and aggressive play style which I prefer over passive farming style that EU players offer.

What can you offer to Nexus: I can offer guides to certain champions that I play at decent level,I contributed lol section with some tips and other miscellaneous stuff,coaching to new players (I'am Gold 5 that will certainly help lower elo players (bronze and silver)

Champions I play at decent level :

500 words about yourself:

I was born in Zadar,Croatia 16 years ago.

I'm very frendly and nice person and I will always try my best to help someone in need (give them advice,hug them,give them some money...) because It makes me sad to see people that once had home,family,job just stand on street and ask for some money. ?

If someone asked me to describe myself in 1 word it would probably be Positive because I try to be positive most of time and I look at the world from the positive side. (Glass is half full,right?)

My favorite quote is "Security is illusion" because there is no such thing as security,there will always be something that will "go thru" security because people invent things every day that can change world on better/worst side so we need to be careful what we are doing with knowledge because knowledge is power,you see when Robert Oppenheimer made nuclear bomb it changed world on BAD but when Alexander Fleming invented pencillin it changed world on GOOD side,so we need to make world better place for future generations that may come after us..get me?

I spend most of my free time playing games or going out with my friends

Games that I play the most are CS:GO,LoL,CoD,Minecraft and somethimes L4D2.

I hate judgmental people.

I'am more like, oh hey do you smoke? Good for you. Hey you drink? That is nice. You wear a lot of make-up? Awesome! You don't? All good with me.

I don't care if you have tattoos,I don't care if you have a lot of money or don't,I don't care if you have fucked up past or not.

I'm no one to judge,just smile and be happy!

What are your expectations of of HF in general?:

I came to HF back in 2012 and I loved it,HF community is very mature over some other forums when 12 yo kids fill sections with leeched stuff and admins are horrible but HF community/admins ARE JUST AWESOME,very polite,HQ and will always try to help other member with any problems that they might have.

In couple of days I will get money and I will support HF so that It can stay alive for a long time and be awesome as it is now.

I'am most active in League of Legends section as well as in general section where I can meat new people and hang out with them and eventually help them if they have any problems,laugh with them when they post something funny,cry with them when something sad happens.

Are you willing to join us in our local TeamSpeak?

Yes I do.
