Thread: [Why is Croatia \(HR\) blocked from accessing HF](#)

ProHackerN00binator - April 11, 2014, 9:15 pm

Hello,

I tried to find the reason on HF,Google but failed.

Can someone tell me why my Friends and family from Croatia cannot access this great HF ?

Thank you all! :)

I'm really sad 'cuz my mother country is blocked.

When I finish my work and return to CRO I will not be able to access HF, not even with VPN :/

Quote:I heard HF blocks entire countries. Is that true?

Yes this is true. Hackforums.net has many countries blocked. The list is extensive. Please note that country blocks are not a slur on the people of that country. These blocks represent problems with IPs originating from these countries. Many are part of botnets, rogue datacenters, and high crime locations. Country blocks are one effective way to eliminate "bad traffic". So don't take it personal. Do not ask for countries to be removed. The block list is currently not published.

Croatia is so retarded county, full of retarded & not educated people so there is no way for "Bad traffic" .

High Crime location in Cro. - hahahahaha nice joke.

I think its maybe 'cuz of EU. , I cannot belive in anything else.

I see that Germany is also blocked...

Viral Dragon - April 12, 2014, 8:36 am

OP:

Cro along with many other countries are blocked mostly due to the fact that sometimes when people launch a DDoS attack that's where a lot of the IP's originate. Sorry. Try finding a proxy or VPN you can use. ._.

Sometimes when you have mold on a piece of bread you're better off just tossing the whole loaf.
