Vouch ! Never thought that this could work ! First working ebook i ever bought on hackforums !

Kuxley - April 10, 2014, 12:45 pm

Very nice e-book, works great and would recommend anybody to purchase it.

It's so simple, if you have used your credit card online before and have knowledge of how to use a credit card online then you can do this.

A 4 year old kid could do it.

My vouch copy review of this eBook. Before we start, you must have a mastercard.

Originality.

10/10- I couldn't find this method on the internet, and I have never seen this method anywhere else.

Ease of use.

9/10 - This eBook is very easy to do. It is just a simple glitch in the WoW system for accepting credit cards. Takes 1 minute to get unlimited gametime. However does require for you to have a master card. Which not all people have. Nothing is charged to the master card however.

Grammar

10/10 - I noticed no major mistakes at all.

Quality

9.5/10 - This is very well written. Only one page long, quality pictures for visual as well. Step by step, with short each step is just a click.

Overall

9.6/10

This eBook will work for as long as I can imagine. I don't see this being patched for a very long time. Took me two minutes to do. Does not include SE'ing or anything. Just a simple glitch. Everything advertised rings true.

I highly recommend this e-book to anyone with a mastercard and who wants gametime codes.

Money Maker Mike - April 10, 2014, 1:10 pm

Thanks for the vouches guys! online if anyone needs support! remember it's autobuy via paypal!

You just use a casual mastercard and add a little trick in order to get the free gametime :)

Obli - April 11, 2014, 11:27 am

Is it that german debit card method? If so, it will get you banned.

This method does not work for me, I do not know why and the seller has not responded to my PM for over 20 hours, to be fair he did reply once but did not respond after his "fix" did not work.

I am not trashing the e-book as I am sure it works fine for other people but it does not work for me! The seller of this ebook just simply hasn't replied to my request for a refund (which I paid extra money for!!!)

P.S: Mike, please to respond to my PM I will happily vouch for your service after.

SIM-83552 - April 29, 2014, 6:14 pm

This method doesn't work for me.

Both Zertt and Money Maker Mike promised me a refund (As I paid for #2 Package). It being over a week or so since the transaction I have heard nothing back from them.

I can't even get a message out of them.

Be careful with this, If you want a refund when it doesn't work for you. DON'T expect one.
