Can you elaborate on the setup please. I am bad at this stuff, but I mean just putting ghz doesn't really help me. What processor is it specially for example. It is an atom or xeon?

This is cracked. Pretty easy to understand from op saying it will last until they realize.

Don't pay 10\$+ for this

Cocaine Dreamz - April 4, 2014, 12:48 pm

still selling it add me on Skype, thanks
