Thread: [Sushi Cartoon Vector](#)

**Jollibee** - April 12, 2014, 9:15 am

Walking Sushi LOL.

**Congruent** - April 12, 2014, 9:16 am

Holy shit, you're pretty good at making these graphics.

Maybe change the mouth a bit?

Scary asf xD

**Clave** - April 12, 2014, 9:16 am

No offense but this doesn't seem vector.

Reasons:

I can see pixels

It's a vector , i just uploaded it to facebook then here, that's why it reduces the quality dramatically, ;) and im on my other laptop so i just used the one i posted on fb. hahaha :)

well you are looking at a screen, which consist of pixels

OP,

I suggest you use the align the shapes properly so that they merge precisely. like this part:

the outer glows or gradients within the eyes could be removed. they don't belong with the rest of the cartoon. I mean if you're going to incorporate gradients, have it on everything.

Next step for you might be improve the detailing of this piece, like the insides. Clean up the paths; no sloppy pen tool work.

Wow great eyes there! :)

Yeah just started vectoring just now so i dont put much detail on it because i dont know how rofl :))

You have a sharp vision to see that!  
thanks!
