Wow... This is the most exaggerated rate I have ever seen for OMCs. Most members are adapting the rate of \$10 per 100, which is more than fair.

It's riding the hype train. Difficulty should never affect the price as much as the actual usefulness of the coin.

I'll buy some hundreds for 1:10 - 1:15, let me know.

I have high hopes that Omni will make use of this coin incorporated with HF itself as it is HF's official currency.
