What does this do exactly? You don't have to pay to use Neobux, you just click stuff/surveys...

You don't have to pay to use Neobux, you just click stuff/surveys...By costs i'm talking about the amount you pay for golden membership and the packs you can buy (such as Emerald, Sapphire, Platinum, Diamond, and Ultimate) also for the upkeep of rented referrals.

The profit calculator takes all of these into consideration and tells you how much you are making/losing.
