immortalwon - April 7, 2014, 3:30 pm

Has anyone tested this method? Let me know how it goes

BumperXBL - April 7, 2014, 4:14 pm

Going to give this a whirl now, I'm very hopeful that it's still unsaturated and working well. I will update with my results.

? **[\$(1000)\$** ? - April 7, 2014, 4:50 pm

Thank you BumperXBL, please post your results. If it seems like you are not getting alot of victims.

Try doing a FPS game. (FAKE) I put a video also of a old or private FPS shooter to make it look more real.

You WILL get slaves this way.

@immortalwon

The spreading method does work bro.

If you decide to try it can you please post your results in the thread.

If you need any help shoot me a PM and I'll be glade to help you

BumperXBL - April 7, 2014, 6:13 pm

I think I sort of implemented the method wrong, but I've gotten one slave so far and I'm confident I'll get more. Especially when I revise the method. Thanks a ton for the share man it's rare someone isn't greedy with a good method!

Computer Forensics - April 7, 2014, 6:15 pm

Damn that's a pretty good method nice share although I don't rat ...

Supreme??????? - April 7, 2014, 6:16 pm

Nice tutorial OP. Looking forward into trying this in the near future!

? **[\$(1000)\$]** ? - April 7, 2014, 6:27 pm

Yes this guide really took me about 10 minutes, the longest was to take the pictures LMAO just wanted to make a quick share, if I have time I will make a more detailed guide.

Thank you BumperXBL, pumpkinface69 and Supreme??????? I currently get around 30+ slaves a night, all depends how fast they ban my account.

But if you get creative and spend more time you could EASILY get wayyyyy more.

Peppermint Butler - April 8, 2014, 12:04 pm

DarK-D3v!L - April 8, 2014, 12:09 pm

That you mini2365 and Dark-D3vil.

Yes, if I made it more HQ I could of sold it, but I rather give BACK to the community that helped me.

I hope you all enjoy and get TONS of SLAVES!

immortalwon - April 8, 2014, 1:43 pm

Works well, made 10 Slaves but you gotta keep posting.

? [\$(1000)\$] ? - April 8, 2014, 1:45 pm

Thats great immortalwon, yea if it gets ban or just not at the top any more you will need to keep posting.

Once you figure our what keywords to use and what to post you can have a thread last awhile and get tons of hits.

I made a shit blogspot site with fake video and ect ect ect and over night got 138 slaves. That was the best for me so far.

Keep testing bro you will figure out how to get the most slaves in no time

Congrats bro!

Top link is .exe file and bottom one is .doc macro exploit.

Dude I was trying to tell him that...

Phiction - April 9, 2014, 6:26 pm

Great method right here. I will try this very soon. Thanks BM.

Also. You dont really need to use a "REAL" email, you can use disposable emails, such as fakemailgenerator.

Other than that, I would have honestly paid for this method.
