Thread: [Which dedicated Server host to use to host game servers](#)

killerxknight - April 10, 2014, 4:04 am

Which dedicated Server host to use to host game servers for games like MW2,Minecraft Etc?

Webmasters - April 10, 2014, 11:58 am

Your best bet is to use Google for that, because a lot of companies specialize in just game server hosting; they will be your best bet 9/10 times.

PS. Not trying to be a dick.

lots of peoples recommend ovh to hosts there servers... poor peoples uses kimsufi offers .. but i recommend SYS servers .. more professional servers with better support !.Also companys like (<https://www.vilayer.com/>) use ovh too ! so .. i think is good company for gameservers !.

CashMoneyMedia - April 12, 2014, 4:07 pm

You have the money i recommend you host on rackspace.

If you might get DDOS'd, its best to go with OVH for protection, otherwise, a quick google search will bring up what you need

Mr.MK - April 13, 2014, 5:00 am

<http://my.ddos-sentry.org/cart.php>

They offer DDoS Protected VPS in OVH, Canada starting at \$10/m. My friend runs a SA:MP GameServer on there. I use it also. to host some Website.

tmnovo92 - April 13, 2014, 9:01 am

you have in portugal route-games.pt or dotplay.com, good choise is dotplay.com, have servers in almost all countrys!

BITW - April 15, 2014, 4:39 am

Go for OVH

anyway I hosted Gameservers from leaseweb NL servers too and never faced such problems like ddos/complain attacks etc

if you are looking dedicated servers for hosting gameservers etc please join me as I Can provide you cheap price good servers from Leaseweb + other locations

skype - xeonsupports
thank you
