A+

for some odd reason once I crypt my server the Icon changes to a windows Icon and under properties it has RPCSMonitoringHost under description and a whole bunch of other stuff but that I can fix. any one know whats up with the icon in my case? I'm compressing the server but I don't think that'd be it.

\$@dok - May 11, 2010, 5:38 pm

RPCSMonitoringHost is in assembly ;) also the icon will be a windows icon and u can change with Reshacker.Thanks you for testing it

Iced Knife - May 11, 2010, 5:56 pm

Does this work with Cerberus?

Riseing - May 11, 2010, 5:59 pm

Could I get the private release?

Thanks man good looks.

-mothered- - May 11, 2010, 6:10 pm

Nice one there mate. I like the fact that It's x64 compatible, hence will be putting it to the test pretty soon.

Much appreciate the share :)

imgunna - May 11, 2010, 7:08 pm

i ahve 64bit comp its compatible i tested it and ran my server on myself it works better than a charm

Lithiumhost - May 11, 2010, 10:05 pm

very nice crypter. this one works as well as your last release keep up the updates

Cheers ?

@ sadokbest

Mate please don't scan at virscan.org as they sends the logs to the av vendors. Here is text stated by the virscan.org:-

Quote:"If the file you uploaded is detected as suspicious, VirSCAN will send the file and report off to the antivirus vendors participating in the VirSCAN service to be analysed. Antivirus companies will update the signature virus database if a real malware is found. If you disagree with VirSCAN's clause or agreement, please don't use VirSCAN's service"

Thanks mate!

Works perfect ;)

FOR ALL THE NOOBS : ONLY UPLOAD IT AT NOVIRUSTHANKS.ORG!

Mate i got a problem on darkcomet, it successfully connects the client but however the explorer.exe hangs and restarts automatically.

Here is the pic:-

[img]http://img718.imageshack.us/img718/9150/13875975.png[/img]

And here is the error i got when i uninstalled the server:-

[img]http://img24.imageshack.us/img24/3373/43256172.png[/img]

Also i recommend you to add the injection and uac bypass as optional coz almost every rat have this feature and double enabling it will make the server unstable. On the whole your crypter is very good and i would have bought it if i had money.

And on thing, your server is detected:-
