Thread: [\[REVIEW\] Wacom Bamboo Capture Tablet](#)

ViciousCookie - April 5, 2014, 6:42 pm

I have always wanted one of these and I finally got one.

Here is my Review:

Spoiler [\(Click to View\)](#)

The Wacom Bamboo Capture Tablet is a drawing tablet used by cartoonists, animators, and web designers. It has a clean silver drawing space with a black panel with 4 buttons. These buttons are customizable to whatever you want.

The tablet comes with a black Bamboo stylus, a 40 inch black USB cable used to connect the tablet to your computer, some extra parts(tips for the stylus), and an Quick Starter Guide and an instruction manual.

The tablet itself is 11 x 7 inches and has a 4 x 6 inch drawing space. It is super responsive and I haven't had any problems with the drawing capabilities.

The stylus is a mix between matte black and a glossy black. It has a great feel to it. It feels just like any other pen or pencil. There is a button on the side that you can customize to certain commands such as Right Click or Click and Drag. I personally haven't had any problems with the stylus, but a friend of mine, [Phybe? Jr.](#), has had the tip wear down over time.

The tablet is extremely thin. It is about as thin as an iPhone 5 and as you can see it is thinner than an Xbox disk case.

That is all I have to say about the Wacom Bamboo Capture Tablet. It is great for people who want to draw or animate and it costs a lot less than most others.

The full price is \$89.99, but I got mine off [Amazon](#) for \$59.99.

Thanks to whoever reads this far!

Tends to happen a lot. They also sell nibs on their website.

I personally put an iPad screen protector on my tablet, so it doesn't get scratched so bad and so it doesn't wear down my nibs as quickly.

Not a bad review, my tip has never worn down, especially years of smudging. All wacom tablets are great for digi-painting,

I also have a Bamboo tablet! They're kinda weird to get used to, but after that it's all good!

Agreed. I didn't use mine at all for a while because it was so hard to use, then I got used to it.

I have one that I use forosu! - I find them really convenient, light and comfortable to use (in comparison to my dumb Cintiq that i'm too lazy to setup 85% of the time because it's so big.. so many regrets over not getting the 13HD ?).

The pens are pretty durable aswell, the one on my old Intuos is still in basically pristine condition after ~2years of use, never had to replace it in the entire duration I had it. The ones at my school have worn down a bit though, but that's literally 7-8 hours a day of intense daily use for a long time.. so idk.

I've had driver issues in the past, though. Besides that, everything's been positive in my Wacom experiences. I love them. <3

Nice review, and congrats on your new tablet! Hope you have fun & get to make a lot of cool stuff with it. :D
