Thread: [\[HELPDESK\] Anaconda's Keylogging Helpdesk - Ask all your questions!](#)

AngularJS - April 4, 2014, 9:56 am

Hey guys from HF!

I'm starting this thread for everyone who has any questions about keylogging, like which keylogger should I use for this etc.

If you have any questions, feel free to ask!

I will reply as soon as possible.

Kind Regards, XAnacondaX.

frontenhack - April 4, 2014, 10:57 pm

Big vouch for Anaconda, know his shit :)

AngularJS - April 5, 2014, 12:48 am

Thanks for your vouch!

Kind Regards, XAnacondaX.

Marwix - April 6, 2014, 2:57 am

Your doing a great job buddy, keep it upp :)

Nello - April 6, 2014, 3:00 am

what keylogger should i use for keylogging a windows 8.1 or 8 pc ?

AngularJS - April 6, 2014, 5:06 am

(Apr 6, 2014 03:00 AM)Nello Wrote: [\[CITE\]](#) what keylogger should i use for keylogging a windows 8.1 or 8 pc ?

It doesn't really matter, but I would advise CaosLogger (paid) or Syslogger (free).

Kind Regards, XAnacondaX.

SnipeAtThat - April 6, 2014, 8:15 am

Hey it would be awesome if you could help me out, I have a couple of questions regarding key loggers and I also need some help setting them up. So if you could reply to this with your Skype name and we could talk, that would be awesome ?

AngularJS - April 6, 2014, 8:22 am

I'll do it asap!

Kind Regards, XAnacondaX.

creepez - April 6, 2014, 4:10 pm

Hey is there free keylogger capable off:

Screen capture after mouse click or a specific word typed!

Automaticly building slideshow would also be very useful because it will have less size(optional)

And has SMTP delivery?

TokyoRoyalty - April 6, 2014, 5:20 pm

Hey, I've already built a keylogger with Dracula Logger but I'm having trouble spreading it around.
Could you PM me your skype info and help me out with spreading it?

AngularJS - April 6, 2014, 10:06 pm

(Apr 6, 2014 04:10 PM)creepez Wrote: [\[CITE\]](#) Hey is there free keylogger capable off:

And has SMTP delivery?

I know there is a free good logger called "SysLogger"

For a paid one I would say CaosLogger

(Apr 6, 2014 05:20 PM)TokyoRoyalty Wrote: [\[CITE\]](#) Hey, I've already built a keylogger with Dracula
Logger but I'm having trouble spreading it around. Could you PM me your skype info and help me
out with spreading it?

Just spread it everywhere, skype, facebook etc.

It would help!

Kind Regards, XAnacondaX.

ritzbitz69 - April 23, 2014, 10:16 am

Hey, i just recently wrote a simple key logger for just testing purposes, But it doenst save the keys
hit in the correct text file. When it is running it wont let me open the text file becuase it is being used.
if needed i can paste the Source code, I am writing it in python just to be simple. any help on how to
fix it?

Thanks for your help

If you really want to keylog, you could better download a keylogger.

Else, post your script here.

DarkCraft - April 23, 2014, 6:22 pm

Hey I'm completely new to hacking in general. However, I do have experience in programming. I know the basics of HTML, some Java, some visual Basic, and some batch files. I would like to do a simple keylogger that is crypted and grabs passwords or other important information. If you could pm me your kik or Skype name that would be fantastic.

ShudderX - June 4, 2014, 11:43 am

I'm looking to spread a keylogger through some sort of physical means (CD/ flash drive). In your opinion, what is the best way to spread the file to a computer that you have limited but physical access to? I like the autorun.inf idea, but I'd like to have the files hidden in some way. Your help is much appreciated

Black ops 3 - June 4, 2014, 1:49 pm

I wanna know the best free keylogger out there :(i wanna see the username and password of what they type to login in tibia client can it do that ? if yes whats the name of the problem thanks :)

AngularJS - June 4, 2014, 11:07 pm

I would recommend SysLogger, it has great features, and it's simple.

Maybe you could set them in a hidden folder?

I'm not coding for anyone, sorry.

Greetz, XAnacondaX.

Vilcek - June 5, 2014, 4:47 am

Hi there,

I am looking for a offline keylogger. Slave is behind proxy, so not able to sent email or FTP. But I have access to slaves drive, so the keylogger could just simply store the logs in predefined location. Do you have any option for me?

Thank you

Black ops 3 - June 5, 2014, 5:07 am

Which free keylogger is the best I was using syslogger but it sucks lol

Bigbull512 - June 24, 2014, 4:47 pm

Hey, I am sort of new to all of this... When I download a key logger

and try to open it, my security system quarantines it as a Trojan. Does this mean there is an actual Trojan, or sees the program as a Trojan? How do I open the program without it "quarantining the Trojan"?

GearCEO™ - June 25, 2014, 7:07 am

Hi everyone, yesterday I was try to hack someone with kelogger. He hacked but 2 hours ago I saw his email back to me. You Hacker..!. Just want to know is he trace back? I have WiFi Device with unknown registration, mean this WiFi Device is not registered under my name. Should I close my GMail Account? or don't login in again. Any advice much appreciated.

AngularJS - June 25, 2014, 1:34 pm

Well, does he know your email?

If not, you're safe because you can't trace an IP without the email.

iloominati - June 25, 2014, 2:06 pm

I pm'd but never got a response. My keylogger works perfectly.

What email should I use for keyloggers? Gmail and hotmail lock/verify/force to change pass/and call my phone...

Making it so my keylogger stops working

Plain - June 25, 2014, 7:09 pm

What is the best free keylogger that just gets the job done?

GearCEO™ - June 25, 2014, 9:51 pm

No he doesn't, I just closed my gmail account permanently. Tell me is it safe now?

AngularJS - June 26, 2014, 1:00 am

(Jun 25, 2014 09:51 PM)???????†? Wrote: [\[CITE\]](#) No he doesn't, I just closed my gmail account permanently. Tell me is it safe now?

Well, your IP is registered in the google database, but if he doesn't know your mail, you're good to go.

voltago - June 26, 2014, 5:51 pm

Is there a keylogger that doesn't have to be activated? like i made a keylogger using this program but it starts to work when the person attempts to open the exe file. Is there a keylogger that works automatically when someone downloads it.?

rsps - June 26, 2014, 6:40 pm

I use dark comet and they download and run my files and they don't show up on my rat is there any reason that this should happen?

What is the best paid key logger for under 30\$? are you able to to put to viruses in one file? such as get them onto my botnet+keylogger

CrazyHorse - June 26, 2014, 6:52 pm

Does Dracula only work with 32bit? I get an error with 64bit.

Thanks,

-Crazy

AngularJS - June 27, 2014, 1:53 am

(Jun 25, 2014 07:09 PM)Plain Wrote: [\[CITE\]](#) What is the best free keylogger that just gets the job done?

SysLogger or Dracula Logger.

If you want a paid one go for predator pain.

(Jun 26, 2014 06:52 PM)CrazyHorse Wrote: [\[CITE\]](#) Does Dracula only work with 32bit? I get an error with 64bit.

Thanks,

-Crazy

If it doesn't work properly just try another keylogger, like SysLogger.

Or get a paid one, like Predator Pain.

246qp - June 28, 2014, 8:39 am

Hey, im new and was wondering if you could help me because I have NO idea about anything about hacking and would love to learn some stuff. Maybe PM me your skype details if you'd like to help me, if not I understand :)

Cheers,
246qp

KenTheCreator - June 28, 2014, 10:55 am

Hey, I have some questions about keylogging etc can you PM me your skype name so we can talk about this? :) Thanks in advanced!

UnChallengeD - June 30, 2014, 4:49 am

Hey i have problem with my rat..

I'm using Darkcommet and using no ip host.. when i build stub and run it on my own pc it's doesn't appear in darkcommet... i check my port.. port is open..

When i put localhost(127.0.0.1) in darkcommet while building it's appear in darkcommet but when i put no-ip host in it.. it doesn't.. what's the problem?

AngularJS - June 30, 2014, 9:33 am

(Jun 30, 2014 04:49 AM)UnChallengeD Wrote: [\[CITE\]](#) Hey i have problem with my rat..

It's Anaconda's KEYLOGGING Helpdesk, not Anaconda's RAT Helpdesk.

CapnGoku - July 4, 2014, 5:03 am

Syslogger's cure isn't working! How to cure myself :|

tulamba - *December 2, 2015, 5:53 pm*

XAnanCondaX

What about keyloggers for Linux (Debian based distro like Ubuntu and Red Hat based distribution like Fedora)

I am looking for both free and paid ones. Please also pm your skype.

Best,
tulamba
