Thread: [\[\\$5.99 ATM\] SimpleSkype - Most Advanced SpamBot On The Market! \[TONS of VOUCHES\]](#)

JohnFKennedy - April 7, 2014, 4:02 pm

LIMITED TIME OFFER \$5.99 ONLY!
Autobuy is coming VERY SOON!

Full Feature List

- Friends list
- Status Icon - Shows an icon of which a color demonstrates their status
- Status - Their status in text
- Display Name - Their display name
- Handle - Their handle or username
- Country - Their set country
- About - Their 'about'
- Mood - Their mood
- Index - Their index according to skype
- Online/Offline - Show online only or online + offline
- Hide blocked users - Hide blocked users if you do not wish to show them
- Refresh List - Refresh your friends list

[*]Blackhat

Spoiler ([Click to View](#)) Steal Information - Right click a user and instantly dump their full skype information.

Boot User - Feature currently doesn't work as I do not have a booter API to work with, if you are a booter owner contact me.

Resolve IP - Works but only if you have a working API saved in settings.

[*]Attack

Spoiler ([Click to View](#)) Call Spam - Spam calls to the selected target as many times as desired

Message Spam - Spams messages to all selected friends as many times as desired [Also replaces %country% to the targets country, and %name% to their name, ect]

Mass Message - Select all the contacts you wish to receive the message, and send the message like you would send a spam message

Group spam - Creates a group with you and the target as many times as selected. Does not deleted left over group chats on your skype.

Fake Quote - Select a user, and instantly create a fake quote of them.

[*]Identity

Spoiler ([Click to View](#)) Steal - Saves their details and avatar momentarily and then sets your details and avatar as the targets[Essentially stealing their profile]

Save - Saves their profile[including avatar] all to a text file, you can then load their profile at any given time or share profiles with others

List - Lists the saved profiles and you have the ability to choose become any one of them at any time, or remove them.

Custom Build - a custom profile that meets your needs, select any picture and it will save as a base64 text file aswell, easy!

[*]Skype

Spoiler ([Click to View](#)) Add Contact - You can add contacts quite easily, simply type in a username and the contact box will pop up with the selected user

Block- Block any contact you deem unworthy of your awesomeness(This includes mass blocking, just select all of the targets!)

Unblock - Unblock contacts with ease (This also includes mass unblocking)

[*]Profile

Spoiler ([Click to View](#)) Mood - You are able to directly input HTML as your mood, as well as animate your mood and set the delay of the animation

Name - You are able to animate your name and set the delay of animation

Status - Set your status as well as use online to offline spam

Calling - You are able to instantly accept or deny calls, essentially not even being bothered by people calling you, you can also leave the call to call as normal

AFK Messaging - You can tick the AFK button and set an AFK message that pops up every time someone messages you, you can even address the person messaging you by name with %name%

Quote generator - Generate fake quotes with exact time, username and message

[*]Misc

Spoiler ([Click to View](#)) Screen Share - A very unique feature, have the ability to share your screen, set a delay on sharing the screen

[*]Reply Bot

Spoiler ([Click to View](#)) Instant Reply - When someone messages you anything, if you have entered no keywords then you will immediately reply with whatever inputted response, even repeating back to them what they sent to you

Keyword reply - When a certain keyword is sent to you, you can reply with any custom response you set. E.g. if someone send you 'hf' you can reply with 'My HF is Matypatty, you can find simpleskype sales thread in the marketplace for 5\$ BETA'

Perfect match - If you input multiple keywords for a response and only want to respond when both are in a message then tick perfect match and it will only reply when both words are in it.

Enable/Disable - Enable or disable certain keywords that you dont want currently active

Delete - Remove an entry from your replybot list, this also deletes it from the save

Save/Load - It will save and load the list items automatically

Whitelist - Insert names that will not be affected by the reply bot

[*]Settings

Spoiler ([Click to View](#)) Resolver - Set resolver settings so you can use your own API(s) or a known API and easily access skype friends IP's with a simple right click.

ReplyBot WhiteList - Add/Delete whitelist users for the reply bot

Contact Request - Auto Accept or deny contact requests

SimpleSkype - Lists your HWID and which skype username the product is licensed to.

Save Mood/Name animation - Save the alt mood/name animation text(s). This is the only one with a save button, most of it saves automatically.

Save Settings - SimpleSkype will automatically save most things you input as you do it.

Booter and skype resolver api is nonfunctional ATM. Working on this.

Screenshots

Spoiler ([Click to View](#))

This fantastic product has just been obtained by me and my crew! Im looking forward to working with SimpleSkype and will do my best to obtain it's magnificent tools! Under here are some Vouches for the product.
