Thread: [Omnicoins Block Explorer | Search Address's Balance, Hash, Block# and Transaction](#)

VRUMM - April 9, 2014, 5:15 am

<http://omnicoinexplorer.com>

If you have an incorrect balance shown on omnicoinexplorer, make sure your wallet is in sync. Also note that this is not the official one created by devs.

We support both the JSON and Simple Query API

Depends on how this goes, I will switch to an OVH if needed since we got ddosed for no apparent reason lol.

Will get new design as well.

Viralboost.io - April 9, 2014, 5:17 am

Hey thanks for making a block explorer!

Dean Winchester? - April 9, 2014, 5:19 am

This seems good, thanks for making this Sh1eld :)
Bookmarked it.

Cryptography - April 9, 2014, 5:21 am

Haha, just sent 50 OMC to Omni's address. Let's see if it pops out in a while :)

Doctor Blue - April 9, 2014, 5:24 am

Baww you beat me to it...
Although I was going to do it somewhat differently.

VRUMM - April 9, 2014, 5:24 am

(Apr 9, 2014 05:21 AM)Cryptography Wrote: [\[CITE\]](#) Haha, just sent 50 OMC to Omni's address. Let's see if it pops out in a while :)
cfbe7f5fed... 2366 50 244.95574343 OMC
it showed up

EziNet - April 9, 2014, 5:24 am

Good work Sh1eld, glad someone developed this.

VRUMM - April 9, 2014, 5:25 am

(Apr 9, 2014 05:24 AM)Doctor Blue Wrote: [\[CITE\]](#) Baww you beat me to it...
Although I was going to do it somewhat differently.How differently? Xen0n didn't want to make it, so I wanted to.

Cryptography - April 9, 2014, 5:26 am

it showed up
And it did, nice work man :). You planning to work on the design?

Viralboost.io - April 9, 2014, 5:26 am

Could you also make a top 200 rich list?

VRUMM - April 9, 2014, 5:26 am

(Apr 9, 2014 05:26 AM)Cryptography Wrote: [\[CITE\]](#) And it did, nice work man :). You planning to work on the design?

It is in python, so I was told it is tricky, but yes definitely.

Perfectionist - April 9, 2014, 5:27 am

Oh so this is how you made that Wizardry thread.. anyway, nice job :D

Just noticed additional +30 OMC in my wallet when I searched my address .. guess I have to sync my wallet for it to show up

Doctor Blue - April 9, 2014, 5:27 am

(Apr 9, 2014 05:25 AM)Sh1eld Wrote: [\[CITE\]](#) How differently? XenOn didn't want to make it, so I wanted to.

Was planning to have ABE running locally and then do a website querying the API instead.

Looks a bit stupid with URL's like chain.omnicoin.pw/chain/omnicoin. Just some random playing around and prettification and then to avoid using python as a web server (It really sucks at that).

SIM-1166170 - April 9, 2014, 5:28 am

Good job she1ld. Looks pretty good I like!

Ive been waiting on a block explorer :black hat:

VRUMM - April 9, 2014, 5:30 am

(Apr 9, 2014 05:27 AM)Doctor Blue Wrote: [\[CITE\]](#) Was planning to have ABE running locally and then do a website querying the API instead.

scammedperson - April 9, 2014, 11:27 am

hey sad the siganture doesnt accept html other wise i could try to make a OMC check your wallet balance sig

Doctor Blue - April 9, 2014, 11:49 am

(Apr 9, 2014 11:27 AM)*DarkHacker* Wrote: [\[CITE\]](#) hey sad the siganture doesnt accept html other wise i could try to make a OMC check your wallet balance sig
You can do a PHP script which will generate an image with the amount in it. I believe dynamic images work on HF.

scammedperson - April 9, 2014, 11:50 am

(Apr 9, 2014 11:49 AM)Doctor Blue Wrote: [\[CITE\]](#) You can do a PHP script which will generate an

how
does the signature accepts PHP?

xhflhkeuhwguu34 - April 9, 2014, 12:06 pm

(Apr 9, 2014 11:49 AM)Doctor Blue Wrote: [\[CITE\]](#) You can do a PHP script which will generate an image with the amount in it. I believe dynamic images work on HF.
You'll get that removed as per the help documents.

Omniscient - April 9, 2014, 12:36 pm

Excellent. Is that free script you're running? Like a python api from github?

Doctor Blue - April 9, 2014, 12:38 pm

(Apr 9, 2014 12:36 PM)Omniscient Wrote: [\[CITE\]](#) Excellent. Is that free script you're running? Like a python api from github?

It's a python script which will fork into the background and run a webserver providing an API and a very basic blockchain explorer. It reads the blockchain from a local copy of the wallet.

I'm assuming it's this one or at least a fork of it.

<https://github.com/bitcoin-abe/bitcoin-abe>

xhflhkeuhwguu34 - April 9, 2014, 12:39 pm

(Apr 9, 2014 12:38 PM)Doctor Blue Wrote: [\[CITE\]](#) It's a python script which will fork into the background and run a webserver providing an API and a very basic blockchain explorer. It reads the blockchain from a local copy of the wallet.

(Apr 9, 2014 12:06 PM)Xen0n Wrote: [\[CITE\]](#) You'll get that removed as per the help documents.

Didn't intend on doing it so I never really checked up on the signature rules. Well, it makes sense. It could be an IP logger.

cyberducky - April 9, 2014, 12:42 pm

Really good job Sh1eld. Comes in handy :D

iNuke - April 9, 2014, 12:44 pm

Thank you very much for this Sh1eld, well done. Tried it with my own address, worked. Good job! ?

Omniscient - April 9, 2014, 12:47 pm

(Apr 9, 2014 12:38 PM)Doctor Blue Wrote: [\[CITE\]](#) It's a python script which will fork into the background and run a webserver providing an API and a very basic blockchain explorer. It reads the blockchain from a local copy of the wallet.

I wonder what his incentive was to develop a web interface in Python.

Seriously... Did anyone ever expect that to be better than Node.js/PHP/ASP.NET or whatever?

Python is good for one-time scripts, exploits, cheating and automation. When you start using it to provide services you start getting a hell of a lot of issues.

Things like bitcoin-abe, stratum-mining and stratum-proxy ought to be developed in C or C++ so they could work efficiently and be integrated with the system.

None of them even tries to adhere to the Linux Standard Base which generally would make everything a thousand times easier.

Just to test, lolTrying to find answer and it happens to other known block explorers as well

Quote:It's correct, please remember you have "change addresses", this means even if you have 1 address in your wallet, your balance could still be in a change address that you can't see. Try this

Quote:If you want to make yourself more relieved... (did I just really say that?)

You can send all the coins you have back to your original address. Your balance won't change, but you will see all the other "change" address send their coins back. Then the block explorer and your balance will "sync up."

SIM-1166170 - April 9, 2014, 5:11 pm
