Thread: [Color our code!!](#)

World of Warcraft - April 4, 2014, 1:26 pm

Hey Omni, would like you to add coloring to code to make it readable and beautiful without us having to do it manually.

Like my thread: <https://hackforums.net/showthread.php?tid=4135549>

Whats wrong with coloring it yourself?

HueyTheGod - April 4, 2014, 1:27 pm

Use the [code] function. Or if you want purdy colors, use [php] but it won't color to the C++ syntax.

They shouldn't have to do it? I suppose you wouldn't know, as most HF'ers aren't even coders.

The suggestion of adding syntax highlighting has been denied many, many times in the past.
