He tried dealing with me twice, but always seemed sketch and wanted me to go first..

Make sure to submit the report here <https://hackforums.net/disputedb.php>

Also before doing that add the users profile to this too.

You should put his UID in the thread title also link to his profile in the OP. You got scammed and you cant do anything about it.

Sorry for your loss. :/

Sucks man, you should rarely go first unless you deal with a trusted member. Mainly because they can chargeback and you cannot dispute or anything.

Also read his previous reputation, it states that he scammed before.

Joined yesterday, apparently was near best friends with the "scammer" and then tried to post a scam report when I assume user wasn't a member or was using another account.

Are you a multi-accounter by any chance?

OT: That sucks, there seems to be a few complaints about him scamming and being sketchy, good luck with getting this sorted.

so yeah why is nothing happening to the user?

sorry first time being scammed on hf.

You're definitely a ban evader/multi-account, been on site for 4 days, and already have a list of links to click for people to get you L33t?

Young Sinatra is indeed a scammer, but this scam report does not have enough evidence. Sorry for your loss OP aka one of my newest clients(deal went smooth). I recommend recording all deals for now as I do.

Azzayo is legit, he went 1st to me on 75m, no questions ask, used same duel arena method, I can prove that's his trade method, due to the fact I have the video from our deal.

Record all deals! Best quality proof is letting the reviewers watch with their own eyes.

Young has tried to scam to other RSGP clients of mine, but I've now warned all my buyer/sellers(who deal with me on Skype).

Thats just my little person spin on things, have much more, but not going into it, Azzayo is legit.

Really? He hasn't tried denying it, he deleted his posts on my thread and yet to acknowledge any dispute.

Surely its enough :/

Consider editing your thread title to include his UID, so that if he tried to scam again hopefully the user will do a search on him and find this.

TO be honest mate, 82 rep is no where near enough to trust someone with \$100 on this site... I have been scammed by ub3rs with 300+ rep for \$15...

You can only really trust someone with 500+ rep and very few negs for that amount

Tyler the Creator???????? - October 25, 2014, 11:44 am

Looks legit to me, hopefully this gets resolved OP.
