Considering we're working with the other pools that would be rather retarded, don't you think?

Legitimate downtime on my end.

I set this up for him so I doubt he attacked me.

You're not getting coins because of a shitblock that is taking 200% of work instead of 100%. Don't worry it will pass soon

This 'soon' talk worries me since this is a rented rig.

Only have so much time with it :(

You get paid the exact same regardless of how many times you get paid

With us you get paid a big percentage slowly and with other pools it's a small percentage often.

It works out as the same net coins anyway :)

Its cool to have another pool but I fee uncomfortable knowing you hired Xenon to do the grunt work.

Meh, that shouldn't really affect your choice. Just the maintaining ability of the host.

I guess thats whats making me fuzzy. If they didn't set up the pool themselves, hard to see them maintain it, thats all.

Eh, its probably alright though.

(Apr 8, 2014 05:38 PM)Xen0n Wrote: [\[CITE\]](#) I am 100% sure that's bullshit.

Go on your TOS page to see that you use PPLNS, the same as every other pool.

I'm pretty sure you didn't make any core edits to make this statement true as you hired me to set it up.

To clear this up in simpler language.

We make blocks slower due to less people mining.

Omnipool makes blocks faster due to lots mining.

But when a block is found it is spread between the ~70 workers on omnipool whereas it's spread between the ~5 on mineomni.pw.

Meaning, people on omnipool get small ammounts very quickly, and on mine omni they get big ammounts but a long time between the ammounts.

as i stated before.

You DO NOT MAKE ANY SUBSTANTIALLY MORE PROFIT FROM EITHER.

The pools are not in competition. We use the same settings to stop this rivalry that it's becoming.

Hope this clears it all up.

Creative.

That being said... Yes people are experiencing the same kind of thing on my pool.

Payouts happen less often, but the block reward is split amongst fewer people to people get a bigger share.

At the end of the day it's all the same.

Need to enable in your global scripting - HTTP_X_FORWARDED_FOR & HTTP_X_REAL_IP headers - so your webserver can grab the real IP of your miners.

You should also be using Nginx with Varnish for your front-end. ?

The problem is across all the pools. Pool owners haven't forwarded proper modules for their webserver to see the real IPs' and forward that to members. ?

All i'm saying is that i'm rather busy and an IP doesn't bother me at all. It's working for me and most others in my pool so i think that's good enough for a feature that nobody is using.

We're online and running perfectly! Over 15k coins have passed through our pool!

Krew - April 17, 2014, 11:39 am

Perfect time to start mining. Difficulty is at 2.3!

Tenaxium - April 17, 2014, 3:28 pm

Vouched, wheres my free OMC?

Im kidding, this is a good pool.

SystemVariable - April 18, 2014, 12:05 am

You don't have to download anything do you? If so what do I download to start mining omnicoins?

All you need to download is the OMC wallet and the Miner of your choice.

We're ready for the hype train to board again :)

Krew - April 26, 2014, 3:27 pm

Start mining, boys! Difficulty is OK to mine right now :)

Krew - April 29, 2014, 9:04 am

C'mon boys, get mining over here while you still can.

Says the one who runs a pool that lost everyones coins. Stfu kid and piss off our thread. We're working 100% with no downtime unlike your pool.

You got access to the pool server, deleted the user database then made changes to the pools frontend promoting your own website MattsSite (or something).

Please do not trash the pool for something you are the cause of.

I thought you were selling this pool anyway because you couldn't fix the share problem or something?

.Matt - May 1, 2014, 6:22 am

Going to be throwing some huge Mh/s at the pool tonight :)

Your wish is my command. Due to an incredible boost from Omni, We're back online for good!

Krew - May 14, 2014, 1:29 pm

Correct. Thanks to Omniscient we are back online.

Please register a new account for now even if you already had a existing account.

Pluxo - May 14, 2014, 9:00 pm

Second one I think. :DDDD I would doubt it though.

Nonon Jakuzure - May 15, 2014, 5:06 pm

I've begun mining on this pool to hopefully help get it going.

EDIT: I've decided to set my donation percentage to 100% to help this pool even further.

Obli - May 17, 2014, 12:35 am

Great mining pool, good job Matt and Krew.

.Matt - May 18, 2014, 2:09 am

Pool running super stable, haven't had a single second of downtime so far and have withstood 2Gh/s of mining with less than 50% cpu!

Flashy. - May 18, 2014, 2:20 am

Vouch for the pool, Its very stable (tested a bunch)

.Matt - May 18, 2014, 3:10 pm

Pool is at an average of 60Mh/s! OMC to the moon!
